Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Manhole, Gravity Interceptor, and Easement Road Improvements Phase 2 Project

Lead Agency: Delta Diablo

Contact Name: Thanh Vo

Email: thanhv@deltadiablo.org Phone Number: (925) 756-1949

Project Location: Unincorporated communities of Bay Point and Shore Acre, City of Pittsburg, Contra Costa County
City *County*

Project Description (Proposed actions, location, and/or consequences).

Delta Diablo (the District) is implementing the proposed Project to address critical infrastructure improvements in their wastewater collection system. The Project includes rehabilitating or replacing approximately 53 manholes, rehabilitating approximately 8,882 linear feet of sewer pipes, constructing a permanent underground bypass system, and improving access roads to five of the District's manholes.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The IS/MND identified potentially significant impacts related to air quality (fugitive dust, odor), biological resources (special-status plants, nesting birds, burrowing owls, salt marsh harvest mouse, California Ridgway's rail and California black rail, California red-legged frog, water quality, aquatic habitats), cultural and tribal cultural resources (archaeological resources and human remains), geology and soils (erosion, paleontological resources), hazards and hazardous materials(transport, use, or disposal of hazardous materials; upset and accident conditions involving the release of hazardous materials; hazardous materials within one-quarter mile of an existing school; located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5), hydrology and water quality (water quality standards, erosion, release of pollution as a result of being located within a flood zone), land use and planning (conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect), and utilities and service systems (relocation or construction of new or expanded wastewater facilities), and mandatory findings of significance.

Mitigation measures in the IS/MND include fugitive dust control measures (AIR-1), an odor complaint procedure (AIR-2), a worker environmental awareness training (BIO-1), preconstruction surveys and protection measures for special-status plants (BIO-2), preconstruction surveys and protection measures for nesting birds and burrowing owls (BIO-3, BIO-4), protection measures for special-status wildlife species (BIO-5, BIO-6, BIO-7), water quality protection measures (BIO-8), protection measures for aquatic habitats (BIO-9), procedures to follow in the event of accidental discovery of archaeological resources or human remains (CUL-1, CUL-2), protection measures for paleontological resources (GEO-1), preparation and implementation of a Phase II Environmental Site Assessment and Soil Management Plan (HAZ-1, HAZ-2), implementation of construction stormwater best management practices (HYD-1), and preparation of a Spill Prevention and Response Plan (HYD-2).

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No areas of controversy are known to the Lead Agency.

Provide a list of the responsible or trustee agencies for the project.
