Caltrans proposes to remove pavement in need of repair and replacing it with HMA-Type A. The project site is in In San Diego County at various locations along SR 94 near Dulzura and Barrett Junction from 1.2 miles east of Grande Creek Bridge to 0.6 mile west of Route 188. The main scope of work is to dig out (cold plane no more than 2") and place HMA-Type A on multiple locations where pavement repair is needed on Route 94 within the work segment (Post Miles: 30.3 to 38.3) to preserve the life of the existing pavement. The work also includes restriping and few pavement markings on the areas that include pavement work. All work would occur on the traveled way. Environmental commitments for biological resources, visual resources, hazardous waste/materials, and NPDES/Stormwater are included in the Environmental Commitments Record (ECR).
