NOTICE OF EXEMPTION

TO: Clerk of the Board
County of Santa Barbara
105 East Anapamu Street - Room 407
Santa Barbara, CA 93101

FROM: Santa Barbara County
Air Pollution Control District
260 N. San Antonio Road, Suite A
Santa Barbara, CA 93110

Project I.D.: Authority to Construct (ATC) No. 16522
Project Title: Las Flores Pump Station Corrosion Inhibitor Totes
Project Applicant: Sable Offshore Corp.
Project Location: 12000 Calle Real, Goleta

Project Description: This permit authorizes the installation and operation of two, 793-gallon corrosion inhibitor totes, a 0.5 horsepower corrosion inhibitor pump, and associated fugitive components at the Las Flores Pump Station.

Exempt Status: (Check One)

CEQA Section(s):

- ☐ Ministerial (Section 21080 (b)(1); 15268)
- ☐ Declared Emergency (Section 21080(b)(3); 15269(a))
- ☐ Emergency Project (Section 21080(b)(4); 15269(b)(c))
- ☐ Categorical Exemption (Cite section: _____)
- ☐ Statutory Exemption (Cite section: _____)

Other Basis for Exemption:

- ☐ General "Common Sense" Exemption under CEQA Guidelines Section 15061(b)(3)
- ☒ District CEQA Guidelines, Appendix A ("District List of Exempt Projects")

RECEIVED
2026 JUL 17 P 12:28
COUNTY OF SANTA BARBARA
CLERK OF THE
BOARD OF SUPERVISORS

Reasons Why Project is Exempt:

This project is exempt from the requirements of CEQA pursuant to the *Environmental Review Guidelines for the Santa Barbara County APCD* (revised April 30, 2015). Appendix A.1.(a) (*APCD Projects Exempt from CEQA and Equipment or Operations Exempt from CEQA*) provides an exemption specifically for projects at new or existing sources or facilities with a potential to emit less than the Best Available Control Technology (BACT) thresholds specified in APCD Regulation VIII. Additionally, Appendix A.1.(f) (*APCD Projects Exempt from CEQA and Equipment or Operations Exempt from CEQA*) provides an exemption specifically for projects undertaken exclusively for the repair, maintenance or minor modification of existing sources involving negligible or no expansion of use beyond that previously existing. The project results in 0.13 lb/day (0.03 tons/yr) of ROC emissions, well below the District's 25 lb/day BACT threshold. The proposed corrosion inhibitor totes are consistent with normal operational maintenance practices and pipeline integrity maintenance. The project did not require an AQIA or trigger offsets at the source for the first time. The two, 793-gallon steel totes will be located within the existing developed area at the pump station amongst existing industrial infrastructure. The prefabricated totes require no foundation work. Section 15300.2 of the State CEQA Guidelines lists exceptions that would prohibit a project from qualifying for a categorical exemption. The District considered the applicability of the listed exceptions and concludes that none of the exceptions apply. Further information and supporting documentation can be found in the District's administrative permit files.
