DIST-CO-RTE: 11-SD-8 **PM:** 6.25/12.06

Project Description

Caltrans proposes to repair six (6) culverts via CIPP (Cured-in-Place-Pipe Liner) In San Diego County on Interstate 8 at various locations from 0.1 miles east of the Fairmount Avenue undercrossing to 0.3 miles west of the Severin Drive overcrossing. This project will not require temporary construction easements, permits to enter, or permanent acquisitions. This project will include shoulder, lane, and/or ramp closures to allow sufficient space for the Contractor to access the culvert end treatment (aka drainage inlet, etc.). No detours are required for this project. CIPP liner involves inserting a flexible liner into the upstream culvert end treatment, which is then pulled through to the downstream culvert end treatment. The liner is then inflated and cured to harden the liner. Work adjacent to the culvert end treatments will be limited to workers on foot with hand tools only. Equipment will be parked on the paved area and is limited to a vactor truck to clean the culverts, CCTV/Cure truck for video and curing of culvert, and service truck for unrolling liner. No ground disturbance is anticipated and no grading will be performed. No construction equipment is utilized on CIPP projects. Environmental commitments for biological resources, visual resources, hazardous waste/materials, and NPDES/Stormwater are included in the Environmental Commitments record (ECR).
