CITY OF HANFORD

COMMUNITY DEVELOPMENT DEPARTMENT

GABRIELLE MYERS

317 N. DOUTY STREET

HANFORD, CA 93230

Dear: Ms. Myers

INITIAL STUDY AND MITIGATED NEGATIVE DECLARATION FOR THE BONADELLE LACEY AVENUE RESIDENTIAL PROJECT, SCH# 2026071023

The Department of Conservation's (Department) Division of Land Resource Protection (Division) has reviewed the Initial Study and Mitigated Negative Declaration for the Bonadelle Lacey Avenue Residential Project (Project).

The Division monitors and maps farmland conversion on a statewide basis, provides technical assistance regarding the Williamson Act, and administers various agricultural land conservation programs. Public Resources Code, section 614, subdivision (b) authorizes the Department to provide soil conservation advisory services to local governments, including review of CEQA documents.

Protection of the state's agricultural land resources is part of the Department's mission and central to many of its programs. The CEQA process gives the Department an opportunity to acknowledge the value of the resource, identify areas of Department interest, and offer information on how to assess potential impacts or mitigation opportunities.

The Department respects local decision-making by informing the CEQA process and is not taking a position or providing legal or policy interpretation.

We offer the following comments for consideration with respect to the project's potential impacts on agricultural land and resources within the Department's purview.

PROJECT ATTRIBUTES

The proposed Project includes an annexation, rezoning, and residential development on a 16.65-acre site immediately west of the City of Hanford. The proposed Project site is within the City's Sphere of Influence and annexation is proposed for the entire 16.65-acre Project site, and includes Assessor Parcel Numbers (APN) 011-010-003, -004, -005, -

006, -007, -008 and -009. APNs 011-010-007, -008 and -009 total 2.77 acres in size and are currently developed with rural residences.

A Tentative Subdivision Map is proposed for the remaining 13.88 acres, which would divide the site into 78 single family residential lots, ranging in size from 4,172 to 10,367 square feet square feet. Access roads, lighting, landscaping and other associated improvements will be constructed, per City Standards within the proposed Project site and along the future Aquifer Drive alignment along the eastern site boundary.

Construction will include the connection to City water, storm drain and sewer within the development, along with other utilities such as electric and communication lines. The Project site contains Prime Farmland as designated by DOC's Farmland Mapping and Monitoring Program.

PROJECT CONSIDERATIONS

The conversion of agricultural land represents a permanent reduction and impact to California's agricultural land resources. The Department generally advises discussion of the following in any environmental review for the loss or conversion of agricultural land:

- Type, amount, and location of farmland conversion resulting directly and indirectly from implementation of the proposed project.
- Impacts on any current and future agricultural operations in the vicinity; e.g., land-use conflicts, increases in land values and taxes, loss of agricultural support infrastructure such as processing facilities, etc.
- Incremental impacts leading to cumulative impacts on agricultural land. This would include impacts from the proposed project, as well as impacts from past, current, and likely future projects.
- Implementation of any City or County Agricultural Mitigation Plans, Programs, or Policies.
- Proposed mitigation measures for impacted agricultural lands within the proposed project area.

MITIGATING AGRICULTURAL LAND LOSS OR CONVERSION

Consistent with CEQA Guidelines, the Department advises that the environmental review address mitigation for the loss or conversion of agricultural land. An agricultural conservation easement is one potential method for mitigating loss or conversion of agricultural land. (See Cal. Code Regs., tit. 14, § 15370 [mitigation includes "compensating for the impact by replacing or providing substitute resources or environments, including through permanent protection of such resources in the form of conservation easements."]; see also *King and Gardiner Farms, LLC v. County of Kern* (2020) 45 Cal.App.5th 814.)

Mitigation through agricultural conservation easements can take at least two forms: the outright purchase of easements or the donation of mitigation fees to a local, regional,

or statewide organization or agency whose purpose includes the acquisition and stewardship of agricultural easements. The conversion of agricultural land may be viewed as an impact of at least regional significance. Hence, the search for replacement lands may not need to be limited strictly to lands within the project's surrounding area. A helpful source for regional and statewide agricultural mitigation banks is the California Council of Land Trusts. They provide helpful insight into farmland mitigation policies and implementation strategies, including a guidebook with model policies and a model local ordinance. The guidebook can be found at:

[California Council of Land Trusts](#)

Of course, the use of conservation easements is only one form of mitigation, and the Department urges consideration of any other feasible measures necessary to mitigate project impacts.

Thank you for giving us the opportunity to comment on the Initial Study and Mitigated Negative Declaration for the Bonadelle Lacey Avenue Residential Project. Please provide the Department with notices of any future hearing dates as well as any staff reports pertaining to this project. If you have any questions regarding our comments, please contact Farl Grundy, Associate Environmental Planner via email at Farl.Grundy@conservation.ca.gov.

Sincerely,

Monique Wilber
