Project Title: 818892_Lodi Gas_UIC_UGS

Project Applicant: Lodi Gas Storage, L.L.C. (L2330)

Project Location: San Joaquin County, Lodi Gas Oil Field; Section 09, Township 04N, Range 07E, Base MD; 38.20868683, -121.21230316; 1245.0 ft W and 1690.0 ft N of the SE corner section 09-04N-07E MD

Project Description: The Operator proposes to plug & abandon the lower zone, then perforate and complete the upper zone within a wellbore in the Lodi Underground Natural Gas Storage Project. Proposed work will be performed using a service rig and ancillary services. Work will involve hydrostatically controlling the well, removing the wellhead, and pulling the existing tubing. The lower Midland zone will be plugged with cement. The upper Domengine zone will be perforated, and a sand control liner will be installed. A new tubing and packer assembly will be installed to ensure the well is compliant with CCR1726.5. The wellhead will be re-installed, and a series of pressure tests will be performed. The project duration will be approximately 25 days total.

The proposed project consists of the California Department of Conservation, Geologic Energy Management Division (CalGEM) approving 1 permit for Lodi Gas Storage, L.L.C. (L2330) to rework the well listed below, in the Lodi Gas Oil Field in San Joaquin County.

API #	Well Name
0407720733	Loma M-4B

Exempt Status: As the Lead Agency, CalGEM has determined that the proposed project is exempt from full environmental review requirements of the California Environmental Quality Act (CEQA), pursuant to the specified exemptions marked in the section below. CalGEM further finds that the proposed project would not result in a significant adverse impact to the environment, or that any of the exceptions to the application of the exemptions apply (14 CCR § 15300.2).

Exemption Type		Statute (PRC)	Regulation (14 CCR)	
☐	Statutory Exemption:			
☐	Ongoing Project (<i>pre-CEQA approval on April 5, 1973</i>)	21169	15261 (b)	
☐	Ministerial	21080 (b)(1)	15268	
☐	Declared Emergency	21080 (b)(3)	15269 (a)	
☐	Emergency Projects	21080 (b)(4)	15269 (b) or (c)	
☐	Categorical Exemption:	21084		
☒	Class 1: Existing Facilities		15301	1684.1
☒	Class 2: Replacement or Reconstruction		15302	
☐	Class 3: New Construction/Conversion of Small Structures		15303	
☒	Class 4: Minor Alterations to Land		15304	1684.2
☐	Class 6: Information Collection		15306	
☐	Class 7: Protection of Natural Resources		15307	
☐	Class 8: Protection of the Environment		15308	
☐	Class 11: Accessory Structures		15311	
☐	Class 21: Enforcement Actions to revoke a permit		15321	
☐	Class 30: Minor Actions to Prevent, Minimize, Stabilize, Mitigate, or Eliminate a Release (Actual or Threat) of Hazardous Substances (Waste or Material)		15330	
☐	Class 33: Small Habitat Restoration Projects		15333	
☐	General Exemption ("common sense")		15061 (b)(3)	
☐	Not a "Project" subject to CEQA		15378 (b)(2)	
CEQA Exceptions to the Exemptions (14 CCR § 15300.2): where project is located (e.g., sensitive environment); Cumulative Impact; Significant Effect due to Unusual Circumstances; Scenic Highways; Hazardous Waste Sites; Historical Resources.				

Reasons Why Project is Exempt: The basis for CalGEM's determination that the project is exempt from the requirements of CEQA is provided in the brief explanation below.

Class 1, Existing Facilities (14 CCR §§ 15301, 1684.1): The project is categorically exempt from CEQA under the "Class 1" (14 CCR § 15301) exemption per the CEQA Guidelines because the proposed project is a repair or minor alteration of existing facilities and will not involve an expansion of use of the gas field, and therefore is exempt from the need for full CEQA review. Additionally, in accordance with 14 CCR § 1684.1 the Class 1 exemption consists of operation repair, maintenance, minor alternation of existing

public or private structures, facilities, mechanical equipment, or topographical features involving negligible or no expansion of use beyond that existing previously. The well is situated on an existing site within the Lodi Underground Gas Storage Project. The well pad is on private property accessible by private road.

Class 2, Replacement or Reconstruction (14 CCR § 15302): Class 2 applies because it consists of "replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced[. The well is situated on an existing pad within the Lodi Underground Gas Storage Project. Work will be performed on an existing gas storage well and no expansion of facilities or capacities will be needed.

Class 4, Minor Alterations to Land (14 CCR §§ 15304, 1684.2): Class 4 exemption applies. The proposed project would be conducted entirely on an existing pad with enough space to contain all equipment. The project would not disturb any undisturbed areas. The proposed project is located within an industrial area. Therefore, the proposed project "consists of drilling operations that result in only minor alterations with negligible or no permanent effects to the existing condition of the land, water, air, and/or vegetation." The rework/sidetrack would not expand the facility. The well is situated on an existing pad within the Lodi Underground Gas Storage Project. The well is already equipped for production; there will be no additional surface equipment required.

Exceptions to Exemptions: CalGEM further finds that there are no exceptions to the application of the categorical exemptions (PRC § 21084; 14 CCR § 15300.2) referenced above. For example, there is no substantial evidence that there are any "unusual circumstances" associated with the proposed project that create a reasonable possibility that the activity will have a significant effect on the environment, and that there are no significant "cumulative impacts" resulting from successive projects of the same type in the same place. Therefore, reliance on the exemptions is appropriate.

A copy of this NOE (as required by 14 CCR § 15062(a)) and all other related materials can be made available to the public by contacting the CalGEM CEQA Program, located at 715 P Street, MS 1803, Sacramento, CA 95814; by calling (916) 445-9686; or an electronic copy of these documents may be requested by contacting CEQA@conservation.ca.gov.
