Project Title: New Well #8 and Pipeline Replacement Project

Lead Agency: Frazier Park Public Utilities District

Contact Name: Jonnie Allison

Email: jallison@frazierparkpudca.gov. Phone Number: 661-331-2995

Project Location: Unincorporated Community of Frazier Park Kern County

City *County*

The Frazier Park Public Utilities District (FPPUD or District) is proposing to implement two water infrastructure Projects in the near future for which the District is seeking funding from the State Water Resources Control Board's Division of Drinking Water (DDW). The first Project is a new potable water well, proposed District Well #8. The second Project is the replacement of approximately 18,300 feet of District potable water distribution pipelines in three of the District's service areas, Summit Area, Lower Summit Area, and Texas Trail.

Mitigation is required to minimize impacts under Aesthetics (lighting plan); biological resources (Crotch's Bumble Bee, Nesting Birds, Coast horned lizard); Cultural (to address accidentally exposed subsurface resources); Geology (to address BMPs for erosion control, and to address accidental discovery of paleo resources); Hazards (to address accidental spills and routine use of hazardous materials, and fire suppression); Hydrology (to address well drilling, discharge, and water quality); and, Utilities (recycling of construction debris)

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None known

Provide a list of the responsible or trustee agencies for the project.

The amount of area to be disturbed by the whole Project will be greater than one acre; therefore, the FPPUD will be required to file a Notice of Intent (NOI) for a General Construction permit to comply with the National Pollutant Discharge Elimination System (NPDES) requirements. The NOI is filed with the State Water Resources Control Board and enforced by the Regional Water Quality Control Board. A Stormwater Pollution Prevention Plan (SWPPP) must be implemented in conjunction with construction activities.

As noted above, the FPPUD will be required to obtain permits from the following:

- a. Well Drilling Permit: County of Kern
- b. Drinking Water Permit Amendment: State Water Resources Control Board Division of Drinking Water to connect the new, finished wells to the potable water distribution system.
- c. Regulatory permits: U. S. Fish and Wildlife Service and the California Department of Fish and Wildlife
