TO: X Clerk of the Board of Supervisors
San Bernardino County
385 N. Arrowhead Avenue, 2nd Floor
San Bernardino, CA 92415-0130

FROM: City of Loma Linda
Community Development Dept
25541 Barton Road
Loma Linda, CA 92354

1. Project Title: Sewer Line Installation at Anderson Street
2. Project Applicant: T. Jarb Thaipejr, City Manager of City of Loma Linda
3. Project Location - Specific: On Anderson Street, between Redlands Boulevard and the I-10 Freeway on ramp.
4. Project Location - City: Loma Linda
5. Project Location - County: San Bernardino
6. Description of nature, purpose, and beneficiaries of project: The project consists of upgrading an existing 8-inch sewer main to a 12-inch SDR 35 PVC sewer main along Anderson Street between Redlands Boulevard and the Interstate 10 (I-10) freeway on-ramp. The upgraded 12-inch sewer main will connect to the existing 12-inch sewer main on Redlands Boulevard and to the existing 12-inch sewer main adjacent to the I-10 freeway. The project also includes the installation of a new cleanout for an existing 8-inch sewer lateral that serves an existing commercial development located east of the project site. The cleanout will be installed adjacent to the proposed 12-inch sewer main to provide maintenance access to the existing lateral.
7. Name of Public Agency approving project: City of Loma Linda
8. Name of Person or Agency carrying out project: T. Jarb Thaipejr, City Manager of City of Loma Linda
9. Exempt status: (Check One)
 - ☐ Ministerial project
 - ☐ Not a project
 - ☐ Emergency project
 - ☒ Categorical Exemption: Section 15301; Section 15302
 - ☐ Declared Emergency
 - ☐ Statutory exemption. State Code Section Number:
 - ☐ Other:
10. Reason why the project was exempt. Per Section 15301, the project can be considered exempt because it involves a minor alteration of existing public structures and topographical features. It is a negligible expansion and upgrade of existing sewer line pipes. Section 15302 applies because a majority of the project site is already disturbed with other utility lines. This reconstruction of existing utility systems involves negligible expansion of capacity. The project consists of replacing an existing 8-inch sewer main with a 12-inch sewer main within the existing public right-of-way to improve the reliability and performance of the existing sewer system.
