Present Land Use/Zoning/General Plan Designation:**Waterway****Project Description:** *(please use a separate page if necessary)*

The Tularcitos Creek Downstream North Hillview Drive Levee Repair Project is intended to address damage to the west bank levee caused by rodent burrowing and associated erosion and to protect property and public safety by reducing the risk of continued erosion. The project would repair approximately 2,932 LF of the existing levee, and the total area of temporary disturbance would be approximately 2.7 acres. The west bank levee would be reconstructed using SMP-2 Method 1A, which involves installation of a buried rock structure (rock buttress) to protect against erosion scour, stabilize the channel embankment, and provide a stable foundation for the repair, which is currently compromised by saturated soils.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.
