Project Title: Newlove 251 Rework (573977_PCEC_OG)

Project Applicant: Pacific Coast Energy Company LP

Project Location: Santa Barbara County, Orcutt Oil Field; S25/T09N /R34W/MD; 34.82732010/-120.40502930.

Project Description:

Pacific Coast Energy is applying for a permit to rework Newlove 251 and return the well back to production. This well is located on the Newlove lease within the Orcutt Hill Oil Field boundaries in Santa Barbara County and is currently an active producer. This proposed rework will add 86 feet of new perforations across the Diatomite formation. Newlove 251 is currently drilled into the Diatomite formation to a depth of 914 MD. There is no BFW/USDW in the immediate area of this location, however ephemeral water sands may exist to a depth of 126 MD. This project will consist of minor site preparation and remediation work both prior to and post rig mobilization. Temporary equipment will be needed to complete the project which includes a backhoe, workover rig, pumps, water trucks, cement trucks. In addition, vehicles to transport personnel, materials and to mobilize and demobilize equipment and waste will be utilized. No permanent facilities will be constructed. No expansion of associated facilities will be required. Any waste materials generated will be properly disposed of as non-hazardous or hazardous waste at a facility licensed to accept the waste. All work will take place within the Newlove 251 location and the roads leading to and from that location. PCEC is asking the State of California for a rework permit to add additional perforations across the Diatomite formation in Newlove 251. Once this work is completed the well will be returned to production.

The proposed project consists of the California Department of Conservation, Geologic Energy Management Division (CalGEM) approving 1 permit for Pacific Coast Energy Company LP to rework the well listed below, in the Orcutt Oil Field.

API #	Well Name
0408322700	Newlove 251

Exempt Status: As the Lead Agency, CalGEM has determined that the proposed project is exempt from full environmental review requirements of the California Environmental Quality Act (CEQA), pursuant to the specified exemptions marked in the section below. CalGEM further finds that the proposed project would not result in a significant adverse impact to the environment, or that any of the exceptions to the application of the exemptions apply (14 CCR § 15300.2).

Exemption Type		Statute (PRC)	Regulation (14 CCR)	
☐	**Statutory Exemption:**			
	☐ Ongoing Project (*pre-CEQA approval on April 5, 1973*)	21169	15261 (b)	
	☐ Ministerial	21080 (b)(1)	15268	
	☐ Declared Emergency	21080 (b)(3)	15269 (a)	
	☐ Emergency Projects	21080 (b)(4)	15269 (b) or (c)	
☑	**Categorical Exemption:**	21084		
	☑ **Class 1**: Existing Facilities		15301	1684.1
	☑ **Class 2**: Replacement or Reconstruction		15302	
	☐ **Class 3**: New Construction/Conversion of Small Structures		15303	
	☑ **Class 4:** Minor Alterations to Land		15304	1684.2
	☐ **Class 7**: Protection of Natural Resources		15307	
	☐ **Class 8**: Protection of the Environment		15308	
	☐ **Class 11:** Accessory Structures		15311	
	☐ **Class 21**: Enforcement Actions to revoke a permit		15321	
	☐ **Class 30**: Minor Actions to Prevent, Minimize, Stabilize, Mitigate, or Eliminate a Release (Actual or Threat) of Hazardous Substances (Waste or Material)		15330	
	☐ **Class 33**: Small Habitat Restoration Projects		15333	
☐	**General Exemption** ("common sense")		15061 (b)(3)	
☐	**Not a "Project" subject to CEQA**		15378 (b)(2)	
	CEQA Exceptions to the Exemptions (14 CCR § 15300.2)**:** where project is located (e.g., sensitive environment); Cumulative Impact; Significant Effect due to Unusual Circumstances; Scenic Highways; Hazardous Waste Sites; Historical Resources.			

Reasons Why Project is Exempt: The basis for CalGEM's determination that the project is exempt from the requirements of CEQA is provided in the brief explanation below.

Class 1, Existing Facilities (14 CCR §§ 15301, 1684.1): The project is categorically exempt from CEQA under the "Class 1" (14 CCR § 15301) exemption per the CEQA Guidelines because the proposed project is a repair or minor alteration of existing facilities and will not involve an expansion of use of the oil field, and therefore is exempt from the need for full CEQA review. Additionally, in accordance with 14 CCR § 1684.1 the Class 1 exemption consists of operation repair, maintenance, minor alternation of existing public or private structures, facilities, mechanical equipment, or topographical features involving negligible or no expansion of use beyond that existing previously. This Class includes but is not limited to conversion, and abandonment work on oil, gas, injection, and geothermal wells involving the alteration of well casing, such as perforating and casing repair, removal, or replacement; installation or removal of downhole production or injection equipment, cement plugs, bridge plugs, and packers set to isolate production or injection intervals.

Class 2, Replacement or Reconstruction (14 CCR § 15302): Class 2 applies because it consists of "replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced[.]" Examples of Class 2 include, but are not limited to, "Replacement or reconstruction of existing utility systems and/or facilities involving negligible or no expansion of capacity."

Class 4, Minor Alterations to Land (14 CCR §§ 15304, 1684.2): Class 4 exemption applies. The proposed project would be conducted entirely on an existing pad with enough space to contain all equipment. The project would not disturb any undisturbed areas. The proposed project is located within an industrial area. Therefore, the proposed project "consists of drilling operations that result in only minor alterations with negligible or no permanent effects to the existing condition of the land, water, air, and/or vegetation." The rework/sidetrack would not expand the facility.

Exceptions to Exemptions: CalGEM further finds that there are no exceptions to the application of the categorical exemptions (PRC § 21084; 14 CCR § 15300.2) referenced above. For example, there is no substantial evidence that there are any "unusual circumstances" associated with the proposed project that create a reasonable possibility that the activity will have a significant effect on the environment, and that there are no significant "cumulative impacts" resulting from successive projects of the same type in the same place. Therefore, reliance on the exemptions is appropriate.

A copy of this NOE (as required by 14 CCR § 15062(a)) and all other related materials can be made available to the public by contacting the CalGEM CEQA Program, located at 715 P Street, MS 1803, Sacramento, CA 95814; by calling (916) 445-9686; or an electronic copy of these documents may be requested by contacting CEQA@conservation.ca.gov.
