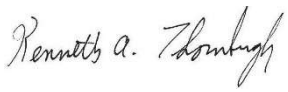
RE: Phase I Environmental Site Assessment
21151, 21171, 21221 South Western Avenue
Torrance, California 90501
Thornburgh Project No: 0130

Dear Mr. Fam:

Thornburgh Consulting, Inc. has completed a Phase I Environmental Site Assessment of the above referenced property. This assessment was performed in conformance with our contract agreement and the scope and limitations of ASTM Practice E 1527-21, which is the latest version of the E1527 standard published by the ASTM.



We appreciate the opportunity to provide environmental consulting services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact our office at 949-457-9677.

Sincerely,

Thornburgh Consulting, Inc.

Davis Tang
Divisional Manager

Ken Thornburgh
President

List of Acronyms/Abbreviations

Thornburgh may use the following abbreviations and acronyms for common terminology described in our report. Not all abbreviations or acronyms may be applicable to this report:

AOC	– Area of Concern
AST	– Aboveground Storage Tank
ASTM	– American Society for Testing Materials
BER	– Business Environmental Risk
CERCLA	– Comprehensive Environmental Response Compensation and Liability Act
CERCLIS	– Comprehensive Environmental Response Compensation and Liability Information System
CESQG	– Conditionally Exempt Small Quantity Generator
COC	– Chemicals of Concern
CORRACTS	– Corrective Action Sites
CREC	– Controlled Recognized Environmental Condition
DEC	– Department of Environmental Conservation
DEP	– Department of Environmental Protection
DHS	– Department of Health Services
DNPL	– Delisted National Priority List
DOB	– Department of Buildings
DOH	– Department of Health
DOT	– Department of Transportation
EPA	– Environmental Protection Agency
ERNS	– Emergency Response Notification System
FD	– Fire Department
FOI/FOIA/FOIL	– Freedom of Information / Freedom of Information Act / Freedom of Information Letter
HVAC	– Heating Ventilation & Air Conditioning
HREC	– Historical Recognized Environmental Condition
IAQ	– Indoor Air Quality
ISRA	– Industrial Site Recovery Act
LBP	– Lead-Based Paint
LCP	– Lead-Containing Paint
LQG	– Large Quantity Generator
LTANK	– Leaking Storage Tank
LUST	– Leaking Underground Storage Tank
SDS/MSDS	– Safety Data Sheet / Material Safety Data Sheet
NA	– Not Applicable
NFA	– No Further Action
NFRAP	– No Further Remedial Actions Planned
NPDES	– National Pollutant Discharge Elimination System
NPL	– National Priority List
OPRA	– Open Public Records Act
PAH	– Polycyclic Aromatic Hydrocarbon
PCE	– Perchloroethylene
RAO	– Response Action Outcome
RCRA	– Resource Conservation and Recovery Act
RCRIS	– Resource Conservation and Recovery Information System
REC	– Recognized Environmental Condition
SDG	– Significant Data Gap
SEMS	– Superfund Enterprise Management System
SRP	– Site Remediation Program
SQG	– Small Quantity Generator
SVOC	– Semi-Volatile Organic Compound
TCE	– Trichloroethylene
TSDF	– Treatment Storage and/or Disposal Facility
UST	– Underground Storage Tank
VEC	– Vapor Encroachment Condition
VOC	– Volatile Organic Compound

1.0 SUMMARY OF FINDINGS

1.1 Executive Summary

Thornburgh Consulting, Inc. (Thornburgh) performed a Phase I Environmental Site Assessment (ESA) of 21151, 21171, 21221 South Western Avenue, Torrance, California (the Subject Property) in accordance with our contracted scope of work and the ASTM Standard Practice E 1527-21 for Phase I Environmental Site Assessments and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312. This section contains a summary of findings, opinions and conclusions made by this assessment. However, this section, alone, does not constitute the complete assessment. The report must be read in its entirety.

Summary of Project Details

Primary Street Address:	21151, 21171, 21221 South Western Avenue				
City:	Torrance	County:	Los Angeles	State:	California
Tax ID/Parcel Number:	7355032010, 7355032011, 7355032012				
Property Owner:	Torrance Center South Complex, LLC				
Zoning Designation:	M1 (Light Industrial)				
Approx. Property Area:	7.76 acres				
Buildings:	Three, 3-story office buildings				
Approx. Building Size:	143,972 ft^2				
Approx. Year Built:	1987 & 1988				
Commercial Occupants:	Various commercial offices				
Current Use:	Offices				
Inspected By:	Mr. Stephen Krummlett				
Site Contact/Company:	Ms. Tatiana Torres / EPD				
Site Escort/Company:	Ms. Rui Gan / Torrance Center South Complex, LLC				
Inspection Date:	March 19, 2025				
Weather Conditions:	Fair, 70 ^oF

1.2 Findings, Opinions and Conclusions

Recognized Environmental Conditions & Significant Data Gaps

Thornburgh has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-21 of the Subject Property as described in Section 2.2 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 2 of this report. This assessment has revealed no recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs) or significant data gaps (SDGs) in connection with the Subject Property.

RECOGNIZED ENVIRONMENTAL CONDITIONS
No RECs were identified.
CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS
No CRECs were identified.
SIGNIFICANT DATA GAPS
No SDGs were identified.
RECOMMENDATIONS
Thornburgh recommends the following: HREC: A soil management plan should be developed and utilized during the planned redevelopment of the Subject Property in the event that odorous or discolored soils are encountered during site excavation.

Historical Recognized Environmental Conditions (HRECs)

This assessment has revealed the following *historical recognized environmental conditions* (HRECs) in connection with the Subject Property:

HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS
City of Torrance Redevelopment Agency / Torrance Tubing & Conduit (1739 West 213th Street) is listed on several regulatory databases. The SLIC case is associated with Torrance Center I, a large redevelopment project that the Subject Property was a part of. The SLIC case received regulatory closure on June 16, 1965; however, this date is most likely in error as the issue occurred in 1986. Based on documents reviewed on the GeoTracker online database; during the initial construction of the Torrance Center I site, an oily liquid substance seeped into the excavation site from the east along South Western Avenue. The seepage was immediately contained with three on-site water extraction wells and an impervious clay barrier was constructed across the contamination point of entry. Contaminated soil was excavated and stockpiled at another location pending development of a plan for management. Based on the containment, cleanup, and subsequent closure of the SLIC case, this is considered to be an HREC in connection with the Subject Property.

De Minimis and Other Environmental Conditions

The following *de minimis* and other environmental conditions were identified:

OTHER ENVIRONMENTAL CONDITIONS / DE MINIMIS CONDITIONS
The Subject Property was listed on several regulatory database associated with the generation of hazardous waste. However, no reported violations or significant unauthorized releases were reported. Based on the absence of reported violations or releases the regulatory listings are not considered to be a REC in connection with the Subject Property. Continentals One Hour located at 21171 South Western Avenue was identified on the EDR Hist Cleaners database as a drycleaning plant in 2013 and 2014. However, no reported violations or significant unauthorized releases were reported. Based on the absence of reported violations or releases and the short duration of operation, the Hist Cleaners listing is not considered to be a REC in connection with the Subject Property.
A former gas station (21138 South Western Avenue) was adjoining to the northeast and operated as a gas station from approximately 1952 to 2016. This former gas station is identified as a LUST case due to impacts to an aquifer used for drinking water. The LUST case has since received regulatory closure as of October 25, 2018. Thornburgh reviewed documents of this LUST case on the RWQCB GeoTracker online database, according to plume maps, previous contamination appears to be localized to this off-site location. Based on the regulatory closure and plume maps, this former gas station is not considered to be a REC in connection with the Subject Property.

Environmental Professional Statement

I/We declare that, to the best of my professional knowledge and belief, I/we meet the definition of *Environmental professional* as defined in § 312.10 of 40 C.F.R. 312. I/we have the specific

qualifications based on education, training and experience to assess a *property* of the nature, history and setting of the *subject property*. I/We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

Davis Tang
Environmental Professional

Stephen Krummlett
Environmental Professional

1.3 Business Environmental Risks / Non-ASTM Scope

Thornburgh has performed a limited review of the following potential *business environmental risks* (BER), also known as "*Non-ASTM Scope*" concerns, in accordance with the contracted scope of work scope for this assessment. Additional details of the scope of work and findings are included in Sections 2 and 7.

Subject	Findings	Not Appl.	Rpt. Ref.
Asbestos	Suspected ACM noted within the accessed building areas included acoustic ceiling panels, sheetrock wall systems, vinyl flooring and mastics, and carpet mastics.		7.1
Lead Paint		X	7.2
Radon	Property is located in the USEPA radon designation Zone 2 or 'moderate risk' area for radon.		7.3
Mold / Microbial Damage	Thornburgh did not observe evidence of significant problems with moisture intrusion or mold/microbial growth at the Subject Property.		7.4
NWI Wetlands	The review did not indicate regulated wetland areas on the Property.		7.5
Lead in Drinking Water	Potable water service at the Property is provided by a utility connection with the City of Torrance. A recently published water quality report from the utility indicated compliance with USEPA water quality standards for lead in drinking water. A copy of the report has been attached in Appendix F.		7.6

2.0 INTRODUCTION

2.1 Purpose and Scope

This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E 1527-21. The ASTM describes these methodologies as representing good commercial and customary practice for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. § 9601) and petroleum products. This practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability ("landowner liability protections," or "LLPs"): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses of the Subject Property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35) (B). The goal of the processes established by ASTM E 1527-21 is to identify *recognized environmental conditions* in connection with the Subject Property.

The term *recognized environmental condition* (REC) is defined by ASTM E 1527-21 as *"(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."*

The term *controlled recognized environmental condition* (CREC) is a type of recognized environmental condition and defined by ASTM E 1527-21 as a *"recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)."*

The term *historical recognized environmental condition* (HREC) is defined as a *"previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations)."* The ASTM E 1527-21 standard has clarified that a *historical recognized environmental condition* is not a *recognized environmental condition*.

The term *de minimis condition* is defined by the ASTM, *"…a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."* A condition determined to be a *de minimis condition* is not REC nor a CREC.

The chief components of this assessment are generally described as follows:

- A non-invasive visual reconnaissance of the Subject Property and adjoining properties in accordance with ASTM guidelines for evidence of RECs.

- Interviews of past and present owners and occupants and state and local government officials, seeking information related to the potential presence of RECs at the Subject Property.

- A review of standard physical record sources for available topographic, geologic and groundwater data.

- A review of standard historical record sources, such as fire insurance maps, city directories, aerial photographs, prior reports and interviews, etc., to determine prior uses of the Subject Property from the present, back to the Subject Property's first developed use, or back to 1940, whichever is earlier.

- A review of standard environmental record sources including federal and state environmental databases, and additional environmental record sources, to identify potential regulatory concerns with the Subject Property, adjoining properties and properties located within the surrounding area.

An evaluation of environmental or other regulatory compliance matters is excluded from the scope of this assessment.

These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

Business Environmental Risks/Non-ASTM Scope Considerations

Thornburgh has performed a limited review of the following potential *business environmental risks* (BER), also known as "*Non-ASTM Scope*" concerns, in accordance with the contracted scope of work scope for this assessment. BER is defined by ASTM E 1527-21 as *"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."*

- Asbestos-Containing Building Materials (ACBM): A cursory non-intrusive visual screening for the presence of suspect ACBM within the accessed areas of buildings built prior to 1990 on the Subject Property. If the Subject Property contains buildings built in 1990 or later, the contracted scope of work excludes a cursory non-intrusive visual screening or any other level of evaluation for suspect ACM; however, the exclusion for buildings built ≥1990 should not be interpreted to suggest that any such buildings are free of ACBM or would not warrant evaluation of building materials for ACBM prior to disturbance. It is emphasized that this cursory non-

intrusive visual screening does not constitute an asbestos survey/inspection of the premises. An asbestos survey/inspection should be sought by the report User(s) if a greater certainty is desired regarding ACBM and potential asbestos hazards at the Subject Property. Furthermore, a review of regulatory compliance matters pertaining to asbestos is excluded from the scope of work.

- Lead-Based Paint (LBP): A cursory non-intrusive visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1978 on the Subject Property. If the Subject Property contains buildings built in 1978 or later, the contracted scope of work excludes any cursory non-intrusive visual screening or other level of evaluation for suspect LPB; however, the scope of work exclusion for building built ≥1978 should not be interpreted to suggest that any such buildings are free of LPB or other lead hazards. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for LBP or potential lead hazards. A comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding LBP at the Subject Property. Furthermore, a review of regulatory compliance matters pertaining to lead-based paint is excluded from the scope of work.

- USEPA Designated Radon Potential: Review of general non site-specific data published by the USEPA regarding the Radon Zone classification for the area of the Subject Property.

- Mold/Microbial Damage: A cursory non-intrusive visual screening within the accessed areas of buildings on the Subject Property for evidence of systemic microbial problems, including visible mold growth, water damaged building materials or musty odors. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for moisture/mold/microbial damage. A more comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding the potential for moisture/mold/microbial damages at the Subject Property.

- NWI Wetlands: The Subject Property has been reviewed for jurisdictional wetlands using the National Wetlands Inventory-Wetland Mapper to determine whether mapped federal wetlands have been indicated on the Subject Property. Any further evaluation or legal delineation of regulated wetlands areas is excluded from the scope of work. It is also emphasized that a field delineation of regulated wetlands by a qualified professional would be warranted to more fully determine the presence or absence of regulated wetlands at the Subject Property.

- Lead in Drinking Water: Review of the potential for elevated levels of lead in the drinking water by determining the source of the drinking water supply and a review of available testing or compliance data reports.

2.2 Property Location/Legal Description

Property location and legal description details are described as follows:

Primary Street Address:	21151, 21171, 21221 South Western Avenue				
City:	Torrance	County:	Los Angeles	State:	California
Tax ID/Parcel Number:	7355032010, 7355032011, 7355032012				
Approx. Land Area:	7.76 acres				
Apprx. Latitude/Longitude:	North 33.8370770 degrees/West 118.3098470 degrees				
Additional Details (if appl.):	NA				
Property Owner:	Torrance Center South Complex, LLC				
Zoning Designation:	M1 (Light Industrial)				

2.3 Data Gaps

A *data gap* is defined by the ASTM as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap and the ability to determine the presence or absence of recognized environmental conditions. The following table summarizes data gaps encountered during the assessment as well as a discussion of their significance.

Data Gap:	Significant (Yes/No)?	Discussion
Historical records data failure	No	The date and/or type of the first developed use of the Subject Property was not documented. Records gaps exceeding five years were encountered; however, no significant site use changes are suspected during these intervals.
Response to agency records requests not received as of date of report.	No	Any additional information indicative of a REC will be forwarded upon receipt.

2.4 ESA Report Component Dates/Viability

The ASTM E 1527-21 standard states that an environmental site assessment (ESA) is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the Subject Property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). Specifically, all of the following components must be conducted or updated within 180 days prior to the date of acquisition or prior to the date of the transaction. The following table summarizes the component completion dates:

ESA Component	Completion Date
Interviews:	March 19, 2025
Env Lien Search:	See Section 3.2
Government Records Review:	March 14, 2025
Visual Inspections:	March 19, 2025
Env. Professional Declaration:	March 31, 2025

2.5 User Reliance

This report is for the exclusive use of Torrance Center South Complex, LLC and additional relying entities, if any, named on the front cover. No additional individuals or entities shall be permitted to rely upon any data, interpretation, reports or other information or documentation contained in this report, without first obtaining the consent of Torrance Center South Complex, LLC; and without obtaining written consent from Thornburgh in the form of a reliance agreement/letter.

Thornburgh may, in its sole discretion, withhold its consent to additional reliance and/or Thornburgh may condition consent for reliance upon payment of a fee or other conditions.

2.6 Significant Assumptions

The following significant assumptions are made:

- The site operations at the time of the site visit are assumed to reflect typical site conditions relative to potential environmental conditions and that no concealment of environmental conditions or releases by site owners or occupants has occurred. Likewise, it is assumed that no areas of the Subject Property with potential environmental concerns or RECs were concealed or otherwise not reported, intentionally or unknowingly, by the Subject Property owners/occupants and/or site escort at the time of the site visit.

- For the purpose of estimating the approximate direction of groundwater flow in the absence of site-specific groundwater data, unless indicated otherwise, an assumption has been made that the gradient of groundwater flow follows the surface topography of the Subject Property and immediate surrounding area.

2.7 General Limitations and Exceptions

Limitations

The report turnaround time specified by the contract agreement for this assessment may present a limitation to the availability of pertinent regulatory agency records. Such limitations, if encountered, would be further specified in Section 4.1.

Significant limitations related to the condition or accessibility of the Subject Property at the time of the site reconnaissance, if encountered, are reported in Section 6.1.

Other Exceptions or Deletions

No other exceptions or deletions from the ASTM Standard E 1527 are reported.

Special Terms and Conditions

This Phase I Environmental Site Assessment has been prepared using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes and petroleum products at the Subject Property. Findings within this report are based on information collected from observations made on the day of the site reconnaissance and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, site development, redevelopment, or other construction purposes. No representation or warranty is made that the past or current operations at the Subject Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes.

Findings, conclusions and recommendations presented in this report are based on visual observations of the Subject Property, interviews conducted, the records reviewed, information provided by the Client, and/or a review of readily available and supplied drawings and documents. No warranty or guarantee is made of the accuracy or completeness of information that was obtained from ostensibly knowledgeable individuals, regulatory agency representatives or other secondary sources, including information obtained during the assessment, whether written, graphic or verbal, provided by the Subject Property contact(s) or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or government agency source. Independent verification of the accuracy or completeness of all information reviewed or received during the course of this assessment is not made and excluded from the scope of work for this assessment.

Regardless of the findings stated in this report, Thornburgh is not responsible for consequences or conditions arising from facts that were concealed, withheld or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. Thornburgh can neither warrant nor guarantee

the accuracy or completeness of the information obtained from the regulatory database report provider during the course of this assessment.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment to identify aboveground and underground storage tanks and ancillary equipment. Reasonable efforts are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify surficial and subsurface features that may have been hidden from view due to parked automobiles and other vehicles, snow cover, vegetative growth, pavement, construction or debris pile storage or incorrect information from sources.

No guarantee, explicit or implied, is made that the records pertaining to historical ownership or occupancy which were reviewed represent a comprehensive or precise delineation of past Property ownership or tenancy for legal purposes.

The ASTM E 1527-21 standard states that recommendations are not required to be included in a Phase I ESA report; however, further that recommendations are an additional service that may be useful in the User's analysis of landowner liability protections or business environmental risks; and that the User should consider whether recommendations for additional inquiries or other services are desired.

Recommended response actions offered in Section 1.3, if any, are provided as an option to the Client, and may have taken into account the Client's relation to the Subject Property and/or their intended purpose of this assessment. If included, it is not intended by Thornburgh to represent the only course(s) of action, or inaction, to take. Furthermore, it is emphasized that additional response actions may become advisable depending on the outcome of the initial action(s) taken. Thornburgh advises that Client and any additional authorized relying parties as specified on the report Cover and Section 2.5, or via letter of reliance extension, undertake consultation with legal counsel familiar with environmental and real estate law would be beneficial to the decision making process for the type and timing of a response action to identified RECs or Business Environmental Risks, if any.

Due to the limited nature of our review of potential Business Environmental Risks, the User(s) of the report should consider whether to take additional action(s) to further define, properly manage and/or mitigate potential BERs.

The User(s) assumes responsibility for business decisions that it makes utilizing information in the report provided by Thornburgh. Thornburgh shall not be responsible for any conclusions, interpretations and/or decisions of the User(s).

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the consulting services agreement for this project, the consulting services agreement shall control.

3.0 USER PROVIDED INFORMATION

The term "User" is defined by ASTM as the party seeking to use Practice E 1527-21 to complete an environmental site assessment of the Subject Property; specifically, the entity or entities named on the front cover to which the report has been addressed.

3.1 Prior Environmental Reports/Documentation

The following prior environmental reports/documentation were provided:

Phase I Environmental Site Assessment, Torrance Properties, 21221, 21151 and 21171 South Western Avenue, Torrance, Los Angeles County, California 90501; prepared by AEI Consultants; dated November 9, 2017. The report concluded the following:

> *"This assessment has identified no evidence of Recognized Environmental Conditions (RECs) or Controlled Recognized Environmental Conditions (CRECs) in connection with the subject property."*

3.2 User Responsibilities

The User must conduct inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31 to meet their responsibilities to qualify for one of the Landowner Liability Protections (LLPs) offered by federal regulations. The User should provide the following information to the environmental professional (Thornburgh). Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete. To assist the report User to meet these requirements, Thornburgh has provided a questionnaire of the required inquiries (User Questionnaire) with instructions to complete and return to Thornburgh. A completed questionnaire was received by Thornburgh. The following is a summary of the User's responses:

Question	Yes/No	Detail
1. Search of Land Title and Judicial Records: Has the User performed a search of land title records and judicial records for environmental liens and/or Activity and Use Limitations (AULs) filed or recorded against the Subject Property?	No	
1.a. If yes to Question 1: Did the search identify any environmental liens or Activity and Use Limitations (AUL), such as engineering controls, land use restrictions or institutional controls that are in place at the Subject Property and/or have been filed or recorded against the Subject Property under federal, tribal, state or local law?	N/A	
1.b. If yes to Question 1: Has the User provided the result of the search of land title and judicial records to Thornburgh?	N/A	
2. Specialized knowledge or experience of the person seeking to qualify for the LLP: Do you have any specialized knowledge or experience related to the Subject Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the	No	

Question	Yes/No	Detail
Subject Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?		
3. Relationship of the purchase price to the fair market value of the Subject Property if it were not contaminated: Does the purchase price being paid for this property reasonably reflect the fair market value of the Subject Property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Subject Property?	N/A	*"No purchase transaction. We are Trying to get a permit to build housing."*
4. Commonly Known or Reasonably Ascertainable Information: Are you aware of commonly known or reasonably ascertainable information about the Subject Property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example: (respond below)		
4.a. -Do you know the past uses of the Subject Property?	No	
4.b. -Do you know of specific chemicals that are present or were once present at the Subject Property?	No	
4.c. -Do you know of spills or other chemical releases that have taken place at the Subject Property?	No	
4.d. -Do you know of any environmental cleanups that have taken place at the Subject Property?	No	
5. The degree of obviousness of the presence or likely presence of contamination at the Subject Property, and the ability to detect the contamination by appropriate investigation: Based on your knowledge and experience related to the Subject Property are there any obvious indicators that point to the presence or likely presence of releases at the Subject Property?	No	
6. Litigation/Administrative Proceedings/Government Notice: As the User of this ESA, do you have knowledge of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Subject Property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Subject Property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.	No	
7. User's Reason/Purpose for Performing Phase I ESA:	The User indicated that the purpose of the assessment is to obtain permit to build housing.	

The Client did not provide a title report to Thornburgh for review.

4.0 RECORDS REVIEW

4.1 Environmental Information

Physical Setting

Source	Discussion
USGS 7.5 minute Topographic Map Data: (EDR Geocheck-Physical Setting Source Addendum)	The Subject Property lies at an elevation of approximately 50 feet above mean sea level. An interpretation of topographic contour lines as well as a review of the EDR Geocheck-General Topographic Gradient suggested terrain sloping downward towards the east-northeast. The closest down gradient water body is an unnamed canal, located approximately 2.4 miles to the ENE.
USDA SCS Soil Data: (EDR Geocheck-Physical Setting Source Addendum)	The soil type at the Subject Property is classified as "Urban Land". The Urban Land designation indicates that a majority of the original soils on the site have been disturbed by development or covered with impervious surfaces, such as buildings or pavement.
Geologic Data: (EDR Geocheck-Physical Setting Source Addendum)	The geologic formation in the vicinity of the Property is described as a stratified sequence of the Cenozoic Era, Quaternary System, and Quaternary Series.
Prior Env. Reports: (Section 3.1)	No pertinent data was obtained from the prior environmental reports discussed in Section 3.1.
Additional Sources/ Data:	Additional physical setting data was obtained from groundwater monitoring wells on a northeast adjoining site that indicated groundwater flow was to the southwest in 2016.
Groundwater Flow Discussion:	Based on a review of the above information as well as observation of the site, the direction of shallow groundwater flow at the site is inferred to be towards the southwest.

Federal, State and Tribal Environmental Record Sources

Standard government records were obtained and reviewed primarily via a third-party regulatory database report, titled EDR Radius Map™ Report, prepared by Environmental Data Resources of Shelton, CT. The report provided government records from the standard environmental resources and within minimum search distances specified by Section 8.2.2-Table 2 of the ASTM E 1527-21; and were reviewed for the purpose of identifying potential RECs in connection with the Subject Property. Additional detail of the source and significance of the regulatory databases can be found in the regulatory database report in Appendix D. Thornburgh has also included discussion of records pertaining to the Subject Property from other government record sources not specifically listed under Table 2, as applicable.

Reported distances for adjoining property listings, if applicable, are approximate and indicative of the presence of a public roadway or right-of-way between the adjoining site and Property.

The reported gradients have been estimated based on a number of factors including but not necessarily limited to field observation, review of topographic maps, database listing details and/or site specific geo-technical data.

Limited analysis of the details of on-site, adjoining and vicinity database sites was conducted to identify potential sources of sub-surface vapor encroachment. This review was based on elements of the ASTM "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM E 2600-15); and also, on elements of "Methodology for Identifying the Area of Concern Around a Property Potentially Impacted by Vapor Migration from Nearby Contaminated Sources" (Buonicore, 2011-S-103-AWMA). Vicinity database sites pertaining to non-petroleum product releases within 1,760 feet of the Subject Property in the up-gradient direction, 365 feet of the Subject Property in the cross gradient direction and 100 feet of the Subject Property in the down gradient direction; and vicinity database sites pertaining to petroleum product releases within 528 feet of the Subject Property in the up-gradient direction, 165 feet of the Subject Property in the cross gradient direction and 100 feet of the Subject Property in the down gradient direction were reviewed to identify active contamination sites with the potential to affect subsurface vapor conditions at the Subject Property. The potential for vapor encroachment was considered in assessing whether a REC exists in connection with the Subject Property when reviewing applicable sites within those distances.

Regulatory database sites with active petroleum or non-petroleum releases that are considered to constitute a vapor encroachment condition (VEC) to the Subject Property, if any, are identified and discussed in this section.

The EDR Radius Map report is attached in Appendix D.

Subject Property Listings

The following listings of the Subject Property were identified:

Name/Address:	South Bay Creation; 21151 South Western Avenue
Database(s):	CHMIRS, FINDS, ECHO
Data Discussion:	The CHMIRS database lists an unauthorized release of 200-gallons of mineral oil from a pad-mounted transformer due to failure and impacted gravel in 2018. The incidence did not impact any waterways and has since been stopped and contained. The FINDS and ECHO listings are related administratively related to a COVID-19 sanitizing station with UV-C.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Name/Address:	Alan Parrish / ADT Security; 21171 South Western Avenue
Database(s):	RCRA-NonGen / NLR, ECHO, FINDS, HWTS, HAZNET
Data Discussion:	The RCRA database lists this site as a non-generator of RCRA hazardous waste in 2013 and 2024, no violations were listed. The ECHO and FINDS listings are related to the

	RCRA listing. The HWTS and HAZNET listings identify non-RCRA hazardous waste generators and wastes generated onsite, the listings indicate a status of "Inactive" as of June 30, 2018.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Name/Address:	E&K Energy Resources Inc; 21171 South Western Avenue
Database(s):	HWTS
Data Discussion:	The HWTS listing identify non-RCRA hazardous waste generators and wastes generated onsite, the listing indicate a status of "Inactive" as of June 30, 2014.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Name/Address:	1x Gascon Mar LTD; 21221 South Western Avenue
Database(s):	HWTS, HAZNET
Data Discussion:	The HWTS and HAZNET listings identify non-RCRA hazardous waste generators and wastes generated onsite, the listings indicate a status of "Inactive" as of October 25, 2000.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Adjoining Property Listings

The following adjoining property listings were identified.

Name/Address:	AT&T Corp; 1741 Torrance Boulevard				
Database(s):	RCRA-NonGen / NLR				
Distance in feet:	173	Direction:	NW	Gradient:	Cross
Data Discussion:	The RCRA listing indicates this site was a non-generator of hazardous waste in 2021, no violations were listed.				
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.				
VEC Discussion:	Based on the available data, a VEC is not suspected.				

Name/Address:	Three B Tire / Keith's Automotive Service Center; 1717 Torrance Boulevard				
Database(s):	UST, CERS HAZ WASTE, HWTS, HAZNET, CERS, RCRA-NonGen / NLR				
Distance in feet:	173	Direction:	NNW	Gradient:	Cross
Data Discussion:	The RCRA listing indicates this site was a non-generator of RCRA hazardous waste in 2011, no violations were listed. The UST database lists an inactive status, no other pertinent information was provided. The CERS, CERS HAZ WASTE, HWTS, and HAZNET databases identifies this site as a non-RCRA hazardous waste generator due to being a chemical storage facility. Various violations related to unauthorized releases and administrative issues were listed and have since returned to compliance.				

REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Name/Address:	Former Gas Station / Chevron / Jesse's Auto Service; 21138 South Western Avenue				
Database(s):	UST Finder Release, UST, LUST, CORTESE, RCRA-NonGen / NLR, CERS HAZ Waste, HWTS, HAZMAT LA, CERS, RCRA-SQG, FINDS, ECHO				
Distance in feet:	40	Direction:	NE	Gradient:	Up
Data Discussion:	The RCRA listing indicates this site was a generator of hazardous waste in 1986 and was a non-generator of hazardous waste in 2020, no violations were listed. The FINDS and ECHO databases are related to the RCRA listing. The UST database lists an inactive status, no other pertinent information was provided. The CERS, CERS HAZ WASTE, HAZMAT LA, HWTS, and HAZNET databases identifies this site as a hazardous waste generator due to being a gas station. Various violations related to administrative issues were listed and have since returned to compliance. The UST listing indicates former USTs registered at this site. The LUST, CORTESE, CERS, and UST Finder Release listings are associated with the LUST case at this site due to impacts to an aquifer used for drinking water. The LUST case has since received regulatory closure as of October 25, 2018. Thornburgh reviewed documents of this LUST case on the RWQCB GeoTracker online database, according to plume maps, previous contamination appears to be localized to this off-site location.				
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.				
VEC Discussion:	Based on the available data, a VEC is not suspected.				

Name/Address:	Southwest Printing & Lithograph CO; 21236 South Western Avenue				
Database(s):	HAZMAT LA				
Distance in feet:	134	Direction:	SE	Gradient:	Up/Cross
Data Discussion:	The HAZMAT LA database lists an inactive status as of December 1, 2024.				
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.				
VEC Discussion:	Based on the available data, a VEC is not suspected.				

Name/Address:	21240 South Western Avenue				
Database(s):	UST				
Distance in feet:	133	Direction:	SSE	Gradient:	Up/Cross
Data Discussion:	The UST database indicates former USTs were registered at this site, no additional pertinent information was provided.				
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.				
VEC Discussion:	Based on the available data, a VEC is not suspected.				

Name/Address:	21281 South Western Avenue				
Database(s):	CHMIRS				
Distance in feet:	Adjoining	Direction:	SW	Gradient:	Down

Data Discussion:	The CHMIRS database lists an incident date of July 7, 1991, no additional pertinent information was provided.
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Name/Address:	Pac Bell DBA AT&T California; 21285 South Western Avenue				
Database(s):	HTWS, HAZNET				
Distance in feet:	Adjoining	Direction:	SW	Gradient:	Down
Data Discussion:	The HWTS and HAZNET listings identify hazardous waste generators and wastes generated, the listings indicate a status of "Inactive".				
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.				
VEC Discussion:	Based on the available data, a VEC is not suspected.				

Name/Address:	1x Torrance Center 1; 1731 213th Street				
Database(s):	HTWS, HAZNET				
Distance in feet:	Adjoining	Direction:	SW	Gradient:	Down
Data Discussion:	The HWTS and HAZNET listings identify hazardous waste generators and wastes generated, the listings indicate a status of "Inactive".				
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.				
VEC Discussion:	Based on the available data, a VEC is not suspected.				

Name/Address:	City of Torrance Redevelopment Agency / Torrance Tubing & Conduit; 1739 West 213th Street				
Database(s):	CERS, PRP, RCRA-SQG, FINDS, ECHO, CPS-SLIC, HWTS, HAZNET				
Distance in feet:	Adjoining	Direction:	SW	Gradient:	Down
Data Discussion:	Torrance Tubing & Conduit was identified on the PRP database related to historical releases at this site that resulted in a SLIC case. The SLIC case received regulatory closure on June 16, 1965; however, this date is most likely in error as the issue occurred in 1986. The CERS database is related to the SLIC case. The HWTS and HAZNET listings identify hazardous waste generators and wastes generated, the listings indicate a status of "Inactive" as of January 1, 1995. The RCRA listing indicates this site was a former small quantity generator of hazardous waste, no violations were listed. The FINDS and ECHO databases are related to the RCRA listing. Based on documents reviewed on the GeoTracker online database; during the initial construction of the Subject Property, an oily liquid substance seeped into the construction site from the east along South Western Avenue. The seepage was immediately contained with three on-site water extraction wells and an impervious clay barrier was constructed across the contamination point of entry. Contaminated soil was excavated and stockpiled at another location pending development of a plan for management.				
REC Discussion:	Based on the details provided above, a HREC in connection with the Subject Property has been identified.				
VEC Discussion:	Based on the available data, a VEC is not suspected.				

Surrounding Area Findings

The following is a discussion of non-adjoining sites identified as located within the ASTM specified search distance surrounding the Subject Property. In order to keep this discussion informative and concise, discussion(s) is/are provided of the listed site(s) for each database category that appears most likely to impact the Subject Property based on distance, area topography and/or regulatory status. Listings of sites within the applicable search distances not specifically discussed below were reviewed and concluded not to be RECs in connection with the Subject Property or VECs based on various factors including distance, area topography, known or inferred groundwater flow direction and/or regulatory status.

Federal NPL				# of sites:	2	Search Distance:	1-mile
Notable Listing:	Del Amo NPL						
Distance in feet:	4,369	Direction:	NE	Gradient:	Up		
Data Discussion:	A former synthetic rubber manufacturing facility operated in the early 1940s to the early 1970s that contributed to impacts to the groundwater used for drinking. Groundwater was contaminated with ethylbenzene, benzene, and naphthalene.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

Federal Delisted NPL				# of sites:	0	Search Distance:	½-mile
Notable Listing:	None						
Distance in feet:		Direction:		Gradient:			
Data Discussion:							
REC Discussion:							
VEC Discussion:							

Federal SEMS				# of sites:	1	Search Distance:	½-mile
Notable Listing:	Del Amo NPL						
Distance in feet:	4,369	Direction:	NE	Gradient:	Up		
Data Discussion:	A former synthetic rubber manufacturing facility operated in the early 1940s to the early 1970s that contributed to impacts to the groundwater used for drinking. Groundwater was contaminated with ethylbenzene, benzene, and naphthalene.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

Federal SEMS Archive				# of sites:	5	Search Distance:	½-mile
Notable Listing:	Pacific Bronze Neodane Co Inc; 1005 Santa Clara Avenue						
Distance in feet:	1,006	Direction:	WNW	Gradient:	Cross		
Data Discussion:	This site is not on the NPL as it does not quality based on existing information.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

Federal CORRACTS				# of sites:	2	Search Distance:	1-mile
Notable Listing:	Body Glove International; 20700 Denker Avenue, Unit A						
Distance in feet:	2,585	Direction:	NE	Gradient:	Up		
Data Discussion:	This site is listed on the CORRACTS database due to a required corrective action related to "CA Prioritization-Low CA Priority", no additional pertinent information was provided.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

Federal RCRA-TSD				# of sites:	1	Search Distance:	½-mile
Notable Listing:	Body Glove International; 20700 Denker Avenue, Unit A						
Distance in feet:	2,585	Direction:	NE	Gradient:	Up		
Data Discussion:	The treatment storage and disposal type for this site is listed as "Storage", no pertinent additional information was provided.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

State/Tribal Superfund & Hazardous Waste				# of sites:	31	Search Distance:	1-mile
Notable Listing:	American Honda Motor Co., Inc.; 1919 Torrance Boulevard (Building 510 Parking Lot)						
Distance in feet:	625	Direction:	W	Gradient:	Down		
Data Discussion:	This site is listed on the EnviroStor database as a voluntary cleanup site due to impacts to the soil with several heavy metals, PCBs, and VOCs.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

State/Tribal Landfilll / Solid Waste Disposal				# of sites:	2	Search Distance:	½-mile
Notable Listing:	American Honda Motor Co., Inc.; 1919 Torrance Boulevard (Building 510 Parking Lot)						
Distance in feet:	625	Direction:	W	Gradient:	Down/Cross		
Data Discussion:	The listing for this site indicates commercial and inert wastes were accepted and the current status is listed as "Closed."						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

State/Tribal Leaking Storage Tanks				# of sites:	12	Search Distance:	½-mile
Notable Listing:	Aable Muffler (Abandoned); 1889 Torrance Boulevard						
Distance in feet:	538	Direction:	W	Gradient:	Down/Cross		
Data Discussion:	This site is listed as a LUST case due to impacts to soil with gasoline and received regulatory closure on February 10, 2014.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.						

VEC Discussion:	Based on the available data, a VEC is not suspected.

State/Tribal Voluntary Cleanup Sites				# of sites:	1	Search Distance:	½-mile
Notable Listing:	American Honda Motor Co., Inc.; 1919 Torrance Boulevard (Building 510 Parking Lot)						
Distance in feet:	625	Direction:	W	Gradient:	Down/Cross		
Data Discussion:	This site is on the voluntary cleanup program due to impacts to the soil with several heavy metals, PCBs, and VOCs.						
REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Subject Property.						
VEC Discussion:	Based on the available data, a VEC is not suspected.						

State/Tribal Brownfields				# of sites:	0	Search Distance:	½-mile
Notable Listing:	None						
Distance in feet:		Direction:		Gradient:			
Data Discussion:							
REC Discussion:							
VEC Discussion:							

Unmapped/Orphan List Sites	
Thornburgh has also reviewed a list of unmapped sites (a.k.a. "Orphan List" sites) indicated by the database report. Unmapped sites that were identified as falling within an applicable specific search distance or warranting discussion have either been discussed in the preceding tables or are detailed below:	
Notable Listings:	None

Additional Environmental Record Sources

Requests have been submitted to local, municipal and state agencies for pertinent records pertaining to the Subject Property, particularly with regard to potential environmental concerns such as petroleum storage tanks, storage and usage of hazardous substances and petroleum products, and/or known or suspected environmental contamination. Where applicable, internet research of government environmental regulatory databases was also conducted, as well as a general cursory internet search of the Subject Property address, for information indicative of a REC. The following table summarizes the findings of the research:

Source	Type	Outcome
CA DTSC Envirostor database (www.envirostor.dtsc.ca.gov/public/)	Online search	Thornburgh searched online for records pertaining to the Property. No records pertaining to the property were found.
CA GeoTracker database (geotracker.waterboards.ca.gov/)	Online search	Thornburgh reviewed available online records pertaining to the Property. The following pertinent records and/or information was obtained:

Source	Type	Outcome
		Records pertaining to the SLIC listing at 1739 West 213th Street and a LUST closure packet report pertaining to 21138 South Western Avenue was reviewed and is further discussed in Section 4.1.
EPA Envirofacts	Online search	Thornburgh reviewed available online records pertaining to the Property. The following pertinent records and/or information was obtained: South Bay Creation (21151 South Western Avenue) is listed with no pertinent information provided. ADT LLC (21171 South Western Avenue) is listed due to their RCRA listing, no additional pertinent information was provided.
Los Angeles Co. Fire Dept./CUPA	Online search	Thornburgh searched online for records pertaining to the Property. No records pertaining to the property were found.
Regional Water Quality Control Board (RWQCB)	FOI request	No response was received prior to report issuance.
CA DTSC	FOI request	No response was received prior to report issuance.
South Coast Air Quality Management District (SCAQMD)	FOI request	No response was received prior to report issuance.

Copies of obtained records referenced in the above table have been included in Appendix D.

4.2 Historical Research

Historical records have been compiled and analyzed for historical property information and developing a history of previous uses of the Subject Property, adjoining properties and surrounding area. These records were reviewed for the purpose of identifying the likelihood of past uses having led to RECs in connection with the Subject Property.

The historical record sources listed below have been sought with the objective to document past uses of the Subject Property from the present back to the Subject Property's first developed use, or back to 1940, whichever is earlier. The term "developed use" includes agricultural use, placement of fill dirt and other uses that do not involve structures. Thornburgh has sought to review historical records in minimum intervals of five years.

Fire Insurance Maps

A Certified Sanborn Map Report was obtained from EDR for a review of published historical fire insurance maps for the Subject Property and surrounding area. The following is a summary of site uses and notable details depicted by the available maps:

Year(s)	Subject Property	Adjoining Properties
1929, 1932	Dwelling and a shed; the northeastern portion is unmapped	Vacant land, automobile garage; the north and eastern sides are unmapped

A copy of the Certified Sanborn Map Report is attached in Appendix E.

City Directories

An EDR City Directory Abstract report was reviewed for data of prior occupants of the Subject Property's street address. The following is a generalized summary of the findings of city directory research for past occupants of the Subject Property.

Subject Property	
Use and/or Occupants(s)	Years
Office occupants	1990-2020

The EDR City Directory Abstract report was also reviewed for listings of prior occupants of the adjoining properties. The following is a generalized summary of the findings of city directory research for past occupants of the adjoining properties:

Adjoining Properties	
Use and/or Occupants(s)	Years
Torrance Tubing & Conduit Co	1971-1981
Gas station / auto service center	1954-2014
Southwest Printing & Lithographic	1995-2020
Commercial / offices	1971-2020

A copy of the EDR City Directory report is attached in Appendix E.

Historical Topographic Maps

Historical topographic maps of the Property and vicinity obtained from an EDR Historical Topographic Map report (as attached in Appendix E) have been reviewed. The following interpretation of land usage was made by review of the maps:

Year(s)	Subject Property	Adjoining Properties
1896	No features or uses depicted	No features or uses depicted
1924	A small structure and a pond	A small structure, railroad tracks
1930, 1934, 1941	Two small structures and a pond	A small structure, railroad tracks
1948	Several large structures	Portions shaded to denote a built-up area, railroad tracks
1951	Several small structures	Several small and large structures, portions shaded to denote a built-up area
1964, 1972, 1981	Several large structures	Two large structures, portions shaded to denote a built-up area

Year(s)	Subject Property	Adjoining Properties
2012, 2015, 2018, 2021	No features or uses depicted	No features or uses depicted

Historical Aerial Photographs

Historical aerial photographs of the Property and vicinity obtained from an EDR Aerial Photo Decade Package report, as attached in Appendix E, were reviewed. The following interpretation of land usage was made by review of the aerial photographs:

Year(s)	Subject Property	Adjoining Properties
1928	Residential	Residential/commercial, vacant land
1947	Commercial	Residential, commercial, light industrial
1952, 1963, 1977, 1983	Commercial	Residential, commercial, light industrial, gas station
1989, 1994, 2002, 2005, 2009, 2012, 2016	Commercial	Residential, commercial, gas station
2020	Consistent with current conditions	Consistent with current conditions

EDR High-Risk Historical Records

The EDR Radius Map™ report, which is discussed in greater detail in Section 4.1 and attached in Appendix E, provided a search of proprietary databases of potential historical high-risk uses at or in the vicinity of the Subject Property. These databases include EDR Hist Cleaner – a database of property addresses with records of historical occupancy by suspected cleaners businesses; EDR Hist Auto – a database of property addresses with records of historical occupancy by potential automotive gas/filling stations and repair facilities; and EDR MGP- a proprietary database of sites historically occupied by manufactured gas plants and related facilities.

EDR Database	On-site Listings:	Adjoining/Off-Site Listings
EDR Hist Cleaner: (on-site/adjoining only)	Continentals One Hour HTG & A (21151 South Western Avenue) is listed as a drycleaning plant in 2013 and 2014.	None
EDR Hist Auto: (on-site/adjoining only)	None	EZ Smog (21138 South Western Avenue) is identified a gasoline service station from 1969 to 1979 and a general automotive repair shop from 1987 to 2014. John Bacarella (21160 South Western Avenue) is identified as a gasoline service station in 1971.
EDR MGP:	None	None

(1-mile distance)		

Petroleum/Natural Gas Well Review

The historical record sources and the California Geologic Energy Management Division (CalGEM) online mapping application were reviewed for records of historical petroleum and/or natural gas wells at the Subject Property. No record of any historical petroleum/natural gas wells at or adjoining the Property was identified.

Per- and Polyfluoroalkyl Substances (PFAS) Review

A review of the Subject Property's historical usage did not indicate industries known or likely to have utilized PFAS. Additionally, no obvious fire incidents where PFAS containing materials may have been applied were noted either.

Additional Historical Data

Where applicable, the following additional pertinent historical data was obtained:

Interviews/Anecdotal:	No additional pertinent historical data was obtained.
Local Gov't Records:	No additional pertinent historical data was obtained.
Prior Env. Reports: (Section 3.1)	Prior environmental reports reviewed as part of this assessment, as detailed in Section 3.1, did not provide additional pertinent detail of historical site usage.
Site Observations:	Indications of historic uses of the Property or adjoining properties were not observed during the site reconnaissance.
Other Sources:	No additional pertinent historical data was obtained.

Summary of Historical Subject Property Uses

The following table presents a summary of the types and approximate date ranges of identified prior uses of the Subject Property:

Date Range	Use
Unk to 1928	Residential
1928 to present	Commercial

Summary of Historical Adjoining Property Uses

The following table presents a summary of the types of identified prior uses of the adjoining properties:

Date Range	Use
Unk to 1928	Residential/commercial, vacant land
1928 to 1947	Residential, commercial, light industrial
1952 to 1983	Light industrial
1952 to 2016	Gas station
1952 to Present	Residential, commercial

Historical Records Data Failure

The ASTM E 1527-21 standard defines data failure as failure to achieve the historical research objective even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. The objective is to identify all obvious uses of the Subject Property from the present, back to the Subject Property's first developed use, or back to 1940, whichever is earlier. Furthermore, records of historical use/conditions were sought in intervals no less than approximately five years, unless the Subject Property conditions appear unchanged over a longer interval. In encountered, data failure and its significance as a data gap is discussed below:

Objective	Met?	Detail	Significant?
First developed use/date determined?	Yes	The first developed use of the Property was a residential structures in 1929.	NA
Record sources at 5-year intervals back to 1940 or first developed use?	No	Historical record gaps exceeding five years were encountered. However, significant site-use changes or undiscovered site uses appear unlikely to have occurred during the record gaps.	No
All obvious prior uses identified?	Yes	See Summary of Identified Past Uses of this section.	NA

Please refer to Section 2.3 for additional discussion of data gaps and their significance to the findings of the assessment.

Historical Uses REC Discussion

The review of historical records did not indicate evidence of a REC in connection with the Subject Property.

The Subject Property was listed on several regulatory database associated with the generation of hazardous waste. However, no reported violations or significant unauthorized releases were reported. Based on the absence of reported violations or releases the regulatory listings are not considered to be a REC in connection with the Subject Property.

Continentals One Hour located at 21171 South Western Avenue was identified on the EDR Hist Cleaners database as a drycleaning plant in 2013 and 2014. However, no reported violations or significant unauthorized releases were reported. Based on the absence of reported violations or

releases and the short duration of operation, the Hist Cleaners listing is not considered to be a REC in connection with the Subject Property.

A former gas station (21138 South Western Avenue) was adjoining to the northeast and operated as a gas station from approximately 1952 to 2016. This former gas station is identified as a LUST case due to impacts to an aquifer used for drinking water. The LUST case has since received regulatory closure as of October 25, 2018. Thornburgh reviewed documents of this LUST case on the RWQCB GeoTracker online database, according to plume maps, previous contamination appears to be localized to this off-site location. Based on the regulatory closure and plume maps, this former gas station is not considered to be a REC in connection with the Subject Property.

City of Torrance Redevelopment Agency / Torrance Tubing & Conduit (1739 West 213th Street) is listed on several regulatory databases. The SLIC case is associated with Torrance Center I, a large redevelopment project that the Subject Property was a part of. The SLIC case received regulatory closure on June 16, 1965; however, this date is most likely in error as the issue occurred in 1986. Based on documents reviewed on the GeoTracker online database; during the initial construction of the Torrance Center I site, an oily liquid substance seeped into the excavation site from the east along South Western Avenue. The seepage was immediately contained with three on-site water extraction wells and an impervious clay barrier was constructed across the contamination point of entry. Contaminated soil was excavated and stockpiled at another location pending development of a plan for management. Based on the containment, cleanup, and subsequent closure of the SLIC case, this is considered to be an HREC in connection with the Subject Property.

5.0 INTERVIEWS

5.1 Interviews with Owners, Operators and Occupants

Current Owner

Name	Contact Name	Affiliation	Interview Type
Torrance Center Couth Complex, LLC	Ferdinand Fam	Owner	Email/questionnaire
Interview Date:			
Interview Outcome/Findings:			
An environmental questionnaire for information pertinent to the assessment was forwarded via email and completed, as attached in Appendix C. Pertinent information, where applicable, is referenced in the appropriate sections of this report.			

Key Site Manager/Operator

Name	Company/Title	Yrs @ Site	Interview Type
Ms. Rui Gan	Torrance Center Couth Complex, LLC / Property Management	5	In person
Interview Date:	March 19, 2025		
Interview Outcome/Findings:			
An interview was conducted in person at the time of the site visit. Pertinent information, where applicable, is referenced in the appropriate sections of this report.			

Occupant(s)

Name	Company/Title	Yrs @ Site	Interview Type
Interview Date:			
Interview Outcome/Findings:			
No occupants were interviewed.			

Prior Owners/Operators/Occupants

Name	Company/Title	Yrs @ Site	Interview Type

Interview Date:			
Interview Outcome/Findings:			

Neighboring Property Owner/Occupants

Name	Company/Title	Yrs @ Site	Interview Type
Interview Date:			
Interview Outcome/Findings:			
The Subject Property was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews with adjoining or nearby property owners or occupants were not conducted.			

5.2 Interviews with State and/or Local Government Officials

State and/or local governmental officials have been interviewed to obtain information of potential RECs in connection with the Subject Property. Many government agencies and their officials require submittal of written request for records in order to respond. The details in Section 4.1 list the various state and local government agencies contacted as part of this assessment, and the outcome of each inquiry. In addition, the details of regulatory database research in Section 4.1 may have included detail of interviews with officials pertinent to government records review and identification of RECs.

Additional interview of government officials not previously detailed in Sections 4.1 are discussed below, if applicable.

Name	Agency Name/Title	Interview Type
Interview Outcome/Findings:		
No additional local/state government officials were interviewed.		

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

A site reconnaissance was conducted to collect information and make observations to help identify RECs in connection with the Subject Property. This included visual and/or physical observations of the Subject Property and its structures, adjoining properties as viewed from the Subject Property boundaries and the surrounding area based on visual observations from adjoining public thoroughfares and accessed Subject Property structures. Subject property building exteriors were observed at ground level, unless otherwise indicated. Where applicable, building interiors were accessed and observed to the extent they were made safely accessible with the cooperation of the site escort.

Site Inspection Personnel:	Mr. Stephen Krummlett
Escort Name/Company:	Ms. Rui Gan / Torrance Center South Complex, LLC
Inspection Date:	March 19, 2025
Weather Conditions:	Fair, 70 °F

Significant Inaccessible Areas

No significant areas of the Property inaccessible at the time of the inspection were noted.

Significant Limiting Site Conditions

No significant limiting site conditions were noted at the time of the site reconnaissance.

6.2 General Site Setting

Site and Vicinity Characteristics

Abutting Roadways:	Torrance Boulevard to the north; South Western Avenue to the east; West 213th Street to the south
Current Property Use:	Offices
Evidence of Past Property Uses:	None observed.
Evidence of Past Adjoining Property Uses:	None observed.
Surrounding Area Uses:	Commercial, residential

Current Adjoining Property Uses

Dir	Street Address	Description
N	1717 & 1741 Torrance Boulevard	Commercial
E	21176 South Western Avenue 21210-21228 South Western Avenue	Starbucks Apartments
S	21381 South Western Avenue	Hotel
SW	21241 South Western Avenue	Offices
W	1820 Torrance Boulevard	Mobile home park

No visual observations indicative of a potential environmental concern were noted on the adjoining properties.

Topographic Characteristics

Terrain:	Flat to gently sloping
Direction of Downward Slope:	Towards the east-northeast
On-site Water Bodies:	None observed
Other Significant Features:	None observed

General Description of Structures and Improvements

Buildings:	Three commercial office buildings
Approx. Building Size:	143,972 ft^2
Approx. Year Built:	1987 & 1988
Number of Stories:	Three
Basement/Subgrade Levels:	None
Exterior Ground Cover:	Asphalt parking lot, grass lawn/landscaping
Ancillary Structures:	None
Sources of Heating & Cooling:	Natural gas and electric powered systems
Potable Water/Sewage Disposal:	Municipal utility connections

6.3 Site Features and Conditions

Storage/Usage of Hazardous Substances and Petroleum Products

The following approximate number of containers, and general description of their contents, capacity, container types and storage conditions, were observed to be stored and/or used at the Subject Property:

Occupant	Substance	Qty/Container Type	Storage Conditions
None identified			

Bulk Petroleum/Hazardous Material Storage Tanks

The following storage tanks for bulk petroleum or hazardous material storage were identified or reported to be present; or are suspected to be present based on visual observations:

AST/UST	Product	Capacity	Construction	Year Installed	Status	Location/Notes
None identified						

Strong, Pungent or Noxious Odors and their Sources

No strong, pungent or noxious odors were noted at the Subject Property.

Standing Surface Water/Pools & Sumps

No standing water, pools or sumps containing liquids likely to be hazardous substances or petroleum products were noted.

Drums, Totes and Intermediate Bulk Containers

No hazardous substance or petroleum product drums, totes or intermediate bulk containers were noted.

Unidentified Substance Containers

No unidentified substance containers suspected of containing hazardous substance or petroleum product were noted.

PCBs in Oil Filled Electrical/Hydraulic Equipment

PCBs in electrical/hydraulic equipment are considered unlikely at the Subject Property based on the post-1979 date of the current site development.

It is noted that identification of PCB containing fluorescent light ballasts, caulk, paint, or other materials located inside and are part of the building or structure is outside of the scope of the ASTM E 1527-21 standard and this assessment.

Stains or Corrosion on Floors, Walls or Ceilings

No stains or corrosion of floors, walls or ceilings, excluding any staining from water, were noted.

Drains and Sumps

No floor drains or sumps were noted at the Subject Property.

Pits/Ponds/Lagoons

No pits, ponds or lagoons were identified in connection with waste treatment or disposal.

Stained Soil, Pavement/Stressed Vegetation

No stained soil, pavement or stressed vegetation was observed.

On-Site Solid Waste Disposal/Fill Material

No evidence of on-site disposal of trash, construction debris, demolition debris or other solid waste was observed.

Waste Water

Sanitary sewage generated at the Subject Property is discharged via a connection to the local public sewer system.

Storm water runoff at the Subject Property is discharged via roof drains into the municipal sewer system.

No additional waste water discharges were identified at the Subject Property.

Septic Systems/Cesspools

No septic systems or cesspools were identified at the Subject Property.

Wells

No wells (including any dry wells, irrigation wells, injection wells, abandoned wells, or other wells) were identified at the Subject Property.

Railroad Spurs

No railroad spurs were identified on the Subject Property.

7.0 BUSINESS ENVIRONMENTAL RISKS

In accordance with the contract agreement for this assessment, Thornburgh has performed cursory reviews of several potential Business Environmental Risks (also known as "Non-Scope Considerations"). The ASTM E 1527-21 standard defines the term business environmental risk (BER) as, *"a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice."*

7.1 Asbestos-Containing Material (ACM)

The contracted scope of work included a cursory visual screening of the accessed portions of buildings at the Subject Property built prior to 1990 for suspect asbestos containing materials (ACM). The information provided in this section, where applicable, is limited to identification of potential suspect materials in the readily accessible and observed areas of the building, and their general condition. This is not intended to be a comprehensive survey for the presence of ACM, and no testing has been conducted.

Suspected ACM noted within the accessed building areas included acoustic ceiling panels, sheetrock wall systems, vinyl flooring and mastics, and carpet mastics.

7.2 Lead-Based Paint

The contracted scope of work included a cursory visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1978. This is not intended to constitute a comprehensive survey for LBP or potential lead hazards, and no testing has been conducted.

No residential buildings built prior to 1978 were present at the Property.

7.3 Radon

Data compiled by the USEPA, as summarized by the regulatory database report, indicated that the Subject Property is located in an area classified as Zone 2 or 'moderate risk' area for radon. Radon testing was not included in the scope of this assessment.

7.4 Mold/Microbial Damage

The contracted scope of work included a cursory visual screening of the accessed areas of the building for evidence of significant damage to building materials and finishes as result of moisture intrusion and/or mold/microbial growth. Thornburgh did not observe evidence of significant problems with moisture intrusion or mold/microbial growth at the Subject Property.

7.5 NWI Mapped Wetlands

The US Fish and Wildlife National Wetlands Inventory Wetland Mapper fwsprimary .wim.usgs.gov/wetlands/apps/wetlands-mapper/ was reviewed for indications of jurisdictional wetlands at or immediately adjoining the Subject Property. The scope of work for this assessment excluded a visual determination of regulated wetlands at the Subject Property. It is emphasized that, regardless of the data reviewed via the NWI Wetlands Mapper, a field delineation of regulated wetlands by a qualified professional would be warranted to determine the presence or absence of regulated wetlands at the Subject Property.

The review did not indicate regulated wetland areas on the Property.

7.6 Lead in Drinking Water

The scope of work for this assessment included a review of the potential for elevated levels of lead in drinking water by determining the source of the drinking water supply and a review of available compliance or testing data.

Potable water service at the Property is provided by a utility connection with the City of Torrance. A recently published water quality report from the utility indicated compliance with USEPA water quality standards for lead in drinking water. A copy of the report has been attached in Appendix F.

Instructions: Please answer each question. Check "D/K" if you don't know, or otherwise lack sufficient knowledge of the Property to answer the question.

	PREVIOUS INVESTIGATIONS	
1.	Have any previous environmental investigations (e.g.- Phase I Environmental Site Assessment, soil/groundwater testing, radon testing, asbestos survey, tank closure/removal reports, etc.) been performed at the Property?	■ Yes ☐ No ☐ D/K
2.	If yes, what concerns were indicated or recommendations made? *(please provide a copy of all previous environmental reports)*	
	Copy of AEI 10/24/17 Phase 1 report to be provided	
	PROPERTY USAGE	
3.	To the best of your knowledge, is the Property or any adjoining property currently occupied or formerly occupied for industrial purposes? If yes, please elaborate:	Property: ☐ Yes ☐ No ☐ DK D/K Adj. Property: ☐ Yes ☐ No ☐ DK D/K
4.	Is the property or any adjoining property currently used, or have they ever been used, as a gasoline filling station, dry cleaning facility, automotive service/repair shop, auto body repair shop, commercial printing facility, photo development laboratory shop, junkyard, landfill, or as a waste treatment, storage disposal, recycling or processing facility? If yes, please elaborate:	Property: ☐ Yes ☐ No ☐ DK D/K Adj. Property: ☐ Yes ☐ No ☐ DK D/K
5.	Have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries,, or any other waste materials been dumped above grade, buried and/or burned on the property?	☐ Yes ☐ No ☐ DK D/K
	BULK STORAGE TANKS	
6.	Are there currently, or have there been previously, any registered or unregistered above ground or underground storage tanks located at the Property? *If YES, please provide number, size, age of tanks, permits, closure reports, regulatory agency correspondence, and related information.*	Current Tanks: ☐ Yes ☐ No ☐ DK D/K Previous Tanks: ☐ Yes ☐ No ☐ DK D/K
7.	Are there currently, or have there been previously, any vent pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	Current: ☐ Yes ☐ No ☐ DK D/K Previous: ☐ Yes ☐ No ☐ DK D/K
8.	Are there currently, or have there been previously, any leakage of hazardous substances or petroleum products from above ground or underground storage tank systems at the Property?	Current: ☐ Yes ☐ No ☐ DK D/K Previous: ☐ Yes ☐ No ☐ DK D/K

THORNBURGH
CONSULTING, INC.

	SPILLS, RELEASES, WASTES	
9.	Are there currently, or have there been previously, any waste discharges on or adjacent to the property, other than storm water or into a municipal sanitary sewer system? If yes, please elaborate:	Current: ☐ Yes ☐ No ☐ DK D/K Previous: ☐ Yes ☐ No ☐ DK D/K
10.	Are there currently, or have there been previous, any septic systems, dry wells or leach fields on the property? If yes, please elaborate:	Current: ☐ Yes ☐ No ☐ DK D/K Previous: ☐ Yes ☐ No ☐ DK D/K
11.	Are there currently, or have there been previously, any flooring, drains or walls located within the facility that are, or have been, stained by substances (or, in the case of drains, used for) other than water or are emanating foul odors? If yes, please elaborate:	Current: ☐ Yes ☐ No ☐ DK D/K Previous: ☐ Yes ☐ No ☐ DK D/K
12.	Are there currently, or have there been previously, any spills or releases of hazardous substances or petroleum products within the building(s) or on the exterior of the Property?	Current: ☐ Yes ☐ No ☐ DK D/K Previous: ☐ Yes ☐ No ☐ DK D/K
13.	Has any non-native and/or contaminated fill material been deposited on the Property?	☐ Yes ☐ No ☐ DK D/K
14.	Have any current or former property occupants generated hazardous wastes or other wastes (such as waste oil, or medical wastes) that required non-conventional storage, handling and/or disposal methods? *If YES, please indicate type of waste and the name of the waste handling contractor:*	☐ Yes ☐ No ☐ DK D/K
	TRANSFORMERS/HYDRAULIC EQUIPMENT	
15.	Are any power transformers, capacitors or hydraulic equipment present at the Property? If yes, please elaborate:	☐ Yes ☐ No ☐ DK D/K
16.	If power transformers are present, who owns them?	☐ Yes ☐ No ☐ DK D/K
17.	If hydraulic equipment is present, indicate age of equipment and name/telephone # of service contactor:	☐ Yes ☐ No ☐ DK D/K

THORNBURGH
CONSULTING, INC.

	REGULATORY DISCLOSURE	
18.	Have there been any environmental liens or governmental notification or involvement relating to past or current use or disposal of hazardous substances with respect to the property of any facility or structure located on the property?	☐ Yes ☐ No ☒ DK D/K
19.	If the property is served by a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system, or has the well been designated as contaminated by any government environmental/health agency? *(if not applicable, please check* NO*)*	☐ Yes ☒ N No ☐ D/K
20.	Is there any environmental litigation, administrative action or cleanup action involving the property related to a release or threatened release of any hazardous substance or petroleum product?	☐ Yes ☒ N No ☐ D/K
21.	Are you aware of testing of any environmental media (soil, groundwater, surface water, etc.) at the property which identified levels of contaminants in excess of regulatory standards and/or cleanup guidelines?	☐ Yes ☒ N No ☐ D/K
	ENVIRONMENTAL/BUILDING CONDITIONS	
22.	Has asbestos testing ever been conducted at the Property? *If YES, please forward a copy of test results and/or survey reports:*	☐ Yes ☐ No ☒ DK D/K
23.	Are any asbestos containing materials present at the Property? If yes, please elaborate:	☐ Yes ☐ No ☒ DK D/K
24.	Has lead paint testing ever been conducted at the Property? *If YES, please forward a copy of test results.*	☐ Yes ☐ No ☒ DK D/K
25.	Is lead-based paint present at the Property? If yes, please elaborate:	☐ Yes ☐ No ☒ DK D/K
26.	Has radon testing ever been conducted at the Property? *If YES, please forward a copy of test results.*	☐ Yes ☐ No ☒ DK D/K
27.	Are there any problems with water intrusion, water damaged surfaces or excessive mold growth within the buildings? If yes, please elaborate:	☐ Yes ☐ No ☒ DK D/K

THORNBURGH
CONSULTING, INC.

ASTM E 1527-21/AAI - USER QUESTIONNAIRE

Instructions: This form should be completed by a representative of the USER of the Phase I ESA report and returned to Thornburgh via email or in-person. **The report USER is the entity on whose behalf the assessment is being prepared and that will be relying on the report for liability protections.**

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the USER must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The user should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete. Please complete the following questionnaire and provide any of the referenced information (if available) to Thornburgh @ Email: stephen.k@thornburghconsulting.com

USER Company Name:	Torrance Center South Complex LLC	USER Mailing Address:	21151 S. Western Ave., Torrance, CA 90501
Respondent Name & Email Address:	Ferdinand Fam fdfam@yahoo.com	Date of Completion:	3/20/2025

PROPERTY ADDRESS:	21151, 21171, and 21221 S Western Ave	Yes	No	DETAIL (optional):
1. SEARCH OF LAND TITLE RECORDS AND AULS: Has the User performed a review of land title records and judicial records for environmental liens and Activity and Use Limitations (AULs) filed or recorded against the property?			No	
1.A. IF YES TO THE ABOVE QUESTION: Did the review identify any environmental liens or Activity and Use Limitations (AUL), such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?			N/A	
1.B. IF YES TO QUESTION 1: Has the User provided the result of the search of land title and judicial records to Thornburgh?			N/A	
2. SPECIALIZED KNOWLEDGE OR EXPERIENCE OF THE PERSON SEEKING TO QUALIFY FOR THE LLP: Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?			No	
3. RELATIONSHIP OF THE PURCHASE PRICE TO THE FAIR MARKET VALUE OF THE PROPERTY IF IT WERE NOT CONTAMINATED: Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?			N/A	No purchase transaction. We are trying to get a permit to build housing.

PROPERTY ADDRESS:	21151, 21171, and 21221 S Western Ave	Yes	No	DETAIL (optional):
4. COMMONLY KNOWN/REASONABLY ASCERTAINABLE INFORMATION: Awareness of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases. Answer 4.a through 4.d. below:				
4.a. Do you know the past uses of the property?			N	
4.b. Do you know of specific chemicals that are present or were once present at the property?			N	
4.c. Do you know of spills or other chemical releases that have taken place at the property?			N	
4.d. Do you know of any environmental cleanups that have taken place at the property?			N	
5. THE DEGREE OF OBVIOUSNESS OF THE PRESENCE OR LIKELY PRESENCE OF CONTAMINATION AT THE PROPERTY, AND THE ABILITYTO DETECT THE CONTAMINATION BY APPROPRIATE INVESTIGATION: Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?			No	
6. LITIGATION/ADMINISTRATIVE PROCEEDINGS/GOVERNMENT NOTICES: As the User of this ESA, do you have knowledge of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.			No	
7.0 USER'S REASON FOR PERFORMING PHASE I ESA:	To obtain permit to build housing

Subject: **PHASE I ENVIRONMENTAL SITE ASSESSMENT**
Torrance Properties
21221, 21151 and 21171 South Western Avenue, Torrance, California 90501
AEI Project No. 379137

Dear Mr. Lackett:

AEI Consultants is pleased to provide the results of the Phase I Environmental Site Assessment (Phase I ESA) report of the above referenced address (the "subject property"). This assessment was authorized and performed in accordance with the scope of services outlined in the contract, the scope and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), and the requirements of the lender.

We appreciate the opportunity to provide services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (732) 414-2720 or gbelli@aeiconsultants.com.

Sincerely,

Eugene A. Belli, REPA, CHMM
Executive Vice President
AEI Consultants

EXECUTIVE SUMMARY

AEI Consultants (AEI) was retained by Morgan Stanley Private Bank, NA to conduct a Phase I ESA in conformance with the contract and the scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 21221, 21151 and 21171 South Western Avenue, Torrance, Los Angeles County, California. Any exceptions to, or deletions from, this practice are described in Sections 1.4, 1.5, and 1.6 of this report.

Property Description

PROPERTY INFORMATION	
Subject Property Name	Torrance Properties
Street Address(es)	21221, 21151 and 21171 South Western Avenue
City	Torrance
State	California
Location	Southwest side of Torrance Boulevard and S. Western Avenue intersection
Vicinity Characteristics	Industrial, residential and commercial
Approximate Site Acreage/Source	7.75/Tax Assessor
Subject Property Type	Office
Subject Property Use(s)	Office
Assessor Parcel Number(s)	7355-032-011, 7355-032-012, 7355-032-010

Regulatory Database Listings	EDR Hist Cleaner, HAZNET, SLIC, RCRA-SQG
Institutional Controls	None identified
Engineering Controls	None identified

Environmental Liens	None identified

Based on a review of historical sources, the subject property was identified with a single family residence and a commercial structure in the early 1920s. By the early 1950s the single family residence was removed and additional commercial structures were added on the northwest portions of the site and the south portions of the property. By the 1960s portions of the west adjoining property building were located on the central and south portions of the property. Buildings on the northeast portion of the site were identified to be office buildings. Buildings and operations on the west and south portions of the property from the 1950s to the early 1980s were identified as Torrance Tubing and Conduit Company. The company operations consisted of tube milling, galvanizing, electroplating, and warehouseing of tubing and conduit. The property remained unchanged until 1984, when Torrence Tubing operations were terminated and the property began redevelopment with current improvements starting in 1986 and completed in 1988. Please refer to Section 5.1 for further discussion regarding impacts identified during demolition of Torrance Tubing. The current property structures have been occupied by administrative offices since development.

The following historical addresses were associated with the subject property: 1704 Torrance Boulevard, 1724 Torrance Boulevard, 1754 Torrance Boulevard, 1204 Huber Street, 1703 W 213th Street, 1707 W 213th Street, 1739 W. 213th Street, 1205 & 1211 Bow Avenue. These addresses were also researched as part of this assessment.

The immediately surrounding properties consist of the following:

Direction from Site	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Torrance Boulevard followed by: Multi-tenant office/warehouses (1741 and 1751 Torrance Boulevard) Keith's Automotive Service Center (1717 Torrance Boulevard) Multi-tenant office/warehouses (21081 S. Western Avenue)	UST, EDR Hist Auto (1717 Torrance Boulevard)
East	S. Western Avenue followed by: EZ Smog (21138 S. Western Avenue) Starbucks (21176 S. Western Avenue) Multi-family residential Printing Graphics (21236 S. Western Avenue)	EDR Hist Auto (Former 21160 S Western Ave); LUST, EDR Hist Auto, RCRA-SQG, FINDS, ECHO (21138 S. Western Avenue)
South	W. 213th Street followed by: Miyako Hybrid (21381 S. Western Avenue)	None identified
West	Multi-tenant offices (21241 S. Western Avenue) Skylark Torrance Mobile Park (1820 Torrance Blvd)	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

Based upon topographic map interpretation, the direction of groundwater flow beneath the subject property is inferred to be to the southwest. Based on groundwater monitoring data for a nearby site at 21138 South Western Avenue (located approximately adjacent east of the subject property) obtained from 2016 Subsurface Environmental Site Assessment, groundwater is presumed to be present at an estimated depth of 47 feet bgs.

CONCLUSIONS

AEI has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of 21221, 21151 and 21171 South Western Avenue, Torrance, Los Angeles County, California, the Property. Any exceptions to or deletions from this practice are described in Section 1.5 of this report. This assessment has revealed no evidence of Recognized Environmental Conditions (RECs) or Controlled Recognized Environmental Conditions (CRECs) in connection with the subject property.

AEI's assessment included an evaluation of other Environmental Conditions including, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of asbestos-containing materials, radon, lead-based paint, wetlands and mold and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

This assessment has revealed no evidence of related conditions of concern in connection with the subject property.

RECOMMENDATIONS

As a result of this assessment, AEI does not recommend further investigation of the subject property at this time.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I ESA performed in conformance with the contract and scope and limitations of ASTM Standard Practice E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the property located at 21221, 21151 and 21171 South Western Avenue, Torrance, Los Angeles County, California (Appendix A: Figures and Appendix B: Property Photographs).

1.1 Scope of Work

The purpose of the Phase I ESA is to assist the client in identifying potential RECs, in accordance with ASTM E1527-13, associated with the presence of any hazardous substances or petroleum products, their use, storage, and disposal at and in the vicinity of the subject property. Property assessment activities focused on: 1) a review of federal, state, tribal and local databases that identify and describe underground fuel tank sites, leaking underground fuel tank sites, hazardous waste generation sites, and hazardous waste storage and disposal facility sites within the ASTM approximate minimum search distance; 2) a property and surrounding site reconnaissance, and interviews with the past and present owners and current occupants and operators to identify potential environmental contamination; and 3) a review of historical sources to help ascertain previous land use at the site and in the surrounding area.

The goal of AEI Consultants in conducting the environmental site assessment was to identify the presence or likely presence of any hazardous substances or petroleum products on the subject property that may indicate an existing release, a past release, or a material threat of a release of any hazardous substance or petroleum product into the soil, groundwater, or surface water of the subject property. If such conditions were identified, they would be characterized as one of the following:

Recognized Environmental Condition (REC) - is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

Historical Recognized Environmental Condition (HREC) - A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

Controlled Recognized Environmental Condition (CREC) - A past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

De minimis Conditions - Are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought

to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions nor controlled recognized environmental conditions.

Other Environmental Considerations - These include, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

1.2 Additional Services

Other Environmental Considerations such as ACMs, LBP, lead in drinking water, radon, mold, and wetlands can result in business environmental risks for property owners which may disrupt current or planned operations or cash flow and are generally beyond the scope of a Phase I assessment as defined by ASTM E1527-13. Based upon the agreed-on scope of services this ESA did not include subsurface or other invasive assessments, business environmental risks, or other services not specifically identified and discussed herein.

1.3 Significant Assumptions

The following assumptions are made by AEI in this report. AEI relied on information derived from secondary sources including governmental agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, and personal interviews. AEI has reviewed and evaluated the thoroughness and reliability of the information derived from secondary sources including government agencies, the client, designated representatives of the client, property contact, property owner, property owner representatives, computer databases, or personal interviews. It appears that all information obtained from outside sources and reviewed for this assessment is thorough and reliable. However, AEI cannot guarantee the thoroughness or reliability of this information.

Groundwater flow, unless otherwise specified by on-site well data or well data from the subject property or nearby sites, is inferred from contour information depicted on the USGS topographic maps. AEI assumes the subject property has been correctly and accurately identified by the client, designated representative of the client, property contact, property owner, and property owner's representatives.

1.4 Limitations

Property conditions, as well as local, state, tribal, and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this assessment apply strictly to the environmental regulations and property conditions existing at the time the assessment was performed. Available information has been analyzed using currently accepted assessment techniques and it is believed that the inferences made are reasonably representative of the property. AEI makes no warranty, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the assessment.

Considerations identified by ASTM as beyond the scope of a Phase I ESA that may affect business environmental risk at a given property include the following: ACMs, radon, LBP, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene,

health and safety, ecological resources, endangered species, indoor air quality, mold, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of the property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

If requested by the client, these non-scope issues are discussed herein. Otherwise, the purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under CERCLA. ASTM Standard Practice E1527-13 and the United States EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) constitute the "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined in:

1. 42 U.S.C. § 9601(35)(B), referenced in the ASTM Standard Practice E1527-13.
2. Sections 101(35)(B) (ii) and (iii) of CERCLA and referenced in the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312).
3. 42 U.S.C. § 9601(40) and 42 U.S.C. § 9607(q).

The Phase I ESA is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the property. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, and observations and conditions that existed on the date and time of the property reconnaissance.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely affect the findings, conclusions, and recommendations expressed in this report.

AEI's limited radon screening, if included, is intended to provide a preliminary screening to evaluate the potential presence of elevated radon concentrations at the site. The proposed scope is not intended to define the full extent of the presence of radon at the subject property. As such, the results should be used for lending purposes only. The recommendations and conclusions presented as a result of the limited preliminary radon screening apply strictly to the property conditions existing at the time the sampling was performed. The sample analytical results are only valid for the time, place, and condition of the site at the time of collection and AEI does not warrant that the results will be repeatable or are representative of past or future conditions.

1.5 Limiting Conditions/Deviations

The performance of this Phase I ESA was limited by the following:

- Historical city directories dated from the 1960s through the late 1980s were not available for majority of the Subject Property historical addresses from EDR and/or the Torrance Public Library Consulted. Since the subject property has historically been commercially developed, the lack of historical city directories reduces AEI's ability to verify that no dry cleaners or other tenants of concern have occupied the property. However, as addressed in Section 5.0, the site was part of a redevelopment plan, which received an NFA. Therefore, if any previous tenants impacted the property, this would have been addressed. As such, this limitation will not impact the conclusions of this assessment.

1.6 Data Gaps and Data Failure

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required by the Standard, despite good faith efforts to gather such information. Pursuant to ASTM E1527-13, only significant data gaps, defined as those that affect the ability of the Environmental Professional to identify RECs, need to be documented.

Data failure is one type of data gap. According to ASTM E1527-13, data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met. Pursuant to ASTM E1527-13, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier, or periods of five years or greater.

1.6.1 Data Failure

AEI did not identify evidence of data failure during the course of this assessment.

1.6.2 Data Gaps

AEI did not identify significant data gaps which affected our ability to identify RECs.

1.7 Reliance

All reports, both verbal and written, are for the benefit of Morgan Stanley Private Bank, NA. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of AEI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with AEI granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against AEI, its officers, employees, vendors, successors, or assigns. Reliance is provided in accordance with AEI's Proposal and Standard Terms and Conditions executed by Morgan Stanley Private Bank, NA on October 19, 2017. The limitation of liability defined in the Terms and Conditions is the aggregate limit of AEI's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location and Description

PROPERTY INFORMATION	
Subject Property Name	Torrance Properties
Street Address(es)	21221, 21151 and 21171 South Western Avenue
City	Torrance
State	California
Location	Southwest side of Torrance Boulevard and S. Western Avenue intersection
Vicinity Characteristics	Industrial, residential and commercial
Approximate Site Acreage/Source	7.75/Tax Assessor
Subject Property Type	Office
Subject Property Use(s)	Office
Assessor Parcel Number(s)	7355-032-011, 7355-032-012, 7355-032-010

Engineering Controls	None identified
Environmental Liens	None identified

Utility provider information listed in the table above is provided by Ms. Rui Gan , Property Manager, unless otherwise noted above.

Refer to Appendix A: Figures and Appendix B: Property Photographs for site location and description.

2.2 Site and Vicinity Characteristics

The immediately surrounding properties consist of the following:

Direction from Site	Tenant/Use (Address)	Regulatory Database Listing(s)
North	Torrance Boulevard followed by: Multi-tenant office/warehouses (1741 and 1751 Torrance Boulevard) Keith's Automotive Service Center (1717 Torrance Boulevard) Multi-tenant office/warehouses (21081 S. Western Avenue)	UST, EDR Hist Auto (1717 Torrance Boulevard)
East	S. Western Avenue followed by: EZ Smog (21138 S. Western Avenue) Starbucks (21176 S. Western Avenue) Multi-family residential Printing Graphics (21236 S. Western Avenue)	EDR Hist Auto (Former 21160 S Western Ave); LUST, EDR Hist Auto, RCRA-SQG, FINDS, ECHO (21138 S. Western Avenue)
South	W. 213th Street followed by: Miyako Hybrid (21381 S. Western Avenue)	None identified
West	Multi-tenant offices (21241 S. Western Avenue) Skylark Torrance Mobile Park (1820 Torrance Blvd)	None identified

If the surrounding properties are listed in the regulatory database, please refer to Section 5.1 for discussion.

2.3 Physical Setting

Geology: According to information obtained from the USGS, the area surrounding the subject property is underlain by old alluvial floodplain deposits of the Quaternary-period consisting of moderately well
consolidated, poorly sorted, gravel, sand, silt, and clay.

USGS Topographic Map:	Torrance, California Quadrangle
Nearest surface water to subject property:	Drainage Canal/2 Miles northeast
Gradient Direction/Source:	Southwest/ 2016 Subsurface Assessment (21138 S. Western Avenue)
Estimated Depth to Groundwater/Source:	47 feet bgs/ 2016 Subsurface Assessment (21138 S. Western Avenue)
Wetlands:	No / National Wetlands Inventory
Flood Zone Information:	Zone X / Fema Map # 06037C1935F dated 09/26/ 2008

Note: Groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm

water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

3.0 HISTORICAL REVIEW OF SITE AND VICINITY

3.1 HISTORICAL SUMMARY

Reasonably ascertainable standard historical sources as outlined in ASTM Standard E1527-13 were used to determine previous uses and occupancies of the subject property that are likely to have led to RECs in connection with the subject property. A chronological summary of historical data found, including but not limited to aerial photographs, historical city directories, Sanborn fire insurance maps, and agency records, is as follows:

Date Range	Subject Property Description/Use	Source(s)
1928, 1929, 1939	Single family residence, small commercial structure, undeveloped land, Bow Avenue and Huber Street	Sanborn Map
1945, 1947	Multiple commercial structures	Aerial Photographs
1952, 1957	Multiple commercial size structures and associated parking, (1724 Torrance Blvd - City of Torrance, 1754 - Alano Club of Torrance)	Aerial Photographs, City directories
1960, 1963, 1970	Commercial structures on the central, east and northeast portions of the property are no longer present. Portion of the west adjoining property buildings are located on the central and south portion of the property. Asphalt parking is shown on the northeast portion of the property. Portions property are addressed 1739 W. 213th Street and is occupied by Torrance Tube and Conduit Company.	Aerial Photographs, Regulatory documents
1980, 1983	No significant changes from the 1970 aerial photograph with exception it appears equipment or vehicle storage on the east portions of the property. 1724 Torrance Boulevard is identified as Coast Mobile Home Sales.	Aerial Photographs, City directories
1989-2012	Current improvements.	Aerial Photographs, City directories, site observation

Based on a review of historical sources, the subject property was identified with a single family residence and a commercial structure in the early 1920s. By the early 1950s the single family residence was removed and additional commercial structures were added on the northwest portions of the site and the south portions of the property. By the 1960s portions of the west adjoining property building were located on the central and south portions of the property. Buildings on the northeast portion of the site were identified to be office buildings. Buildings and operations on the west and south portions of the property from the 1950s to the early 1980s were identified as Torrance Tubing and Conduit Company. The company operations consisted of tube milling, galvanizing, electroplating, and warehouseing of tubing and conduit. The property remained unchanged until 1984, when Torrence Tubing operations were terminated and the property began redevelopment with current improvements starting in 1986 and completed in 1988. Please refer to Section 5.1 for further discussion regarding impacts identified during demolition of Torrance Tubing. The current property structures have been occupied by administrative offices since development.

The following historical addresses were associated with the subject property: 1704 Torrance Boulevard, 1724 Torrance Boulevard, 1754 Torrance Boulevard, 1204 Huber Street, 1703 W

213th Street, 1707 W 213th Street, 1739 W. 213th Street, 1205 & 1211 Bow Avenue. These addresses were also researched as part of this assessment.

3.2 Aerial Photographs

AEI reviewed aerial photographs of the subject property and surrounding area. A search was made of the EDR collection of aerial photographs. Aerial photographs were reviewed for the following years:

Year(s)	Subject Property Description	Adjacent Site Descriptions
1928	A commercial structure to the northeast. Single family residence to the south. Remaining areas appear undeveloped. A road dissects the property.	NORTH: Torrance Boulevard followed by undeveloped. EAST: S. Western Avenue followed by undeveloped land. SOUTH: W 213th Street followed by residences WEST: Roadway and undeveloped land
1947	Commercial structures and associated parking on the north portion of property. Parking lot of west adjoining property is located on the south portion of the property. It appears a creek runs through the northeast boundary of the property.	NORTH: Torrance Boulevard followed by undeveloped. NORTHEAST: Torrance Boulevard and S. Western Avenue followed by large commercial structure. EAST: S. Western Avenue followed by undeveloped land. SOUTH: W 213th Street followed by residences WEST: Roadway and undeveloped land, residential, commercial structure and large commercial/or industrial building
1952	No significant changes from the 1947 aerial photograph with exception of a two small commercial structures and associated parking is located on the south portion of the property.	NORTH: Torrance Boulevard followed by undeveloped. NORTHEAST: Torrance Boulevard and S. Western Avenue followed by large commercial structure. EAST: S. Western Avenue followed by a commercial structure and undeveloped land. SOUTH: W 213th Street followed by residences WEST: Roadway followed by residential, Two large commercial/or industrial buildings

Year(s)	Subject Property Description	Adjacent Site Descriptions
1963	No significant changes from the 1952 aerial photograph with exception of portions of west adjoining buildings are located on the central and south portions of the buildings. Parking lot is located on the northeast portions of the property.	NORTH: Torrance Boulevard followed by undeveloped. NORTHEAST: Torrance Boulevard and S. Western Avenue followed by large commercial structure. EAST: S. Western Avenue followed by a two commercial structures and canopy consistent with gas stations, commercial structures and undeveloped land. SOUTH: W 213th Street followed by residences WEST: Roadway followed by residential, Two large commercial/or industrial buildings
1970	No significant changes from the 1963 aerial photograph.	NORTH: Torrance Boulevard followed by undeveloped. NORTHEAST: Torrance Boulevard and S. Western Avenue followed by large commercial structure. EAST: S. Western Avenue followed by a two commercial structures and canopy consistent with gas stations, commercial structures and current multi-family residential. SOUTH: W 213th Street followed by cleared land. WEST: Roadway followed by residential, Two large commercial/or industrial buildings
1983	No significant changes from the 1970 aerial photograph with the exception of vehicle or equipment storage on the east portion of the property.	NORTH: Torrance Boulevard followed by the current office/warehouse structures and auto repair structure. NORTHEAST: Torrance Boulevard and S. Western Avenue followed by large commercial structure. EAST: S. Western Avenue followed by a commercial structure and canopy consistent with gas stations, commercial structures and current multi-family residential. SOUTH: W 213th Street followed by cleared land. WEST: Roadway followed by residential, Two large commercial/or industrial buildings
1989, 1994, 2002, 2005	The property is shown redeveloped with the current improvements.	NORTH: Torrance Boulevard followed by the current improvements EAST: S. Western Avenue followed by a commercial structure and canopy consistent with gas stations, commercial structures and current multi-family residential. SOUTH: W 213th Street followed by cleared land. WEST: Current improvements

Year(s)	Subject Property Description	Adjacent Site Descriptions
2009, 2010, 2012	The property is shown redeveloped with the current improvements.	NORTH: Torrance Boulevard followed by the current improvements EAST: S. Western Avenue followed by a commercial structure and canopy consistent with gas stations, commercial structures and current multi-family residential. SOUTH: W 213th Street followed by current improvements WEST: Current improvements

Based on the aerial photograph review, the adjacent site to the east (21240 S Western Ave) was formerly developed as a gas station circa 1960-1970; the adjacent site to the east (21138 S. Western Ave) has operated a gas station since 1950; these sites are further discussed in Section 5.1.

If available, copies of historical aerial photographs are provided in the report appendices.

3.3 Sanborn Fire Insurance Maps

Sanborn Fire Insurance maps were developed in the late 1800s and early 1900s for use as an assessment tool for fire insurance rates in urbanized areas. A search was made of the EDR collection of Sanborn Fire Insurance maps.

The following maps were reviewed:

Year(s)	Subject Property Description (Listed Address)	Adjacent Site Descriptions
1929, 1932	Single-family residence (1711 W. 213 Street), undeveloped land, Huber Street, Bow Avenue. The northeast portion of the property is not depicted in the sanborn map.	NORTH: Torrance Boulevard EAST: S. Western Avenue SOUTH: W 213th Street WEST: Huber Street, Undeveloped land, Oil Tool Manufacturing and Mechanical Shop (1739 W. 213 Street)

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the Sanborn map review.

If available, copies of historical Sanborn maps are provided in the report appendices.

3.4 CITY DIRECTORIES

A search of historical city directories was conducted for the subject property utilizing EDR. The following table summarizes the results of the city directory search.

Year(s)	Address - Occupant Listed
1940	1704 Torrance Blvd - Not listed
	1724 Torrance Blvd - Not listed
	1754 Torrance Blvd - Not listed
	1204 Huber Street - Not listed
	1711 W. 213th Street - Not listed
	1703 W. 213th Street - Not listed
	1707 W. 213th Street - Not listed
	1739 W. 213th Street - Andersen Carlson Manufacturing
	1205 7& 1211 Bow Avenue - Not listed
	21221 S. Western Ave - Not listed
	21151 S. Western Ave - Not listed
	21171 S. Western Ave - Not listed
1957, 1960	1704 Torrance Blvd - Not listed
	1724 Torrance Blvd - City of Torrance
	1754 Torrance Blvd - Alano Club of Torrance
	1204 Huber Street - Not listed
	1711 W. 213th Street - Not listed
	1703 W. 213th Street - Not listed
	1707 W. 213th Street - Not listed
	1739 W. 213th Street - Rome Cable Corp (Torrance Plant)
	1205 7& 1211 Bow Avenue - Not listed
	21221 S. Western Ave - Not listed
	21151 S. Western Ave - Not listed
	21171 S. Western Ave - Not listed

Year(s)	Address - Occupant Listed

Western Ave - Multi-tenant offices 21151 S. Western Ave - Science applications international 21171 S. Western Ave - Multi-tenant offices
2000, 2010, 2015	1704 Torrance Blvd - Not listed 1724 Torrance Blvd - Not listed 1754 Torrance Blvd - Not listed 1204 Huber Street - Not listed 1711 W. 213th Street - Not listed 1703 W. 213th Street - Not listed 1707 W. 213th Street - Not listed 1739 W. 213th Street - Not listed 1205 7& 1211 Bow Avenue - Not listed 21221 S. Western Ave - Multi-tenant offices 21151 S. Western Ave - Multi-tenant offices 21171 S. Western Ave - Multi-tenant offices

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the city directory review.

If available, copies of historical city directories are provided in the report appendices.

3.5 Historical Topographic Maps

A search of historical topographic maps was conducted for the subject property utilizing USGS. Topographic maps were reviewed for the following years:

Year(s)	Subject Property Description	Adjacent Site Descriptions
1985	No features depicted.	NORTH: Torrance Boulevard followed by undeveloped land EAST: S. Western Avenue followed by shaded region SOUTH: W. 213th Street followed by undeveloped land WEST: Large commercial structure

AEI did not identify potential environmental concerns in association with the historical use of the subject property during the historic topographic map review.

If available, copies of historical topographic maps are provided in the report appendices.

3.6 Chain of Title

In accordance with our approved scope of services, a chain of title search was not performed as part of this assessment.

4.0 REGULATORY AGENCY RECORDS REVIEW

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous substance use, storage, and/or unauthorized releases that may have impacted the subject property. In addition, information pertaining to AULs, defined as legal or physical restrictions, or limitations on the use of, or access to, a site or facility, is requested.

4.1 Local Environmental Health Department and/or State Environmental Agency

On October 30, 2017, AEI contacted the Los Angeles County Department of Public Health (LADPH), Site Inspections, Site Mitigation, and Emergency Response divisions via email for information on the subject property. Files at this agency may contain information regarding hazardous substance storage and use, underground storage tanks, unauthorized releases of petroleum hydrocarbons or other contaminants that may affect the soil or groundwater in the area, wells and/or septic systems.

On November 6, 2017, AEI received a response from the LADPH Emergency Response division stating that no records are on file for 21221, 21151 and 21171 S. Western Avenue. A response has not been received regarding historical addresses associated with the property, nor from the other LADPH divisions. Once responses are received they will be reviewed, and if any environmental concerns are identified they will be addressed in an addendum to this report.

Review of information on file for the subject property at the Los Angeles County Environmental Health Department did not reveal current or prior use or storage of hazardous substances on site.

4.2 Fire Department

On October 30, 2017, AEI reviewed records on file with the Los Angeles Fire Department (LAFD), Hazardous Materials Division. The site addresses are were not identified on any hazardous materials inventory list.

Review of information on file for the subject property at the Los Angeles Fire Department did not reveal current or prior use or storage of hazardous substances on site.

4.3 Building Department

On October 30, 2017, AEI visited the City of Torrance Department of Building and Safety for information on the subject property in order to identify historical tenants, features of concern and property use. On October 30, 2017, AEI reviewed the City of Torrance Department of Building and Safety online permits, and visited the City of Torrance office on October 30, 2017 to review additional permits available on microfilm

Year(s)	Owner/Applicant	Description of Permit and Building Use
1988	Gascon Mar	Certificate of Occupancy/ 5 two-story office buildings

Evidence indicating current or prior use or storage of hazardous substances was not on file for the subject property with the City of Torrance.

4.4 Planning Department

On October 30, 2017, AEI contacted the City of Torrance via office visit for information on the subject property in order to identify AULs associated with the subject property.

AEI spoke with FOIA, who indicated that evidence indicating the existence of AULs was not on file for the subject property with the City of Torrance.

4.5 County Assessor Office

On October 30, 2017, AEI contacted the Los Angeles County assessor's office via online for information on the subject property in order to determine the earliest recorded date of development and use.

According to the Los Angeles County assessor's office, the current buildings were constructed in 1988.

4.6 Oil and Gas Wells/Pipelines

On October 30, 2017, AEI reviewed the California Division of Oil, Gas & Geothermal Resources (DOGGR) maps and the National Pipeline Mapping System (NPMS) Public Map Viewer concerning the subject property and nearby properties. The maps contain information regarding oil and gas development.

According to the DOGGR map, an oil or gas well is located adjacent east of the site. Records indicated an abandoned oil well is located at the northeast corner of Western Avenue and 213th Street. That well (R-K Drilling Co., Inc. #1) was apparently drilled to a depth of 4,150 feet below grade and then abandoned in 1923. AEI did not identify evidence of environmental concerns during the map review.

According to the NPMS Public Map Viewer, pipelines are not located within 500 feet of the subject property. AEI did not identify evidence of environmental concerns during the map review.

4.7 Other Agencies Searched

On October 30, 2017, AEI contacted the ***Los Angeles Regional Water Quality Control Board (LARWQCB)*** via email for information pertaining to leaking underground storage tanks or other releases of petroleum hydrocarbons or hazardous substances potentially affecting groundwater aquifers. AEI received a response from the LARWQCB on October 30, 2017, stating that no records are on file for the subject property. Documentation is provided in Appendix F.

On October 30, 2017, AEI reviewed the ***State Water Resources Control Board (SWRCB) GeoTracker*** website for information pertaining to USTs, leaking USTs, and other releases of hazardous substances at the subject property or surrounding properties. The subject property does not appear on the GeoTracker website.

On October 30, 2017, AEI reviewed the ***DTSC Envirostor*** website for information pertaining to permitting and releases of hazardous substances at the subject and nearby properties. The subject property is not listed on the Envirostor website.

On October 30, 2017, AEI reviewed the ***DTSC Hazardous Waste Tracking System (HWTS)*** website for information pertaining to hazardous waste generation. According to the HWTS, 0.02250 ton of off-spec, aged or surplus organics were generated at the subject property building 21171 S. Western Avenue in 2014 and 0.01250 in 2015.

On October 30, 2017, AEI reviewed the ***South Coast Air Quality Management District (SCAQMD)*** Facility Information Detail (FIND) website for information regarding any records of Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) issued to occupants of the subject property and associated with air emission equipment primarily related to stationary sources of air pollution, such as dry cleaning machines, boilers, and/or underground storage tanks. Information was not on file for any property addresses.

4.8 State Environmental Superliens and Property Transfer Laws

On October 30, 2017, the NETR Online Environmental Lien and AUL State Statuses website was visited to determine if the State of California has environmental superlien and/or property transfer laws which would allow environmental authorities the right to place a first priority lien on the subject property.

According to the NETR Online Environmental Lien and AUL State Statuses website, the State of California does have environmental superlien and/or property transfer laws.

5.0 REGULATORY DATABASE RECORDS REVIEW

AEI contracted Environmental Database Resources, Inc. (EDR) to conduct a search of publicly available information from federal, state, tribal, and local databases containing known and suspected sites of environmental contamination and sites of potential environmental significance. Data gathered during the current regulatory database search is compiled by EDR into one regulatory database report. Location information for listed sites is designated using geocoded information provided by federal, state, or local agencies and commonly used mapping databases with the exception of "Orphan" sites. Due to poor or inadequate address information, Orphan sites are identified but not geocoded/mapped by EDR, rather, information is provided based upon vicinity zip codes, city name, and state. The number of listed sites identified within the approximate minimum search distance from the federal and state environmental records database listings specified in ASTM Standard E1527-13 is summarized in Section 5.1, along with the total number of Orphan sites. A copy of the regulatory database report is included in Appendix C of this report.

The subject property was identified in the regulatory database report as follows: EDR Historical Cleaners and CA HAZNET. See Section 5.1 for additional discussion.

In determining if a listed site is a potential environmental concern to the subject property, AEI generally applies the following criteria to classify the site as lower potential environmental concern: 1) the site only holds an operating permit (which does not imply a release), 2) the site's distance from, and/or topographic position relative to, the subject property, and/or 3) the site has recently been granted "No Further Action" by the appropriate regulatory agency.

5.1 RECORDS SUMMARY

Database	Search Distance (Miles)	Subject Property Listed	Number of Listings within Search Distance	Recognized Environmental Condition or Other Environmental Consideration (Yes or No)
NPL	1	No	1	No
DELISTED NPL	0.5	No	0	
SEMS (formerly CERCLIS)	0.5	No	1	No
SEMS-ARCHIVE (formerly CERCLIS NFRAP)	0.5	No	5	No
RCRA CORRACTS	1	No	3	No
RCRA-TSDF	0.5	No	1	No
RCRA LQG, SQG, CESQGs, VGN, NLR	SP/ADJ	No	11	No
US ENG CONTROLS	SP	No	1	No
US INST CONTROLS	SP	No	1	No
ERNS	SP	No	0	
STATE/TRIBAL HWS	1	No	0	
STATE/TRIBAL SWLF	0.5	No	1	No
STATE/TRIBAL REGISTERED STORAGE TANKS	SP/ADJ	No	0	

Database	Search Distance (Miles)	Subject Property Listed	Number of Listings within Search Distance	Recognized Environmental Condition or Other Environmental Consideration (Yes or No)
STATE/TRIBAL LUST	0.5	No	8	No
STATE/TRIBAL EC and IC	SP	No	0	
STATE/TRIBAL VCP	0.5	No	1	No
STATE/TRIBAL BROWNFIELD	0.5	No	0	
ORPHAN	N/A	No	3	No; none of the identified orphan sites are located in the immediate vicinity (500-feet) of the subject property, and/or based upon the distance and relative gradient, the sites are not expected to represent a significant environmental concern.
ADDITIONAL ENVIRONMENTAL RECORD SOURCES	SP/ADJ	Yes	87	Yes, SP and adjoining discussed below

Facility Name: Continentals One Hour HTG & A
Database(s): EDR Hist Cleaner Address: 21151 S Western Avenue Distance: Subject Property Direction: Subject Property
Comments: The EDR listing is associated with a former tenant. Based on the Property operations since 1987, this listing appears to be associated with company office. No dry cleaning operations have been conducted at the property. As such, this listing is not considered an environmental concern.

Facility Name: ADT LLC DBA ADT Security Services
Database(s): HAZNET Address: 21171 S. Western Avenue Distance: Subject Property Direction: Subject Property
Comments: The listing is associated with the ADT tenant located in the 21171 S. Western Avenue building. The tenant generates and/or stores 0.0125 tons of off-specification, aged or surplus organics. No violation were on file. As such, no environmental concerns were identified.

Facility Name: City of Torrance Redevelopment Agency
Database(s): SLIC Address: 1739 W. 213th Street Distance: Subject Property Direction: Subject Property

The Subject Property was formerly part of a larger 12 acres property occupied by Torrance Tubing and Conduit Company (a tube milling, galvanizing, electroplating , and warehousing of tubing and conduit facility) addressed at 1739 W. 213th Street. The tubing company operated at the Subject Property from the 1950s to 1984 when the facility was terminated.

Torrance Tubing retained BCL Associates, Inc. to prepare a Site Characterization and Remedial Acton Plan (RAP) for the site and was approved the Los Angeles County Health Department (LACHD) on February 18, 1986. The RAP was to help assist with the site demolition efforts. Remedial actions and verification sampling and testing efforts commenced in June and were approved by LACHD in October 1986.

Grading and construction activities at the site commenced in September 1986. On October 13, 1986, an oily substance was encountered while grading operations were being performed in a series of trenches that were dug along the property line adjacent to Western Avenue. It was apparent that this liquid was flowing into the property from Western Avenue. Ultimately, the on-site limits of the oily soil were delineated after the excavation of additional trenches near the discovered contamination, and it became apparent that the area contaminated by the liquid was that which had already been cleaned up as part of our original remedial work, since it had been identified as a Buried Solid Waste area in BCL's original report. The City of Torrance Building and Safety Department was notified of the situation immediately. The City in turn notified other potentially interested agencies, including RWQCB, the Los Angeles County Department of Health Services, and the California Division of Oil and Gas.

Following several meetings on-site with the involved parties, our building contractor proposed a plan of action to prevent further infiltration of the oily substance beneath the site and to allow grading and building operations to continue. The plan, which was approved verbally by the Regional Water Quality Control Board (RWQCB) and the City, included the following major actions:

- Installing three (3) dewatering-wells along the property line adjacent to Western Avenue.
- Pumping the wells and conveying the Baker tanks located to capture the infiltrating oily substance material via an above-ground pipeline to on-site, hence to approved treatment sites.
- Excavating the impacted area, some of which contained the oily substances, and stockpiling it at another location on-site pending development of a plan for its future management. It will be covered with a synthetic tarpaulin
- Constructing a clay barrier along the property boundary adjacent to Western Avenue to prevent the further infiltration of the oil substance.
- Filling in the excavation with clay fill material obtained from another location on-site.
- Removing the three (3) wells and terminating pumping of oily substance.

At this time, construction of the proposed development at the site was near completion.

One soil sample was analyzed for reactivity, volatile organics, total hydrocarbons, corrosivity and ignitability based on the criteria used by the California Department of Health Services to identify hazardous wastes. In addition to the soil sample, three samples of the "raw" oily substance encountered at the site were collected and was analyzed to determine whether the oily substance was a crude or waste refined product, and if crude, to determine its source. The analytical results concluded that the oily soil was not ignitable, corrosive, or reactive. There was a 5% concentration of Total petroleum hydrocarbons detected. No chlorinated hydrocarbons were present in the oily substance samples, but a cumulative concentration of 13 parts per million (ppm) of aromatic compounds (e.g., benzene, toluene, xylene) were identified. Based on the results of the compositional analyses performed on the liquid hydrocarbon (i.e., oily substance) sample, it was concluded that the analytical data was consistent with those obtained from analyses of local Los Angeles Basin crude oil.

The proposed plan for managing the stockpiled soil is to use the material as subbase for on-site parking areas and roadways (which material is routinely treated with oil anyway). As such, the material will be covered with asphalt pavement, which combined with site drainage structures will minimize precipitation

from infiltrating through it. The site reportedly was granted a No Further Action Required. The supporting bases for this action included:

- The oily soil was removed from an area that was addressed in the County-approved RAP. The County confirmed that previous remedial measures undertaken in this area conformed to the RAP.
- The analytical test results for the sample collected are consistent with the verification sample results previously accepted by the County for this on-site area
- Based on the analytical test for the oily substance, the soil is impregnated with an asphaltic crude, consistent with crude oil found naturally in the Torrance area.

No additional information was identified in historical documentation reviewed.

Due to the reported NFA issued for the redevelopment of the property, the mitigation plans outlined above, the present impervious surfaces and the backround levels of crude oil found in the area, this is considered a HREC.

Facility Name: Torrance Tubing & Conduit Company
Database(s): RCRA-SQG, FINDS and ECHO Address: 1739 W. 213th Street Distance: Subject Property and Adjoining West Direction: Subject Property and Adjoining West
Comments: The facility is listed as a hazardous waste handler in 1980. No violations were on file. Additional regulatory documents have been requested. A response to our request has not been received as of the date of the report. As such, this listing is not considered an environmental concern.

Facility Name: John Bacarella/ Former Gas Station/ EZ Smog/ Jesse's Auto Service
Database(s): LUST, EDR Historical Auto Station, RCRA-SQG, FINDS, ECHO Address: 21160, 21138 S. Western Avenue Distance: Adjacent Direction: East
Comments: The Former Gas Station (currently EZ Smog) is located at 21138 South Western Avenue, adjacent northeast of the subject site beyond S. Western Avenue and 10 feet lower than the subject site. The facility operated as a gas station and auto repair facility from the early 1960s to 2014. According to the SWRCB's GeoTracker online database, the site is listed as Open-Site Assessment as of 2/7/2015. According to a June 8, 2017 letter that was prepared by KCE Matrix, Inc. (KCE), the letter requested that the frequency of groundwater monitoring be changed from semi-annually to annually due to the rationale that groundwater had not been significantly impacted, as demonstrated during four rounds of monitoring from three monitoring wells (MW-1 – MW-3) from 2014 to 2016 and groundwater grab sampling in 2016. The maximum historical concentrations of total petroleum hydrocarbons as gasoline (TPHg) and benzene have been 1,520 ug/L and 12 ug/L, respectively, but neither TPHg or benzene were detected in 2015 to 2016. On June 20, 2017, the LARWQCB concurred with the proposed change in groundwater monitoring frequency from semi-annually to annually. Based on the identification of a responsible party, lack of migration of contamination off-site and elevation to the subject site and results of the ongoing groundwater monitoring, the site is not likely to be of significant environmental concern to the subject property. In addition, the facility is listed as a hazardous waste handler in 1986. No violations were on file. Additional regulatory documents have been requested. A response to our request has not been received as of the date of the report.

Facility Name: Cobage Bros Inc

Database(s): UST, SWEEPS UST, HIST UST Address: 1805 Torrance Blvd Distance: Adjacent Direction: Northwest
Comments: The Former facility is listed on the UST, SWEEPS UST and HIST UST for a 10,000-gallon gasoline UST installed in 1964 and removed in the mid-1990s. No violations, spill or releases were identified with the UST. As such, this listing is not considered a significant environmental concern to the Subject Property.

Facility Name: Keiths Service Center Inc./ Three B Tire
Database(s): EDR Hist Auto and UST Address: 1717 Torrance Blvd Distance: Adjacent Direction: North
Comments: The facility is listed on the EDR Hist Auto Station database in association with auto repair services from 2011 through 2014. In addition, the facility is listed with formerly operating a UST. No additional information was provided regarding the size, contents and date of removal of the UST. No violations, spill or releases were identified with the UST. As such, this listing is not considered a significant environmental concern to the Subject Property.

5.2 Vapor Migration

AEI reviewed reasonably ascertainable information for the subject and nearby properties, including a regulatory database, files for nearby release sites, and/or historical documentation, to determine if potential vapor-phase migration concerns may be present which could impact the subject property.

Based on a review of available resources as documented in this report, AEI did not identify significant on-site concerns and/or regulated listings from nearby sites which suggest that a vapor-phase migration concern currently exists at the subject property.

6.0 INTERVIEWS AND USER PROVIDED INFORMATION

6.1 Interviews

Pursuant to ASTM E1527-13, the following interviews were performed during this assessment in order to obtain information indicating RECs in connection with the subject property.

6.1.1 Interview with Owner

The subject property owner, Mr. Ferdinand Fam, was contacted via email on October 30, 2017. AEI requested an interview with the subject property owner; however, the subject property owner has not responded as of this report date. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this assessment.

6.1.2 Interview with Key Site Manager

The key site manager, Ms. Rui Gan, was contacted in person on October 31, 2017. Ms. Rui Gan has been associated with the subject property since approximately 5 years. Ms. Rui Gan stated provide information regarding property operations, construction date and provided a property visit. Ms. Rui Gan was asked if she was aware of any of the following:

	Yes	No
Any knowledge of USTs, clarifiers or oil/water separators, sumps, or other subsurface features.		✔
Any knowledge of previous environmental investigations conducted on site.		✔
Any knowledge of current or past industrial operations and/or other operations which would involve the use of hazardous substances and/or petroleum products.		✔
Any known plans for site redevelopment or change in site use.		✔
Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property.		✔
Any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property.		✔
Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.		✔
Any incidents of flooding, leaks, or other water intrusion, and/or complaints related to indoor air quality.		✔

6.1.3 Past Owners, Operators, and Occupants

AEI attempted to obtain contact information for past owners, operators and occupants of the subject property in order to interview them regarding the potential for contamination at the property. AEI requested this contact information of Mr. Ferdinand Fam, reviewed agency records, and performed online research to obtain this information. Contact information was not found. As such, interviews with past owners, operators and occupants were not reasonably ascertainable.

6.1.4 Interview with Others

Information obtained during interviews with local government officials is incorporated into the appropriate segments of this section.

6.2 User Provided Information

User provided information is intended to help identify the possibility of RECs in connection with the subject property. According to ASTM E1527-13 and the EPA Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), certain items should be researched by the prospective landowner or grantee, and the results of such inquiries may be provided to the Environmental Professional. The responsibility for qualifying for LLPs by conducting the inquiries ultimately rests with the User, and providing the information to the Environmental Professional would be prudent if such information is available.

The User did not complete the ASTM User Questionnaire or provide the User information to AEI. AEI assumes that qualification for the LLPs is being established by the User in documentation outside of this assessment.

6.3 Previous Reports and Other Provided Documentation

Documentation was provided to AEI by Mr. Ferdinand Fanm during this assessment. A summary of this information follows:

Environmental Site Assessment Phase I (21171 S. Western Avenue, Torrance, CA), prepared by Environ Phase Consulting Co. (EPD)(September 21, 2017)

This report describes one parcel (# 7355-032-010) subject property addressed at 21171 S. Western Avenue and generally consistent with current improvements on this parcel.

According to the EPC investigation, the subject site was undeveloped in 1927. By 1941, the subject site was developed with two buildings. By 1952, a few additional buildings were developed. However, the tenants of the buildings are unknown. In 1957, the subject site was listed as Alano Club of Torrance (1754 Torrance) and Torrance Street Department (1730 Torrance). In 1960, Alano Club of Torrance (1754 Torrance) was again listed. By 1980, the subject site was listed as Coast Mobile Home Sales (1724 Torrance). In 1987, the subject site was redeveloped with the present-day multi-tenant office building.

EPC did not reveal significant evidences of UST, AST, PCB, distressed vegetation, stockpile soils, solid waste disposals, visual indications of chemical pits, ponds, lagoons, biological hazardous wastes.

EPC reviewed a 2005 "Phase I Environmental Site Assessment" for 21151, 21171,and 21221 South Western Avenue prepared by EMG. Based on the report, the two-story office buildings were constructed in 1987 and renovated in 1999. According to EMG, prior to 1987, the subject site was undeveloped. Based on the findings of the report, no further action or investigation was recommended by EMG (EMG, 2005).

EPC did not identify any RECs, HRECs, or CRECs in connection with the site.

No Furter Action or investigation was recommended by EPC.

A copy of the report is included in the appendices.

Note: If the above report(s) were not prepared by AEI, the information obtained was not verified for accuracy and a critique of the report(s) is beyond the scope of this assessment.

7.0 SITE RECONNAISSANCE

Site Reconnaissance Date	November 1, 2017
AEI Site Assessor(s)	Derrick Haynes
Property Escort(s)/Relationship(s) to Property	Ms. Rui Gan, property management
Units/Areas Observed	Representative portions of the interiors of the three buildings on site including common areas, restrooms, electrical rooms, office spaces, as well as the maintenance building on the west side of the property
Area(s) not accessed and reason(s)	None identified.
Weather	Sunny 75 degrees

7.1 SUBJECT PROPERTY RECONNAISSANCE FINDINGS

Yes	No	Observation
	✔	Regulated Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use
	✔	Aboveground Hazardous Substance or Petroleum Product Storage Tanks (ASTs)
	✔	Underground Hazardous Substance or Petroleum Product Storage Tanks (USTs)
	✔	Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use
	✔	Unidentified Substance Containers
✔		Electrical or Mechanical Equipment Likely to Contain Fluids
	✔	Interior Stains or Corrosion
	✔	Strong, Pungent, or Noxious Odors
	✔	Pools of Liquid
✔		Drains, Sumps, and Clarifiers
	✔	Pits, Ponds, and Lagoons
	✔	Stained Soil or Pavement
	✔	Stressed Vegetation
	✔	Solid Waste Disposal or Evidence of Fill Materials
	✔	Waste Water Discharges
	✔	Wells
	✔	Septic Systems
	✔	Biomedical Wastes
	✔	Dry Cleaners
	✔	Other

The subject property is currently occupied by multiple administration offices and a cafe. On-site operations consist commercial offices and a cafe. Please refer to the rent roll in Appendices.

Electrical or Mechanical Equipment Likely to Contain Fluids

Toxic PCBs were commonly used historically in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors. According to United States EPA regulation 40 CFR Part 761, there are three categories for classifying such equipment: <50 ppm of PCBs is considered "Non-PCB"; between 50 and 500 ppm is considered "PCB-Contaminated"; and >500 ppm is considered "PCB-Containing". Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any polychlorinated biphenyl in any manner other than in a totally enclosed manner was prohibited after January 1, 1977.

Transformers

Type	Quantity	Owner	Presumed Date of Installation	Spills or Stains Observed (Yes/No)	Non-PCB Label (Yes/No)
Pad-Mounted	3	SoCal Edison	1988	No	No

The management of potential PCB-containing transformers is the responsibility of the local utility or the transformer owner. Actual material samples need to be collected to determine if transformers are PCB-containing.

Transformers installed prior to 1977 may be PCB containing while transformers installed after 1977 are unlikely to be PCB containing. Federal Regulations (40 CFR 761 Subpart G) require any release of material containing >50 ppm PCB and occurring after May 4, 1987, be cleaned up by the transformer owner following the United States EPA's PCB spill cleanup policy.

AEI did not observe evidence of spills, staining, or leaks on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

Elevators

The subject property is equipped with three hydraulic elevators. Based on the age of the buildings (post-1978), it is unlikely that the hydraulic fluid within the equipment contains PCBs. The equipment for the elevators is located adjacent to the elevator shaft on the ground floor. No evidence of stains or leaks was observed at the base of the equipment during the site inspection. The elevators are reportedly maintained by OTIS. Based on the good condition and regular maintenance of the elevators, they are not expected to represent a significant environmental concern.

Drains, Sumps, and Clarifiers

Five storm drains were observed in the parking area of the subject property. AEI did not observe evidence of hazardous substances or petroleum products in the vicinity of the drains. Based on the use of the drains solely for storm water runoff, the presence of the drains is not expected to represent a significant environmental concern.

7.2 Adjacent Property Reconnaissance Findings

Yes	No	Observation
✔		Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use
	✔	Aboveground Hazardous Substance or Petroleum Product Storage Tanks (ASTs)
	✔	Underground Hazardous Substance or Petroleum Product Storage Tanks (USTs)
	✔	Hazardous Substance and Petroleum Product Containers Not in Connection with Property Use
	✔	Unidentified Substance Containers
✔		Electrical or Mechanical Equipment Likely to Contain Fluids
	✔	Strong, Pungent, or Noxious Odors
	✔	Pools of Liquid
	✔	Drains, Sumps, and Clarifiers
	✔	Pits, Ponds, and Lagoons
	✔	Stained Soil or Pavement
	✔	Stressed Vegetation
	✔	Solid Waste Disposal or Evidence of Fill Materials
	✔	Waste Water Discharges
	✔	Wells
	✔	Septic Systems
	✔	Dry Cleaners
	✔	Other

Hazardous Substances/Wastes and/or Petroleum Products in Connection with Property Use

The adjacent site to the north is occupied by an auto repair facility. Based on the nature of use, AEI presumes that various quantities of hazardous materials are stored on site. Based on the lack of a documented release, this site is not expected to represent a significant environmental concern at this time.

Electrical or Mechanical Equipment Likely to Contain Fluids

Several pole-mounted transformers were observed on the adjacent sites during the site reconnaissance. No spills, staining, or leaks were observed on or around the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

8.0 OTHER ENVIRONMENTAL CONSIDERATIONS

8.1 Asbestos-Containing Building Materials

Asbestos is the name for a group of naturally occurring silicate minerals that can be separated into fibers. The fibers are strong, durable, and resistant to heat and fire. They are also long, thin and flexible, so they can even be woven into cloth. Because of these qualities, asbestos has been used in thousands of consumer, industrial, maritime, automotive, scientific and building products. During the 20th century, some 30 million tons of asbestos have been used in industrial sites, homes, schools, shipyards and commercial buildings in the United States. Commercial use of ACM began in the early 1900's and peaked in the period between 1940 and into the 1970's. Common ACMs include pipe-covering, insulating cement, insulating block, refactory and boiler insulation materials, transite board, fireproofing spray, joint compound, vinyl floor tile, ceiling tile, mastics, roofing products, and duct insulation for HVAC applications. Inhalation of asbestos fibers can result in deleterious health effects.

The potential for ACM was evaluated based the USEPA Guidance Document: Managing Asbestos in Place - A Building Owner's Guide to Operations and Maintenance Programs for Asbestos-Containing Materials (the Green Book). In 1973 the NESHAPS banned the use of most spray-applied surfacing ACM, specifically asbestos containing spray-on fireproofing and insulation. Subsequent revisions to this regulation in 1975 and 1978 effectively eliminated the use of friable pre-molded pipe, boiler, turbine, and duct insulation; and the spray application of friable asbestos-containing materials for all uses in buildings. In 1989 the EPA issued regulations to ban some asbestos-containing products and phase out most others over a multi-year period. The "Ban and Phase-Down" rule was challenged in court and the regulation remanded to the agency. As a result, any asbestos-containing products then "in commerce" would not be banned. Those not in commerce would be banned. Those materials "banned" could not be sold. It did not affect such materials already installed, or in use. Most US firms voluntarily ceased production of asbestos containing building materials not covered by the aforementioned Federal bans by the mid-1980's. In 1994, the OSHA determined that employers and building owners are required to treat installed thermal system installation and sprayed on and troweled-on surfacing materials, as well as vinyl or asphalt flooring material, as ACM in buildings constructed no later than 1980 until tested by laboratory analysis to prove otherwise.

The information below is for general informational purposes only and does not constitute an asbestos survey. In addition, the information is not intended to comply with federal, state or local regulations in regards to ACM.

The potential for ACM was evaluated based the Green Book. The Green Book was used as a guide in identifying suspect materials while the definition of suspect ACM and presumed asbestos containing material is taken from 29 CRF Parts 1910, et al. Occupational Exposure to Asbestos; Final Rule. OSHA considers building materials (and specifically friable surfacing material and thermal system insulation) installed prior to 1981, presumed to be asbestos containing until tested by laboratory analysis to prove otherwise. Based on the 1988 date of construction, OSHA finds the installation of friable surfacing material and thermal system insulation after December 31, 1980 unlikely. No sampling was performed as a part of this assessment.

8.2 Lead-Based Paint

Lead-based Paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm² (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", defines a LBP hazard as "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces. Therefore, under Title X, intact LBP on most walls and ceilings would not be considered a "hazard", although the paint should be maintained and its condition monitored to ensure that it does not deteriorate and become a hazard. Additionally, Section 1018 of this law directed HUD and EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, or federally owned or subsidized housing is affected by this rule.

LBP is defined as any paint with any detectable amount of lead present in it. It is important to note that LBP may create a lead hazard when being removed. The condition of these materials must be monitored when they are being disturbed. In the event LBP is subject to abrading, sanding, torching, and/or cutting during demolition or renovation activities, there may be regulatory issues that must be addressed.

The information below is for general informational purposes only and does not constitute a lead hazard evaluation. In addition, the information is not intended to comply with federal, state, or local regulations in regards to LBP.

In buildings constructed after 1978, it is unlikely that LBP is present. Structures built prior to 1978 and especially prior to the 1960s should be expected to contain LBP.

Due to the date of construction (post-1978), lead-based paint is not likely to be present. All painted surfaces were observed to be in good condition with no chalking, peeling or flaking.

8.3 Radon

Radon is a naturally-occurring, odorless, and invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.

The United States EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three radon zones, with Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action Limit of 4.0 pCi/L. It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not requested as part of this assessment. According to the US EPA, the radon zone level for the area is Zone 2, which has a predicted average indoor screening level between 2 pCi/L and 4 pCi/L, equal to or below the action level of 4 pCi/L set forth by the US EPA.

8.4 Drinking Water Sources and Lead in Drinking Water

The City of Torrance supplies potable water to the subject property. The most recent water quality report states that lead levels in the area's water supply were below the action level of 15 ug/L in the 90th percentile of all samples collected and therefore are well within standards established by the State of California and the US EPA

8.5 Mold/Indoor Air Quality Issues

Molds are simple, microscopic organisms, which can often be seen in the form of discoloration, frequently green, gray, white, brown, or black. When excessive moisture or water accumulates indoors, mold growth will often occur, particularly if the moisture problem remains undiscovered or is not addressed. As such, interior areas of buildings characterized by poor ventilation and high humidity are the most common locations of mold growth. Building materials including drywall, wallpaper, baseboards, wood framing, insulation, and carpeting often play host to such growth. Mold spores primarily cause health problems through the inhalation of mold spores or the toxins they emit when they are present in large numbers. This can occur primarily when there is active mold growth within places where people live or work.

Mold, if present, may or may not visually manifest itself. Neither the individual completing this inspection, nor AEI has any liability for the identification of mold-related concerns except as defined in applicable industry standards. In short, this Phase I ESA should not be construed as a mold survey or inspection.

AEI observed interior areas of the subject property buildings to identify the potential presence of mold. AEI did not note obvious visual or olfactory indications of the presence of mold. Water stained ceiling tiles were observed in the elevator equipment room of Building 21171; however, no mold was observed. As such, no bulk sampling of suspect surfaces was conducted as part of this assessment and no additional action with respect to suspect mold appears to be warranted at this time.

This activity was not designed to discover all areas which may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication if significant (based on observed areas) mold growth is present at the subject property. Additional areas of mold not observed as part of this limited assessment, possibly in pipe chases, HVAC systems, and behind enclosed walls and ceilings, may be present on the subject property.

9.0 FINDINGS, CONCLUSIONS, AND RECOMMENDATIONS

9.1 FINDINGS

9.1.1 RECOGNIZED ENVIRONMENTAL CONDITIONS

Recognized Environmental Condition (REC) is defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

This assessment has revealed no evidence of RECs in connection with the subject property.

9.1.2 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS

Controlled Recognized Environmental Condition (CREC) is defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

This assessment has revealed no evidence of CRECs in connection with the subject property.

9.1.3 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Standard Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

This assessment has revealed no evidence of HRECs in connection with the subject property, except for the following:

- As further addressed in Section 5.0, the subject property was part of a larger redevelopment site, which has a NFA as a closed case for a SLIC case.

9.1.4 OTHER ENVIRONMENTAL CONSIDERATIONS (NON-ASTM SCOPE)

Other Environmental Considerations include, but are not limited to, de minimis conditions and/ or environmental considerations such as the presence of ACMs, LBP, radon, mold, and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

This assessment also included Other Environmental Considerations identified at Section 8.0. No related issues of significant concern were identified.

9.2 Conclusions

AEI has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of 21221, 21151 and 21171 South Western Avenue, Torrance, Los Angeles County, California, the Property. Any exceptions to or deletions from this practice are described in Section 1.5 of this report. This assessment has revealed no evidence of RECs or CRECs in connection with the subject property.

AEI's assessment included an evaluation of other Environmental Conditions including, but are not limited to, de minimis conditions and/or environmental considerations such as the presence of asbestos-containing materials, radon, lead-based paint, wetlands and mold and lead in drinking water, which can affect the liabilities and financial obligations of the client, the health and safety of site occupants, and the value and marketability of the subject property.

This assessment has revealed no evidence of related conditions of concern in connection with the subject property.

9.3 Recommendations

As a result of this assessment, AEI does not recommend further investigation of the subject property at this time.

10.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONALS

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR Part 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 05/30/2017 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MONTROSE CHEMICAL CO	***20201 S NORMANDIE AV***	***E 1/8 - 1/4 (0.132 mi.)***	***0***	***9***

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 07/11/2017 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MONTROSE CHEMICAL CO	***20201 S NORMANDIE AV***	***E 1/8 - 1/4 (0.132 mi.)***	***0***	***9***

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status

indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/11/2017 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/13/2017 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 09/13/2017 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2017 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2017 has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

MONTROSE CHEMICAL CO	***20201 S NORMANDIE AV***	***E 1/8 - 1/4 (0.132 mi.)***	***0***	***9***

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 08/10/2017 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 07/31/2017 has revealed that there are 27 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

CA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the CA SWF/LF list, as provided by EDR, has revealed that there is 1 CA SWF/LF site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2017 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 8 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Summary Details:

Conditions at proposal October 15, 1984): Montrose Chemical Corp. manufactured DDT on a l3-acre site in a light industrial/residential area of Torrance, Los Angeles County, California, from 1947 until 1982. About 3,000 people live or work within 0.25 mile of the site. The company s operations included formulation, grinding, packaging, and distribution of DDT. According to analyses conducted by EPA, Montrose, and various State and local agencies, on- and off-site soils, surface water, and sediments are contaminated with DDT. The major transport mechanisms identified were storm water run-off and aerial emissions. On May 6, 1983, EPA issued an Administrative Order under CERCLA Section 106 requiring Montrose Chemical to cease all discharges of DDT and to initiate a study to determine the nature and extent of contamination. After a more detailed review of the Montrose

MONTROSE CHEMICAL CORP. (Continued) **1000420366**

site, EPA determined that further work was necessary to characteri e the site andevaluate alternatives. Therefore, EPA prepared a workplan for a remedial investigation/feasibility study RI/FS). This second phase of investigation will assess all areas of contamination, both on- and off-site, and any public health and environmental impacts. Status June 1986): In February 1985, Montrose installed a temporary asphalt cover over the site. EPA did not endorse this activity. In the summer of 1985, EPA conducted Part I of the RI. On-site sampling foundhigh levels of contamination at 77-foot depths in soil and in shallow ground water. In October 1985, Montrose and EPA signed an Administrative Order under CERCLA Section 106 requiring Montrose to conduct Part II of the RI, which includes on-site sampling of ground water and off-site sampling of soil, sediments, surface water, and ground water. Status November 1988): During July 1986, EPA sampled off-site dust and soil and verified that DDT migrated off-site via aerial dispersion.In November 1986, Montrose completed Phase I sampling under Part II of the RI. Results indicated that soils near the site are contaminated with high levels of DDT, and that the two shallower aquifers in the four-aquifer system underlying the site are contaminated with DDT and monochloroben ene. In October 1987, EPA and Montrose signed an amendment to the October 1985 Administrative Order, calling for both on- and off-site sampling of the two deeper aquifers in the four-aquifer system. Status October 4, 1989): In July 1989, EPA and Montrose signed a second amendment to the original order, under which Montrose will conduct the FS for the overall site and evaluate options for removing DDT-contaminated sediments in the sanitary sewer lines near the site. Sampling conducted under the first amended order indicates that ground water is contaminated with high levels of monochloroben ene 0.25 mile downgradient from the site. Deep wells and additional downgradient wells will be constructed and sampled.

Site Status Details:
- NPL Status: Final

Site Description: The Montrose Chemical Corporation site is located in Los Angeles County, California, with portions of the site within the City of Los Angeles, and adjacent to the City of Torrance, California. The Montrose site and the Del Amo site are separate, but adjacent, Superfund sites that have commingled groundwater contamination. The Harbor Gateway is a half-mile-wide strip of the City of Los Angeles that extends south from Los Angeles proper and provides the City a contiguous jurisdiction to Los Angeles Harbor. The former Montrose

MONTROSE CHEMICAL CORP. (Continued) **1000420366**

Chemical and Del Amo plants were located in the Harbor Gateway between the Cities of Torrance and Carson. Overall groundwater contamination associated with these two sites has come to be located over an area extending more than 1.3 miles in length, but its extent differs widely with the depth of the water-bearing unit as well as the lateral location being considered.

Montrose Chemical Corporation operated a technical grade dichloro-diphenyltrichloroethane (DDT) pesticide manufacturing plant in Los Angeles, California from 1947 to 1982. During its 35 years of operation, the Montrose plant released hazardous substances, pollutants or contaminants, into the surrounding environment, including surface soils, surface drainage and storm water pathways, sanitary sewers, the Pacific Ocean, and groundwater.

In 1982, the Environmental Protection Agency (EPA) conducted an inspection of the Montrose property and determined that DDT was present in surface drainages leading from the Montrose property. In 1983, EPA and the State issued enforcement orders to Montrose, requiring them to cease and desist their discharge of hazardous wastes to the storm drain and surface water drainages. The site was listed final on the National Priorities List in October 1989. In October 1985 Montrose and EPA entered into an Administrative Order on Consent (AOC) which obligated Montrose to perform a remedial investigation and feasibility study (RI/FS) of the entire Montrose Chemical site. This AOC was subsequently amended twice, once in 1987 and again in 1989. Because the investigation of the Montrose Chemical Site had begun earlier than that for the Del Amo Site, originally there had been insufficient data to determine (1) the degree to which groundwater contamination from the Montrose and Del Amo sites were commingled, and (2) the degree to which contamination from the Montrose Chemical Site might be affected by remedial actions that were being considered in feasibility studies for groundwater at the Montrose Chemical Site. The Montrose remedial investigation had identified the existence of extensive Del Amo-related groundwater contamination, but initially the remedial investigation at the Del Amo Site had not progressed to the point that this contamination was adequately defined. Accordingly, EPA considered selecting limited interim groundwater remedies for the Montrose Chemical Site until these factors could be resolved. Operable Unit 3 (OU3): By late 1995 sufficient data had been obtained from the Del Amo groundwater investigation to determine that (1) the groundwater contamination from the Del Amo and Montrose Chemical Superfund sites was commingled, and (2) the evaluation of remedial alternatives related to groundwater contamination at one site was inseparable from the same evaluation at the other site. Groundwater contamination at both sites had to be considered together in order to properly evaluate and select groundwater alternatives for the two sites. In later 1995 and early 1996, EPA informed and opened a dialogue with Montrose Chemical and the Del Amo Respondents that EPA intended to unite the remedial selection processes with respect to groundwater, thereby leading to a single feasibility study and a dual-site groundwater Record of Decision (ROD). EPA initiated a process to generate a single feasibility study, called a Joint Groundwater Feasibility Study (JGWFS) to provide analysis for this ROD. While the separate AOC documents did not directly discuss a JGWFS, the parties agreed to proceed with the joint work as envisioned by EPA on a voluntary basis. A ROD addressing the groundwater operable unit at the Montrose Chemical and Del Amo Superfund sites was completed in March 1999. The Montrose Chemical Corporation site is located in Los Angeles County, California, with portions of the site within the City of Los Angeles, and adjacent to the City of Torrance, California. The Montrose site and the Del Amo site are separate, but adjacent, Superfund sites that have commingled groundwater contamination. The Harbor Gateway is a half-mile-wide strip of the City of Los Angeles that extends south from Los Angeles proper and provides the City a contiguous jurisdiction to Los Angeles Harbor. The former Montrose Chemical and Del Amo plants were located in the Harbor Gateway between

MONTROSE CHEMICAL CORP. (Continued) **1000420366**

the Cities of Torrance and Carson. Overall groundwater contamination associated with these two sites has come to be located over an area extending more than 1.3 miles in length, but its extent differs widely with the depth of the water-bearing unit as well as the lateral location being considered.

Montrose Chemical Corporation operated a technical grade dichloro-diphenyltrichloroethane (DDT) pesticide manufacturing plant in Los Angeles, California from 1947 to 1982. During its 35 years of operation, the Montrose plant released hazardous substances, pollutants or contaminants, into the surrounding environment, including surface soils, surface drainage and storm water pathways, sanitary sewers, the Pacific Ocean, and groundwater.

In 1982, the Environmental Protection Agency (EPA) conducted an inspection of the Montrose property and determined that DDT was present in surface drainages leading from the Montrose property. In 1983, EPA and the State issued enforcement orders to Montrose, requiring them to cease and desist their discharge of hazardous wastes to the storm drain and surface water drainages. The site was listed final on the National Priorities List in October 1989. In October 1985 Montrose and EPA entered into an Administrative Order on Consent (AOC) which obligated Montrose to perform a remedial investigation and feasibility study (RI/FS) of the entire Montrose Chemical site. This AOC was subsequently amended twice, once in 1987 and again in 1989. Because the investigation of the Montrose Chemical Site had begun earlier than that for the Del Amo Site, originally there had been insufficient data to determine (1) the degree to which groundwater contamination from the Montrose and Del Amo sites were commingled, and (2) the degree to which contamination from the Montrose Chemical Site might be affected by remedial actions that were being considered in feasibility studies for groundwater at the Montrose Chemical Site. The Montrose remedial investigation had identified the existence of extensive Del Amo-related groundwater contamination, but initially the remedial investigation at the Del Amo Site had not progressed to the point that this contamination was adequately defined. Accordingly, EPA considered selecting limited interim groundwater remedies for the Montrose Chemical Site until these factors could be resolved. Operable Unit 3 (OU3): By late 1995 sufficient data had been obtained from the Del Amo groundwater investigation to determine that (1) the groundwater contamination from the Del Amo and Montrose Chemical Superfund sites was commingled, and (2) the evaluation of remedial alternatives related to groundwater contamination at one site was inseparable from the same evaluation at the other site. Groundwater contamination at both sites had to be considered together in order to properly evaluate and select groundwater alternatives for the two sites. In later 1995 and early 1996, EPA informed and opened a dialogue with Montrose Chemical and the Del Amo Respondents that EPA intended to unite the remedial selection processes with respect to groundwater, thereby leading to a single feasibility study and a dual-site groundwater Record of Decision (ROD). EPA initiated a process to generate a single feasibility study, called a Joint Groundwater Feasibility Study (JGWFS) to provide analysis for this ROD. While the separate AOC documents did not directly discuss a JGWFS, the parties agreed to proceed with the joint work as envisioned by EPA on a voluntary basis. A ROD addressing the groundwater operable unit at the Montrose Chemical and Del Amo Superfund sites was completed in March 1999. Operable Unit 5: The Palos Verdes Shelf Superfund site (PV Shelf) is an 88 square kilometer (km2) area of sediment on the continental shelf and slope off the coast of the Palos Verdes Peninsula, Los Angeles County, California, that has been contaminated with DDT and polychlorinated biphenyls (PCBs). PV Shelf is Operable Unit 5 of the Montrose Chemical Corporation Superfund site. Its national Superfund electronic database (i.e., CERCLIS) identification number is CAD008242711. EPA Region 9 is the lead agency for site remediation, and is using special account funds from various Consent Decrees entered into with the potentially responsible parties

MONTROSE CHEMICAL CORP. (Continued) **1000420366**

to clean up the site. The California coast from Pt. Conception to the Mexican border curves inward, forming a large bay called the "Southern California Bight." The Palos Verdes Peninsula is a small but prominent land mass extending into the Southern California Bight (SCB). It is bordered by Santa Monica Bay to the north and the San Pedro Shelf to the south. The Channel Islands lie to the west and northwest. The narrow underwater shelf off the Palos Verdes Peninsula is called the Palos Verdes Shelf. It is approximately 14.5 kilometers (km) long and 2.4 km wide. The seabed over most of the shelf slopes at a gentle 1 to 3 degrees. The shelf breaks at a depth of 70 to 100 meters (m), then drops steeply over 800 m to the ocean floor. The primary historical source of chemical contaminants on the PV Shelf is effluent discharged through submarine outfalls at White Point on the Palos Verdes Peninsula. Since 1937, wastewaters have been discharged to the ocean off Palos Verdes Peninsula from submarine outfalls of the JWPCP, operated by the Sanitation Districts of Los Angeles County (LACSD). Contaminants in the effluent included chlorinated hydrocarbons (e.g., DDTs and PCBs) as well as trace metals (e.g., cadmium, copper, lead, zinc, and other metals), and organic matter. The total discharge of suspended solids from 1937 to 1995 has been estimated to be 4.1 million metric tons. It is estimated that approximately 1,000 metric tons (mtons) of DDT were discharged from the outfalls from the 1950s through 1971. Traces of DDT can be found throughout the Southern California Bight; however, approximately 10 percent of the discharge settled on PV Shelf, forming an identifiable layer of contaminated sediment from 5 centimeters (cm) to 60 cm thick over a 44 km2 area. From 1947 until 1982, Montrose Chemical Corp. of California, Inc. (Montrose) operated a DDT-manufacturing plant on 13 acres at 20201 Normandie Avenue in Los Angeles County, California. The land was owned by Stauffer Chemical Company. The Montrose plant operated 24 hours a day, seven days a week, 365 days a year. During its 35 years of operation, Montrose produced approximately 800,000 tons of DDT. When the plant first opened, it discharged DDT-contaminated wastewater from its production operations to a city sewer line via a private pressure sewer line owned by Stauffer Chemical. This connecting line periodically clogged, resulting in the discharge of Montrose DDT-contaminated wastewater to the natural stormwater drainage. When EPA investigated the natural stormwater drain in the 1990s, residual levels of DDT in the drainage immediately downstream of the Montrose plant property were in excess of 8,000 parts per million (ppm). The Normandie Avenue plant property itself was contaminated by Montrose operations. Investigations directed by EPA beginning in 1985 found significant contamination (primarily DDT and chlorobenzene) in the shallow and deep soil at the Montrose plant property, groundwater beneath and downgradient from the Montrose plant property, soil adjacent to and in the vicinity of the property, the sewer line adjacent to and downstream of the Montrose plant property, and, as mentioned above, portions of the stormwater pathway leading from the Montrose plant to the Consolidated Slip in Los Angeles Harbor. Groundwater at the Montrose site is contaminated with monochlorobenzene and other contaminants across six hydrostratigraphic units and to distances up to 1.3 miles from the former Montrose plant site. From 1953 until 1971, Montrose discharged DDT-contaminated wastewater from its operations at the Montrose plant to two sewers operated by the LACSD. These sewers conveyed the wastewater to the JWPCP, where it received primary treatment and was discharged through the White Point outfalls located on the PV Shelf. In the early 1970s, LACSD initiated an investigation to identify and eliminate discharge of DDTs and PCBs into their sewer system. LACSD identified the Montrose plant as the only significant source of DDT in sewer flows to the JWPCP. PCBs entered the LACSD sewer system from several industrial sources in the Los Angeles area, most notably from the Westinghouse Electric Corporation, which manufactured and repaired electrical equipment at its Los Angles County plant; from a

MONTROSE CHEMICAL CORP. (Continued) **1000420366**

paper-manufacturing plant in Pomona owned by Potlatch Corporation; and from Simpson Paper Company. Like DDT from the Montrose plant, PCBs from these plants were sent to the JWPCP and, after treatment, were discharged from the White Point outfalls onto the PV Shelf. LACSD estimated that the discharge from the Montrose plant was contributing 654 pounds (lbs) of DDT per day to the LACSD system. The peak annual mass emissions of effluent solids (167,000 metric tons [mt]), DDT (21.1 mt), and PCBs (5.2 mt) occurred in 1971. Montrose ceased discharging waste into the county sewer system in 1971. LACSD conducted cleaning operations in the two sewer lines adjacent to and downstream of the Montrose property. Sediments in the two sewer lines contained in excess of 7,700 lbs of DDT, according to LACSD. Despite these efforts by LACSD, significant quantities of DDT-contaminated sediment remained in the sewer line. After the plant closure in 1983, under EPA order, Montrose removed approximately 162,000 lbs of sediment from the sewer line downstream from the plant. Sewer sediment samples from this removal operation showed levels of DDT in the sediment at 490,000 milligrams per kilogram (mg/kg) and chlorobenzene at 2,200 mg/kg. PV Shelf enforcement activities occurred along two parallel paths: litigation and response actions. In 1989, CERCLA natural resource trustees1 determined that DDT and PCB contamination of the marine environment off the southern California coast, including the Palos Verdes Shelf, could be causing significant damage to natural resources. In June 1990, the United States and the State of California filed suit in the case of United States v. Montrose et al. The suit contained two claims: - A claim by the natural resource trustees ("Trustees") for natural resource damages caused by the release of DDT and PCBs, through sanitary sewer and stormwater runoff pathways, into the environment off the Los Angeles coast, i.e., the Natural Resource Damage (NRD) site, and - EPA's claim for response costs with respect to the Montrose NPL Site. The named defendants in the Montrose case were Potlatch Corporation and Simpson Paper Corporation, owners and operators of a paper mill that released PCBs into the LACSD sewer system; Westinghouse Electric Corporation, owner and operator of a facility that released PCBs into the LACSD sewer system; the Los Angeles County Sanitation Districts, owners and operators of the municipal sewer system that discharges wastewater to the PV Shelf through the White Point outfalls; and Montrose Chemical Corporation, owner and operator of the facility at the Montrose plant property. Named along with Montrose were several other corporations that were related to Montrose as corporate parents, successors and/or owners of the real property EPA entered into Consent Decrees with LACSD/Municipalities in 1997, with Central Broadcasting System (CBS) Corporation in 1998, with Potlatch Simpson Paper in 1998, and Montrose offshore in 2000. The first Consent Decree established a special account to be used for response and remedial actions on PV Shelf. Monies from the other settlements were added to the special account. Funds from the consent decrees were also allotted to the natural resource trustees. The Trustees formed the Montrose Settlements Restoration Program (MSRP) to restore or replace injured resources and lost services Federal and state natural resource trustees, with NOAA as the lead trustee, completed a CERCLA natural resource damage assessment (NRDA) for the Southern California Bight, including PV Shelf. As part of the NRDA, the U.S. Geological Survey (USGS) collected sediment cores in 1992-1993 from 56 stations at the PV Shelf. Core samples from discrete 2 or 4 cm intervals were analyzed for total DDT and total PCBs, as well as several physical parameters. The results of this sampling indicated that DDT and PCBs were present throughout the effluent-affected sediment deposit and that trends in PCB levels tended to follow trends in DDT concentrations. The NRDA also found that the DDT and PCBs in contaminated sediment were entering the food chain and posed a variety of threats to sediment dwelling organisms, fish and higher predator species, including some protected by state or federal endangered species laws. The NRDA expert

MONTROSE CHEMICAL CORP. (Continued) **1000420366**

reports were issued in October 1994, confirming that DDT and PCBs in sediment on the PV Shelf have caused and continue to cause major damage to the marine environment. Given the breadth and depth of information contained in these reports, EPA decided in December 1994 to consider whether to initiate EPA Superfund response actions with regard to DDT and PCB contamination on the PV Shelf. In July 1996, EPA initiated a noontime critical removal action to evaluate risks posed by the DDT and PCB effluent-affected sediment on PV Shelf and the feasibility of response actions that could reduce threats to human health and the environment. In July 1996, EPA determined that the elevated concentrations of DDT and PCBs in sediment on the PV Shelf represented a threat to human health, welfare and the environment, and initiated a non-time-critical removal action under CERCLA to further investigate the threats. Non-time critical removal actions are defined in the National Oil and Hazardous Substances Pollution Contingency Plan as response actions that can start later than six months after the need for action has been established. 40 CFR subsection 300.415(b) (4). The National Contingency Plan requires an EE/CA for all non-time critical removal actions. The EE/CA for PV Shelf was issued in 2000. As an initial step in the EE/CA process, EPA identified and screened possible response action technologies for contaminated sediment on the PV Shelf. Based on the results of the initial screening, a subset of actions was selected for further evaluation and comparison in the EE/CA. Response actions were screened using three criteria: effectiveness, implementability, and cost. The EE/CA Proposed Plan identified Institutional Controls (ICs) as the preferred alternative. In September 2001, EPA issued an Action Memorandum to implement the ICs program. Public comment on the proposed plan shaped the ICs program to rely more substantively on outreach and education. Institutional Controls (ICs) would serve as an interim removal action (with a limited duration of 10 years) while EPA completed its investigation of PV Shelf. As an interim removal action, EPA waived the applicable or relevant and appropriate requirements (ARARs) for surface water quality standards for DDT and PCBs. In 2000, EPA conducted a pilot study to assess the feasibility of using capping to clean up the site. Three 45-acre cells at different depths were capped with sand from two different sources, using different placement methods. Post-cap monitoring in 2002 showed that contaminant levels over the capped areas were comparable to uncapped areas. Additionally, the LACSD collected sediment cores across the PV Shelf in 2001 and noted that the peak concentration of contaminated sediment in one core collected from a capped cell was closer to the surface than it had been historically. The surface recontamination and possible sediment scouring prompted EPA to conduct four field studies in 2004 to evaluate 1) sediment geotechnical properties, 2) impacts of large, deep-burrowing worms and shrimp, 3) resuspension of sediment from capping, and 4) oceanographic conditions during winter storms. The study reports were completed in 2005 and posted on EPA's website under "Site Documents and Reports." The results of these and other studies were used to develop the Remedial Investigation and Feasibility Study for PV Shelf. EPA issued a Human Health Risk Evaluation for PV Shelf in 1999. The EE/CA acknowledged the need to gather additional information on the extent of contaminants of concern in fishes. From 2002 to 2004, EPA and MSRP collected 23 species of fish from 30 locations along the Southern California coast and analyzed them for DDT, PCBs and other contaminants. White croaker from the vicinity of PV Shelf was generally the most highly contaminated species. In most cases, DDT concentrations were higher than PCBs, particularly in the PV Shelf area. EPA used the survey to recalculate the health hazards from consumption of certain species of fish. An Interim ROD for OU5 was completed in September 2009.

FINDS:

Registry ID: 110002664180

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

STATE MASTER

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 1601

HONDA TORRANCE (Continued) **1000360693**

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 43

Waste code: D035
Waste name: METHYL ETHYL KETONE
Amount (Lbs): 735

Universal Waste Summary:
Waste type: A
Accumulated waste on-site: No
Generated waste on-site: Yes

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT

ZC&R COATINGS FOR OPTICS, INC. (Continued) **1019899383**

MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs):	15650.7
Waste code:	F003
Waste name:	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Biennial Reports:

PHENOMENEX INC (Continued) **1016140068**

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 26840

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 13365

Waste code: D009
Waste name: MERCURY
Amount (Lbs): 7

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 28365

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 1525

Background Info:	National Supply COnmpany (NSC), a division of Armco, Inc., operated a steel and machinery manufacturing facility on a 39.79 acre parcel of land in East Torrance from 1926 through February of 1985. The remedial investigation by Armco's consultant revealed the prescence of total petroleum hydrocarbons and heavy metals. All structures were demolished and the site has been remediated. The property will be sold and developed within the next year (1987).

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Case Type:	Cleanup Program Site
Case Worker:	SR
Local Agency:	Not reported
RB Case Number:	0009
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), Dichloroethane (DCA), Dichloroethene (DCE), Trichloroethylene (TCE), Benzene, Ethylbenzene, Toluene, Xylene
Site History:	Regional Board records indicate that the site is an 0.92-acre undeveloped property owned by the City of Torrance and located on the southern end of American Honda (Honda) Campus in Torrance, California. The site was previously owned and operated by Former Solvent Coatings, a company that reportedly used solvents for paper coatings from 1960 to 1980. The solvents were initially stored in 55-gallon drums and were later transferred to underground storage tanks in 1980. In March 1987, all 19 USTs were removed and were leak-test certified < 0.05 gallons/hr. In 1987, SCS Engineers (SCS) conducted multiple soil investigations. The results of these investigations showed that soil was impacted with residual petroleum and chlorinated hydrocarbons primarily between 10-30 feet below ground surface (bgs). The specific contaminants included benzene, toluene, ethylbenzene, and xylenes (BTEX); and 1,1,1-trichloroethane (1,1,1-TCA), 1,1-dichloroethene (1,1-DCE), 1,1-dichloroethane (1,1-DCA), tetrachloroethylene (PCE), and trichloroethylene (TCE). From 1990 to 1993, SCS conducted soil vapor extraction (SVE) remediation of soil. No SVE pilot testing was conducted. However, available reports indicate that the SVE system was overdesigned (wells spaced 40-50 feet apart) with an estimated radius of influence (ROI) of 100 feet (screen interval: 20-50ft). The SVE system operated for 18,000 hours over a 3-year period and reportedly extracted approximately 65,000 pounds of solvents (10,600 gallons as gasoline. TPH inlet concentrations ranged from 190 - 14,800 ppm (v/v), with an average of 7,000 ppm (v/v). Note that the initial inlet concentration was 190 ppm (v/v); the final inlet concentration was 14,800 ppm (v/v). In February 2001, SCS drilled and collected soil samples from five confirmation soil borings (CB1 through CB5). The highest concentrations were detected in CB3 and CB4 at depths of 10-30 feet

CITY OF TORRANCE (Continued) **S106483716**

bgs within fine-grained clay and clayey sand/silt unit. However, VOCs were generally not detected in any of these boring below 30 feet bgs. Pre-remediation soil data show this same trend, though they were limited to 50 feet bgs. Our records indicate that there was no specific groundwater investigation associated with the Solvent Coatings site and groundwater was not encountered during any of the investigations. However, there are a couple of monitoring wells near the site that have been monitored and sampled for other sites. The available groundwater data from these wells shows evidence of petroleum hydrocarbon impacts, but no impacts from chlorinated hydrocarbons.

Environmental Interest/Information System

SPECTRUM PLATING CO. (Continued) **1001486935**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SLIC:

Region:	STATE
Facility Status:	**Open - Site Assessment**
Status Date:	05/05/2016
Global Id:	SL204EJ2411
Lead Agency:	LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number:	Not reported
Latitude:	33.849933960545
Longitude:	-118.314695692533
Case Type:	Cleanup Program Site
Case Worker:	SR
Local Agency:	Not reported
RB Case Number:	0994
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), 1,4-Dioxane, Dichloroethane (DCA), Dichloroethene (DCE), Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride, Diesel, Gasoline, Total Petroleum Hydrocarbons (TPH), Waste Oil / Motor / Hydraulic / Lubricating
Site History:	The Site is a 54-acre commercial property located within a commercial/industrial area of Torrance and includes three major parcels: Parcel II, Unit 100 and Unit 3. Historical operations include manufacturing of jet engines, aerospace parts and heat exchangers; degreasing, painting and plating. As a result, soil and groundwater have been impacted with petroleum hydrocarbons, 1,4-dioxane and volatile organic compounds (VOCs), including 1,1,1-trichloroethane (1,1,1-TCA) and 1,1-dichloroethene (1,1-DCE). Subsurface lithology at the Site consists primarily of unconsolidated clay, silt, and silty sand from the surface to a depth of approximately 40 feet below ground surface (bgs). From 40 to 75 feet bgs, the soil is primarily sand. Soils from 75 to 120 consist of primarily sand with localized sandy clay, silt and gravel zones. Perched groundwater has been reported offsite to the west and northwest, but no perched zones exist beneath the Site. First encountered groundwater beneath the Site occurs under unconfined conditions at depths of approximately 60 to 65 feet bgs within a sand zone near the base of the lower Bellflower aquitard. In October 2014, groundwater flow was south-southwest with a gradient of 0.0014 foot per foot, which is generally consistent with historical flow conditions. The flow direction has reportedly been modified and influenced by remedial groundwater extraction activities at the adjacent ExxonMobil site. Groundwater monitoring has been conducted on a semiannual basis since 2001. There are 15 groundwater monitoring wells at the Site, five of which are owned by ExxonMobil Corporation (ExxonMobil) and monitored semiannually. These wells include URS-01 through URS-05. ExxonMobil samples these wells and shares the data

MOOG, INC., AIRCRAFT GROUP TORRANCE OPERATIONS (Continued) **S105153717**

with Honeywell under a cooperative agreement. Groundwater monitoring and sampling of the remaining ten wells is conducted on a semiannual basis using the approved Hydrosleeve sampling method. Groundwater samples from Honeywell-owned wells are analyzed for the following parameters: VOCs, including methyl tertiary butyl ether (MTBE), by USEPA Method 8260B; and 1,4-dioxane by USEPA Method 8270C Modified Isotope Dilution In addition to VOCs, Honeywell-owned wells and select ExxonMobil wells are analyzed for monitored natural attenuation (MNA) parameters, including dissolved oxygen, oxidation-reduction potential, chloride, ferrous iron, nitrate, sulfate, total alkalinity, total organic carbon, ethane, ethane, methane and carbon dioxide. The MNA parameters are analyzed annually (generally April) and the results are used to monitor and evaluate anaerobic dechlorination in groundwater beneath the Site. MNA analyses are planned for the next sampling event in April 2015 and will continue to be conducted on an annual basis. Groundwater samples from Honeywell-owned wells are also analyzed for total petroleum hydrocarbons (TPH) as gasoline (TPH-g) and as diesel (TPH-d) on a biennial basis (every two years) using USEPA Method 8015B Modified. The biennial sampling was implemented following a September 18, 2012 meeting among the Regional Board, Honeywell and CH2M HILL. The next monitoring event for TPH is scheduled for April 2016. Honeywell has not requested to change to TPH sampling schedule at this time. ExxonMobil wells are monitored on a semiannual basis and analyzed for the following parameters: VOCs, including MTBE, by USEPA Method 8260B; TPH-g, TPH-d, and TPH as kerosene (TPH-k) by USEPA Method 8015B Modified; and Lead by USEPA Method 6010B ICP Metals (URS-01 only)

CA BOND EXP. PLAN:

Reponsible Party:	RESPONSIBLE PARTY LEAD SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	DHS will be issuing a remedial action order or entering into an enforceable agreement with the responsible parties (RPs). DHS has budgeted $50,000 for oversight/monitoring of cleanup efforts. DHS will recover 100 percent of direct costs plus staff Costs and overhead releated to the project. The RPs will pay all costs associated with remedial investigation and cleanup activities.
Site Description:	This 7.3 acre site is located on both sides of Royal Boulevard between 209th and 210th Streets in Torrance. It was a landfill operated by National Supply Company, a division of Armco from 1956 through 1985.
Hazardous Waste Desc:	During the preparation of the environmental audit and closure plan for the National Supply Company's Torrance facility, it was discovered that foundry sand and baghouse dust may have been disposed of at the Royal Boulevard site. The foundry sand andbaghouse dust waste may contain heavy metals.
Threat To Public Health & Env:	This site is bordered by single-family residential units on the north, east, and south. There is potential for windblown dispersal of foundry sand. There is surface contamination, and offsite migration may result from storm water runoff. Depending on the form of contamination there is some potential for migration to ground water.
Site Activity Status:	On July 16, 1986, the preliminary characterization plan was submitted to the Department and has been approved. The owner of the site, National Supply Company, a division of Armco, Inc., has conducted a limited remedial investigation.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET,

PHENOMENEX BLDG 4 (Continued) **1000303975**

WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 214155

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 129266

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 223860

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

FINDS:

Registry ID: 110055766880

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA BOND EXP. PLAN:

Reponsible Party:	NPL SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	EPA is currenlty conducting the RI/FS, which is funded by CERCLA. The site has been proposed for listing on the NPL. It is uncertain at this time as to whether the RP, Montrose Chemical Corporation, will fund the RAP development and implementation. For the purpose of preparing this Plan, DHS is assuming that the RP will develop the ROD/RAP and fund the selected remedy. DHS has budgeted $50,000 for its oversight and monitoring costs. DHS will seek cost recovery of its direct costs plus staff costs and overhead related to the project.
Site Description:	Montrose Chemical Corporation operated a dichlorodiphenyltrichloroethane (DDT) manufacturing plant from 1947 to 1982 at this location. The 13 acre facility was closed and subsequently dismantled in 1985. The soil is contaminated with DDT as a resultof facility operations and disposal of wastes into a pond onsite.
Hazardous Waste Desc:	Montrose Chemical's sampling results showed onsite soils containing 300 to 400 tons of DDT throughout the facility. EPA studies have found DDT to exist in

MONTROSE CHEMICAL (Continued) **S100833425**

surface water runoff and sediments leaving the Montrose property. High concentrations of DDT have also been identified in sewers that received Montrose wastes before 1972. Other substances of concern that were also found in the investigation include chlorobenzene (MCB), dichlorobenzene (and isomers), chloroform, acetone, benzene hexachloride (BHC and isomers) and benzene.BHC and isomers) and benzene.

Threat To Public Health & Env: The site is located in a light industrial and residential area with about 3,000 people living within a quarter mile of the property. Evidence suggests that DDT has been released from the Montrose site into the surrounding environment. Prior to asphalt capping, DDT-contaminated dust was transported into the nearby residences. Ground water and soils beneath the site are contaminated and may be threatening usable aquifers.

Site Activity Status: EPA completed offsite surface water, offsite soil, onsite ground water, and onsite soil sampling in November, 1986. Further soils and ground water sampling took place during 1987 and more is scheduled for 1988-89. An investigation of DDT contamination of local sewers was completed in September, 1987. A feasibility study is being performed by the responsible party under EPA oversight to evaluate the possible cleanup options. Based upon the findings of the feasibility study, a ROD/RAP will be developed and implemented.

Background Info:	Montrose Chemical Corporation operated a dichlorodiphenyl-trichloroethane (DDT) manufacturing plant from 1947 to 1982 at this location near the city of Torrance. The 13-acre facility was closed and subsequently dismantled in 1985. The soil is highly contaminated with DDT as a result of facility operations and disposal of wastes into an onsite unlined pond. The pond was lined with concrete in 1970. Not reported Montrose's sampling results showed onsite soils with 300 to 400 tons of DDT throughout the facility. U.S. EPA studies have found DDT to exist in surface water runoff and sediments

MONTROSE CHEMICAL CORP (Continued) **S101272760**

leaving the Montrose property. High concentrations of DDT have also been identified in sewers that received Montrose wastes before 1971.
Not reported
Other substances of concern that were found in the soil and groundwater investigations include chlorobenzene (MCB), dichlorobenzene (and isomers), chloroform, acetone, benzene hexachloride (BHC and isomers), and benzene.
Not reported
The site is located in a light industrial and residential area with about 3,000 people living within a quarter-mile of the property. Evidence suggests that DDT has been released from the Montrose site into the surrounding environment. In 1988, Montrose placed an asphalt cover over the areas immediately surrounding the former manufacturing facility.
Not reported
Under a Consent Order with U.S. EPA, Montrose conducted offsite surface water, offsite soil, onsite groundwater, and onsite soil sampling. Further soil and groundwater sampling took place. Groundwater and soils beneath the site are contaminated and may be threatening usable aquifers; however, the three aquifers found to be contaminated are not currently used as drinking water sources. The closest drinking water well is two miles southeast of the site and draws from the deepest aquifer.
Not reported
The site has been split into operable units. The Soils and DNAPL, the groundwater, surface water pathway, sewers, and neighborhood study area.
Not reported
U.S. EPA approved the dual site groundwater ROD on 3/30/1999 for both the Montrose and Del Amo sites. This ROD addresses the dissovled Monochlorobenzene plume emanating from the Montrose site to approximately Torrance Blvd. to the south. It also addresses the dissolved benzene groundwater plume emanating from the Del Amo site to just south of the Del Amo Pits. The plumes from both sites overlap each other to the east of Montrose and to the west of Del Amo, approximately around Normandie Avenue. These dissolved plumes are referred to as "GW1" in this report. The Montrose remedy consists of a pump and treat system with reinjection of treated water into the groundwater aquifer. The Del Amo remedy consists of intrinsic bioremediation with pumping for containment from the lower unit and subsequent discharge. The LNAPL at the Del Amo site will be dealt with along with the soils remedy, and is noted in this report as the Study Area. The DNAPL at the Montrose site will be evaluated separately and is noted as "GW2" in this report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 05/30/2017
Date Data Arrived at EDR: 06/08/2017
Date Made Active in Reports: 09/15/2017
Number of Days to Update: 99

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Elevation:	59 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5633779 TORRANCE, CA
Version Date:	2012

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

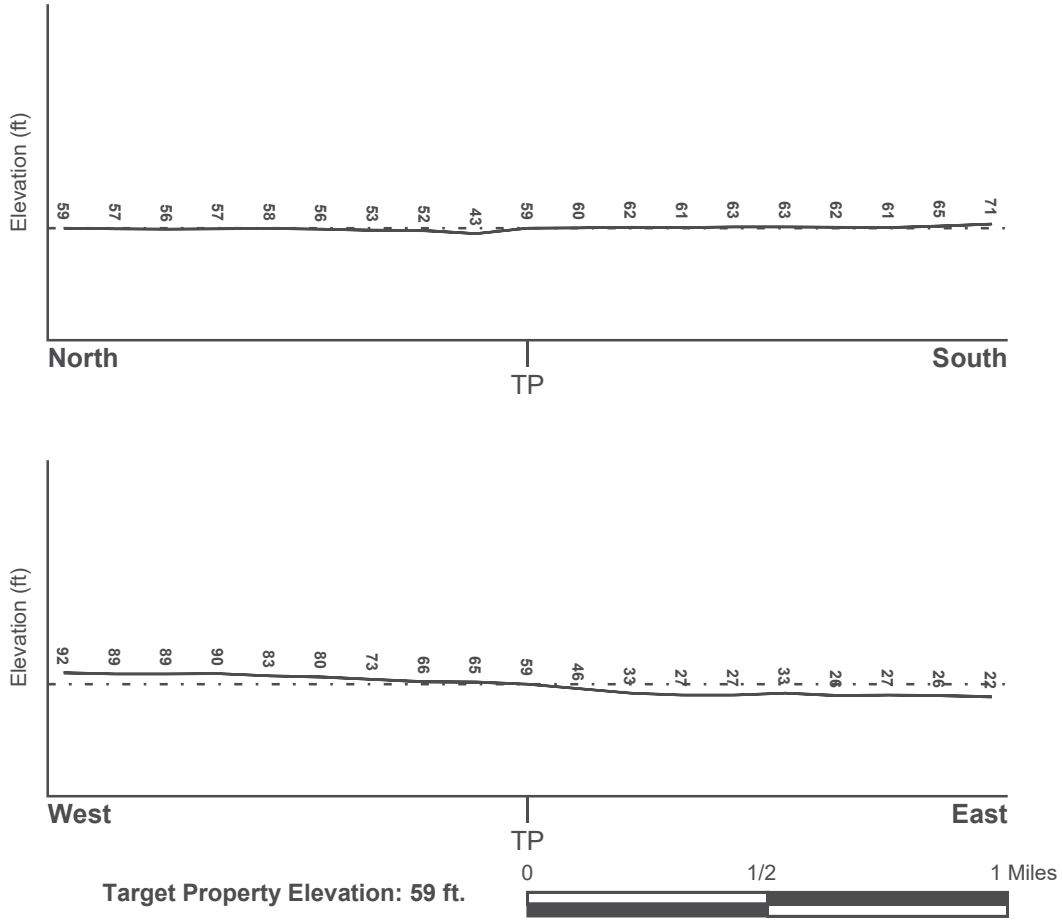
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1935F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1930F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
TORRANCE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Surficial Soil Types:
sandy loam
gravelly - sandy loam
silt loam
clay
fine sand
gravelly - sand
sand
fine sandy loam

Shallow Soil Types:
fine sandy loam
gravelly - loam
sandy clay
sandy clay loam
clay
silty clay
sand

Deeper Soil Types:
gravelly - sandy loam
sandy loam
very gravelly - sandy loam
stratified
very fine sandy loam
weathered bedrock
sand
gravelly - fine sandy loam
silty clay loam
clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish & Game
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

RADON

State Database: CA Radon
Source: Department of Health Services
Telephone: 916-324-2208
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Waste Code Matrix as a spreadsheet

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

Calif. Manifest Counts and Total Tonnage

No Records Found

Non California Manifest Total Tonnage

No Records Found

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

Re: OIL AND WATER SEEPAGE ONTO TORRANCE CENTER I PROPERTY

Dear Mr. Ross:

On behalf of the City of Torrance and the Redevelopment Agency of the City of Torrance, we wish to thank you for your attendance at last Thursday's meeting in the City concerning the Torrance Center I Construction site located at 1739 West 213th Street in Torrance.

We believe that a number of directives and decisions were made at the meeting which will not only help to resolve the present problem at the site, but also facilitate coordination of the activities of the many parties involved with the site under the lead of your agency.

This letter is therefore to memorialize and confirm the directives and conclusions reached as a result of last Thursday's meeting. It is our understanding that the following is to take place:

1. That the Torrance Center I developer (Gascon Mar Ltd.) is to continue its present pumping operation and will maintain the appropriate monitoring of said pumping activities which monitoring will be done through and coordinated with the City of Torrance.

2. That the City of Torrance will immediately identify and notify the appropriate utilities in the event that further off-site bore holes and/or trenching are required within Torrance's right-of-way.

3. That the Regional Water Quality Control Board will provide the appropriate directives after sufficient pumping has taken place with respect to the need and location of further trenching and/or boring in terms of the source of the seeping and any other site assessment action which is necessary.

4. That the Torrance I developer will be required to classify the present material stored on-site, both liquids and contaminated soils, and to either treat on-site and/or remove said material to appropriate disposal facilities.

5. That the City of Los Angeles will immediately identify and notify utilities in the right-of-ways under its jurisdiction in the event that further bore holes and/or trenching are required off-site.

6. That the Regional Water Quality Control Board will investigate any available source of funds at the State level to provide for payment or reimbursement of work required in connection with the present seeping problem, particularly should the source of the seepage fail to be determined.

It was your feeling that another week to ten days of pumping would be required to determine if in fact the source of oil and water would dry up. In addition, you also discussed the installation of a long-term monitoring well with respect to any further activity in the event the liquid dried up. We hope that this correctly summarizes the points and directives that were discussed at the meeting between the Developer, officials from the City of Los Angeles and yourself.

Finally, it was agreed upon that another meeting would be arranged between the necessary parties in approximately two weeks for a further update and report with respect to the present situation at the Torrance Center I construction site.

Sincerely,

David S. Ferren
Deputy Executive Director

MEMO TO FILE 10/29

City Torrance - Western Ave Cleanup

Mobil Oil Pot holed their Lines along West edge of Western Ave Vicinity of "SITE".
No Evidence of leaks in any of 3 holes. Junk material found at 7' feet (hole 1). Junk found in hole 3 at 11½ feet and free oil (Looks Like Crude) found at 12 feet/entering trench from both sides.
Reviewed old photos on Armco property belonging to owner. Maps clearly show old (early 1900's) levee along true East Canal. Alignment follows roughly Cleanup Limit on Site (AA). This Canal bottom appears to cross the area now occupied by Western ave. (outline Area)
More Recent photo Shows all this outline area filled in and trees removed up to Pole Line along western edge of Western Ave. A small triangle area remained on Site (outlined in Blue)
No Known Source of Crude in the area.
D.O.G. indicates a well was drilled but found no oil & was abandoned (NE Cor. of Western & 213th)
Tests of Crude taken from Pothole No. 3 & Sample to be analyzed by developer.
Mobil already Identified material on Site as Crude of unknown origin.
This Site reseambles an abandoned land fill.

Attn: Mr. James Ross
Water Resource Control Engineer

Dear Mr. Ross:

As you know, a liquid oily substance was discovered seeping onto the Torrance Center I construction site (located at 1739 W. 213th Street, Torrance) on Monday, October 13, 1986. The contamination enters the site along the Western Avenue right-of-way.

To immediately contain seepage onto the site, the construction contractor (Lusardi Construction) installed and activated three on-site water extraction wells and will soon complete an impervious clay barrier across the contamination's entry path. The base of the barrier will be keyed/locked into a thick layer of naturally occurring impervious clay which underlies the site. In addition, more than 20,000 gallons of liquid and more than 8,000 cubic yards of fill material saturated with the liquid, have been collected by the developer.

To investigate the source and extent of contamination, the following actions have been taken:

1. A research of city records that disclosed a number of pipelines in the Western Avenue right-of-way (see Attachment 1)

2. Contacted the Divison of Oil and Gas (DOG) for a records check that indicated an abandoned oil well is located at the northeast corner of Western Avenue and 213th Street. That well (R-K Drilling Co., Inc. #1) was apparently drilled to a depth of 4150 feet below grade and then abandoned in 1923.

3. Sampled and chemically analyzed both the liquid itself and the soil. Preliminary tests indicate that the contamination is a crude oil or perhaps bunker type fuel. It has some characteristics that are different from those of local crude. In addition, the liquid was found to be quite a bit warmer than the soil. Both of these characteristics indicate a pipeline as the most likely source. Water entering the site has been tested and found to have more than 2,000 ppm TDS and to be free of chloramines. Thus, it seems probably that it did not come from the MWD's water supply line. Dye was poured into the City sewer line on October 16, 1986, well upstream of the area where the sewerline comes closest to the seepage. To date, none of the dye has appeared in the water/oil mixture entering the construction site.

4. We have contacted Mobil Oil officials and requested specifications for and samples of the products they ship in their pipe lines under Western Avenue and dates, times and results from the most recent pressure testing of the Mobil lines.

5. The Torrance Center I developer (Gascon Mar Ltd.,) has retained Meredith, Boli & Associates to determine the nature and source of the contamination and to recommend and supervise the conduct of appropriate remedial actions in concert with the Redevelopment Agency and State/County agencies.

We hope that the above information will assist you in your search for the source and extent of the contamination. We would also appreciate your keeping us involved in your plans for containment and identification of the source and generator of the contamination. If any new data becomes available to us, we will contact you immediately.

If you have any questions or we can be of any further assistance, please contact myself or Jane Hasselbach at 618-5990.

Sincerely,

David S. Ferren

LI! OF KNOWN PIPELINES IN WESTERN AVENUE

A 10" Mobil Oil Corporation high pressure (1400+ psi) gasoline transmission line (designated by Mobil as M-119);

A 12" Mobil Oil Corporation high pressure (1441 psi) line (M-43) which is apparently used to ship crude oil and "black products" to and from Mobil Oil's Torrance Refinery;

An 8" Southern California Gas Company main (under the westerly parkway);

A 2" Southern California Gas Company main (under the easterly parkway);

A 21" City of Torrance storm drain;

An 18" City of Torrance sewer;

An 84" Metropolitan Water District (225 psi) main domestic water supply line;

A Los Angeles City Department of Water and Power water main;

A 6" pipeline which may be Mobil Oil Corporation's M-35 general purpose pipeline to the Wilmington area; and

A 10" Mobil Oil Corporation "waste water line", abandoned in 1975, may or may not still be present under the Western Avenue right-of-way.

Data Reporting Qualifiers

Value – If the result is a value greater than or equal to the Detection Limit (DL), the value is reported

ND – Indicates that the compound was analyzed for but not detected. The minimum DL for the sample is reported based on necessary concentration or dilution actions.

TR – Indicates an estimated value. This flag is used when the mass spectral data indicates the presence of a compound that meets the identification criteria but the result is less than the specified DL but greater than zero

Los Angeles, CA 90007

Re: Torrance Center I Located on the Southwest Corner of Torrance Boulevard and Western Avenue in Torrance, California

Dear Walter:

As discussed, our consultants, Meredith, Boli & Associates (M/B & A) have now completed the testing and analysis of the materials contaminated by oil flowing from Western Avenue, and we wish to receive the County's concurrence to our proposed actions. This letter is organized by the following major sections:

- Background.
- Sample collections and analysis.
- Analytical results.
- Proposed plan.

BACKGROUND

The referenced property formerly was owned and operated by Torrance Tubing and Conduit Company. The 12-acre site was used for tube milling, galvanizing, electroplating, and warehousing of tubing and conduit. Operations at the facility were terminated in November 1984. Subsequent to this date, Torrance Tubing retained BCL Associates, Inc., Long Beach, California, to prepare a Site Characterization and Remedial Action Plan (RAP) for the site. The RAP was approved by the Los Angeles County Health Department (LACHD) on February 18, 1986.

We purchased the property from Torrance Tubing on June 7, 1986, and assumed the responsibility of implementing the approved RAP in conjunction with site demolition efforts. Remedial actions and verification sampling and testing efforts commenced in June and were completed in

August 1986. Certification that the remedial actions were conducted in accordance with the approved RAP was issued by the LACHD on October 2, 1986.

Grading and construction activities at the site commenced in September 1986. On October 13, 1986, an oily substance was encountered while grading operations were being performed in a series of trenches that were dug along the property line adjacent to Western Avenue. It was apparent that this liquid was flowing into the property from Western Avenue. Ultimately, the on-site limits of the oily soil were delineated after the excavation of additional trenches near the discovered contamination, and it became apparent that the area contaminated by the liquid was that which had already been cleaned up as part of our original remedial work, since it had been identified as a Buried Solid Waste area in BCL's original report. The City of Torrance Building and Safety Department was notified of the situation immediately. The City in turn notified other potentially interested agencies, including RWQCB, the Los Angeles County Department of Health Services, and the California Division of Oil and Gas.

Following several meetings on-site with the involved parties, our building contractor proposed a plan of action to prevent further infiltration of the oily substance beneath the site and to allow grading and building operations to continue. The plan, which was approved verbally by the RWQCB and the City, included the following major actions:

- Installing three (3) dewatering-wells along the property line adjacent to Western Avenue.
- Pumping the wells to capture the infiltrating oily substance and conveying the material via an above-ground pipeline to Baker tanks located on-site, hence to approved treatment sites.
- Excavating soil in the impacted area, some of which contained the oily substance, and stockpiling it at another location on-site pending development of a plan for its future management. It has been covered with a synthetic tarpaulin.
- Constructing a clay barrier (certified by soils engineers) along the property boundary adjacent to Western Avenue to prevent the further infiltration of the oily substance.
- Filling in the excavation with clay fill material obtained from another location on-site.

- Removing the three (3) wells and terminating pumping of the oily substance.

Currently, construction of the proposed development at the site is near completion.

ANALYSIS OF THE SOIL AND OILY SUBSTANCE

One discrete sample of oily soil stockpiled at the referenced facility was collected by M/B & A field personnel on October 30, 1986. The sample was delivered on the same day to James Montgomery Laboratory in Pasadena, California.

The following physical, chemical and biological analyses were performed:

- Ignitability (Flashpoint).
- Corrosivity (pH).
- Reactivity (cyanide/sulfide screen).
- Volatile organics analysis + 10 peaks.
- Base/neutral and acid extractables + 10 peaks.
- Persistent and bioaccumulative toxic inorganics (i.e., metals).
- Persistent and bioaccumulative toxic organics (i.e., pesticides, herbicides, and PCBs).
- Total hydrocarbons.
- 96-hour LC_{50} bioassay.

The analyses listed above were selected to evaluate the stockpiled soil pursuant to the criteria used by the California Department of Health Services to identify hazardous wastes, as presented in Article 11, Title 22 of the California Administrative Code.

In addition to the soil sample, three samples of the "raw" oily substance encountered at the site were collected by M/B & A field personnel on October 16, October 22, and November 14, 1986, respectively. The first two samples were delivered to the West Coast Analytical Service, Inc., in Santa Fe Springs, California. The third sample was delivered

to Global Geochemistry Corporation in Canoga Park, California. The analyses performed on these samples (see tabular presentation below) were selected to determine whether the oily substance was a crude or a waste refined product, and, if a crude, to determine its source.

Sample Date	Sample Material	Analytical Technique
October 16	Oil/water mixture	Nonhalogenated volatile organics
October 22	Oil/water mixture	Volatile halogenated organics Volatile aromatics Metals
November 14	Liquid hydrocarbon	Compositional analyses (e.g., API gravity, sulfur content, saturate and aromatic fractions, etc.)

ANALYTICAL RESULTS

Complete sets of the analytical test results for the one (1) soil sample and the three (3) oily substance samples are presented in Appendices A and B hereto, respectively. A summary discussion of these results follows:

- Based on the flashpoint (i.e., > 140°F), the pH (i.e., 7.8), and the cyanide/sulfide screen (i.e., negative) results of the soil sample, it is concluded that the oily soil is not ignitable, corrosive, or reactive.

- Total petroleum hydrocarbon concentration was 5% in the soil sample. Based on the analyses performed for volatile and semi-volatile organics, the compounds comprising this 5% concentration consists of high molecular weight complexes.

- Regulated pesticides and polychlorinated biphenyls (PCBs) were not detected in the soil sample.

- The reported metal concentrations for the soil sample are significantly less than the respective Total Threshold Limit Concentrations (TTLCs) established at 22 CAC, Chapter 30, and confirms the findings in BCL's verification sampling of the Buried Solid Waste area contained in their report to you of

August 7, 1986.

- Based on the results of the 96-hour LC_{50} bioassay and the calculated oral and dermal LD_{50}s (see Appendix C hereto) performed on the soil sample, it is concluded that the oily soil is not toxic.

- No chlorinated (or halogenated) hydrocarbons were present in the oily substance samples, but a cumulative concentration of 13 ppm of aromatic compounds (e.g., benzene, toluene, xylene) was measured.

- Based on the results of the compositional analyses performed on the liquid hydrocarbon (i.e., oily substance) sample, it is concluded that the material is highly degraded, that the aromatic and saturate fractions in the sample are high in molecular weight (usually indicative of crude oil), that the sample has chemical and physical properties that are similar to asphatic crude oil, and that the analytical data are consistent with those obtained from analyses of local Los Angeles Basin crude oil.

PROPOSED ACTION PLAN

The proposed plan for managing the stockpiled soil is to use the material as subbase for on-site parking areas and roadways (which material is routinely treated with oil anyway). As such, the material will be covered with asphalt pavement, which combined with site drainage structures will minimize precipitation from infiltrating through it. The supporting bases for this action include:

- The oily soil was removed from an area (i.e., Buried Solid Waste) that was addressed in the County-approved RAP. Based on the analytical results of verification sampling conducted by B&L Associates, the County confirmed that previous remedial measures undertaken in this area conformed to the RAP.

- The analytical test results for the sample collected by M/B & A are consistent with the verification sample results previously accepted by the Country for this on-site area.

- Based on the analytical test for the oily substance, the soil is impregnated with an asphaltic crude, consistent with crude oil found naturally in the Torrance area.

I look forward to discussing this with you further and viewing the material, if necessary.

Very truly yours,

GASCON MAR LTD.

LABORATORY REPORT

Samples: One (1) oil water sample
Date Received: 10-16-86
Purchase Order No: Verbal/C.W. Hass

The sample was analyzed by gas chromatography according to EPA method 8015. The top layer of the sample appears to be a crude oil with a boiling point range of 180° C to 450° C. The approximate hydrocarbon distribution is as follows.

LABORATORY REPORT

Samples: One (1) oily water sample
Date Received: 10-22-86
Purchase Order No.: W.C. Hass/Verbal

The sample was analyzed for volatile organic compounds by EPA Methods 601 and 602. These results are reported on the enclosed Organics Analysis Data Results forms.

The sample was also analyzed for metals using ICPMS. These results are reported on the enclosed Quantitative Analysis Report.

Data Reporting Qualifiers

Value - If the result is a value greater than or equal to the Detection Limit (DL), the value is reported

ND - Indicates that the compound was analyzed for but not detected. The minimum DL for the sample is reported based on necessary concentration or dilution actions.

TR - Indicates an estimated value. This flag is used when the mass spectral data indicates the presence of a compound that meets the identification criteria but the result is less than the specified DL but greater than zero.

LABORATORY REPORT

Samples: One (1) Oil Sample
Date Received: 10-29-86
Purchase Order No: Verbal

The sample was analyzed by gas chromatography according to EPA Method 8015 with the following results.

Hydrocarbon Distribution	Area Percent Oil *
C11	0.01
C12	0.15
C13	2.24
C14	3.85
C15	10.6
C16	7.20
C17	8.71
C18	10.1
C19	7.91
C20	49.1

The chromotograms are enclosed for your review

* This oil sample is different from the previous sample (JN#4308) in that the light ends are not present, thus concentrating the heavy ends.

Beverly Hills, CA. 90211

Dear Doug,

This is to confirm our conversation of December 4, 1986 regarding Global's interpretation of the results of analyses made on the liquid hydrocarbon sample you submitted (received Nov. 17, 1986). I have enclosed the analytical results for the work done to date, along with an invoice.

The first objective of the analytical scheme is to determine whether your sample is a crude oil or a refined petroleum waste product. This determination cannot be made with certainty on a single sample, which could be a mixture of crude and refined petroleum. The certainty of this determination on your particular sample is further diminished by the fact that it is highly degraded (as evidenced by the diminished n-alkane content and virtual absence of resolved peaks beyond phytane, in the saturate fraction chromatogram). Despite these difficulties, the analytical results given on Tables 1 and 2 and in the capillary GC data are consistent with results we have obtained from the analyses of highly degraded, asphaltic crude oils. The relatively high aromatic content, coupled with a wide volatility range in both the saturate and aromatic fractions, in particular, is indicative of a crude product. (The range of the saturate chromatogram is C11 to C35. Although no peaks are identified in the aromatic chromatogram, it represents about the same volatility range).

The second analytical objective, if your sample is a crude oil, is to determine the source (local or not). This objective has not been specifically addressed, however, the data acquired so far are consistent with data we have obtained from the analyses of local LA

Basin crude oils. More definitive identification of such a badly degraded oil is only possible by GCMS identification of the biomarkers (which are relatively unaffected by bacterial alteration) and correlation to the biomarker profile of a sample of known source.

If you have any questions, please do not hesitate to call

Sincerely,

David E. Meredith

David E. Meredith
Geochemistry Lab Manager

RECORD OF COMMUNICATION

☐ Phone Call ☐ Discussion ☐ Field Trip
☐ Conference ☐ Other (specify)

TO: Josh Workman	FROM: Elijah Hill	DATE: 10/16/86
SUBJECT: Torrance Blvd. & Western Ave. - Site Subsurface Contamination by Oil/Water		FILE NO: B II 6

SUMMARY OF COMMUNICATION:

In response to a telephone call from Jerry Tillman, the Dept. on 10/14/86 I investigated a complaint at the above site, formerly Torrance Tubing Company located at the S/W corner of Torrance Blvd. & Western Avenue. (See attached map) I met with Paul Nelson, the construction superintendent at the site. Mr. Nelson said that he was [illegible] and that a tractor operator was excavating at a location near the eastern fence line. The oil & water flowed readily into the excavation & [illegible] were dug around the perimeter of the excavation into which the oil & water flowed. Several pits paralleling the fence line were found to contain oil and initial appearances indicated that it might be flowing from under Western Avenue. It was discussed that Tidal Oil Co. (Crusader Oil) might be responsible but could not be contacted. Mr. Nelson pointed out the line. An Oil Well was identified (shown on the map) at the N/E corner of 213th St. & Western Avenue. Torrance Fire Department also reported that an 8" water line is located on Western Avenue.

CONCLUSIONS, ACTION TAKEN OR REQUIRED: (OVER)

✓ Underground storage tanks inspector, recommend referring this case for follow up to Groundwater Regulatory Section.

Referred to your Reg. Section

Jerry

INFORMATION COPIES TO:

The well at the N/E corner of 213th St and Hoskins Rd
[illegible] jar described as Uncompleted abandoned.
The site has an insufficient gravel building currently located
on it.
Capt. Hess stated Mobil Oil was contacted about the
pipeline oil visible within the metal [illegible] and
[illegible] transported through the pipeline.

[illegible] 18 Sept, a recorder of site was to obtain a sample
of the water from the [illegible]. The metal box
did appear to be partially filled with water, but upon
[illegible] there was a thin layer of water.
The excavation revealed that the site was a former [illegible]
of some type. Field TDS of the water sample is 21000ppm.

Because the material is extremely [illegible], it appears
[illegible] injected at the site during the time period.
The stained soils are being removed and will be [illegible]
being stored at Baker Lanes for disposal.

RELIANCE LETTER

September 21, 2017

To: Bank of Hope

and

U.S. Small Business Administration ("SBA")

Re: Borrower Name:
Project Address: 21171 South Western Avenue
Torrance, CA 90501

Environmental Investigation Report Number: ESA- 21171 Western

Dear Lender and SBA:

Environ Phase Consulting Company ("Environmental Professional") meets the definition of an Environmental Professional as defined by 40 C.F.R. § 312.10(b) and has performed the following "Environmental Investigation(s)" (check all that apply):

__A Transaction Screen of the Property dated _____, conducted in accordance with ASTM International's most recent standard (currently ASTM E1528-14);

__X__ A Phase I (or an Updated Phase I) Environmental Site Assessment of the Property dated 9/21/2017, conducted in accordance with ASTM International's most recent standard (currently ASTM E1527-13). In addition, the Environmental Professional has addressed the performance of the "additional inquiries" set forth at 40 C.F.R. § 312.22;

__ A Phase II Environmental Site Assessment of the Property dated _____, conducted in accordance with generally-accepted industry standards of practice and consisting of a scope of work that would be considered reasonable and sufficient to identify the presence, nature and extent of a Release as it impacts the Property.

Reliance by SBA and Lender. Environmental Professional (and Environmental Professional's firm, where applicable) understand(s) that the Property may serve as collateral for an SBA guaranteed loan, a condition for which is an Environmental Investigation of the Property by an Environmental Professional. Environmental Professional (and Environmental Professional's firm, where applicable) authorize(s) Lender and SBA to use and rely upon the Environmental Investigation. Further, Environmental Professional (and Environmental Professional's firm, where applicable) authorize(s) Lender and SBA to release a copy of the Environmental Investigation to the borrower for information purposes only. This letter is not an update or

modification to the Environmental Investigation. Environmental Professional (and Environmental Professional's firm, where applicable) makes no representation or warranty, express or implied, that the condition of the Property on the date of this letter is the same or similar to the condition of the Property described in the Environmental Investigation.

Insurance Coverage. Environmental Professional (and/or Environmental Professional's firm, where applicable) certifies that he or she or the firm is covered by errors and omissions liability insurance with a minimum coverage of $1,000,000 per claim (or occurrence) and that evidence of this insurance is attached. As to the Lender and SBA, Environmental Professional (and Environmental Professional's firm, where applicable) specifically waive(s) any dollar amount limitations on liability up to $1,000,000.

Waiver of Right to Indemnification. Environmental Professional and Environmental Professional's firm waive any right to indemnification from the Lender and SBA.

Impartiality. Environmental Professional certifies that (1) to the best of his or her knowledge, Environmental Professional is independent of and not a representative, nor an employee or affiliate of seller, borrower, operating company, or any person in which seller has an ownership interest; and (2) the Environmental Professional has not been unduly influenced by any person with regard to the preparation of the Environmental Investigation or the contents thereof.

Acknowledgment. The undersigned acknowledge(s) and agree(s) that intentionally falsifying or concealing any material fact with regard to the subject matter of this letter or the Environmental Investigations may, in addition to other penalties, result in prosecution under applicable laws including 18 U.S.C. § 1001.

Environmental Professional

Subject: Phase I, Environmental Site Assessment
Address: 21171 South Western Avenue
Torrance, CA 90501

Dear **Wonhee Yoon,**

On behalf of **Bank of Hope** (the client), Environ Phase Consulting Company (EPC) is pleased to submit this "Environmental Site Assessment (Phase I)" at the described subject site: I declare that, to the best of our professional knowledge and belief, I meet the definition of Environmental Professional as defined in ASTM 1527-13 and 312.10 of this part (40 CFR Part 312). I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EPC initiated visual site inspection for this report in accordance with the Phase I service agreement dated on August 31, 2017. To the best of our professional ability, EPC warrants that users of the report may rely upon it as on accurate reflection of the environmental condition of the property at the time it was evaluated. This report is the property of the client for whom it was prepared. Its distribution to others is at client's discretion. If you have any questions, please feel free to contact Jeff Lee at (323) 936-0411.

Best Regards,

Jeff Lee
Environmental Assessor

EXECUTIVE SUMMARY

A staff consultant of Environ Phase Consulting Company visited the subject site on September 5, 2017 to inspect the current site conditions. EPC recommends ***no further action*** at the subject site based on the below conclusions of this assessment:

Subject Site:	The subject site is addressed as 21171 South Western Avenue in the City of Torrance, California. Former addresses associated with the subject site include 1724-1754 Torrance Boulevard (even numbers). The site is located south of Torrance Avenue between South Western Avenue and Bow Avenue and consists of one irregular-shaped parcel lot (APN: 7355-032-010) totaling 136,465 square feet. The subject site is developed with a two-story multi-tenant office building at the central portion of the subject site and totaling 53,218 square feet. An approximately 450 square foot storage building is located west of the office building. The remaining portions of the subject site consist of an asphalt-paved parking lot and landscaping. See Figure 1 in Appendix 2 for site configuration.
Historical Usage:	According to historical sources (e.g. building permit records, historical aerial photographs, historical tenant search, and previous environmental reports), the subject site was undeveloped in 1927. By 1941, the subject site was developed with two buildings. By 1952, a few additional buildings were developed. However, the tenants of the buildings are unknown. In 1957, the subject site was listed as Alano Club of Torrance (1754 Torrance) and Torrance Street Department (1730 Torrance). In 1960, Alano Club of Torrance (1754 Torrance) was again listed. By 1980, the subject site was listed as Coast Mobile Home Sales (1724 Torrance). In 1987, the subject site was redeveloped with the present-day multi-tenant office building. No records of a dry cleaners, gas station, and industrial operations were found for the subject site.
Subject Site Reconnaissance:	EPC did not reveal significant evidences of UST, AST, PCB, distressed vegetation, stockpile soils, solid waste disposals, visual indications of chemical pits, ponds, lagoons, biological hazardous wastes, and other chemicals at the subject site based on our visual site inspection.
Previous Report:	On April 12, 2005 a "Phase I Environmental Site Assessment" for 21151, 21171, and 21221 South Western Avenue was prepared by EMG. Based on the report, the two-story office buildings were constructed in 1987 and renovated in 1999. According to EMG, prior to 1987, the subject site was undeveloped. Based on the findings of the report, no further action or investigation was recommended by EMG (EMG, 2005). See Appendix 7 for full report.
Recognized Environmental Condition (REC) Search:	**Historical RECs Study**: A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). o Historical RECs were not found at the subject site.

	RECs Study: The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. o RECs were not found at the subject site. **Controlled RECs Study:** A recognized environmental condition which involves a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority and that is subject to activity and use limitations. o Controlled REC was not found at the subject site.
Lien Search:	o No environmental lien was found in the Preliminary Title Report.
Immediate Adjacent Neighboring Properties:	o EPC *did not* reveal evidences of human harmful activity or *significant* pollutant emission to pose immediate environmental concern into the subject site from the **neighboring properties** during this environmental assessment (See Section 5).
Environmental Record Search (ERS) Result:	Environmental effects from the neighboring sites are evaluated at minimal risk level in accordance with the reported remedial actions, distance between the subject site and reference sites, and limited contamination of the reference sites. Thus, government agencies' listings of the subject site vicinity area are not expected to represent a significant environmental concern on the subject site. o According to the ERS Rec Check Report, eight (8) listings of High Risk Occurrences were found. However, based on the distance, elevation, and/or regulatory status of the sites, the sites were not likely to be of significant environmental concern to the subject site (See Section 6).
Data Gaps:	o No significant data gaps of historical tenant records, local environmental agency records, weather, and on-site reconnaissance were indicated during this assessment. o Owner's questionnaire was not provided to EPC at the time of this assessment. However, the lack of the questionnaire is not likely to affect the conclusion of this assessment.
Deviations & Deletions:	This Phase I report was conducted to meet or exceed the practices as All Appropriate Inquiries Rule {ASTM 1527-13 and 312.10 of this part (40 CFR Part 312)}. No significant deviations, deletions, or client imposed constraints were made from this Phase I practice.). • EPC is an independent consulting firm with no interest in the subject site at the subject site. • EPC has no special contractual conditions.
Report Preparation:	Environ Phase Consulting Co. (EPC) Jeff Lee, REA I Allen Shim, Registered Civil Engineer (PE)

EPC Summary Table since 1993

1. INTRODUCTION

1-1. Purpose

This site assessment report was conducted to evaluate environmental risk for current lending requirements. This report was performed to identify potential environmental concerns associated with the property due to its location and former and current property use.

1-2. Scope of Work & Involved Parties

This Environmental Site Assessment (Phase I) was performed to meet the AAI Rule (40 CFR Section 312.21-Results of Inquiry by an Environmental Professional and 312.31-Standards and Practices) following due diligences.

- On site visual inspection;
- Visual inspection surrounding the subject site;
- Review local environmental agencies' records;
- Review previous environmental report;
- Review available historical tenant records;
- Research hydrogeology;
- Review historical usages using building Dept record and Sanborn Map;
- Interview with the property Owner/User;
- Review environmental government records using database; and
- Recommendation/Conclusion

This report also addressed potential environmental risk under a 1-mile radius of the subject site. The information adduced in this Phase I report was furnished in good faith. An environmental data research report with reliable environmental site auditing was provided from the database supporting company, Environmental Data Resources Inc. (i.e., an environmental information and computer data retrieval company).

Environmental check list was summarized including involved parties for Phase I Preparation (Table 1):

Table (1) Phase I, Environmental Check List

Content	Check List	
Site Reconnaissance:	Site Photos	Yes
	On-Site inspection	Yes
	Immediate neighboring properties inspection	Yes
Review of Historical Uses & Sources of Information:	Building Dept Record	Yes
	Historical Tenant Search	Yes
	Sanborn Fire Insurance Maps Review	Yes
	Historical Aerial Photographs	Yes
Hydrogeology Information	USGS Topography Map	Yes

	Contour Data Search	Yes
Previous Environmental Assessment provided by the owner:	Environmental site assessment previously conducted by others was provided by the property owner.	No
	Environmental site assessment previously conducted by others was provided by other agency.	Yes
Review of Federal and State Records (i.e., Environmental Record Search (ERS) Report)	Standard Environmental Regulatory Records NPL, CERCLIS, ERNS, HMIRS, LUST, UST, SWIS, NT, Operation Sites Records, and etc.	Yes
Review of Local Government Agencies' Records:	Environmental related local agencies: Torrance Fire Dept.	No
	SCAQMD	Yes
	LUST/UST file search using SWRCB web site	Yes
Owner's Information:	Property Profile	Yes
	Preliminary Title Report & Deed for Lien Search	Yes
	County Tax Assessor record review	Yes
Environmental Questionnaire	Interview	No

Executive Summary	It generally consists of the reconnaissance summary, site information, decision regarding environmental concerns.	

EPC Table Form 010 since 1993

2. SUBJECT PROPERTY INFORMATION

2-1. Geographic Setting

The subject site is located at 21171 South Western Avenue, Torrance, California. Plot plan is presented in Appendix 2. The subject site's physical location is found employing a United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle (Quad) Map relevant to the subject property. The USGS 7.5 Minute Quad Map has an approximate scale of 1 inch to 2,000 feet, and shows physical features with environmental significances such as wetlands, water bodies, roadways, mines, and buildings. The subject site is located within 33˚ 50′ 13″ north latitude and 118˚ 18′ 39″ west longitude. The subject site lies within the Coastal Plain of Los Angeles County Groundwater Basin, West Coast Subbasin at approximately 58 feet above mean sea level (MSL).

2-2. Subject Site Description

A staff consultant of Environ Phase Consulting Company (EPC) visited the subject site on September 5, 2017 to observe the current site conditions (See Section 3 in this report and Site Photos as shown in Appendix 2): The subject site is addressed as 21171 South Western Avenue in the City of Torrance, California. Former addresses associated with the subject site include 1724-1754 Torrance Boulevard (even numbers). The site is located south of Torrance Avenue between South Western Avenue and Bow Avenue and consists of one irregular-shaped parcel lot (APN: 7355-032-010) totaling 136,465 square feet. The subject site is developed with a two-story multi-tenant office building at the central portion of the subject site and totaling 53,218 square feet. An approximately 450 square foot storage building is located west of the office building. The remaining portions of the subject site consist of an asphalt-paved parking lot and landscaping. See Figure 1 in Appendix 2 for site configuration.

2-3. Historical Property Use Search

2-3-1. Property Profile

According to historical sources (e.g. building permit records, historical aerial photographs, historical tenant search, and previous environmental reports), the subject site was undeveloped in 1927. By 1941, the subject site was developed with two buildings. By 1952, a few additional buildings were developed. However, the tenants of the buildings are unknown. In 1957, the subject site was listed as Alano Club of Torrance (1754 Torrance) and Torrance Street Department (1730 Torrance). In 1960, Alano Club of Torrance (1754 Torrance) was again listed. By 1980, the subject site was listed as Coast Mobile Home Sales (1724 Torrance). In 1987, the subject site was redeveloped with the present-day multi-tenant office building. No records of a dry cleaners, gas station, and industrial operations were found for the subject site. The summary of the property profile is shown in Table (2).

Table (2) Summary of Property Profile

Representative Address:	21171 South Western Avenue Torrance, CA 90501
APN:	7355-032-010
Jurisdiction:	City of Torrance
Primary Owner:	TCS Plaza Inc
Occupancy:	Multi-Tenant Office Building
Property Type:	Commercial
Property Size:	136,465 square feet
No. of Building:	One 2-Story Building
Building Size:	53,218 square feet
Built Year:	1987

EPC Table Form 020 since 1993
Chicago Property Profile and Los Angeles County Assessor

2-3-2. Fire Insurance Map Review (Sanborn Map)

EPC requested Sanborn maps to Environmental Record Search (an environmental information and computer data retrieval company for EPC). Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were found as follows (Appendix 3).

- In 1929 and 1932, the subject site appears to be vacant. The neighboring adjacent properties to the south and west also appear to be vacant. Further to the west and southwest appear to be occupied by residential dwellings and industrial buildings, respectively. The northeast portion of the Fire Insurance Map is unmapped.

Fire insurance maps are large-scale maps that depict the commercial, industrial and residential sections of some twelve thousand cities and towns in the United States. These specialized maps were first prepared for the exclusive use of fire insurance companies and underwriters to provide accurate, current and detailed information about the buildings they were insuring. Information relied upon in place of personal examinations of property. Fire insurance maps show the size, shape and construction of dwellings, commercial buildings and factories, as well as indicate widths and names of streets, property boundaries, and house and block numbers. The primary benefit of reviewing fire insurance maps is to analyze historical land use of a subject property and its immediate area. In this review, special emphasis is given to the existence and location of fuel storage tanks, flammable or other potentially hazardous substances, as well as the nature of businesses located on site.

2-3-3. Aerial Photograph

Archival aerial photographs (U.S. Dept. of Interior Geological Survey) were examined for the building location at the subject site as shown in Appendix 3. The summary of the aerial photos are shown in Table (3).

Table (3) Summary of Aerial Photographs

Year	Subject Site Description	Neighboring Property Description
1927	The subject site is undeveloped.	**North:** Roadway followed by undeveloped lot. **South:** Undeveloped lot. **East:** Two structures appear. **West:** Undeveloped lot.
1941	Two structures appear at the southern portion of the subject site. The northern portion appears to be undeveloped.	**North:** Roadway followed by undeveloped lot. **South:** Undeveloped lot. **East:** One structure appears. **West:** Undeveloped lot.
1952	Additional structures appear at the southwest and northern portion of the subject site.	**North:** Roadway followed by undeveloped lot. **South:** Two large structures appear. **East:** One structure appears. **West:** Roadway followed by present-day mobile home park.
1963 1972 1980	A large rectangular-shaped structure appears at the southern portion of the subject site. Two small rectangular-structures appear at the southwest portion of the subject site. Northern portion appears to be undeveloped.	**North:** Roadway followed by undeveloped lot. **South:** Occupied by large industrial structures. **East:** Occupied by parking lot. **West:** Roadway followed by present-day mobile home park.
1985	The previous structures appear to be demolished and the site is vacant.	**North:** Roadway followed by present-day commercial buildings. **South:** Appears to be vacant. **East:** Appears to be vacant. **West:** Roadway followed by present-day mobile home park.
1994 - 2016	The present-day office-building appears at the subject site.	**North:** Roadway followed by present-day commercial buildings. **South:** Occupied by present-day office building. **East:** Occupied by present-day office building. **West:** Roadway followed by present-day mobile home park.

EPC Table Form 030 since 1993

2-3-4. Historical Tenants Search

Table (4) Summary of Historical Tenants Search

Year	Address	Tenant
1957	1730 Torrance	Torrance Street Department
	1754 Torrance	Alano Club of Torrance
1960	1754 Torrance	Alano Club of Torrance
1965-1975	1700-1798 Torrance	Address range is not listed.
	21171 Torrance	Address is not listed.
1980	1724 Torrance	Coast Mobile Home Sales
1990	21171 Torrance	CA St. Med Quality BD
		Geodynamics Corp
		Tokyu Travel Am Inc
1995	21171 Torrance	Geodynamics Corp
2000	21171 Torrance	Address is not listed.

EPC Table Form 040 since 1993 (Appendix 4)

General Information: Various published city business tenant directories for the **Los Angeles County, CA** area to identify historic tenants of the subject site and its neighboring properties was completed. The three general types of directories researched for the historical tenant report are the city directory, street address directory, and criss-cross directory. All three types are devoted to have sections that list the tenant and telephone number of given street addresses by their street name and address. These telephone directories, not as readily available to the public as white pages or yellow pages, are excellent for uncovering names, business names and nature of businesses as listed by street address.

2-3-5. Building Department Records

The records provided limited information about building construction date, past owner, and building use. The City of Torrance Building & Safety Department permit record is able to use directly or indirectly to determine historical occupancies, property usages, and construction records of the subject site as summarized as follows (Appendix 5):

Table (5) Summary of Building Permit Records

Year	Address	Owner	Purpose
1986	21171 Western	Torrance Center I	Approval for proposed building construction.
1987	21171 Western	Gascon Mar Development	Certificate of Occupancy for two story office/research & development building.
1987	21171 Western	Torrance Center I	Building permit for alteration for office building.
1988	21171 Western	Gascon Mar Development	Notice of Change of Address. Former addresses included 1704-1754 Torrance Boulevard.
2000	21171 Western	Torrance Motor Sales	Demo 2 interior rooms and construct 2 new interior room.
2006	21171 Western	TCS Plaza Inc	Add demising wall to create new storage space in Suite 250.
2006	21171 Western	TCS Plaza Inc	Install demising wall and create new space #260.
2006	21171 Western	TCS Plaza Inc	Remodel reception area.
2008	21171 Western	TCS Plaza Inc	Renovate to create 1 office & server room.

Year	Address	Owner	Purpose
2010	21171 Western	TCS Plaza Inc	Renovate portion of warehouse, remove and rebuilding walls to create offices and locker room.

Source: City of Torrance Building & Safety Division (Appendix 5).
EPC Table Form 050 since 1993

2-4. Records Review for Hazardous Substance Usages

EPC field engineer visited or contacted the following public agencies to find any records of operation permits, licenses, and registration of underground fuel storage tank (UST) or any other hazardous substances on the subject site.

2-4-1. State Water Resources Control Board

A review of the Geo Tracker UST record using website (http://geotracker.waterboards.ca.gov/) dated August 31, 2017. The subject site did not appear as UST/LUST site in the **Geo Tracker** (Appendix 6).

2-4-2. Torrance Fire Department

On September 8, 2017, EPC requested fire department records associated with hazardous materials and underground storage tanks for the subject site. As of this assessment, EPC has yet to receive a response from the Torrance Fire Department. Based on other historical sources for the subject site, underground storage tank and hazardous material records for the subject site is not likely to exist (Appendix 6).

2-4-3. South Coast Air Quality Management District (SCAQMD)

Based on the SCAQMD information using the agency' databases (http://www3.aqmd.gov/webappl/fim/prog/search.aspx) on August 31, 2017, the subject site did not appear in the SCAQMD database (Appendix 6).

2-4-4. Cal/EPA DTSC

Hazardous generator record of the subject site did appear in California State EPA Dept. of Toxic Substances Control (DTSC) (Appendix 6):

- ADT LLC DBA ADT Security Services (Facility ID# CAL000391823) is listed as *Active*. In 2014, the facility generated 0.0225 ton of off-spec, aged, or surplus organics. In 2015, the facility generated 0.0125 ton of unknown waste.
    - Based on the quantity of the waste generated at the site, the site is not a large quantity generator of hazardous wastes. The wastes generated at the site are not likely to be of significant environmental concern for the subject site.

3. SUBJECT SITE RECONNAISSANCE

EPC performed the field inspection survey of the subject site and adjacent properties on September 5, 2017 including visual inspection of ACMs, PCB chemical, UST, AST, fuel island, hydraulic hoist unit, hazardous material, well, lagoons, and visual indication of spill using an **Environmental Questionnaire** Form of the ASTM E1528-13 (Appendix 7). The field inspection was summarized in Table (6): EPC did ***not*** reveal evidences of human harmful activity or ***significant*** pollutant emission enough to pose immediate environmental concern in the subject site.

Table (6) Subject Site Reconnaissance Summary

No	Inspection Categories	Risk Evaluation				Records / Description
		High	Med	Low	Unk	
3-1	Vapor Intrusion			x		Commercial
3-2	Asbestos-Containing Material			x		Built Year: 1987
3-3	Lead Based Paint			x		No pealing evidence
3-4	Polychlorinated Biphenyl			x		No
3-5	Underground Storage Tank, Piping, and/or Dispenser			x		No
3-6	Aboveground Storage Tank (AST)			x		No fuel AST
3-7	Hydraulic Hoist Unit			x		No
3-8	RCRA Hazardous Materials			x		No
3-9	Non-RCRA Wastes, Other Chemicals Containers			x		Household cleaning products.
3-10	Hazardous Waste TSD			x		No
3-11	Distressed Vegetation			x		No
3-12	Stockpile, Soil Staining			x		No
3-13	Waste Treatment Unit/Clarifier			x		No
3-14	Solid Waste Disposals			x		No
3-15	Wells			x		No
3-16	Utilities			x		Yes
3-17	Visual Indications of Spills, Leakage			x		No
3-18	Pits, Ponds, & Lagoons			x		No
3-19	Urea Formaldehyde			x		No
3-20	Herbicide & Pesticides			x		No
3-21	Biological Hazardous Wastes			x		No
3-22	Radon			x		LA County area: 2-4 pCi/L

EPC Table Form 060 since 1993

Radon Estimate: The area radon concentrations were reported by U.S. Radon Map

3-1. Vapor Intrusion

The subject building is not likely a vapor intrusion (VI) as following reasons: 1) No evidence of volatile organic substances release was observed at the site; 2) No current hazardous materials used permits (e.g., gas station and dry cleaners) were found at the subject site; 3) No vapor organic compounds containing devices (e.g., dry cleaning machine, fueling system, and fuel combustion system, UST, and AST) was observed at the subject site; and 4) No evidence of building floor damage that poses significant vapor pathway.

Tier 1 (EPA, 2012): The EPA guidance recommends primary screening be used with general knowledge of a site and chemicals known or reasonably suspected to be present in the subsurface; it does not call for specific media concentration measurements for each Contaminants of Concern (COC). Since this screen relies on basic physical factors, such as the presence of volatile compounds or occupied buildings, Tier 1 can be used to screen in sites (that is, carry sites on for further investigation of the potential for VI) as well as (where there is adequate characterization of the contamination present) screen out sites from further consideration since VI is unlikely based on knowledge of the basic physical parameters.

Tier 2. The EPA guidance recommends secondary screening be used with some limited site-specific information about the contamination source. Observations and experiences since 2002 suggest considerable variability and uncertainty are associated with the predicted indoor air concentrations based on external measurements. The recommended VISL Calculator can assist RPMs and OSCs in determining whether a VI investigation is needed based on an initial review of limited site data by: (1) identifying whether chemicals that can pose a risk through VI are present; (2) determining if explosive levels are present (lower explosive limit [LEL] column of the VISL); and (3) comparing existing data (if determined to be of adequate quality) against screening levels provided in the VISL Calculator for standard default scenarios (residential or commercial).

- The vapor screen test (Tier 2) is out of the scope of work this Phase I assessment.

OSCs: On-Scene Coordinators
RPM: Remedial Project Manager
VISL: Vapor Intrusion Screening Level
VI: VI is the general term given to the migration of volatile chemicals from subsurface contaminated soils and groundwater into the indoor air spaces of overlying buildings through openings in the building foundation (for example, cracks and utility openings)(Johnson and Ettinger 1991). A key concept of VI is that the vapor concentrations attenuate (decrease) as the vapors migrate.

3-2. Asbestos-Containing Building Materials (ACMs)

Result of Visual Inspection: Based on such historical information of the subject site, the building was constructed after the year when Federal Government banned asbestos for commercial use in 1978. Actual sampling and analysis (polarized light microscopy with dispersion staining method and/or count point) is beyond the contracted scope of this assessment work, thus not included in this report.

Information: U.S Federal Government banned asbestos for commercial use in 1978. Based on above historic information of the site, the on-site building at the site appears to be of the age and construction that suggests the possibility the construction material may contain asbestos fibers. Potential locations for the presence of asbestos containing materials (ACMs) in the on-site building are floor tiles, wall insulation, pipe insulation, roof sealant, and etc.

3-3. Lead-Based Paint

Actual sampling and analysis is beyond the contracted scope of this assessment work, thus not included in this report. If renovation or demolition of the subject building is planned, lead based paint inspection can be tested on interior and exterior walls using non-destructive analysis device (e.g., Nitron XLp 300A or others). The lead based paint inspection should be performed to meet the inspection protocol in Chapter 7 of HUD Guidelines (United State Department of Housing and Urban Development 2012 Edition).

General Information: Title X of the Housing and Community Development Act of 1992 referred to as the "Residential Lead Based Paint Hazard Reduction Act" was signed on October 28, 1992. And the interim final rule 29 CFR 1926.62 for the occupational Safety and Health Administration (OSHA) regulated lead exposure standard in construction in June 3, 1993 requires disclosure of the presence of lead-based paint hazards before the sale or lease of pre-1978 housing or commercial building. This rule (lead exposure standard) will become effective in October 1995. This provision of the OHSA lead in construction standard-29 CFR 1926.62 applies to all construction work in which lead is present. The employer must ensure that no employee is exposed to concentration of lead in excess of the permissible exposure level (PEL) for lead, which is an eight-hour time weighted average (TWA) exposure of 50-ug/cubic meter. Testing and monitoring must be continually conducted as the project unfolds. Dust wipe clearance testing must be done at the completion of the project to demonstrate that the project activities did not leave any lead hazard on site at the end of the project.

SBA SOP 50 105 (H), Subpart B- Section H: Special Use Facilities Prudent lending practices dictate that specific additional environmental assessments be performed for certain special use facilities. For example, Property constructed prior to 1980 that will be used for daycare or child care centers or nursery schools or residential care facilities occupied by children must undergo a lead risk assessment (for lead based paint) and testing for lead in drinking water, and the results of these assessments must be submitted to the SBA. Disbursement will not be authorized unless the risk of lead exposure to infants and small children has been sufficiently minimized".

3-4. Polychlorinated Biphenyl (PCB's)

- No PCB-containing hydraulic fluid trash compactor or PCB-containing transformer was discovered at the site.
- PCB chemical was not observed at the subject site during our inspection.
- One pad-mounted electrical transformer was located southeast of the subject site office building. No signs of leaking and damage were observed during our site inspection.

General Information: Prior to 1978, PCBs was commonly used in dielectric fluids in transformers, capacitors, and light ballast's due to their desirable thermal characteristics and hydraulic fluid compactor. Due to their demonstrated toxicity and persistence in the environment, PCB manufacturing in the United State was discontinued. No PCB-containing light ballasts were inspected, which operate fluorescent light fixtures. Separate survey of PCB's on existing light ballasts can only determine the content, unless such ballasts contained in the fluorescent light fixtures are labeled with "no PCB". Prior to construction or any disturbances to the existing light fixtures, PCB-ballasts survey has to be performed, and identified PCB-ballasts shall properly be disposed of by incineration or recycled within authorized facilities.

3-5. Underground Fuel Storage Tank (UST), Associated Piping, & Fuel Island

No USTs and features (e.g., vent pipe, island form, service canopy, tank manhole, and etc.) were observed at the subject site.

3-6. Aboveground Fuel Storage Tank (AST)

No fuel ASTs were observed on the property.

Definition

- AST: An "aboveground storage tank" or "storage tank" means a tank that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground. The aggregate design/shell capacities of all non-transportation related aboveground tanks containing petroleum at the tank facility (owned or operated by the same business or person) with a design/shell capacity equal to or greater than 55 gallons should be added together. If the total aggregate capacity is equal to or greater than 1,320 gallons, the tank facility is likely captured under California Aboveground Petroleum Storage Act (APSA).

3-7. Hydraulic Hoist Unit

- No underground hydraulic hoist unit was observed at the subject site.

- One hydraulic unit associated with the single elevator was observed at the subject site. No signs of leaking or spills were observed in the vicinity of the hydraulic unit. The hydraulic unit is not of significant environmental concern.

3-8. RCRA-Hazardous Substances

No RCRA hazardous substances were observed at the subject site during our site inspection.

Definition

RCRA is the Resource Conservation and Recovery Act, which was enacted by Congress in 1976. RCRA's primary goals are to protect human health and the environment from the potential hazards of waste disposal, to conserve energy and natural resources, to reduce the amount of waste generated, and to ensure that wastes are managed in an environmentally sound manner. RCRA regulates the management of solid waste (e.g., garbage), hazardous waste, and underground storage tanks holding petroleum products or certain chemicals.

3-9. Other Chemical Containers

- Small amounts of household cleaning products were observed during the site inspection. The household cleaning products were stored in closed containers. No signs of leaking or spills were observed. The household cleaning products are not of significant environmental concern.

3-10. Hazardous Waste Treatments, Storage, and Disposal (TSD)

No TSD of hazardous waste, other than described in the preceding sections, was found during the site investigation.

3-11. Distressed Vegetation

No evidence of distressed vegetation at the subject site.

3-12. Stockpile & Soil Staining

No stockpile and soil staining were observed at the subject site.

3-13. Wastewater Treatment Unit/Clarifier

No wastewater treatment unit/clarifier was observed at the subject site.

3-14. Solid Waste Disposals

No improper activities of treatment or disposal of hazardous, medical, or toxic wastes were performed on the subject site.

3-15. Wells

No monitoring well covers were observed at the subject site.

3-16. Utilities

Utility	Utility Company	Observation
Any industrial boiler used of petroleum fuel oil	Individual Co.	No oil boiler, might be contained asbestos insulator, was observed at the subject site.
Water	City of Torrance	Active
Electricity	SoCal Edison	Active
Septic Tank	Individual Co.	None
Sewer	City	Active
Telephone	AT&T	Active
Municipal gas	SoCal Gas	Active

EPC Utility Table since 1993

3-17. Visual Indications of Spills or Leaks

No evidences of oils spill or chemicals leak were observed at the site.

3-18. Pits, Ponds, and Lagoons

No visible evidence of wetlands such as pits, ponds, lagoons, or any other water bodies were observed within the property's boundary line.

3-19. Urea Formaldehyde

No evidence of UF foam insulation was observed during the subject site reconnaissance. The potential for UF on the site presumed low. EPC is not contracted to perform the testing of formaldehyde level on the building. Thus, the delineation of its level is beyond the scope of the service included in this report: Formaldehyde, by itself, or in combination with other chemicals, serves a number of purposes in manufactured products. It had been widely used to add permanent press qualities to clothing and draperies, as a component of glues and adhesives, and

as a preservative in some paints and coating products. In commercial buildings, the most significant sources of formaldehyde are pressed wood products made using adhesive that contain urea-formaldehyde (UF) resins, such as particleboard, hardwood plywood paneling, and medium density fiberboard. As a colorless, pungent-smelling gas, formaldehyde can cause sensations in the mucous membrane and difficulty in breathing which could lead to asthmatic attack. Newly installed UF foam insulation often releases the gas-phase UF for six to twelve months. Such volatilized gases can concentrate in the internal air of a building.

3-20. Herbicides & Pesticides

No evidence of herbicides or pesticides use on the site was observed during the inspection.

3-21. Biological Hazardous Wastes

No biological hazardous wastes were observed during the inspection.

General Information: Any Substance of a human or animal origin, other than food waste, which is to be disposed of and could harbor to transmit pathogenic organisms including but not limited to pathological specimens such as tissues, blood elements, excreta, secretion, bandages, and related substances. Increasing interest in the hazards from pathogens in bio-solid waste or sludge has required more intensive interest in determining their levels in bio-solid waste and in the effect of processing techniques on them. Methods, which are merely extensions of methods used for wastewater, are well developed for the usual indicators of bacterial pollution (e.g., coliform, fecal coliform) and common pathogens such as Salmonella species. Very little is known about the levels of parasites such as protozoa and helminthes in solid wastes in the United States. Determination of virus concentrations in solid wastes is complicated by the fact that viruses are strongly adsorbed by the various solids types. The recovery from such solids is highly variable, which makes it difficult to establish levels and effects of processing. The National Science Foundation, ERDA, and EPA have been supporting work related to transport of viruses from solid wastes to the environment and to destruction of viruses in solid wastes by ionizing radiation or incineration.

3-22. Radioactivity (Radon)

The subject site was ***not likely*** to be exposed by harmful level of radon with following reasons:

- Radon concentrations in the Los Angeles County were assessed using information supplied by the EPA Map of Radon Zones. The Los Angeles County is located in Zone 2. Average indoor radon levels may be between 2-4 picocuries of radon per liter of air (pCi/L). The USEPA action level for radon is 4.0 pCi/L. Therefore, the levels of radon at the subject site did not appear to present an environmental concern.

  General Information: The purpose of the EPA map is to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. This map is not intended to be used to determine if a home in a given zone should be tested for radon.

4. OWNER/USER PROVIDED INFORMATION

4-1. Interview with the Current Property User

- Owner's questionnaire was not provided to EPC at the time of this assessment. However, the lack of the questionnaire is not likely to affect the conclusion of this assessment.

- TCS Plaza Inc. appeared as the listing owner for the property (Chicago Title Company).

4-2. User Provided Information

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM 1527-13 Phase I Standards require that the Report User conduct independent research and consider certain information before purchasing a property.

4-2-1. Lien Search

The property user/owner is required to obtain a recent (less than 180 days old) title report prepared for the subject property. The report should be reviewed to obtain information regarding environmental clean-up liens or activity and use limitations with regard to the subject property. If environmental cleanup liens or activity and use limitations encumbering the subject property or in connection with the subject property are identified, the User should provide that information to the Environmental Professional (Environ Phase Consulting Company). If the User has actual knowledge of environmental cleanup liens or activity and use limitations encumbering the subject property or in connection with the subject property, the User should provide that information to the Environmental Professional (i.e., Environ Phase Consulting Company).

- No environmental lien was found in Preliminary Title Report provided by lender.

4-2-2. Specialized Knowledge

The property user/owner should provide the Environmental Professional (Environ Phase Consulting Company) with any specialized knowledge the User has with regard to recognized environmental conditions in connection with the property.

- The Owner/User is not aware of any specialized knowledge about the subject property with respect to recognized environmental conditions.

4-2-3. Commonly Known or Reasonably Ascertainable Information

If the property user/owner is aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions, the property user/owner should provide the information to the Environmental Professional (Environ Phase Consulting Company).

- The Owner/User is not aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions.

4-2-4. Property Valuation

If this Phase I was prepared as due diligence for a property transaction, it is the responsibility of the User to consider the relationship of the purchase price to the fair market value of the property. If the purchase price is significantly lower than the fair market value, the User should identify the alternate reason for the low purchase price if the lower purchase price is not related to the property being affected by hazardous substances or petroleum products.

- No significant evidences of valuation reduction were found for the subject site regarding environmental issues during this assessment.

4-3. Previous Reports

- On April 12, 2005 a "Phase I Environmental Site Assessment" for 21151, 21171, and 21221 South Western Avenue was prepared by EMG. Based on the report, the two-story office buildings were constructed in 1987 and renovated in 1999. According to EMG, prior to 1987, the subject site was undeveloped. Based on the findings of the report, no further action or investigation was recommended by EMG (EMG, 2005). See Appendix 7 for full report.

5. VISUAL INSPECTION OF NEIGHBORING PROPERTIES

Result of Visual Inspection: Our site inspection did reveal evidences of human harmful activity or significant pollutant emission enough to pose immediate environmental concern into the subject site. Neighboring properties were summarized as shown in Table (7).

Table (7) Summary of Adjacent Properties

Site	Address	Visual Inspection/Notes
North	Immediate: Torrance Boulevard Across Roadway: Multi-Tenant Commercial Buildings 1741-1751 Torrance Boulevard	Based on the regulatory records and site reconnaissance, the adjacent properties were not of significant environmental concern.
South	2-Story Office Building 21241 South Western Avenue	No signs of hazardous materials and wastes were observed.
East	2-Story Office Building 21151 South Western Avenue	No signs of hazardous materials and wastes were observed.
West	Immediate: Bow Avenue Across Roadway: Residential Mobile Home Park	No signs of hazardous materials and wastes were observed.

Photos: See Appendix 2
EPC Table Form 070 sine 1993

6. ENVRIONMENTAL GOVERNMENT RECORD SEARCH

In order to determine reported areas of possible environmental impairment on or within a 1-mile radius of the site, an environmental record search (ERS) report was obtained from the database company. The conducted government record search was performed to aid. In compliance with AAI, the environmental agencies' records are summarized as follows: Identification of facilities, location within a one-mile or half mile radius of the subject site, which might pose a potential threat to the subsurface environment at the subject site; and identification of any environmental violation notices associated with activities conducted at the subject site itself. The following lists were reviewed for sites within a one-mile of the site (Appendix 8).

Environmental effects from the neighboring sites are evaluated at ***minimal risk level*** in accordance with the reported remedial actions, distance between the subject site and reference sites, and limited contamination of the reference sites.

High Risk* Occurrences Identified in Requested Search Radius		
Database Searched	**Distance Searched (Miles)**	**High Risk Occurrences Found**
CorAct-Open-CA	0.5	0
Military-Active-CA	1	0
School-Active-CA	0.5	0
State-Response-Active-CA	1	0

VCP-Active-CA	0.5	0
CERCLIS-US	0.5	0
County-LUST-Open-CA	0.5	0
County-SLIC-Open-CA	0.5	0
Hist-UST-Cleanup-CA	0.5	0
LUST-Open-CA	**0.5**	**2**
NPL-US	**1**	**1**
Proposed-NPL-US	1	0
Response-CA	**1**	**3**
SAA-Agreements-US	1	0
SLIC-Open-CA	**0.5**	**1**
Tribal-LUST-Open-Reg9	0.5	0

* "High Risk" occurrences are those that have known contamination and have not received a "case closed" or "no further action" status from the agency that maintains the records.

LUST-Open-CA

Leaking Underground Storage Tanks, Open Cases

Description: The California State Water Resources Control Board's Underground Storage Tank Program keeps a list of all underground storage tanks which have been reported as having had a release. This subset of sites are those that have not yet been cleaned up and now have a status of Case Open.

- The subject site does not appear in the LUST-Open-CA listing.

- Two LUST-Open-CA listings appeared within a 0.5-mile radius of the subject site. Former Gas Station is located at 21138 South Western Avenue, 0.15 miles northeast of the subject site and 10 feet lower than the subject site. According to the SWRCB's GeoTracker online database, the site is listed as *Open-Site Assessment* as of 2/7/2015. According to a June 8, 2017 letter that was prepared by KCE Matrix, Inc. (KCE), the letter requested that the frequency of groundwater monitoring be changed from semi-annually to annually due to the rationale that groundwater had not been significantly impacted, as demonstrated during four rounds of monitoring from three monitoring wells (MW-1 – MW-3) from 2014 to 2016 and groundwater grab sampling in 2016. The maximum historical concentrations of total petroleum hydrocarbons as gasoline (TPHg) and benzene have been 1,520 ug/L and 12 ug/L, respectively, but neither TPHg or benzene were detected in 2015 to 2016. On June 20, 2017, the LARWQCB concurred with the proposed change in groundwater monitoring frequency from semi-annually to annually. Based on the horizontal distance and elevation to the subject site and results of the ongoing groundwater monitoring, the site is not likely to be of significant environmental concern to the subject site.

- American Honda Motors C. Bldg. 320 is located at 1919 Torrance Boulevard, 0.27 miles northwest of the subject site. According to the SWRCB's GeoTracker online database, the site is listed as *Open-Site Assessment* as of 10/19/2007. On July 18, 2017, the site was issued a pre-closure letter from the LARWQCB because the site met the Regional Board's low threat criteria for a case closure. Based on the horizontal distance to the subject site and regulatory status of the site, the site is not likely to be of significant environmental concern to the subject site.

NPL-US

National Priorities List

Description: The National Priorities List is the list of national priorities among the known releases or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States and its territories. The NPL is intended primarily to guide the EPA in determining which sites warrant further investigation.

- The subject site does not appear in the NPL-US listing.

- One NPL-US listing appeared within a 1-mile radius of the subject site. Montrose Chemical Corp. is located at 20201 South Normandie Avenue, 0.97 miles northeast of the subject site and 8 feet lower than the subject site. According to the DTSC's EnviroStor online database, the site is listed as *Active* since 4/22/1996. Montrose Chemical Company (Montrose) operated from 1947 to 1982 as the largest DDT manufacturer in the country. The site is located in a light industrial and residential area with about 3,000

people living within a quarter-mile of the site. The 13-acre facility was closed and subsequently dismantled in 1985. DDT, chlorobenzene, and byproducts that included parachlorobenzene sulfonic acid (pCBSA) were released to soils, groundwater, and drainage channels. In 1989, the U.S. Environmental Protection Agency (U.S.EPA) added the Montrose site to the National Priorities List. To better manage cleanup efforts, the U.S. EPA divided the Montrose Superfund site into separate operable units (or OUs).

Based on the horizontal distance and elevation of the site, ongoing groundwater monitoring, identification of the responsible party, and oversight of the case by the US EPA, the site is not likely to be of significant environmental concern to the subject site.

Response-CA

State Response Sites

Description: This database includes one component of the Cortese List Data by identifying State Response and National Priorities List (NPL) (Federal Superfund) sites listed under Health and Safety Code section 25356.

- The subject site does not appear in the Response-CA listing.

- Three Response-CA listings appeared within a 1-mile radius of the subject site. Armco, Inc. is located at 1541 Border Avenue, 0.29 miles southwest of the subject site. According to the DTSC's EnviroStor online database, the site is listed as *Certified* since 11/16/1987. Based on the horizontal distance and regulatory status of the site, the site is not likely to be of significant environmental concern to the subject site.

- Halbert's Lumber, Inc. is located at 2026 Abalone Avenue, 0.65 miles south of the subject site. According to the DTSC's EnviroStor online database, the site is listed as *Backlog* since 1/16/2008. Halbert's Lumber was in operation from the 1970's until 1991. The Halbert's site was contaminated with metals from zinc ash to fill in low land areas, low spots, and puddled areas. The zinc ash was obtained from an adjacent facility which smelted zinc. The Los Angeles County Fire Department oversaw clean up activities at the Halbert's Lumbert site. The clean up activities were concluded in 1996. Based on the horizontal distance to the subject site and past clean up activities at the site, the site is not likely to be of significant environmental concern to the subject site.

- Montrose Chemical Corp is located at 20201 Normandie Avenue, 0.97 miles northeast of the subject site and 8 feet lower than the subject site. See NPL-US section above for more information.

SLIC-Open-CA

Spills, Leaks, Investigation & Cleanup, Open Cases

Description: The Spills, Leaks, Investigation & Cleanup (SLIC) Program deals with site investigation and corrective action involving sites not overseen by the Underground Tank Program and the Well Investigation Program. These particular sites are considered open by the agency.

- The subject site does not appear in the SLIC-Open-CA listing.

- One SLIC-Open-CA listing appeared within a 0.5-mile radius of the subject site. American Honda Motors C. Bldg. 320 is located at 1919 Torrance Boulevard, 0.27 miles northwest of the subject site. According to the SWRCB's GeoTracker online database, the site is listed as *Open-Site Assessment* as of 10/19/2007. On July 18, 2017, the site was issued a pre-closure letter from the LARWQCB because the site met the Regional Board's low threat criteria for a case closure. Based on the horizontal distance to the subject site and regulatory status of the site, the site is not likely to be of significant environmental concern to the subject site.

Superfund-Active-CA

Envirostor Superfund Active Sites

Description: This database contains a listing of Federal Superfund Sites identified by the U.S. EPA where the Department of Toxic Substances Control is actively involved, either in a lead or support capacity, in the investigation and/or remediation currently in progress. This subset of cases have a status of Active.

- The subject site does not appear in the Superfund-Active-CA listing.

- One Superfund-Active-CA listing appeared within a 1-mile radius of the subject site. Montrose Chemical Corp is located at 20201 Normandie Avenue, 0.97 miles northeast of the subject site and 8 feet lower than the subject site. See NPL-US section above for more information.

Subject Site

The subject site was listed in the following database:

HWIS-CA (Hazardous Waste Information Summary)
See Section 2-4-4 for more information.

7. CONCLUSION

A staff consultant of Environ Phase Consulting Company visited the subject site on September 5, 2017 to inspect the current site conditions. EPC recommends ***no further action*** at the subject site based on the below conclusions of this assessment:

Subject Site

The subject site is addressed as 21171 South Western Avenue in the City of Torrance, California. Former addresses associated with the subject site include 1724-1754 Torrance Boulevard (even numbers). The site is located south of Torrance Avenue between South Western Avenue and Bow Avenue and consists of one irregular-shaped parcel lot (APN: 7355-032-010) totaling 136,465 square feet. The subject site is developed with a two-story multi-tenant office building at the central portion of the subject site and totaling 53,218 square feet. An approximately 450 square foot storage building is located west of the office building. The remaining portions of the subject site consist of an asphalt-paved parking lot and landscaping. See Figure 1 in Appendix 2 for site configuration.

According to historical sources (e.g. building permit records, historical aerial photographs, historical tenant search, and previous environmental reports), the subject site was undeveloped in 1927. By 1941, the subject site was developed with two buildings. By 1952, a few additional buildings were developed. However, the tenants of the buildings are unknown. In 1957, the subject site was listed as Alano Club of Torrance (1754 Torrance) and Torrance Street Department (1730 Torrance). In 1960, Alano Club of Torrance (1754 Torrance) was again listed. By 1980, the subject site was listed as Coast Mobile Home Sales (1724 Torrance). In 1987, the subject site was redeveloped with the present-day multi-tenant office building. No records of a dry cleaners, gas station, and industrial operations were found for the subject site.

REC Search:

Historical RECs Study:
A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

- Historical RECs were not found at the subject site.

RECs Study:
The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.

- RECs were not found at the subject site.

Controlled RECs Study:
A recognized environmental condition which involves a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority and that is subject to activity and use limitations.

- Controlled REC was not found at the subject site.

Lien Search:

- No environmental liens were found in the Preliminary Title Report.

Immediate Adjacent Neighboring Properties

- EPC *did not* reveal evidences of human harmful activity or *significant* pollutant emission to pose immediate environmental concern into the subject site from the **neighboring properties** during this environmental assessment (See Section 5).

Environmental Data Research Results

In order to determine reported areas of possible environmental impairment on or within a 1-mile radius of the site, an environmental disclosure report was obtained from database. Environmental effects from the neighboring sites are evaluated at minimal risk level in accordance with the reported remedial actions, distance between the subject site and reference sites, and limited contamination of the reference sites. Thus, government agencies' listings of the subject site vicinity area are not expected to represent a significant environmental concern on the subject site.

- According to the ERS Rec Check Report, eight (8) listings of High Risk Occurrences were found. However, based on the distance, elevation, and/or regulatory status of the sites, the sites were not likely to be of significant environmental concern to the subject site (See Section 6).

Data Gaps

- No significant data gaps of historical tenant records, local environmental agency records, weather, and on-site reconnaissance were indicated during this assessment.

- Owner's questionnaire was not provided to EPC at the time of this assessment. However, the lack of the questionnaire is not likely to affect the conclusion of this assessment.

Valuation Reduction

Reasons for Significantly Lower Purchase Price: The property price is at current market value. No significant price drop was found due to **environmental reasons.**

8. LIMITATION & EXCEPTION

The report is the property of the Client for whom it was prepared. Its distribution to others is at client's discretion. To the best of our professional ability, EPC warrants that users of the report may rely upon it as on accurate reflection of the environmental condition of the property at the time it was evaluated: The results rendered are options based upon information obtained within records of Environmental Regulatory Agencies (ERS's database), owner/user interview, and visual inspection.

This Phase I report should not be regarded as a guarantee that further hazardous waste/material contamination and spill, leaking of those material. In the future, if suspected some hazardous wastes/materials contamination is encountered during any construction activities, Environmental Site Investigation may be required.

No part of this report may be reproduced, stored in a retrieval system, or transmitted, in any form or by any means, electronic, mechanical, photocopying, or otherwise, without the prior written permission of the EPC.

- **Non-CERCLA considerations are beyond the contracted scope of this assessment**: Non-CERCLA considerations may include the following: asbestos-containing materials (ACMs), PCB-containing materials, lead-based paint, lead in drinking water, urea formaldehyde, wetlands identification, mold inspections, air quality inspections, or flood zone applicability.

- Special Contractual Conditions between users (i.e., the client, the current or previous tenant, the property buyer, and the property seller) and environmental professional (EPC): EPC is an independent consulting firm with no interest in the subject site at the subject site. EPC has no special contractual conditions.

MTBE: methyl tertiary-butyl ether DIPE: di-isopropyl ether
TAME: tertiary-amyl methyl ether ETBE: ethyl-tertiary butyl ether
TBA: tertiary-butyl alcohol

HVOC Halogenated Volatile Organic Compounds (Dichlorodifluoromethane, Chloromethane, Vinyl Chloride, Bromomethane, Chlorobenzene, 1,1,2-Trichloroethane, and etc.)

Material Threat ASTM guidance defines "**material threat**" as "a physically observable or obvious threat, which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment." It is not sufficient to establish a site feature as a "recognized environmental condition" just because it exists. In order to establish a site feature as a "recognized environmental condition," there "must be compelling evidence that either 1) the hazardous substance or petroleum product was released from its container or **operation onto (or into) the surface** or 2) by virtue of the condition of the container or state of the operation that stores or handles such products, there is reasonable concern in the foreseeable future that such materials will be released to the surface of the property" (New and Improved Site Assessment Standard, Revisions to the ASTM Phase I Standards Represent Significant Interpretive Changes for Both Users and Environmental Professionals, ASTM Standardization News Insight, March 2001

Low Threat Closure Policy

On May 1, 2012, the California State Water Resources Control Board (SWRCB) adopted the California Low Threat Underground Storage Tank Case Closure Policy (Low Threat Policy) and became effective on August 17, 2012. The purpose of the policy is to establish statewide consistent case closure criteria for low-threat petroleum underground storage tank (UST) sites. In the first paragraph of the section titled Criteria for Low-Threat Case Closure, the document states: In the absence of unique attributes of a case or site-specific conditions that demonstrably increase the risk associated with residual petroleum constituents, cases that meet the general and media-specific criteria described in this policy pose a low threat to human health, safety or the environment and are appropriate for closure pursuant to Health and Safety Code section 25296.10. Cases that meet the criteria in this policy do not require further corrective action and shall be issued a uniform closure letter consistent with Health and Safety Code Section 25296.10.

Company Information

Name: *Jeff Lee*

Title: President of EPC

Education:

* M.S. 1988 Environmental Engineering	Kon-Kuk University of Korea
* B.S. 1986 Environmental Engineering	Kon-Kuk University of Korea
* Hazardous Material Management Certificate	UC Irvine

Affiliation:

- Lab Technologist Grade-II California Water Pollution Control Association Certificate Number 263
- Hazardous Substance Removal License (Haz 776425)
- General Engineering License (A 776425)
- Electrical Contractor License (C-10 776425)
- Registered Environmental Property Assessor (REPA 403790)

Professional Experiences:

While majoring in Environmental Engineering for his Bachelor's and Master's degrees, Mr. Lee has studied great deal in Environmental Site Assessment (ESA), Transaction Screen Assessment (TSA), Site Investigation (Phase II), and soil/groundwater treatment (Phase III) to meet ASTM and environmental government agencies' requirements. Also familiarizes with hazardous material and toxic chemical rules and regulations required by U.S Federal and California State governments. Mr. Jeff Lee has provided environmental site assessments and consulting services to banks and individual clients since 1986.

- Rapid Transit District (RTD) Vernon facility, Vernon, California: Worked for Modification of Existing Underground storage tank (UST).

- Film Recycle Facility, Los Angeles, California: Engaged in Site Assessment and Groundwater Monitoring Well Installations.

- Former Station, Pasadena, 8620 S. Normandie Ave., LA, California; Engaged in Site Assessment and Vapor Extraction Well Installations with Volatile Organic Compound (VOC) Control Thermal Unit.

- Western Environmental Engineering Co, Santa Ana, California: Designed and installed Vapor control/Degassing Engine Unit and Air Monitoring Mobile Laboratory.

- Huge Air Craft, Sherman Oaks, California: Worked for research and laboratory Q/A, Q/C; engaged in groundwater monitoring and estimated radioactivity project.

- Familiar with various types of rotary kilns, fluidized-bed combustors, and moving-grate boilers that can burn organic wastes and contaminated soils.

- Worked for research and laboratory organizations; Engaged in setting up waste-water and air pollutant analyzers and instruments and in preparing necessary protocol procedures for sampling and testing.

- Performed a great deal of lab tests for air pollution and waste water treatments and accumulated a large number of experiences in soil and groundwater sampling, EPA testing, site cleanup and remediation products, contaminated soil excavation and disposal.

- Crenshaw Transmission Shop - Los Angeles California: Prepared a plan to close report on the site assessment and contaminated soil remediation by elevated concentrations of PCB and Semi volatile Organic Compounds.

- National Institute of Environmental Research-Seoul Korea; As a Research engineer for the Air Pollution Engineering Division responsibilities included sampling and analyzing stationary sources, and designed incinerator and air pollution control system.

RESEARCH PAPERS

- 1988 - "The Technical Development of Waste Derived Fuel and Air Pollution Control for Combustible Industrial Waste" for The National (KOREA) Institute of Environmental Research's project.

- 1987 -"A Study on The Formation Mechanism of Particulate and Gaseous Nitrate in Seoul Atmosphere" for Master of Science Degree.

- May 1995 ~ August 1997 – Environmental Column in Journal of Gas Station

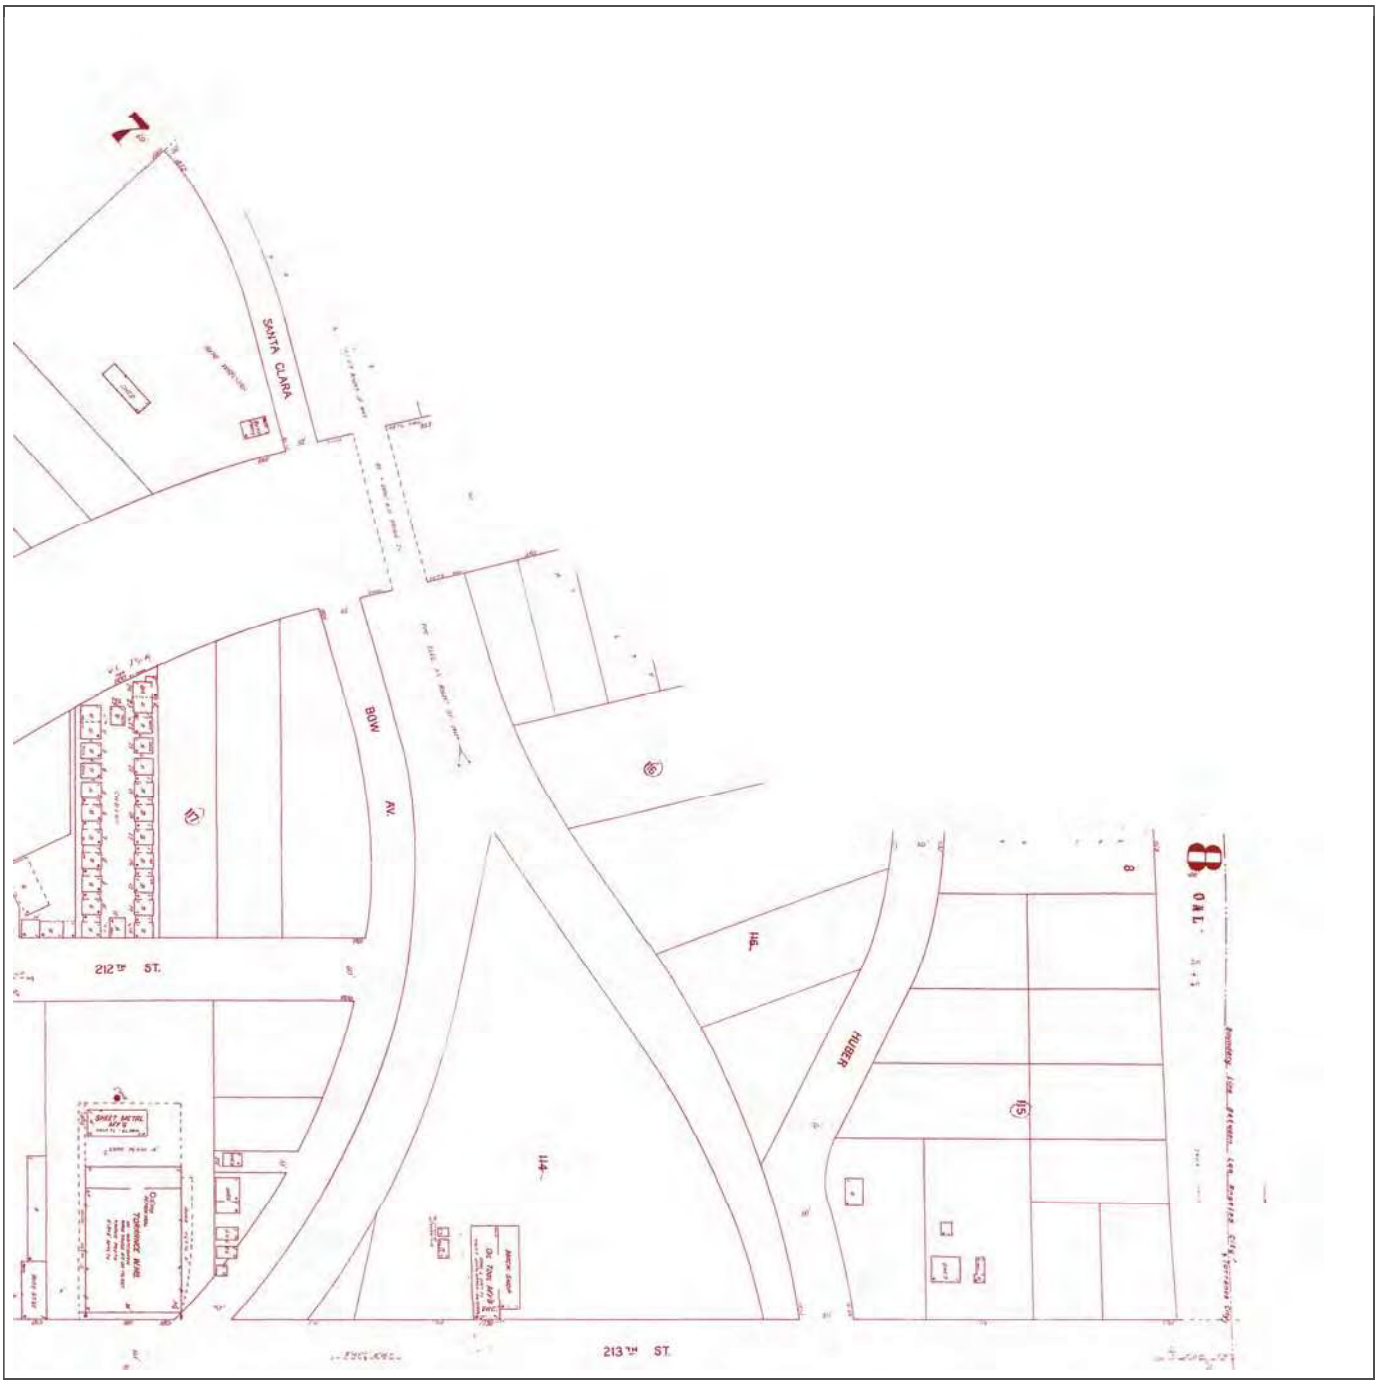
EXECUTIVE SUMMARY

Years researched covering your site or adjacent sites:

1929*	**1932***			

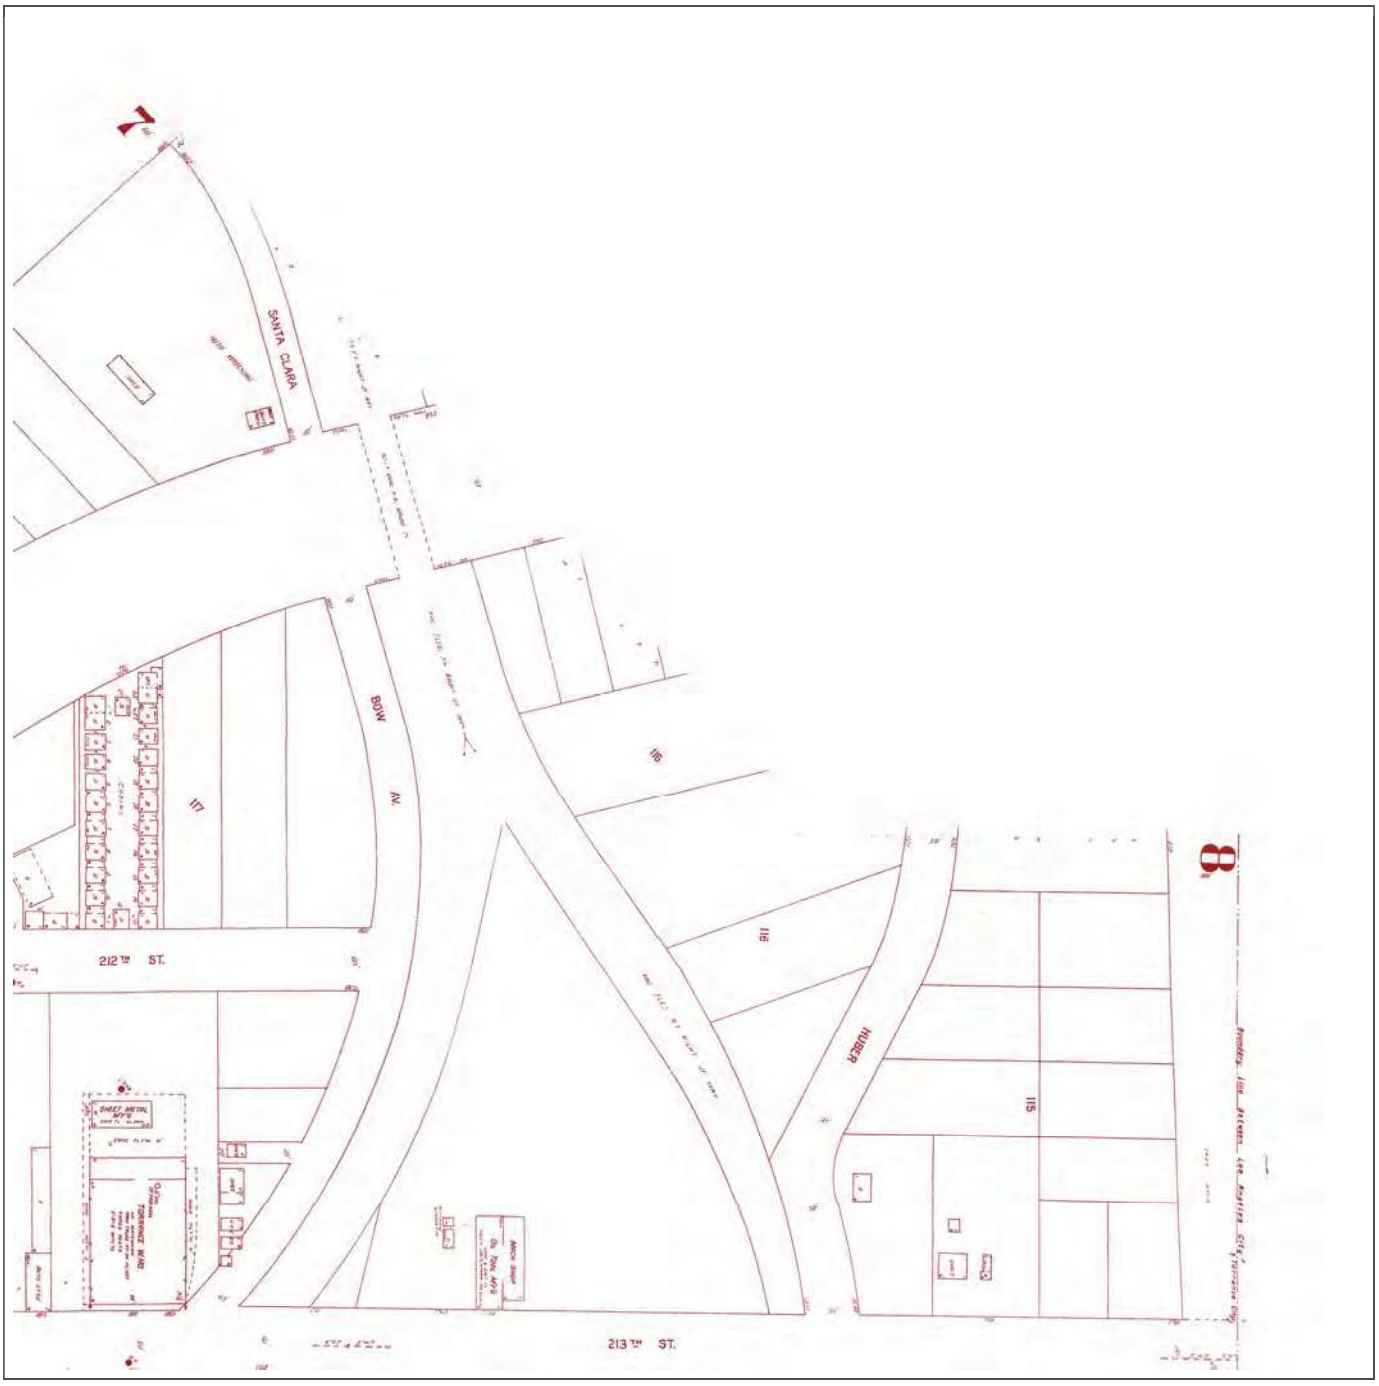


Years researched NOT covering your site or adjacent sites:

1916	**1922**			

***Note: The subject site is partially covered. Northern and eastern adjacent sites have no coverage.**

ERS's Hybrid Fire Insurance Map represents a combination of a Fire Insurance Map directly overlaid and imbedded into a current parcel map of the subject property and all nearby and adjacent sites (usually at least a block surrounding the subject property). The Hybrid Fire Insurance Map is a sophisticated tool for Environmental Professionals, thereby saving them time and increasing their accuracy.



ERS's research has been limited to the facts presented on fire insurance maps only. All terms, conditions, and limitations normally associated with work contracted by ERS and presented or associated with the fire insurance maps are in effect at all times. This Hybrid Map, all its information and content have been derived, reconfigured and reformatted (creating an entirely new map) from and relies upon fire insurance maps originally published by The Sanborn Map Company or other publishers and local agency parcel maps. "Digital Sanborn Maps, 1867-1970" is owned by ProQuest, LLC, licensed from Environmental Data Resources, Inc., and some are protected by copyright and other laws that recognize the rights of copyright holders. ERS's research has only been based on these maps; ERS did not perform any type of independent investigation of any type, including as to the accuracy and/or completeness of the information derived or otherwise obtained from the secondary source or sources including those maps received from the Library of Congress.

Thank you for selecting ***Environmental Record Search***!

Included are the findings of our research of the subject site and immediate adjacent sites.

Streets Researched: **South Western Avenue** (Subject)
Torrance Boulevard (Adjacent)
Huber Avenue (Adjacent)

Years researched which did cover your site or adjacent sites:

1957	**1960**	**1965**	**1970**	**1975**
1980	**1985**	**1990**	**1995**	**2000**
2006				

Years researched which did NOT cover your site or adjacent sites:

ERS's research has been limited to the information presented in the reviewed city directories only. All terms, conditions, and limitations normally associated with work contracted by **ERS** and presented or associated with the city directories are in effect at all times. This letter summary, all its information, and content have been derived from and rely upon the reviewed city directories. **ERS's** research has only been based on these books; **ERS** did not perform any type of independent investigation of any type, including as to the accuracy and/or completeness of the information derived or otherwise obtained from the secondary source or sources.

OWNER/BUILDER DECLARATION

Section 7031.5 of the California Business and Professions code provides as follows:

"Each county or city which requires the issuance of a permit as a condition precedent to the construction, alteration, improvement, demolition or repair of any building or structure shall also require that each applicant for such a permit file as a condition precedent to the issuance of a permit a statement which he has prepared and signed stating that the applicant is licensed under the provisions of this chapter, giving the number of his license and stating that it is in full force and effect, or, if the applicant is exempt from the provisions of this chapter, the basis of the alleged exemption. Any violation of this section by any applicant for a permit shall be subject to a civil penalty of not more than five hundred dollars ($500.00)."

☐ I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale. (Section 7044, Business and Professions code: The Contractor's License law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvements is sold within one year of completion, the owner/builder will have the burden of proving that he did not build or improve for the purpose of sale.)

☒ I, as owner of the property, am exclusively contracting with licensed contractors to construct the project. (Section 7044 of the Business and Professions code: The contractor's license law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the contractor's license law.)

☐ I, as owner, am exempt under ____ B and P code, for the reason: ____

Subject: Public Records Act Request :: W002307-090817 Time Extension

9/8/2017

Sophie Choi
5169 W Washington Blvd
Los Angeles CA 90016

Dear Requester:

In response to your records request received on 9/8/2017 12:23:26 PM for Fire records, the City of Torrance needs additional time to search for your records.

The City Clerk's Office will contact you within fourteen (14) days as to whether the City of Torrance is in possession of records responsive to your request.

Thank you for your interest in the City of Torrance. If you have any questions, or wish to discuss this further, please contact the City Clerk's Office at (310) 618-2870.

Sincerely,

City Clerk's Office
City of Torrance

Waste Code Matrix as a spreadsheet

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

1. CERTIFICATION

EMG has completed a Phase I Environmental Site Assessment of the Torrance Center South (the "Project"), located at 21151, 21171 and 21221 South Western Avenue in Torrance, California 90501. The assessment was performed at the Client's request using the methods and procedures consistent with good commercial and customary practice designed to conform to acceptable industry standards.

This report is exclusively for the use and benefit of the Client identified on the first page of this report. The purpose for which this report shall be used shall be limited to the use as stated in the contract between the client and EMG.

This report is not for the use or benefit of, nor may it be relied upon by any other person or entity, for any purpose without the advance written consent of EMG. In expressing the opinions stated in this report, EMG has exercised the degree of skill and care ordinarily exercised by a reasonable prudent environmental professional in the same community and in the same time frame given the same or similar facts and circumstances. Documentation and data provided by the Client, designated representatives of the Client or other interested third parties, or from the public domain, and referred to in the preparation of this assessment, have been used and referenced with the understanding that EMG assumes no responsibility or liability for their accuracy.

The independent conclusions represent our professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client or their representative has been assumed to be correct and complete. The conclusions presented are based on the data provided, observations, and conditions that existed on the date of the on site visit.

If you have any questions regarding this report, please contact the Technical Relationship Manager listed below at 800.733.0660, Ext. 6517.

2. EXECUTIVE SUMMARY

EMG performed a Phase I Environmental Site Assessment, that included on site observations of the accessible areas of the Torrance Center South (the "Project"), on December 10, 2004. The Project is located at 21151, 21171 and 21221 South Western Avenue in Torrance, California 90501, and consists of approximately two acres.

The Project, originally constructed in 1987 and renovated in 1999, is currently a business office park. Current facility operations include administrative activities, a fitness center, café and general building and grounds maintenance activities. Prior to construction of the current improvements, the Project was undeveloped land. Properties in the general vicinity of the Project include commercial and residential land uses.

The following summarizes the independent conclusions representing EMG's best professional judgment based on information and data available to us during the course of this assignment. Factual information regarding operations, conditions, and test data provided by the Client, owner, or their representative has been assumed to be correct and complete. Additionally, the conclusions presented are based on the conditions that existed at the time of the assessment.

2.1. FINDINGS/CONCLUSIONS

Historical Review (Section 5)

- The review of the historical data available for the Project and surrounding area revealed no evidence that may have lead to an environmental impact to the Project. No further action or investigation is recommended regarding historical uses.

Operational Activities (Section 6.1)

- EMG observed no circumstances of environmental concern associated with the operational activities at the Project. No further action or investigation is recommended regarding operational activities at the Project.

Hazardous Materials/Petroleum Products (Section 6.2)

- The Project is involved in the use of hazardous materials in the form of routine janitorial and maintenance supplies. The identified materials appear to be properly stored. The materials observed do not appear to pose a hazard to the Project, provided they continue to be used as designed, are properly handled, and all regulations regarding their use are followed. No further action or investigation is recommended regarding the use of hazardous materials or petroleum products at the Project.

Wastes (Section 6.3)

- The Project does not generate, treat, store, or dispose of hazardous, medical, or regulated wastes. Furthermore, the non-hazardous solid and liquid wastes generated at the Project appear to be stored and disposed of properly. No further action or investigation is recommended regarding wastes at the Project.

Polychlorinated Biphenyls (PCBs) (Section 6.4)

- EMG identified three utility-owned transformers at the Project that are labeled as "Non-PCB". This equipment appeared to be in good condition with no evidence of leaks. No further action or investigation is recommended regarding the transformers at the Project.
- The Project contains three elevators that use hydraulic fluid. PCB-containing hydraulic fluid has not been manufactured since 1977. Therefore, based on the dates of installations (post-1977), PCB-containing hydraulic fluid is not likely to be found in the elevator operating systems. No indication of leakage was observed in the area of elevator operating equipment. The hydraulic elevator units at the Project should be periodically inspected for leakage. If leakage is identified, the unit should be repaired and any fluid or fluid-soaked waste disposed of in accordance with applicable federal, state, and local regulations. No further action or investigation is recommended regarding this equipment.

Asbestos-Containing Materials (ACM) (Section 6.5)

- Laboratory analysis of the ceiling tile samples collected indicated *"No Asbestos Detected"*.
- Suspect ACM in the form of roofing materials and vinyl floor tiles were not sampled as part of the assessment. These non-friable materials are in good condition and should be sampled prior to repair, renovation, or demolition activities.

Radon Gas (Section 6.6)

- Radon gas was not addressed due to the non-residential use of the Project. No further action or investigation is recommended with regard to radon gas levels at the Project.

Lead-Based Paint (LBP) (Section 6.7)

- LBP was not addressed due to the non-residential use of the Project. No further action or investigation is recommended with regard to LBP at the Project.

Storage Tanks/Pipelines (Section 6.8)

- No evidence of storage tanks or pipelines (above or below ground) was identified. No further action or investigation is recommended regarding storage tanks or pipelines at the Project.

Surface Areas (Section 6.9)

- No issues associated with surface areas were identified. No further action or investigation is recommended regarding surface areas at the Project.
- Visual observation of the storm water system did not identify any abnormal accumulation of petroleum run-off or foreign material. No unusual blockages of the storm water control system were observed. No unusual ponding of storm waters was observed. No further action or investigation is recommended regarding storm water systems at the Project.

Mold (Section 6.10)

- EMG performed a limited visual assessment for the presence of mold, conditions conducive to mold, and evidence of moisture in readily accessible interior areas of the Project. EMG did not note obvious visual indications of the presence of mold, conditions conducive to mold, or evidence of moisture in readily accessible interior areas of the Project. No further action or investigation is recommended regarding mold at the Project.

Regulatory Review (Section 7)

- Based on review of the regulatory database report, the Project is not located on any of the databases evaluated, and none of the off site listed facilities are anticipated to have negatively impacted the environmental integrity of the Project. In addition, the review does not suggest that the Project is involved in the generation, treatment, storage, or disposal of hazardous waste. No further action or investigation is recommended regarding the regulatory review.

Adjacent Properties (Section 8)

- EMG identified no current adjacent property uses that are anticipated to have a negative impact on the environmental integrity of the Project. No further action or investigation is recommended regarding the adjacent properties.

2.2. RECOMMENDATIONS

No further action or investigation is recommended at this time.

3. SURVEY APPROACH/PURPOSE

EMG conducted an on site Environmental Site Assessment of the Project that consisted of a walk-through observation of the accessible areas and interviews with facility personnel and local agency representatives. On site activities and/or interviews were conducted by Ms. Thin-yi Hlaing, EMG Project Manager, with:

- Mr. Manny Costales, On-site Point of Contact (POC) and Building Engineer

A Pre-Survey Questionnaire was completed as a part of this assessment which is included in the Appendices (Section 9). The Questionnaire was completed by Ms. Lynn Bertram, Assistant Property Manager of Torrance Center South. Information obtained from the Questionnaire has been used in the preparation of this report.

Areas accessed included all tenant units; all common areas; all exterior areas; and the Project boundaries.

Visual observation above the drop ceiling tiles was not performed as a part of this assessment. Visual observation of pipe chases and behind walls was not performed as a part of this assessment.

Weather conditions at the time of the Project assessment were clear, with temperatures in the mid-60s (°F) and light winds.

EMG reviewed available federal, state, and local records in an effort to identify sites of known or suspected hazardous waste activity located at or near the Project which could have an adverse impact on the Project. In an attempt to determine whether historical uses of the Project and surrounding area have had an environmental impact on the Project, EMG interviewed individuals knowledgeable about the Project and reviewed available pertinent records and documents. This assessment is based on the evaluation of the information gathered, laboratory analysis of samples collected (when required), and accessibility at the time of the assessment.

The purpose of this report is to provide the Client an assessment concerning environmental conditions (limited to those issues identified in the report) as they existed at the Project. The assessment was conducted utilizing generally accepted Phase I industry standards using the American Society for Testing and Materials (ASTM) Standard Practice E 1527-00. The scope of work included an evaluation of:

- The Project history in an attempt to identify any possible ownership(s) and/or uses that would suggest an impact to the environmental integrity of the Project as identified through review of reasonably ascertainable standard historical sources.
- Physical characteristics of the Project as identified through review of reasonably ascertainable topographic, wetlands, flood plain, soils, geology, and groundwater data.
- Current Project conditions (as applicable), including compliance with appropriate regulations as they pertain to the presence or absence of:
  - Facility storage tanks, drums, containers (above or below ground), etc.
  - Transformers and other electrical equipment which utilize fluid which may potentially contain PCBs
  - The use of hazardous materials/chemicals and petroleum products, and/or the generation, treatment, storage, or disposal of hazardous, regulated, or medical wastes
- A screening approach for the potential existence of:
  - Asbestos, including the identification of all suspect materials in accessible areas (interior and exterior) and the collection and analysis of three bulk samples from each homogeneous area of friable and damaged non-friable suspect ACM. The remaining materials are considered suspect until tested and proven otherwise. Friable materials are those which can be easily crumbled or pulverized by hand pressure.

This screening approach is not a comprehensive (i.e., AHERA-Style) asbestos survey, nor is it intended to fulfill the NESHAP requirements for demolition/renovation purposes, but is intended to identify the potential for an asbestos hazard in accessible areas. This screening is not intended to be used for demolition, abatement, renovation, or repair work.

The basis for "suspect" determination is taken from the materials listed in Appendix G of the United States Environmental Protection Agency (USEPA) publication *Managing Asbestos in Place* (the "Green Book"). Therefore, all materials listed in the Green Book which were installed prior to 1989 are considered suspect with the exception of resilient floor tile, asbestos-cement board (transite), and roofing felt, which are considered suspect regardless of installation date (these materials continue to be manufactured and installed in the United States).

The laboratory reports list the samples taken from the Project and their subsequent analytical results using polarized light microscopy with dispersion staining *(Interim Method for Determination of Asbestos in Bulk Insulation Sample — USEPA 600/M4-82-020)* for asbestos. Analysis was performed using the "positive-stop" method, whereby analysis is stopped on a group of samples once the first positive sample is analyzed, and the entire homogeneous material is considered asbestos-containing.

- Radon gas propensity, through the review of the USEPA's Map of Radon Zones and radon gas concentrations through the exposure and analysis of canisters, using the charcoal liquid scintillation method for all residential properties in areas of high radon propensity.
- Lead-based paint for all residential properties constructed prior to 1978. The basis for this determination is taken from the Lead Paint Poisoning Act passed by the Congress of the United States that banned the use of lead paint starting January 1, 1978. Therefore, all paint applied prior to 1978 is considered suspect.
- Lead in water, based on information provided by the municipal water provider.
- Mold, including the identification of visible mold growth, conditions conducive for mold growth, and evidence of moisture in accessible areas of the Project. In addition, EMG interviewed Project personnel regarding any known or suspected mold contamination, water intrusion, or mildew like odor problems. Sampling was not performed as a part of this assessment. EMG notes that this assessment does not constitute a comprehensive mold survey of the Project, and the conclusions made are based solely on observable conditions in readily accessible interior areas of the Project on the assessment date.

- An evaluation of information contained in programs such as the NPL, CERCLIS, SHWS, RCRIS, SWF, LUST, and other governmental information systems within specific search distances of the Project. This evaluation was performed to identify any sites that would have the potential to impact the environmental integrity of the Project.

  The regulatory agency report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The report is based on a radius search which focuses on both the Project and neighboring sites that may impact the Project. Neighboring sites listed in governmental environmental records are identified within a specific search distance. The search distance varies depending upon the particular government record being checked. The search is designed to meet the requirements of ASTM Standard E 1527-00. The information provided is assumed to be correct and complete.

- Visual observation of the adjacent properties to identify high-risk neighbors and the potential for known or suspected contamination to migrate onto the Project.

4. PROJECT LOCATION/DESCRIPTION

The Project is located at 21151, 21171 and 21221 South Western Avenue in Torrance, Los Angeles County, California 90501.

4.1. PROJECT DESCRIPTION

The Project lands consist of approximately two acres.

The Project consists of three office buildings with a fitness center and café that were constructed in one phase during 1987. The 21221 building contains eight tenants in sixteen units. The 21151 building contains one tenant while the 21171 building is currently vacant. Renovations of the 21171 building occurred in 1999. Renovations reportedly consisted of the replacement of interior surfaces, including suspended ceiling tiles, wallboard, carpeting and floor tiles. Project improvements consist of three two-story structures, landscaping, and surface-level asphalt paved parking/drive areas.

The Project does not contain basement levels and no evidence of urea formaldehyde foam insulation was observed.

Structural components of the buildings consist of concrete foundations; wood interior framing; and textured concrete block perimeter walls. These buildings utilize flat-style roofs. Roofing materials consist of composite materials.

The Project is serviced by public water and sanitary sewer systems. The Project is supplied with water from City of Torrance. According to the 2004 Drinking Water Quality Report, the drinking water supplied to the Project is within federal, state, and local drinking water quality standards.

Hot water is generated by electrically powered water heaters. The associated piping was observed to be uninsulated.

HVAC systems observed consisted of the following:

- Heat and air-conditioning are supplied to Project from natural gas-fired boilers and electrically operated cooling towers. Conditioned air is distributed via thermostatically controlled, ducted supply and return systems. Where observed, duct work associated with the HVAC systems was insulated with fiberglass and foil. The exhaust flues associated with the natural gas-fired boilers were observed to be uninsulated.

4.2. MISCELLANEOUS SYSTEMS

- Elevators — three hydraulic lift elevators, one in each building, are located at the Project (see Section 6.4 for a further discussion).

4.3. ENVIRONMENTAL SETTING

4.3.1. Topography

Review of the Torrance, California Topographic Quadrangle, published by the United States Geological Survey (USGS) and dated 1981 (photo revised in 1998), indicated the following:

- The Project has an average elevation of approximately 60 feet above mean sea level. Elevations do not vary significantly across the Project lands. Slope in the general area of the Project is to the east.
- The Project is shown to be improved with three outlined structures.
- The nearest surface water feature, a flood control channel, is located approximately 50 feet northeast of the Project.

A copy of the topographic map is appended (Section 9).

4.3.2. Wetlands

Review of the National Wetlands Inventory (NWI) Map, published by the United States Fish and Wildlife Service and dated 2004, indicated the following:

- No wetland areas are indicated at the Project or adjacent properties.

A copy of the NWI wetlands map was not available for reproduction.

4.3.3. Floodplain

Review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency (FEMA) and dated 1979, indicated the following:

- The Project is located in Zone C, areas outside the 500-year flood plain with less than 0.2% annual probability of flooding. Annual Probability of Flooding of Less than one percent.

A copy of the FEMA flood plain map was not available for reproduction.

4.3.4. Soils/Geology

Review of the Soil Survey of Los Angeles County, California published by the United States Department of Agriculture Natural Resources Conservation Service (USDA NRCS) and dated 1969, indicated the following:

- The Project is located in an area comprised of one soil type known as the Cropley association.
- The Cropley soil series is considered to be a well drained, clay textured soil with a depth of at least 60 inches. General characteristics of the Cropley soil include slow permeability and a neutral and mildly alkaline soil reaction. Depth to the seasonal high water table is unknown.

Review of the Geologic Map of California, published by the United States Geological Survey and dated 1991, indicated the following:

- The Project is located within the Coastal Range physiographic province of California, which consists of Pleistocene alluvium deposits

4.3.5. Groundwater Hydrology

Review of the California's Groundwater Bulletin 118 for Coastal Plain of Los Angeles County Groundwater Basin, published by the Department of Water Resources and dated 2003, indicated the following:

- The Project is located within the West Coast Sub basin with the unknown groundwater levels.

Shallow groundwater flow is expected to follow the ground level slope of surface elevations. The direction of this flow at the Project is anticipated to be toward the east.

5. HISTORICAL REVIEW

Review of information available from the Los Angeles County Assessor Office indicated that the Project is shown as Assessor Parcel Numbers 7355-032-010, 7355-032-011 and 7355-032-012.

5.1. CHAIN OF TITLE

Review of the available deed records indicates that the Project has been owned by Torrance Center South Office Park LLC since 2000 when it was obtained from Millard Seldin.

5.2. PRIOR USE INTERVIEWS

EMG met with Mr. Manny Costales, On-site Point of Contact (POC) and Building Engineer, who was cooperative, and provided information which appeared to be accurate based upon our subsequent site observations. It is EMG's opinion that Mr. Manny Costales was somewhat knowledgeable about the Project and questions EMG posed during the interview process. According to Mr. Costales, the Project was developed in 1987 into the current use. Mr. Costales was unaware of any prior uses of the Project. Mr. Costales indicated that he has been associated with the Project since 2002.

5.3. LOCAL GOVERNMENT AGENCY RECORD REVIEW

EMG reviewed file information for the Project at the City of Torrance Fire Department. Records dating back to 2000 are maintained by this department. No environmentally significant information was identified.

EMG reviewed file information for the Project at the City of Torrance Building Department. Records dating back to approximately 1950s are maintained by this department. This review indicated that the present buildings at the Project were built in 1987. General building permits for the Project were also on file, but did not reveal any information or condition that could impact the environmental integrity of the Project. No permits for previous uses were found in the file for the Project address. No environmentally significant information was identified.

Review of the available zoning records from the City of Torrance Department of Planning indicates that the Project is currently zoned M-1, Light Manufacturing, and is within the Industrial Redevelopment Project, zoning district. According to the records, no additional zoning changes were listed for the Project. Records dating back to 1950s are maintained by this department.

5.4. HISTORICAL MAPS

EMG contacted EDR in an attempt to determine if there were any historic maps in the EDR Historic Map Collection. However, there was no historic map coverage for the Project in the EDR Historic Map Collection, for the period covering the years 1867 to present.

5.5. HISTORICAL CITY DIRECTORIES

Historical city directories were reviewed for the Project at the Torrance Public Library. City directories have tenant listings by address. This review revealed the following information:

- **1946 —** The Project addresses are not listed. 21100 South Western Avenue is listed as Mead Johnson & Company (Infant Diet).
- **1956 —** The Project addresses are not listed. 21100 South Western Avenue is listed as Carnation Company/Frozen Food Division. 21138 South Western Avenue is listed as Save-On Service Station. 1815 West 213th Street is listed as Johnnie's Ornamental Ironworks.
- **1968 —** The Project addresses are not listed. 21100 South Western Avenue is listed as Carnation Company/Simple Simon Pies. 21138 South Western Avenue is listed as Phillips 66 Service Station. 21176 South Western Avenue is listed as C-JS. 21210, 21220 and 21223 South Western Avenue are listed as multi-family residential properties. 21236 South Western Avenue is listed as Gerwer K Realty, Los Angeles County Medical, and Southwest Printing Company. 21240 South Western Avenue is listed as Pockrandt Service.

EMG identified city directories dating from the 1970s to 2004; however, these directories were not indexed by street address making further research impractical.

No older historical city directories were identified.

5.6. AERIAL PHOTOGRAPHY

Review of the 1945 aerial photograph, available from Rupp Aerial Photography, indicated the following:

- Project: The Project is unimproved and contains wooded areas. Vehicular access is available from the north, east, south and west.
- Off site: The area north of the Project is shown as a vacant land. The area east of the Project is shown as a vacant land with wooded areas. The area south of the Project is shown as a vacant lot. The area west of the Project is shown as a vacant lot. The area southwest of the Project is shown as a commercial building.

The 1989 aerial photograph, available from Rupp Aerial Photography, differs from the 1945 aerial photograph in that:

- Project: The Project is improved with three buildings, surface-level parking and minimal vegetation. Vehicular access is available from the north, south, east and west.
- Off site: The area north of the Project is shown as commercial buildings. The area east of the Project is shown as commercial buildings followed by residential buildings. The area south of the Project is shown as a vacant lot. The area west of the Project is shown as residential buildings. The area southwest of the Project buildings is shown as two office buildings.

The 1992 aerial photograph, available from Rupp Aerial Photography, does not differ significantly from the 1989 aerial photograph.

Copies of the 1945, 1989 and 1992 aerial photographs are appended (Section 9).

5.7. PREVIOUS INVESTIGATIONS/ASSESSMENTS

EMG was not provided with any previously conducted environmental assessment reports for the Project.

5.8. PLANS AND SPECIFICATIONS

As-built/renovation site plans, drawings, or specifications were not available for review at the Project or local agency offices visited for this assessment.

5.9. HISTORICAL SUMMARY

Based upon interviews and a review of local agency records, city directories and aerial photographs, the Project was undeveloped land prior to the development of the current Project improvements in 1987. Since developed in 1987, the Project has been occupied by a variety of offices, including a fitness center and café.

6. PROJECT RECONNAISSANCE

6.1. OPERATIONAL ACTIVITIES/NOTEWORTHY TENANTS

The Project is a commercial office facility. No noteworthy tenants occupy the Project and no environmentally significant operations are conducted at the Project. A complete list of tenants is appended (Section 9).

Considering the operations assessed at the Project, no environmental permits, registrations or notifications appear to be required.

6.2. HAZARDOUS MATERIALS/PETROLEUM PRODUCTS STORAGE AND HANDLING

Visual observation for the use and/or storage of hazardous materials and petroleum products was performed. The following products listed in the Observed Materials Table below were identified.

Observed Materials			
Type of Material	**Quantity**	**Storage Location**	**Use**
Routine janitorial and maintenance supplies	Retail size containers	Designated storage areas	Project maintenance and upkeep

The identified chemicals, materials, and products were observed in their sealed, original containers and in designated storage areas. Materials appeared to be properly stored.

No evidence of spills or staining was observed in the area of product storage/usage. In addition, the concrete floors appeared intact and no cracks were observed in the areas of product storage/usage.

6.3. WASTE GENERATION, TREATMENT, STORAGE, AND DISPOSAL

Visual observation for the generation, treatment, storage, and disposal of wastes was performed. EMG identified the following waste generation listed in the Waste Generation Table below.

Waste Generation			
Type of Waste	**Generation Process**	**Pre-Disposal Storage**	**Disposal Method**
+ **Non-Hazardous Solid**			
Municipal trash	N/A	Dumpsters	Municipal trash collection service
+ **Non-Hazardous Liquid**			
Cooking grease	Food preparation	Grease trap and one 30-gallon plastic drum on the exterior west side of the 21221 building	Wilmington Grease Company
Sewage	N/A	N/A	Municipal sanitary system

No evidence of spills or staining was observed in the area of waste generation or pre-disposal storage. In addition, the asphalt surfaces appeared intact and no cracks were observed in the areas of waste generation or pre-disposal storage.

No excessive odors or overflowing/excessive ground trash were noted in the vicinity of the dumpsters. No hazardous, regulated, or medical wastes were noted in the dumpsters.

Prior to entry into the sanitary sewage system, grease is removed in a trap located in the kitchen of Ivory Coast Café (unit 120 of the 21221 building). According to Mr. Costales, the grease trap is cleaned on a regular basis and the waste grease is disposed by Wilmington Grease Company.

6.4. POLYCHLORINATED BIPHENYLS (PCBS)

The Project is supplied with underground secondary electrical service from three pad-mounted exterior electrical transformers. The transformers are designated as the property of Southern California Edison, the public utility and are labeled Non-PCB. The units should be periodically inspected for leakage. If leakage is visible, the Project owner/manager should contact the public utility, which will remediate the situation. Should the units have to be replaced, the utility is responsible, provided the cause is equipment failure, not customer misuse. No leakage of the transformers was observed at the time of the assessment.

The Project also uses secondary electrical service from three privately owned "dry type" step-down transformers. Dry type transformers do not use oils for cooling purposes; therefore, these transformers are not expected to contain PCBs.

Three hydraulic lift elevators, one in each building, are located at the Project. PCB-containing hydraulic fluid has not been manufactured since 1977. Therefore, based on the dates of installations (1987), PCB-containing hydraulic fluid is not likely to be found in the elevator operating systems. No visual indication of leakage was observed in the areas of the elevator operating equipment. The hydraulic elevator units at the Project should be periodically inspected for leakage. If leakage is identified, the unit should be repaired and any fluid or fluid-soaked waste disposed of in accordance with applicable federal, state, and local regulations.

No additional equipment with the potential to utilize dielectric or hydraulic fluid was observed during the site assessment.

6.5. ASBESTOS-CONTAINING MATERIALS (ACM)

As-built/renovation site plans, drawings, or specifications were not available for review at the Project or local agency offices visited for this assessment.

Suspect ACM in the form of roofing materials, vinyl floor tiles and suspended ceiling tiles were identified during the on site assessment.

No suspect damaged non-friable materials were observed at the Project during the assessment. Random samples of the accessible friable suspect ACM were collected. Each of the samples collected and the results of the associated laboratory analysis are listed in the Asbestos Screening Sampling Table below.

Asbestos Screening Sampling Table						
No.	**Material Type**	**Location**	**Friable**	**Condition**	**Analytical Results**	**Estimated Quantity**
1A 1B 1C	Suspended ceiling tiles	Storage room of the 21221 building	Yes	Good	ND ND ND	44,000 SF
2A 2B 2C	Suspended ceiling tiles	Storage room of the 21151 building	Yes	Good	ND ND ND	46,000 SF

ND = No Asbestos Detected
SF = Square Feet

6.6. Radon Gas

Radon was not addressed due to the non-residential use of the Project.

6.7. Lead-Based Paint (LBP)

LBP was not addressed due to the non-residential use of the Project.

6.8. Facility Storage Tanks and Pipelines (above or below ground)

Visual observations for manways, vent pipes, fill connections, concrete pads, and saw cuts in paved areas did not identify any surface connections or disturbances that would indicate the potential for an underground storage tank (UST) installation at the Project.

No aboveground storage tanks (ASTs) were observed at the Project.

The manways and surface caps observed at the Project were for site services (i.e., domestic water, storm water, and sanitary sewer system).

Furthermore, review of currently installed mechanical equipment, and historical information concerning mechanical equipment, identified the use of alternate fuel sources (i.e., electric, natural gas) thereby eliminating the need for on site fuel storage at the Project.

Based on the review of the state list of registered USTs, no USTs are registered for the Project.

Interviews with persons knowledgeable of the Project did not identify any evidence of current or historic storage tanks (above or below ground) at the Project.

Visual observations did not identify any surface markings indicating the existence of subsurface product pipelines at the Project.

6.9. Surface Areas

Observations during EMG's assessment identified that the Project lands are graded to provide slope and swale to direct storm water away from the on site buildings. The land surface of the Project is relatively flat, with no significant changes in elevation. Surface water flow is in an easterly direction.

Visual observation of the Project and adjacent properties did not identify any evidence of distressed vegetation, staining, or surface migration of petroleum releases or hazardous materials onto or off the Project.

Visual observations did not identify any evidence of on site surface impoundment facilities, pits, dry wells, or dumping of apparent hazardous substances at the Project.

Visual observations did not identify any surface water features including lagoons, ponds or other bodies of water at the Project.

Parking facilities consist of surface level areas. Minor oil discharges were observed on the parking areas; however, the discharges are incidental in nature and corrective action is neither practical nor warranted.

Storm water from the roof areas is directed to the ground via downspouts. Storm water from drive and parking surfaces is directed to storm drains via sheet flow. Storm water from vegetated surface areas naturally infiltrates into the subsurface.

6.10. Mold

EMG performed a limited visual assessment for the presence of mold, conditions conducive to mold, and evidence of moisture in readily accessible interior areas of the Project. EMG did not note obvious visual indications of the presence of mold, conditions conducive to mold, or evidence of moisture in readily accessible interior areas of the Project.

This assessment does not constitute a comprehensive mold survey of the Project. The reported observations and conclusions are based solely on interviews with Project personnel and conditions as observed in readily accessible interior areas of the Project on the assessment date.

7. REGULATORY DATABASE REVIEW

Based on review of the regulatory database report, and by cross-referencing name, address, and zip code, EMG concludes that the Project is not a listed site. Furthermore, the area search of the Project for sites listed in these databases identified various sites outlined in the Regulatory Agency Data Report Findings included in the Appendices, Section 9. Information about the listed sites is included below.

EMG also reviewed the unmappable sites in the database report, cross-referencing addresses and site names. Unmappable sites are environmental risk sites that cannot be plotted with confidence, but can be located by zip code or city name. In general, a site cannot be geocoded because of inaccurate or missing location information in the record provided by the agency. Any identified unmappable site within the specified search radii is included below.

The following databases were reviewed for this assessment:

- **NPL Listing:** The National Priorities (Superfund) List is United States Environmental Protection Agency (USEPA's) database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund Program.
- **RCRA-TSD Facilities Listing:** The USEPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA-TSD database is a compilation by the USEPA of reporting facilities that transport, treat, store or dispose of hazardous waste.
- **RCRA-CORRACTS Facilities Listing:** The USEPA's Resource Conservation and Recovery Act (RCRA) Corrective Action sites Listing contains information pertaining to hazardous waste treatment, storage, and disposal facilities (RCRA TSD) which have conducted, or are currently conducting, a corrective action(s) as regulated under RCRA.
- **SHWS (CALSITE) Listing:** The CALSITE list is a comprehensive listing of sites which were considered to be a possible threat to the public health and welfare by the California Department of Toxic Substances Control (CDTSC). The CALSITE list can include any business or property that may utilize hazardous chemicals. The list does not necessarily imply environmental impairment.
- **CERCLIS Listing:** This database is a compilation of sites which the USEPA has investigated or is currently investigating for a release or threatened release of hazardous substances.
- **NFRAP Listing:** This database contains information regarding sites which have been removed from the USEPA CERCLIS database.
- **SWF Listing:** This database is a comprehensive listing of all State Permitted Solid Waste Landfills.
- **Leaking Underground Storage Tanks (LUST)**
- **Underground Storage Tanks (UST)**
- **RCRIS-Generator Listing:** The USEPA identifies and tracks hazardous waste from the point of generation to the point of disposal through the Resource Conservation and Recovery Information System (RCRIS). The RCRIS-Generators database is a compilation by the USEPA of facilities that report hazardous waste generation.
- **Emergency Response Notification System (ERNS):** The ERNS is a national database used to collect information on reported releases of oil or hazardous substances.

The following table indicates the number of sites identified for each regulatory database within the specified search radii:

Database	On site	Adjacent	Remaining within 1/8 mile	1/8 - 1/4 mile	1/4 - 1/2 mile	1/2 - 1 mile
NPL	0	0	0	0	0	1
RCRA-TSD	0	0	0	0	0	N/A
RCRA-CORRACTS	0	0	0	0	0	2
CERCLIS	0	0	0	0	0	N/A
NFRAP	0	0	0	0	3	N/A
SHWS	0	0	0	0	1	1
SWF	0	0	0	0	0	N/A
LUST	0	0	0	0	4	N/A
UST	0	0	N/A	N/A	N/A	N/A
RCRIS-Generators	0	1	N/A	N/A	N/A	N/A
ERNS	0	N/A	N/A	N/A	N/A	N/A

Torrance, California 90501
Distance: Adjacent (corrected)
Direction: East (corrected)
Databases listed on: RCRA-SQG and FINDS

Based on review of the USGS Topographic Map, this site is located topographically down-gradient from the Project and estimated groundwater flow in the area of the site is to the east, away from the Project. Information in the RCRA-SQG and FINDS databases indicates that the site is a small-quantity generator of hazardous waste with no violations recorded. Furthermore, this site was not identified on the any database which reports releases or spills such as the LUST, NPL, SHWS, or CERCLIS Listings. The RCRIS-Generator database is merely a listing of all facilities that, due to the amount of hazardous waste generated, are required to register with the USEPA for tracking purposes and are not necessarily sites with reported contamination incidents. Based on topographic relations, estimated groundwater flow and the absence of reported releases, this site is not anticipated to have adversely impacted the environmental integrity of the Project.

The remaining listed sites are located more than 750 feet from the Project. Based on a variety of factors such as distance from the Project, topographic relations, estimated groundwater flow, type of media affected and/or current regulatory status, none of these listed sites are anticipated to have adversely impacted the environmental integrity of the Project.

8. ADJACENT PROPERTIES

The general vicinity of the Project consists of residential and commercial land uses. The following adjacent properties were observed:

North — The Project is bordered to the north by Torrance Boulevard followed by HD Horident/Teeth Hut (1751 Torrance Boulevard), A.D. Johnson Company (1741 Torrance Boulevard), Firestone/Bridgestone Auto Repair (1717 Torrance Boulevard), and Western Medical Group (21081 Torrance Boulevard). The Project is bordered to the northeast by Country Home Bakers, Inc. (21100 South Western Avenue).

East — The Project is bordered to the east by South Western Avenue followed by Smog & Lube Shop (21138 South Western Avenue – See Section 7), Sienna Auto International (21176 South Western Avenue), Enterprise Rent-A-Car (21176 South Western Avenue), a multi-family residential complex (21210 South Western Avenue), The South Bay multi-family residential complex (21220 South Western Avenue), a multi-family residential complex (21223 South Western Avenue), Printing Graphics (21236 South Western Avenue), and La Corona Norte multi-family residential apartment complex (21240 South Western Avenue). The Project is bordered to the southeast by single-family residential properties.

South — The Project is bordered to the south by professional office buildings (21281 and 21241 South Western Avenue) and West 213th Street followed by a professional office building (West 213th Street) and an SBC parking facility.

West — The Project is bordered to the west by Bow Avenue followed by the South Bay Mailing Service (1205 Bow Avenue) and a residential mobile home park.

Based on observations and available regulatory information, the adjacent property uses are not anticipated to adversely impact the environmental integrity of the Project.

All plotted occurrences represent approximate locations based on geographic information provided by the respective agency. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. **Occurrences are shown in three colors** to give a visual indication of the potential risk of the listed occurrence based on the type of list and the current status of the occurrence. Occurrences shown in RED are locations with known contamination that have not received a "case closed" or "no further action" status. Occurrences shown in YELLOW have been listed by the respective agency, but do not always represent an environmental risk. The detailed status information and description of the listing should be reviewed for further information. Occurrences shown in GREEN are occurrences that have active permits or have had contamination in the past but have received a "case closed" or "no further action" status and therefore, do not likely present an environmental risk.

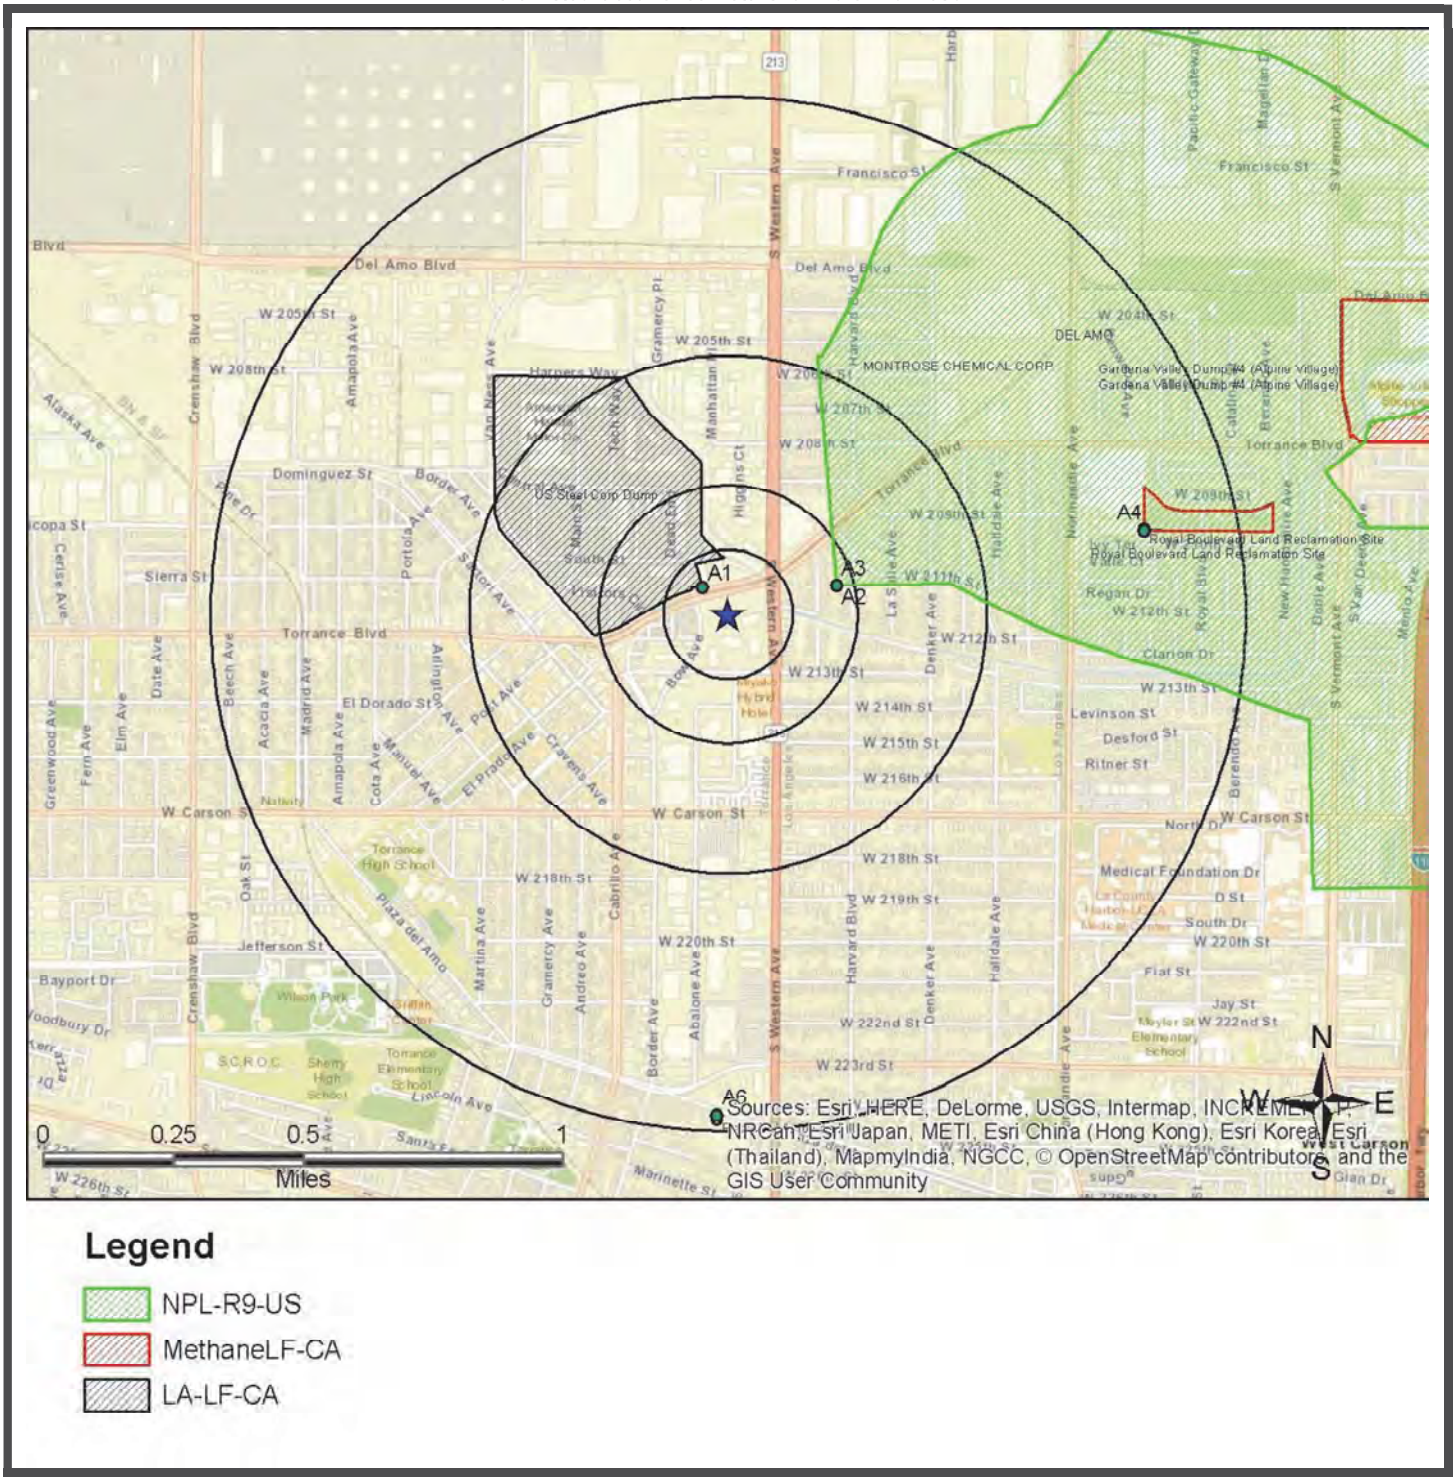
MAPPED AIR PERMITS WITH POTENTIAL DISPERSION (MAP5)

Note: Occurrences on this map are reported in Air Quality databases. Potential air plumes are drawn in the direction of the prevailing wind.



All plotted occurrences represent approximate locations based on geographic information provided by the respective agency/source. Actual locations may vary due to numerous reasons such as: the size of the property, accuracy of the provided location, accuracy of the software used to determine the location, etc. Potential air dispersion plumes are depicted to graphically show the direction contaminates may travel based on prevailing wind data and provide a visual screening tool only. Actual direction will vary especially by season. Depending on the actual contaminate, amount released, and other variables, the distance from the source the contaminate may travel can and will vary. Interpretation and review of all the actual relevant data by an environmental professional is recommended before making any decisions, conclusions or otherwise based on the map depictions, air data, and potential air dispersion plumes.

This "MAPPED AIR PERMITS WITH POTENTIAL DISPERSION (MAP 5)" is fully protected against reproduction in any way, shape or form by ERS Environmental Record Search. ALL applicable laws, copyrights, pending copyrights, trademarks, and any and all applicable Federal and State laws apply at all times. These protections include the concept, procedures, processes, layout, vision, color scheme, mapping layout, legends, data, any and all verbiage, and the entire concept.

POTENTIAL AREAS OF CONCERN/CONTAMINATION (MAP6)

Note: Locations shown may represent site boundaries, contamination plumes, or other information. See descriptions in the Listed Occurrence Details for more information.

BF-MOA-CA
Brownfield MOA Sites (aka Considered Brownfield Sites, SWRCB MOA, Brownfield Memorandum of Agreement)
Category: State/Tribal Brownfield
Description: In order to improve coordination of oversight activities at brownfields sites in California, DTSC, the Water Board, and the RWQCBs agreed to a Brownfield Memorandum of Agreement (MOA). The MOA limits oversight of a brownfields site to one agency, establishes procedures and guidelines for identifying the lead agency, calls for a single uniform site assessment procedure, requires all cleanups to address the requirements of the agencies, defines roles and responsibilities, provides for ample opportunity for public involvement, commits agencies to review timeframes, and commits agencies to coordinate and communicate on brownfields issues. This database contains facilities that fall under the MOA as reported by the State Water Resource Controls Board.
Agency: State Water Resource Controls Board

CERCLIS-Archived-US
CERCLIS sites that have been archived
Category: Federal CERCLIS NFRAP

Copyright 2017 Environmental Record Search (ERS) All Rights Reserved

Description: The Superfund Enterprise Management System (SEMS). The reports produced by SEMS contain information on the assessment and remediation of current and archived hazardous waste sites. The archived designation means that to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates that this decision was not appropriate or other considerations require a recommendation for listing at a later time. Information provided to the previous CERCLIS Legacy System has been added to the details of the sites.

CERS-CA
California Environmental Reporting System (CERS)
Category: State/Tribal ASTM Other
Description: The California Environmental Reporting System (CERS) is a statewide web-based system to support California Unified Program Agencies (CUPAs) and Participating Agencies (PAs) in electronically collecting and reporting various hazardous materials-related data as mandated by the California Health and Safety Code and new 2008 legislation (AB 2286). Under oversight by Cal/EPA, CUPAs implement Unified Program mandates that streamline and provide consistent regulatory activities. Cal/EPA does not provide phone support. Your primary contact should always be your CUPA or PA. The database includes the following counties:
Amador
Calaveras
Contra Costa
Fresno

Coal-Ash-Dams-US
Coal Ash Contaminated Sites and Hazard Dams

Copyright 2017 Environmental Record Search (ERS) All Rights Reserved

Category: ERS Supplemental Govt Sources
Description: This database contains coal ash contaminated sites and hazard dams. Coal combustion waste sites have contaminated groundwater, wetlands, and rivers. The U.S. EPA rates coal ash ponds according to a National Inventory of Dams criteria that categorizes the ponds by the damage that would occur in the event of a dam failure. This database contains High Hazard and Significant Hazard dams.

Controls-CA

California sites with Deed Restrictions or other Controls
Category: State/Tribal Inst/Eng Controls
Description: A deed restricted site is a property where DTSC has placed limits or requirements on future use of the property due to varying levels of cleanup possible, practical, or necessary at the site. The DTSC Site Mitigation and Brownfield's Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. Not all deed restrictions are available at this time.

Controls-RCRA-US

RCRA Institutional and Engineering Controls Summary (aka Federal RCRA with Controls)
Category: Federal Institutional/Engineering Contro
Description: The Institutional and Engineering Controls Summary provides a listing of all RCRA sites with Institutional and/or Engineering Controls in place. Institutional Controls (IC) are defined as non-engineered and/or legal controls that minimize the potential human exposure to contamination by limiting land or resource use. Whereas, Engineering Controls (EC) consist of engineering measures (e.g, caps, treatment systems, etc.) designed to minimize the potential for human exposure to contamination by either limiting direct contact with contaminated areas or controlling migration of contaminants through environmental media.

EPA-Watch-List-US
EPA Watch List
Category: ERS Supplemental Govt Sources
Description: This database contains facilities listed on the Clean Air Act, Clean Water Act, and RCRA Watch List. These reports are now considered archived and will no longer be updated. Being on the Watch List may not mean that the facility has actually violated the law only that an evaluation or investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. The Watch List does not identify which alleged violations of environmental laws may pose the greatest risk to public health or the environment. It is an automated report based on data from the Air Facility System
(AFS), which is used by federal, state and local agencies to track environmental enforcement and compliance information.
Agency: United States Environmental Protection Agency

Eval-Hist-CA
EnviroStor Evaluation History Sites
Category: State/Tribal Voluntary Cleanup Sites
Description: EnviroStor is the Department of Toxic Substances Control's data management system for tracking cleanup, permitting, enforcement and investigation efforts at hazardous waste facilities and sites with known contamination or sites where there may be reasons to investigate further. The subset of cases included in this database is Historical Sites. Historical Sites are identified sites from an older database where no site type was identified. Most of these sites have a status of Referred or No Further Action. DTSC is working to clean up this data by identifying an appropriate site type for each Historic Site.

FUDS-US
Formerly Used Defense Sites
Category: ERS Supplemental Govt Sources
Description: The Department of Defense (DoD) is responsible for environmental restoration of properties that were formerly owned by, leased to or otherwise possessed by the United States and under the jurisdiction of the Secretary of Defense. Such properties are known as Formerly Used Defense Sites (FUDS). The Army is the executive agent for the program and the U.S. Army Corps of Engineers manages and directs the program's administration. The scope and magnitude of the FUDS program are significant, with more than 9,900 properties identified for potential inclusion in the program. Information about the origin and extent of contamination, land transfer issues, past and present property ownership, and program policies must be evaluated before DoD considers a property eligible for Defense Environment Restoration Account (DERA) funding under the FUDS program. Environmental cleanup procedures at FUDS are similar to those at active DoD installations.

Hist-CA

Previously Listed California Sites
Category: ERS Supplemental Govt Sources
Description: ERS has compiled records that have been previously listed in other agency databases. When ERS updates an agency database, if there is a record that was in the older version but the record is not found in the newer version, it is put into this database. The site may have been completely removed, or there was a significant change in the record such as Name, ID, or Address. The information from the old listing is preserved in this database along with which database it was originally in, It is also possible that it was moved from one database to another such as a LUST Open site receiving closure and now being listed in the LUST Closed database.

Hist-CALSITES-CA
Calsites Database
Category: ERS Supplemental Govt Sources
Description: The CalSites database includes both known and potential sites. Two- thirds of these sites have been classified, based on available information, as needing "No Further Action" (NFA) by the Department of Toxic Substances Control. The remaining sites are in various stages of review and remediation to determine if a problem exists at the site. Several hundred sites have been remediated and are considered certified. Some of these sites may be in long term operation and maintenance.

Hist-US
Previously Listed Federal Sites
Category: ERS Supplemental Govt Sources
Description: ERS has compiled records that have been previously listed in other agency databases. When ERS updates an agency database, if there is a record that was in the older version but the record is not found in the newer version, it is put into this database. The site may have been completely removed, or there was a significant change in the record such as Name, ID, or Address. The information from the old listing is preserved in this database along with which database it was originally in, It is also possible that it was moved from one database to another such as a LUST Open site receiving closure and now being listed in the LUST Closed database.

SLIC-Closed-CA
Geotracker - The Spills, Leaks, Investigation & Cleanup (SLIC), Closed Cases
Category: Emergency Release Reports
Description: GeoTracker is the California State Water Resources Control Board's data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. The system is used by the State Board, regional boards, and local agencies to track and archive compliance data from authorized or unauthorized discharges of waste to land, or unauthorized releases of hazardous substances from underground storage tanks. The Spills, Leaks, Investigation & Cleanup (SLIC) Program deals with site investigation and corrective action involving sites not overseen by the Underground Tank Program and the Well Investigation Program. These particular sites have had all remediation completed and are now considered closed by the agency.

TOMS-CA
Topographically Occurring Mine Symbols
Category: ERS Supplemental Govt Sources

Copyright 2017 Environmental Record Search (ERS) All Rights Reserved

Description: In 1998, the Office of Mine Reclamation began inventorying abandoned mined lands as part of a program to produce a report describing the "scope and magnitude" of abandoned mine issues in California. To support this effort, the Office began digitizing mining features from scanned USGS topographic quadrangles. Each of the 7.5-minute USGS topographic quadrangles was examined and all mining features were digitized and annotated with information derived from the map. Positional accuracy was reliant on the accuracy of the original source maps. Human digitization of the mining symbols has likely added slight deviations from the original source map, though no formal method has been undertaken to quantify this additional error. In 2001, we completed the digitizing process for all 7.5-minute topographic quadrangles covering the state.

UST-Closed-CA

UST Case Closure Review Denials and Approved Orders (aka Closure of Underground Storage Tank (UST) Cases)

Category: State/Tribal UST

Description: The Underground Storage Tank Cleanup Fund provides a means for petroleum UST owners and operators to meet the federal and state requirements of maintaining financial responsibility to pay for any damages arising from their tank operations. The Fund assists a large number of small businesses and individuals by providing reimbursement for expenses associated with the cleanup of leaking USTs. The Fund also provides money to the Regional Water Boards and local regulatory agencies to abate emergency situations or to cleanup abandoned sites that pose a threat to human health, safety, and the environment, as a result of a UST petroleum release. This database contains UST tanks that have been closed under the Underground Storage Tank Cleanup Fund as reported by the California State Water Resource Control Board.

EnviroStor Database VCP NFA Listing
Category: State/Tribal Voluntary Cleanup Sites
Description: EnviroStor is the Department of Toxic Substances Control's data management system for tracking cleanup, permitting, enforcement and investigation efforts at hazardous waste facilities and sites with known contamination or sites where there may be reasons to investigate further. The Voluntary Cleanup Program allows DTSC to provide oversight to motivated parties to address Brownfields sites. The subset of cases included in this database is Voluntary Cleanup Program sites with a status of No Further Action.

UN-MAPPABLE OCCURRENCES

The following occurrences were not mapped primarily due to incomplete or inaccurate address information. All of the following occurrences were determined to share the same zip code as the area searched. General status information is given with each occurrence along with any address information entered by the agency responsible for the list.

ID	Facility Name	Address	Database	Status
No "un-mapped" sites requested.

DISCLAIMER, LIMITS AND LIABILITIES

All of the data presented in this report was garnered from public information maintained by governmental agencies. ***Environmental Record Search (ERS)*** cannot ensure that the data, which has been entered and maintained by others, is complete and/or accurate. Any, and all omissions, errors, negligence, accidentally or otherwise within the data received by ***ERS*** is assumed to be caused by others and ***ERS*** cannot and does not assume, take, or acknowledge any liability whatsoever for their respective data. The extrapolation of the mapped locations is based solely on the accuracy of the data provided by others. Prior to relying completely on any mapped location within this report, its accuracy should be verified using other means such as further documentation or a field visit. ***ERS*** makes no representation, warranty or guaranty, express or implied regarding the accuracy of the data entered and maintained by others or the suitability of the data received from others in this report for a certain task or interpretation.

The data presented in this report should only be interpreted by an experienced environmental professional, as per EPA definition, that completely understands the potential inaccuracy of the data derived from others, the possible existence of contaminated occurrences that have not been listed, and the possibility that the governmental database misrepresents the actual status of an occurrence or listing. Prior to relying completely on any of the data within this report, an environmental professional should verify the accuracy of the information presented unless one of ERS's Environmental Professionals has interpreted the data and/or report.

It is important that the reader and/or end user of this information realize that the data gathered has not been verified for its accuracy or completeness in any way by ***ERS***. With billions of records, this is an impossible task for any Company. As much as possible, the data is presented unchanged and unaltered to represent the actual data produced by these agencies. This insures the integrity of the data for the end user.

ERS does however stand behind its representation of the data, any manually plotted occurrences, any risk determinations and all other items directly under its control. This report does comply (as far as the data is reasonably ascertainable as outlined in both the following standards) with section 8.2.1 of ASTM 1527-13 – Standard Environmental Record Sources and EPA's 40 CFR Part 312, All Appropriate Inquiries. ***ERS*** does ensure that the data is accurately reproduced from the original source. ***ERS*** backs the reporting of the data with $3,000,000 of General and Environmental Professional Liability (errors and omissions) Insurance!

QUALIFICATIONS

Amanda G. Lettieri – National Client Manager

BS – Marine Science, Richard Stockton College of New Jersey
OSHA 40-hour Hazardous Waste Operations and Emergency Response
Wetland Delineator Program (NJ)

Ms. Lettieri has fourteen years experience in the environmental services industry. Her project experience includes: Phase I and Phase II Environmental Site Assessments, field activities associated with environmental investigations/remediation, preparing PA/SI, RI/RAW, and RAR documents for contaminated sites in New Jersey, freshwater wetland delineations, Baseline Ecological Evaluations, and NJDEP and USACE permit applications.

Project experience for Ms. Lettieri includes:

- Phase I and II Environmental Site Assessments
- Implementation of soil and groundwater investigations and remediation in conjunction with regulatory agencies
- Conducting wetland delineations and completing Freshwater Wetland permit applications to the NJDEP
- Baseline Ecological Evaluations
- Prepared PA/SI, RI/RAW, and RAR documents for various contaminated sites in New Jersey
- Prepared State and Federal permit applications for various types of sites throughout NJ

Ms. Lettieri has a working knowledge of the ArcGIS program and has integrated this type of mapping into all aspects of environmental services.

Derrick Haynes – Associate Consultants

BS, Mathematics, Morehouse College

Mr. Haynes has more than five years of experience in the environmental consulting and facility management industries. Mr. Haynes has spent his career as a Project Engineer and Project Manager for several companies, specializing in construction monitoring and management in the civil/structural engineering field, and in conducting property condition and needs assessments, property condition evaluations, property reserve needs assessments, and environmental assessments. Mr. Haynes has served as a building assessor, project manager, and author on over a thousand real estate transactions.

Project experience for Mr. Haynes includes:

- Conducted several large portfolios of property conditions and physical needs assessments for various financial institutions
- Completed several hundred due diligence property condition assessments and physical need assessments for commercial office buildings, mobile home parks, gasoline stations, hotels/motels, assisted living and nursing home facilities, industrial/warehouse buildings, multi-family residences, self-storage facilities, and retail shopping centers
- Performed construction monitoring and draw inspections on over 20 properties including a 250-unit multi-family complex, a 50 single family residence subdivision and multiple commercial facilities
- Conducted 50 Geotechnical explorations on proposed residential and commercial properties

Mr. Haynes has experience as a project manager in the building sciences/construction field. His background in building assessments allows him to provide complete and thorough assessments and evaluations to serve a client's specific needs. In addition to providing consulting services, Mr. Haynes has conducted report reviewing and employee training in the construction monitoring field.

Mr. Haynes has performed assessments on numerous commercial, multi-family and industrial facilities. He has been actively performing Phase I and Phase II environmental site assessments along with physical needs assessments and property condition evaluations for not only HUD transactions, but also Freddie Mac, Fannie Mae, and lenders in local and regional markets.

Mr. Haynes is familiar with all standards of Due Diligence Property Assessments and the needs and requirements of a varied number of reporting standards, including the Property Condition Assessment ASTM E2018, Fannie Mae, Freddie Mac, Property Insurable Value Evaluation and customized client formats or scopes. He has also authored Property Condition Assessments, Property Condition Evaluations, HUD Project Capital Needs Assessments, and Environmental Site Assessments.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 12/19/2024 has revealed that there are 2 NPL

sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
DEL AMO Cerclis ID:: 901293 EPA Id: CAD029544731	***DEL AMO BLVD AND VER***	***NE 1/2 - 1 (0.827 mi.)***	***0***	***11***
MONTROSE CHEMICAL CO Cerclis ID:: 900993 EPA Id: CAD008242711	***20201 S NORMANDIE AV***	***E 0 - 1/8 (0.085 mi.)***	***0***	***66***

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/19/2024 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MONTROSE CHEMICAL CO Site ID: 0900993 EPA Id: CAD008242711	***20201 S NORMANDIE AV***	***E 0 - 1/8 (0.085 mi.)***	***0***	***66***

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/19/2024 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 02/17/2025 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1

RCRA-TSDF site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2025 has revealed that there are 8 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 10/21/2024 has revealed that there are 29 CA ENVIROSTOR sites within approximately 1 mile of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 9 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/17/2025 has revealed that there are 32 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/30/2024 has revealed that there are 4 PFAS ECHO sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 6 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there is 1 UST FINDER site within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 09/16/2024 has revealed that there are 20 E MANIFEST sites within approximately 0.25 miles of the target property.

CA HWTS: DTSC maintains the Hazardous Waste Tracking System that stores ID number information since the early 1980s and manifest data since 1993. The system collects both manifest copies from the generator and destination facility.

A review of the CA HWTS list, as provided by EDR, and dated 07/19/2024 has revealed that there are 6 CA HWTS sites within approximately 0.001 miles of the target property.

CA HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the CA HAZNET list, as provided by EDR, and dated 12/31/2023 has revealed that there are 5 CA HAZNET sites within approximately 0.001 miles of the target property.

LA CO LF METHANE: This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

A review of the LA CO LF METHANE list, as provided by EDR, and dated 05/14/2024 has revealed that there is 1 LA CO LF METHANE site within approximately 0.5 miles of the target property.

CA CERS: The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

A review of the CA CERS list, as provided by EDR, and dated 10/15/2024 has revealed that there are 2 CA CERS sites within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 4 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The Section Seven Tracking System (SSTS) tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed.

Summary Details:

Conditions at Proposal December 1, 2000): The Del Amo site should be placed on the National Priorities List NPL) because contaminated ground water beneath the site could effect water that people drink. The Del Amo site is located within the LosAngeles city limits, Los Angeles County, California, in proximity to the Cities of Torrance and Carson. From the early 1940s to the early 1970s, a 280-acre synthetic rubber manufacturing facility operated on the property. The facility consisted ofthe following three plants: a butidiene plant, a styrene plant, and a copolymer plant. The facility was dismantled in the early to mid 1970s, and the property is currently occupied by a business park. The Montrose Chemical Corporation NPL site islocated approximately 600 feet west of the Del Amo site. The 1998 Final Groundwater Remedial Investigation

DEL AMO (Continued) **1000483853**

Report identified the following 12 areas of concern for ground water contamination on the Del Amo site: 1) cyclohexane tanks associatedwith the former copolymer plant in the northern portion of the site, 2) pits and trenches in the former copolymer plant area, 3) XMW-20 non-aqueous phase liquid NAPL) in the former styrene plant area in the western portion of the site, 4) volatileorganic compound VOC) tanks associated with the former styrene finishing/ben ene purification unit, 5) VOC tanks and/or pipelines associated with the former styrene finishing unit, 6) tank farm in the former styrene plant area, 7) VOC storage tanksassociated with the former ethylben ene production unit number 1, 8) VOC storage tanks associated with the former ethylben ene production unit number 2, 9) utility tanks in the former styrene plant area, 10) waste pit area and underground petroleumpipelines in the southern portion of the site, 11) underground ben ene pipeline in the southeast portion of the site, and 12) laboratory underground pipelines in the former butadiene plant area in the eastern portion of the site. The Del Amo HRS Documentation Record focuses on two of these 12 areas of concern the XMW-20 NAPL and the waste pit area). The XMW-20 NAPL is composed primarily of ben ene 90 percent) with lesser quantities of toluene, ethylben ene, and styrene. It is locatedapproximately 50 feet from the historic location of a 500,000-gallon crude ben ene storage tank and extends laterally over an area of approximately 17,500 feet. The NAPL is limited to the saturated one, occurring as isolated blobs in a smear onethat extends vertically from the water table, at approximately 60 feet below ground surface, to 30 feet below the water table. The waste pit area occupies approximately 3.7 acres in the southern portion of the site and consists of six disposalpits Pits 2A through 2F) and two evaporation ponds Ponds 1B and 1C). The pits and ponds received process wastes from the styrene manufacturing plant. The pits and ponds are currently covered with fill material, weeds, and miscellaneous debris, and the 3.7-acre parcel is surrounded by a double row of fences. Ha ardous substances in the waste remaining in the pits and ponds include ben ene, ethylben ene, and naphthalene. The pits and ponds are evaluated as two separate sources in the Del Amo HRS Documentation Record. Ground water proximal to the XMW-20 NAPL is contaminated with ben ene at concentrations up to 1,200,000 ug/L. Soils located beneath the waste pit area have come to be located below the top of the water table, dueto rising ground water levels. These soils are contaminated with the same ha ardous substances that are found in the waste remaining in the pits e.g., ben ene, ethylben ene, and naphthalene). There are 17 municipal drinking water wells within 4 miles of the Del Amo site. Status September 2002): EPA is considering various alternatives for this site. The description of the site release) is based on information available at the time the site was evaluated with the HRS. The description may change as additional information is gathered on the sources and extent of contamination. See 56 FR 5600, February 11, 1991, or subsequent FR notices. For more information about the ha ardous substances identified in this narrative summary, including general information regarding the effects of exposure to these substances on human health, please see the Agency for Toxic Substances and Disease Registry ATSDR) ToxFAQs. ATSDR ToxFAQs can be found on the Internet at

1-888-422-8737.

Completed Document Type:	Remedial Investigation Report
Completed Date:	08/04/2007
Comments:	The purposes of the RI were to evaluate the nature and extent of NAPL and soils contaminants at the site and to provide sufficient data for completion of the Baseline Risk Assessment and Feasibility study. Also, the objective of the RI was to identify and evaluate likely contaminant sources areas. Based on those investigations, it was concluded that Benzene is a primary contaminant at some of the sources areas.
Completed Area Name:	OU 2
Completed Sub Area Name:	Not reported
Completed Document Type:	Operation and Maintenance Report
Completed Date:	06/15/2009
Comments:	U.S. EPA filed an Explanation of Significant Difference (ESD) for the Del Amo Pits treatment technology for the SVE System.
Completed Area Name:	OU 1
Completed Sub Area Name:	Not reported
Completed Document Type:	Record of Decision
Completed Date:	10/10/2011

Background Info:	The site consists of waste disposal ponds that were used by a former synthetic rubber manufacturing complex. The site operated from the 1940's to 1972, when the disposal areas were covered over with soil and later sold to a series of land development corporations. Currently, the site is fenced and posted. Not reported The unlined pits were used for chemical waste disposal. Soils and groundwater are contaminated with high concentrations of volatile aromatic hydrocarbons (VAHs) such as benzene, toluene, and ethylbenzene; and polynuclear aromatic hydrocarbons (PNAs). The highest concentrations of these contaminants are found in the soils from the waste pit area. The contaminants in the shallow aquifer, which is not a drinking water source, may possibly migrate to and contaminate the deeper drinking water aquifer. Not reported A Consent Order was issued in March 1988, and three potentially responsible parties have completed the remedial investigation and are currently conducting the feasibility study. The Consent Order only addresses the onsite soil contamination and not the groundwater contamination. U.S. EPA has completed a groundwater investigation for the site which concluded that there is hydraulic continuity between the uppermost contaminated aquifer and the local drinking water aquifer within two miles of the site. Not reported The site has been split into two operable units. One addresses the pits only, the other addresses the larger study area comprising of soils and groundwater contamination. Not reported U.S. EPA approved the dual site groundwater ROD on 3/30/1999 for both the Montrose and Del Amo sites. This ROD addresses the dissolved Monochlorobenzene plume emanating from the Montrose site to approximately Torrance Blvd. to the south. It also addresses the dissolved benzene groundwater plume emanating from the Del Amo site to just south of the Del Amo Pits. The plumes from both sites overlap each other to the east of Montrose and to the west of Del Amo, approximately around Normandie Avenue. These dissolved plumes are referred to as "GW1" in this report. The Montrose remedy consists of a pump and treat system with reinjection of treated water into

DEL AMO (Continued) **1000483853**

	the groundwater aquifer. The Del Amo remedy consists of intrinsic bioremediation with pumping for containment from the lower unit and subsequent discharge. The LNAPL at the Del Amo site will be dealt with along with the soils remedy, and is noted in this report as the Study Area. The DNAPL at the Montrose site will be evaluated separately and is noted as "GW2" in this report.

Summary Details:

Conditions at proposal October 15, 1984): Montrose Chemical Corp. manufactured DDT on a l3-acre site in a light industrial/residential area of Torrance, Los Angeles County, California, from 1947 until 1982. About 3,000 people live or work within 0.25 mile of the site. The company s operations included formulation, grinding, packaging, and distribution of DDT. According to analyses conducted by EPA, Montrose, and various State and local agencies, on- and off-site soils, surface water, and sediments are contaminated with DDT. The major transport mechanisms identified were storm water run-off and aerial emissions. On May 6, 1983, EPA issued an Administrative Order under CERCLA Section 106 requiring Montrose Chemical to cease all discharges of DDT and to initiate a study to determine the nature and extent of contamination. After a more detailed review of the Montrose

MONTROSE CHEMICAL CORP OF CALIFORNIA (Continued) **1000420366**

site, EPA determined that further work was necessary to characteri e the site andevaluate alternatives. Therefore, EPA prepared a workplan for a remedial investigation/feasibility study RI/FS). This second phase of investigation will assess all areas of contamination, both on- and off-site, and any public health and environmental impacts. Status June 1986): In February 1985, Montrose installed a temporary asphalt cover over the site. EPA did not endorse this activity. In the summer of 1985, EPA conducted Part I of the RI. On-site sampling foundhigh levels of contamination at 77-foot depths in soil and in shallow ground water. In October 1985, Montrose and EPA signed an Administrative Order under CERCLA Section 106 requiring Montrose to conduct Part II of the RI, which includes on-site sampling of ground water and off-site sampling of soil, sediments, surface water, and ground water. Status November 1988): During July 1986, EPA sampled off-site dust and soil and verified that DDT migrated off-site via aerial dispersion.In November 1986, Montrose completed Phase I sampling under Part II of the RI. Results indicated that soils near the site are contaminated with high levels of DDT, and that the two shallower aquifers in the four-aquifer system underlying the site are contaminated with DDT and monochloroben ene. In October 1987, EPA and Montrose signed an amendment to the October 1985 Administrative Order, calling for both on- and off-site sampling of the two deeper aquifers in the four-aquifer system. Status October 4, 1989): In July 1989, EPA and Montrose signed a second amendment to the original order, under which Montrose will conduct the FS for the overall site and evaluate options for removing DDT-contaminated sediments in the sanitary sewer lines near the site. Sampling conducted under the first amended order indicates that ground water is contaminated with high levels of monochloroben ene 0.25 mile downgradient from the site. Deep wells and additional downgradient wells will be constructed and sampled.
