Victor Valley Wastewater Reclamation Authority (VWVRA) owns two existing gravity trunk sewer pipelines (36-in Reinforced Concrete Pipe [RCP] and 42-in Vitrified Clay Pipe [VCP]) that cross Ossum Wash. These large diameter sewer pipelines transport around 1-MG of the City of Victorville's daily sewage. After recent heavy rain events, the existing grade above these pipelines has eroded substantially. VWVRA is concerned that future rain events might expose the two pipelines, making them susceptible to a pipe break and sewage spill from bedload or debris travelling down the wash during a rain event. The two existing pipelines are estimated to have approximately 4 feet of cover remaining above them. (continued on Page 2)

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.
