Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: YOl-16 Vision Zero Shoulder Widening

Lead Agency: California Department of Transportation-District 3

Contact Name: David Gould

Email: david.gould@dot.ca.gov Phone Number: (530)812-6493

Project Location: Cadenasso (*City*) Yolo County (*County*)

Project Description (Proposed actions, location, and/or consequences).

The California Department of Transportation (Caltrans) proposes safety improvements along State Route 16 from Post Miles 21.2 to 21.9 in Yolo County. The project proposes installing 4-ft shoulders on each side of the highway segment, roadway realignment and super elevation adjustment, drainage work at various locations, safety improvement installations including rumble strips, replacing all existing signs with retroreflective sheeting, adding two new speed limit signs, cold plane and overlay existing asphalt of the traveled way within the project limits. The project will tie into existing 8-foot shoulders at the northern project limits.

Three collisions occurred within the existing corridor, 1 fatal and 2 serious injuries during the period from 01/01/2019 to 12/31/2020. Shoulder widths within the project limits vary from no shoulder to 2 feet, which leaves limited room for vehicles to take corrective action before leaving the roadway. In addition, this roadway does not have the width to incorporate rumble strips along existing shoulders.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The proposed project would have no impact on aesthetics, agriculture and forest resource, energy, geology and soils, land use and planning, mineral resources, noise, population and housing, public services, recreation, and transportation.

The proposed project would have a less than significant impact to air quality, biological resources, cultural resources, greenhouse gas emissions, tribal cultural resources, hazards and hazardous materials, hydrology and water quality, utilities and service systems, and mandatory findings of significance.

No mitigation measures are required.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Not applicable.

Provide a list of the responsible or trustee agencies for the project.

United States Fish and Wildlife Services and California Department of Fish and Wildlife.
