Project Title: Geotechnical Testing for the Monterey Road Wildlife Crossing Geotechnical Borings

Project Applicant: Santa Clara Valley Transportation Authority (SCVTA)

Project Location - Specific:

Monterey Road at Fisher Creek near UPRR Milepost 59.19, City of San Jose

Project Location - City: San Jose, Sunnyvale, Milpitas Project Location - County: Santa Clara

Description of Nature, Purpose and Beneficiaries of Project:

The proposed location for the Monterey Road Wildlife Crossing is in an area with substantial changes in materials and topography. The proposed wildlife crossing is located at the base of Tulare Hill at the confluence of Fisher Creek and Coyote Creek. Rock is shallow below the hill and can be seen outcropping on the hillside and along cuts for Monterey Road and the Union Pacific Railroad. The valley bottoms are composed of alluvium and borings made in the valley indicate a deep alluvial profile overlying rock. The cuts and fills made for construction of Monterey Road and the Union Pacific Railroad further complicate the distribution of materials at the site. Geotechnical borings are necessary to understand these properties and extents of these materials to evaluate potential alternatives, identify potential hazards, and to provide design recommendations.

Name of Public Agency Approving Project: Santa Clara Valley Transportation Authority (SCVTA)

Name of Person or Agency Carrying Out Project: Santa Clara Valley Transportation Authority (SCVTA)

Exempt Status: (check one):

- ☐ Ministerial (Sec. 21080(b)(1); 15268);
- ☐ Declared Emergency (Sec. 21080(b)(3); 15269(a));
- ☐ Emergency Project (Sec. 21080(b)(4); 15269(b)(c));
- ☒ Categorical Exemption. State type and section number: 15306. Information Collection
- ☐ Statutory Exemptions. State code number: _____

Reasons why project is exempt:

This Categorical Exemption consists of basic data collection, research, experimental management, and resource evaluation activities which do not result in a serious or major disturbance to an environmental resource. These may be strictly for information gathering purposes, or as part of a study leading to an action which a public agency has not yet approved, adopted, or funded. CEQA Guidelines Section 15306 is applicable for the Project because the proposed geotechnical borings are being conducted in a previously disturbed active roadway to gather information to support design recommendations.
