PROJECT TITLE: HD Ranch Biogas Facility (SCH: 2026090436)

The California Geologic Energy Management Division (CalGEM), has received the above-referenced project. CalGEM's records indicate that there are 20 wells within the vicinity, listed on the Attachment.

If work is to be performed on any oil, gas, or geothermal well, prior approval from CalGEM is required. CalGEM advises against building over oil, gas, or geothermal wells, or impeding access to accommodate equipment that may be needed should an issue arise with a well. In the event that access to a well is required, impeded access could result in removal or demolition of any structure or obstacle that prevents or impedes access. CalGEM does not compensate owners for removal or demolition, when required, due to impeded well access. CalGEM advises against installing impermeable barriers over previously abandoned wells as any leaks could trap hazardous gases or liquids beneath the barrier and create a safety hazard.

CalGEM recommends that a licensed Petroleum Engineer evaluate any well that may be built over or have access impeded to determine if the well meets current standards. A well that does not meet standards can create a significant health and safety risk. CalGEM recommends that any well not meeting current standards be either abandoned or re-abandoned.

Should you have any questions, need approval to work on a well, or encounter any wells that are not on the following list, contact CalGEM by phone at (916) 322-1110 or via email at CalGEMNorthern@conservation.ca.gov.

Sincerely,

May Soe
