

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Livermore Area Recreation and Park District Parks, Recreation and Trails Master Plan 2026

Lead Agency: Livermore Area Recreation and Park District

Contact Name: David Weisgerber, Communications and Planning Manager

Email: dweisgerber@larpd.org Phone Number: 925-373-5765

Project Location: Livermore, Alameda County

City

County

Project Description (Proposed actions, location, and/or consequences).

The Livermore Area Parks and Recreation District (LARPD) proposes to adopt a comprehensive update of the Parks, Recreation, and Trails Master Plan (proposed Plan) to guide the development, enhancement, and management of parks, trails, recreation facilities, open space, and programs within LARPD's jurisdiction over the next ten years. The proposed Plan establishes a framework for future decision-making through adopted policies, service standards, priorities, and implementation tools in order to address the growing and change changing population and physical environment, existing infrastructure deficiencies and the associated demands for new and/or improved community recreation facilities and programs. The proposed Plan reflects community priorities, Board policy direction, system assessments, and planning analysis. Rather than serving as a fixed list of projects, the proposed Plan provides a flexible roadmap for maintaining existing assets, expanding recreation opportunities, improving connectivity, and supporting long-term stewardship of public resources.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Air Quality - Construction of the proposed project could result in fugitive dust. and toxic air contaminants. Mitigation includes implementation of Bay Area Air District Best Management Practices and use of Tier 4 equipment.

Biological Resources - Implementation of the proposed project could impact special-status wildlife species and wetlands. Mitigation includes project-specific assessments, pre-construction surveys, and compensatory mitigation, if needed.

Cultural Resources - Historical or archaeological resources could be discovered during ground disturbing activities. Mitigation includes worker stopping work in the event of a discovery, consulting a qualified archaeologist, and implementing appropriate measures to evaluate, and protect the resource.

Paleontological Resources - Paleontological resources could be discovered during ground disturbing activities. Mitigation includes stopping work, consulting a qualified paleontologist and implementing appropriate measures.

Tribal Cultural Resources - Tribal cultural resources could be discovered during ground disturbing activities. Mitigation includes monitoring during ground disturbance, stopping work in the event of a discovery, and implementing appropriate measures in consultation with the Consulting Tribe(s).

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None known.

Provide a list of the responsible or trustee agencies for the project.

No permits are required for adoption of the Master Plan. Permits would be obtained, as needed, once specific projects are implemented.
