Laguna Grande Understory Thinning Project

1. Project Overview

	Proposed	Actual
Treated Acres	12.80	Project Not Finished
Start Date	04/01/2026	Project Has Not Started Yet
End Date	04/01/2028	Project Has Not Started Yet

Primary Project Objectives

Removal of hazardous, dead, and/or dying trees,

Removal of vegetation for community defensible space,

Removal of vegetation along roadways, high-ways, and freeways for the creation of safer ingress and egress routes for the public and responders and/or to reduce roadside ignitions

Anticipated cooperating agencies and/or resources

CalFire BUE/ Monterey
Monterey County Regional Fire Protection District (MCRFD)
Seaside Fired Department (SFD)
California Conservation Corps (CCC)

2. Applicant Information

Name

Monterey Peninsula Regional Park District

Organization

Public Agency

3. Jurisdictional Information

Responsibility Area

Local

CAL FIRE Unit

BEU

4. Commercial Component

Will this project generate revenue? - No

If yes, explain:

5. Acres by Treatment Type

Mechanical 0	**Manual** 12.8
Prescribed Herbivory 0	**Herbicide** 0
Pile Burning 0	**Broadcast Burning** 0
Cultural Burning 0	**Other** 0

Other Approved Activities

No Other Activities are approved for this project

6. Project Details

Description of Work

Project will reduce fire hazard within the Laguna Grande Park, in Seaside, CA. within areas where dense ladder fuels and brush has grown up.

The area is at extreme risk of fire because of the extensive presence of unpermitted camping by unhoused individuals.

The area is within the City limits and fire at this location could become catastrophic due to the proximity to residential and commercial areas.

Project is limited to removal of dense understory (<8" DBH).

Trees would only be limbed or pruned as needed to access the dense brush.

Areas of brush not under the understory will be thinned to create a functional mosaic, retaining habitat and preventing type conversion.

Low growing understory would remain in place to reduce erosion but prevent ladder fuels from connecting understory vegetation to the tree canopy.

No significant ground disturbance will be created.

The long-term vision includes permitted management of the area for fire hazard.

Fuels Management

Vertical Separation:

- manual limbing of trees (>6" DBH) up to 8 ft.

- manual understory thinning of brush and ladder fuels (<6" DBH) to create 8ft vertical separation from tree crown.

Low growing understory will be retained for erosion control.

Horizontal separation:

- Brush not under canopy will be thinned to a functional mosaic (separation of approx. 2 times the height of the brush layer) between individual (or clumps of individuals) to allow reduced risk of fire spread, while retaining ecosystem type and habitat.

- Rare or sensitive species will not be treated.

Ground-based Equipment

Vegetation management work will use light weight equipment operated by trained personnel under supervision of MPRPD Staff, CALFIRE, SFD, and/or the CCC.

Brush cutters, chainsaws, pole saws, weed ships, hand tools, 4x4 trucks, UTVs and will be used for manual thinning.

Chippers will be used for used for slash disposition.

Heavy machinery will be minimized.

Vehicles/equipment will stay on established roads except under emergency situations.

No new roads will be built.

Slash Treatment

Woody debris/slash will be managed within the season that it is cut to prevent fuel buildup and to protect soils.

Material will either be chipped in place or lopped and scattered (no greater than 3in fuel bed thickness in sensitive areas).

Larger logs will be retained for habitat.

All work will follow Cal Fire air and smoke management standards.

Maintenance Plan

MPRPD will maintain the land through ongoing monitoring, retreatment and community engagement.

MPRPD staff will track vegetation recovery, invasive species control, and fuel loads annually to guide adaptive management.

The proposed project area is expected to require re-treatment (either re-burning, mechanical treatment, or prescribed herbivory) every 5-10 years, as needed.

MPRPD will partner with CALFIRE, local and regional partners for follow-up treatments.

Long term stewardship will be funded through public and private grants.

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Monterey Peninsula Regional Park District,

Regarding Project ID: ee9891e4-7a07-4475-8b83-4e3e4dc79b78

Please refer to the attached letter of determination for the above-referenced project. Please note that prior to commencing project activities Applicant must submit a **Notice of Commencement** specifying the date activities will actually commence.

Of special note:

- Be advised that the **Statewide Fuels Reduction Environmental Protection Plan** (EPP) referenced in the attached approval letter was recently updated December 2025; please review the updated requirements and guidance.
- **CDFW:** See attached advisory.
- **Water Boards**
  1. Pollution prevention near waters: Ensure all manual thinning activities implement pollution prevention measures to prevent vegetation debris, sediment, or disturbed material from entering the lake, consistent with EPP Section 4(d).
  2. Saturated soil conditions: Ensure manual work does not occur during saturated soil conditions, consistent with EPP Section 5(d).
  3. Vegetation and debris management: Ensure cut material is placed and managed in a manner that maintains bank stability and avoids mobilization toward the lake, consistent with EPP Sections 4(d) and 5(b).
- **Coastal Commission**
  1. Vegetation removal should follow the vegetation removal hierarchy as described in EPP BMP 8b:
     a. removal of dead, dying, or diseased trees and shrubs;
     b. removal of non-native and invasive species;
     c. removal of native species that are not listed or sensitive; and then finally,
     d. removal of minimal necessary native species to achieve project goals. Given that the majority of Laguna Grande is mapped as wetland, native vegetation removal should be minimized to retain habitat value.
  2. During nesting and roosting seasons, trees and shrubs should be inspected by a qualified biologist for nesting birds and/or roosting bats before work occurs, consistent with EPP BMP 3h.

3. Any biomass generated and left onsite should be placed where it cannot enter water bodies, consistent with EPP BMPs 4d and 8e.

Any questions related to your project should be directed to: **fuelsreductionsoe@resources.ca.gov**. Please reference your project name and project ID in your email. Thank you for your submission.

Project No.: ee9891e4-7a07-4475-8b83-4e3e4dc79b78 - Laguna Grande Understory Thinning Project

SECRETARIAL SUSPENSION AUTHORIZATION

BACKGROUND

On March 1, 2025, Governor Newsom proclaimed a state of emergency to exist in the State of California due to the catastrophic wildfire risks created by forest conditions across the state. It was extended by Executive Order N-38-25, signed on December 31, 2025. The Proclamation suspends state statutes, rules, regulations, and requirements that fall within the jurisdictions of the boards, departments, and offices within the California Environmental Protection Agency (CalEPA) and the California Natural Resources Agency (CNRA) to the extent necessary for expediting certain critical fuels reduction projects. It requires individuals or entities who desire to conduct such activities under the suspension to request that the appropriate agency secretary, or the secretary's designee, make a determination that the proposed activities are eligible to be conducted under this suspension. (That determination is referred to herein as the "secretarial suspension authorization" or "suspension authorization.") The Secretary for CalEPA and the Secretary for CNRA must use sound discretion to ensure that the secretarial suspension authorization serves the purpose of accelerating critical fuels reduction projects, while at the same time protecting public health and the environment.

The Proclamation further provides that critical fuels reduction projects are eligible for a suspension authorization only if they are initiated and if they include as a primary objective at least one of the following activities ("permissible primary objective"): removal of hazardous, dead, and/or dying trees; removal of vegetation for the creation of strategic fuel breaks as identified by approved fire prevention plans, including without limitation CAL FIRE Unit Fire Plans or Community Wildfire Preparedness Plans; removal of vegetation for community defensible space; removal of vegetation along roadways, highways, and freeways for the creation of safer ingress and egress routes for the public and responders and to reduce roadside ignitions; removal of vegetation using cultural traditional ecological knowledge for cultural burning and/or prescribed fire treatments for fuels reduction; or maintenance of previously-established fuel breaks or fuels modification projects.

The Proclamation further requires that any activities performed under the suspension be in accordance with the State Environmental Protection Plan describing how such actions will balance expeditious fuels reduction and environmental protection. The Statewide Fuels Reduction Environmental Protection Plan was developed by CalEPA, CNRA, the California Air Resources Board, the California Coastal Commission, the California Department of Fish and Wildlife, the State Water Resources Control Board (State Water Board) and Regional Water Quality Control Boards (each a Regional Water Board), the Department of Forestry and Fire Protection, and the California Geological Survey, to apply to fuels reduction projects granted a secretarial suspension authorization. The EPP is appropriate for application to certain fuels reduction activities. It specifies methods

intended to allow the fuels reduction activities to continue without delay while still preserving the intent of the suspended laws and protecting the environment.

Monterey Peninsula Regional Park District (Applicant) has submitted a request for a suspension authorization (Application) on December 31, 2025. Applicant has included a description of the work, a description of treatment activities, a long term maintenance/retreatment plan and included a project map. The activities described in the Application are hereinafter referred to as the Project. The information contained in the Applicant's Application is hereby incorporated by reference.

CONDITIONS OF SUSPENSION AUTHORIZATION

The suspension of laws set forth below is conditioned on the following:

1. **Applicability:** This suspension authorization applies only to the Project. It does not apply to any activities not set forth in the Application. This suspension authorization does not alter any requirements imposed by any law not specifically identified herein, including local and federal laws, and any material modification of or departure from the Project described in your Application may independently trigger obligations under the state laws identified in this authorization.
2. **EPP:**
    - The Project must be conducted in conformance with the EPP. This suspension authorization is only valid to the extent the Applicant and individuals conducting Project Activities comply with the EPP. Failure to comply with the EPP, and with any applicable federal and non-suspended state and local environmental laws and regulations, may result in an enforcement action by CalEPA departments and/or CNRA departments.
    - Staff of the State Water Board, appropriate Regional Water Board, California Air Resources Board, California Coastal Commission, the California Department of Fish and Wildlife, the Department of Forestry and Fire Protection, and the California Geological Survey will have the opportunity to inspect operations and verify proper implementation of best management practices and other measures set forth in the EPP. Inspections may occur throughout the life of the project and within eight months of filing a Notice of Completion to the State. Staff will ensure they provide reasonable notice to the applicant for all site visits. Applicant must work with staff to ensure access is granted.
    - The EPP may be amended at any time during planning or implementation of project activities. The Project must be conducted in conformance with the then-applicable EPP. If such amendment occurs, CNRA and CalEPA will notify all applicants of such changes.
3. **Qualified Responsible Party**:
    - All Project work must be conducted by or under the direction of a qualified responsible party, such as a Registered Professional Forester, Certified Rangeland Manager, qualified vegetation management contractor, qualified incident commander, certified arborist, certified burn boss and/or authorized cultural burner.
    - If no qualified responsible party was listed in the Application, or the Applicant substitutes a different or adds additional qualified party/parties, Applicant must submit a Notice of Qualified Responsible Party prior to commencement of on-the-ground work.

4. **Landowner Consent**: Applicant must have a legal entitlement to enter the property or consent of landowner of record.
5. **Commencement and termination of on-the-ground project activities:**
    - On the ground fuel project activities must commence no later than October 15, 2026.
    - Applicant must submit a Notice of Commencement to CalEPA, CNRA, and the applicable CAL FIRE unit prior to commencing on-the-ground project activities and specifying the date on which on-the-ground project activities will actually commence. Ideally, this will be the same date set forth in the Application. The Notice of Commencement must set forth the target completion date.
    - Operations should conclude no later than 2 years after commencement of on-the-ground project activities.
    - In the event operations will not conclude before the target completion date identified in the Notice of Commencement, Applicant must submit of a Notice of Amended Completion Date prior to the previously identified target completion date.
    - Applicant must submit a Notice of Completion promptly after on-the-ground work has been completed. The Notice of Termination will specify the date on which on-the-ground project activities concluded and identify the total acres treated.

SUSPENSION AUTHORIZATION BY CALEPA

I, Catalina Hayes-Bautista, Undersecretary, have been delegated authority by Secretary for Environmental Protection Yana Garcia, to issue suspension authorizations where appropriate. I find that Applicant's Project is eligible for a suspension authorization because it was submitted by May 1, 2026, and has the permissible primary objectives of Removal of hazardous, dead, and/or dying trees; Removal of vegetation for community defensible space; and Removal of vegetation along roadways, highways, and freeways for the creation of safer ingress and egress routes for the public and responders and to reduce roadside ignitions. I further find that issuance of a suspension authorization in this case would serve the purpose of expediting critical fuels reduction activities and that Applicant's compliance with the EPP in conducting the Project will protect public health and the environment.

Based on the foregoing, I find that the Project is eligible to be conducted under the suspension authorized by the Proclamation. This suspension authorization, however, is conditioned on compliance with the conditions listed above. In the exercise of my discretion under the Proclamation, I hereby authorize the Project to proceed pursuant to the suspension of the following laws within the jurisdiction of the State Water Resources Control Board or appropriate Regional Water Board and the following laws within the jurisdiction of the California Air Resources Board:

- California Water Code, § 13160, and all regulations pursuant to that section; requires an applicant for a federal license or permit to conduct any activity which may result in any discharge to navigable waters to file an application for a water quality certification from the appropriate Regional Water Board or the State Water Board.
- California Water Code, § 13260, and regulations pursuant to that section; requires that any person discharging waste, or proposing to discharge waste, within any region that could affect the quality of waters of the state shall file with the appropriate Regional Water Board a report of the discharge.

- Cal. Code Regs., tit. 17, §§ 80100-80330; establishing smoke management guidelines for agricultural and prescribed burning.

Suspension Approved by:

3/4/2026

Catalina Hayes-Bautista, Undersecretary
California Environmental Protection Agency **Date**

SUSPENSION AUTHORIZATION BY CNRA

I find that Applicant's Project is eligible for a suspension authorization because it was submitted by May 1, 2026, and has the permissible primary objectives of Removal of hazardous, dead, and/or dying trees; Removal of vegetation for community defensible space; and Removal of vegetation along roadways, highways, and freeways for the creation of safer ingress and egress routes for the public and responders and to reduce roadside ignitions. I further find that issuance of a suspension authorization in this case would serve the purpose of expediting critical fuels reduction activities and that Applicant's compliance with the EPP in conducting the Project will protect public health and the environment.

Based on the foregoing, I find that the Project is eligible to be conducted under the suspension authorized by the Proclamation. This suspension authorization, however, is conditioned on compliance with the conditions listed above. In the exercise of my discretion under the Proclamation, I hereby authorize the Project to proceed pursuant to the suspension of the following laws within the jurisdiction of the following agencies:

- California Fish and Game Code (FGC) § 86 where "Take" shall be avoided. Take is defined as to hunt, pursue, catch, capture, or kill, or attempt to hunt, pursue, catch, capture, or kill.
- FGC § 1600 et seq.; Lake or Streambed Alteration Agreement, notification of significant alteration to stream channel, bank, or bed.
- FGC § 1900 et seq.; Native Plant Protection Act.
- FGC § 1927 et seq.; Western Joshua Tree Conservation Act.
- FGC § 2000; Taking is unlawful except as provided.
- FGC § 3503 and § 3503.5; Protection for bird nests and eggs and birds of prey.
- FGC § 3511; California Fully Protected Birds.
- FGC § 3513; California Migratory Bird Protection Act.
- FGC § 4700; California Fully Protected Mammals.
- FGC § 5050; California Fully Protected Reptiles and Amphibians.
- FGC § 5515; California Fully Protected Fish.
- FGC §§ 5650 and 5652; Deposition of deleterious material into waters of the state.
- FGC § 5901; Fish passage.
- FGC § 5937; Sufficient water for fish.
- FGC § 5948; Obstruction of streams.
- FGC §§ 2050-2115.5: California Endangered Species Act; prohibition of the take of any species of wildlife designated as endangered, threatened, or candidates for listing.
- Public Resources Code §§ 30000-30900: California Coastal Act
- Public Resources Code §§ 21000-21189.91: California Environmental Quality Act

- All regulations implementing the code sections identified above.

Suspension Approved by:

Wade Crowfoot, Secretary
California Natural Resources Agency

March 10, 2026
Date

Biological Resources Advisories

1. (a) The Project has the potential to impact the following species and sensitive natural resources: the State and federally endangered coastal dunes milk-vetch (*Astragalus tener var. titi*), Hickman's cinquefoil (*Potentilla hickmanii*), Menzie's wallflower (*Erysimum menziesii*), Monterey clover (*Trifolium trichocalyx*), and Tidestrom's lupine (*Lupinus tidestromii*); the State endangered and federally threatened beach layia (*Layia carnosa*); the State endangered seaside bird's-beak (*Cordylanthus rigidus ssp. littoralis*); the federally endangered Smith's blue butterfly (*Euphilotes enoptes smithi*); the State threatened and federally endangered Monterey gilia (*Gilia tenuiflora ssp. arenaria*)*;* the federally endangered Contra Costa goldfields (*Lasthenia conjugens*) and Yadon's rein orchid (*Piperia yadonii*); the State and federally threatened California tiger salamander (*Ambystoma californiense pop. 1*); the State threatened bank swallow (*Riparia riparia*), California black rail (*Laterallus jamaicensis coturniculus*); the federally threatened Monterey spineflower (*Chorizanthe pungens var. pungens*), western snowy plover (*Anarhnchus nivosus nivosus*); the State rare Pacific Grove clover (*Trifolium polyodont*); the State proposed endangered burrowing owl (*Athene cunicularia*) and western bumble bee (*Bombus occidentalis*); the federally proposed threatened monarch (*Danaus plexippus plexippus pop. 1*); and the California Rare Plant Rank (CRPR) 1B.1 Congdon's tarplant (*Centromadia parryi ssp. congdonii*), Eastwood's goldenbush (*Ericameria fasciculata*), Fort Ord button-celery (*Eryngium montereyense*), Kellogg's horkelia (*Horkelia cuneata var. sericea*), legenere (*Legenere limosa*), Oregon meconella (*Meconella oregana*), Pajaro manzanita (*Arctostaphylos pajaroensis*), pink Johnny-nip (*Castilleja ambigua var. insalutatal*), Robbins' broomrape (*Aphyllon robbinsii*), Santa Cruz clover (*Trifolium buckwestiorum*), and vernal pool bent grass (*Agrostis lacuna-vernalis*); the CRPR 1B.2 Carmel Valley bushmallow (*Malacothamnus involuratus*), Choris' popcornflower (*Plagiobothrys chorisianus var. vhorisianus*), Fort Ord spineflower (*Chorizanthe minutiflora*), Gowen cypress (*Hesperocuparis goveniana*), Hickman's onion (*Allium hickmanii*), Hooker's manzanita (*Arctostaphylos hookeri ssp. hookeri*), Hospital Canyon larkspur (*Delphinium hutchinsoniae*), Hutchinson's larkspur (*Delphinium hutchinsoniae*), Jolon clarkia (*Clarkia jolonensis*), marsh microseris (*Microseris paludosa*), northern curly-leaved monardella (*Monardella sinuate ssp. nigrescens*), pine rose (*Rosa pinetorum*), Point Reyes horkelia (*Erigonum nortonii*), saline clover (*Trifolium hydrophilum*), San Francisco collinsia (*Collinsia multicolor*), sand-loving wallflower (*Erysimum ammophilum*), sandmat manzanita (*Arctostaphylos pumila*), Santa Cruz microseris (*Stebbinsoseris decipiens*), Toro

manzanita (*Arctostaphylos montereyensis*), twisted horsehair lichen (*Sulvaria spiralifera*), and woodland woollythreads (*Monolopia gracilens*); and the CRPR 1B.3 Pinnacles buckwheat (*Eriogonum notyonii*).

(b) CDFW advises the applicant contact the USFWS regarding federally listed species.

(c) Please refer to EPP Section 1(d) regarding identifying and marking sensitive resources prior to project commencement, and EPP Section 3 which includes BMPs for sensitive biological resources. There are several known sensitive biological resources within treatment areas and it is unclear if these areas can be fully avoided, per EPP Section 3(a) the applicant shall contact CDFW regarding location and avoidance of sensitive biological resources prior to project activities, please email R4Timber@wildlife.ca.gov.

2. Please be advised that future maintenance will be subject to the Fish and Game Code. Please contact CDFW at R4Timber@wildlife.ca.gov for future maintenance activities.

Hello,

Coastal Commission staff recently reviewed your suspension request for manual treatment of 12.8 acres targeting ladder fuels and brush around Laguna Grande Park in Monterey County. Please see the attached letter describing our recommendations for implementation of Environmental Protection Plan measures in this project. If you have any questions, please feel free to reach out to our District staff.

Thank you,

Subject: **Laguna Grande Understory Thinning Project**

Dear Monterey Peninsula Regional Park District,

We are in receipt of the Fuels Reduction Suspension Request you submitted pursuant to Governor Newsom's March 1, 2025 State of Emergency Proclamation (SOE) at Seaside in Monterey County. This letter does not serve as authorization of the Request, but describes the measures needed to carry out the project consistent with the Statewide Fuels Reduction Environmental Protection Plan (EPP) as it relates to coastal resource protection.

The fuels reduction project request consists of manual treatment of 12.8 acres, targeting ladder fuels and brush around Laguna Grande Park in Monterey County. We recommend the following measures to ensure that the requested work adequately protects coastal resources, most notably potential environmentally sensitive habitat areas (ESHA) identified in the [JURISDICTION] Local Coastal Program. These measures are needed to comply with the EPP requirements related to coastal resources, and shall be carried out in addition to any other requirements of the EPP:

- Vegetation removal should follow the vegetation removal hierarchy as described in EPP BMP 8b: 1) removal of dead, dying, or diseased trees and shrubs; 2) removal of non-native and invasive species; 3) removal of native species that are not listed or sensitive; and then finally, 4) removal of minimal necessary native species to achieve project goals. Given that the majority of Laguna Grande is mapped as wetland, native vegetation removal should be minimized to retain habitat value.

- During nesting and roosting seasons, trees and shrubs should be inspected by a qualified biologist for nesting birds and/or roosting bats before work occurs, consistent with EPP BMP 3h.

- Any biomass generated and left onsite should be placed where it cannot enter water bodies, consistent with EPP BMPs 4d and 8e.

- The request describes ongoing maintenance of the treatment areas. Please be advised that the suspension request does not authorize maintenance work in the future beyond the approval period specified by the suspension. Further authorizations will be required for work performed in the future.

- In addition to documentation requirements provided in the authorization letter you receive, the California Coastal Commission requests that photo documentation of treatment areas before and after treatment, as well as a final description of treatments completed, be submitted at the conclusion of the project. Reports and photos should be sent to CentralCoast@coastal.ca.gov.

Additionally, current guidance for the SOE requires work to be completed within 2 years of initiation with limited exceptions. Continuation of this work beyond that timeline may require a coastal development permit. Correspondence with California Coastal Commission staff can help provide further details in the future.

Sincerely,

Erin Prahler
Statewide Planning Manager
Statewide Planning Unit
California Coastal Commission
