PROJECT TITLE: Environmental Review No. 8982– Shaver Lake Area Fire Escape Routes Improvements

PROJECT APPLICANT/SPONSOR: Fresno County Department of Public Works and Planning, Design Division

PROJECT LOCATION – COUNTY: Eastern Fresno County near Shaver Lake

DESCRIPTION OF PROJECT: The project proposes to improve fire escape routes located in the Shaver Lake area. The scope of work includes grading, leveling, and placing dirt or gravel on sections of the designated fire routes where needed to ensure smooth passage for two-wheel drive vehicles. Minimum improved route widths are to be 12' wide. Aggregate base and asphalt grindings will be placed where needed. Nearby water drainage facilities will be inspected, cleared, and improved or repaired so that drainage is away from travel routes and minimizes erosion and flooding damage. This may include rip-rap, water bars, and check dams, culvert crossings, or other work as needed. Vegetation will be cleared up to a minimum of 12' wide and 14' high. High visibility directional signage and crash gates will be installed at key intersections. Other minor appurtenant work may be completed as necessary.

NAME OF PUBLIC AGENCY APPROVING PROJECT: Fresno County Board of Supervisors, Department of Public Works and Planning, Design Division.

NAME OF PERSON OR AGENCY CARRYING OUT PROJECT: Fresno County Department of Public Works and Planning, Design Division.

EXEMPT STATUS: Categorical exemption: Section 15301 *Existing Facilities*

REASONS WHY THE PROJECT IS EXEMPT: The project's scope of work includes improving existing emergency fire escape routes to improve public safety. The project meets the criteria for a CEQA Class 1 exemption according to Section 15301, which includes the repair, maintenance, and minor alteration of existing structures. Section 15301(d) specifically exempts restoration or rehabilitation of deteriorated or damaged structures or facilities to meet current standards of public health and safety. Since this project only includes improvement and repair of existing routes, and does not create additional automobile lanes, it can be concluded it will not have an impact on the environment and is considered exempt under CEQA guidelines.
