Project Information

Project Name: Hardwire Existing Solar Panel Signs, and Refresh Pavement Markers on SR 111

DIST-CO-RTE: 11-IMP-111 **PM:** R4.4/R5.1

Project Description

Caltrans proposes to upgrade existing solar powered flashing beacons to hardwired flashing beacons to prevent panel theft and increase consistency of the flashers. Caltrans also proposes to refresh pavement markings throughout the intersection and install signal ahead pavement markings to increase driver visibility and awareness. Other work activities include refreshing pavement delineation across the intersection, removing existing solar panels from signal ahead signs on both northbound and southbound sides of SR 111. Caltrans will install new modified electrical system with flashing beacon at each sign and install new signal ahead pavement markings on westbound SR 86. The project also includes temporary construction signs, traffic control. No new signs are being installed but 4 signs will be upgraded with flashing beacons. Environmental commitments for biological resources, air quality, hazardous waste, and NPDES/Stormwater are included in the Environmental Commitments record (ECR).
