

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: LCSD Wastewater Treatment Facility and Effluent Disposal Improvement Project

Lead Agency: Loleta Community Services District

Contact Name: Dennie Her

Email: generalmanagerlcsd@gmail.com

Phone Number: 707-733-1717

Project Location: NA (Community of Loleta)
City

Humboldt
County

Project Description (Proposed actions, location, and/or consequences).

LCSD is planning to modify its WWTF and effluent discharge system to meet the terms of its current National Pollutant Discharge Elimination System (NPDES) permit, including waste discharge requirements for recycled water (beneficial reuse for irrigation of agricultural land becomes the discharge point instead of surface water). The proposed project includes a land acquisition and new wastewater treatment facility component (including geotechnical borings), rehabilitation of the existing waste discharge pipe component, and land application of treated effluent component. LCSD proposes to expand the existing 0.48-acre WWTF parcel (APN 309-211-006) into an approximately 0.77-acre portion of an adjacent 55.47-acre parcel (APN 309-191-012) using a lot line adjustment, which requires an amendment to the local coastal plan (Eel River Area Plan) and a zone reclassification. A new WWTF will be constructed, and the old WWTF will be demolished.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Mitigation reducing all impacts to less than significant includes - Requirements to Reduce Air Pollution, Protect Northern Red-legged Frog, Pre-construction Nesting Bird Surveys, Protect Northwestern Pond Turtle, Stockpile and Replace Topsoil in Agricultural and Wetland Areas, Revegetate Temporarily Disturbed Agricultural Lands, Protocols for Inadvertent Discovery of Cultural Resources, and Inadvertent Discovery Protocol – Paleontological Resources.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
