**AMENDMENT OF LAKE OR STREAMBED ALTERATION AGREEMENT NOTIFICATION NO., EPIMS-
VEN-56908-R5, TD2222411 Westlake Blvd Eleanor Deteriorated Pole Replacement Project,
County of Ventura [APN 695-0-220-085]**

Dear Warnetta Logan:

The California Department of Fish and Wildlife (CDFW) has received your request to amend the above referenced Lake or Streambed Alteration Agreement (Agreement) and the required fee in the amount of \$1,929.75 for a major amendment. Your request to amend the Agreement includes changes to the Project Description, vehicle and equipment access, and CDFW contact information.

CDFW hereby agrees to amend this Agreement with addition of the following amended Project Description, Measures, and CDFW Contact Information (language removed is shown in ~~red with a strikethrough~~, language added is shown in ***bold, italicized text***):

1. Project Description: The TD2222411 Westlake Blvd Eleanor Deteriorated Pole Replacement Project (Project) consists of the removal and replacement of Pole 1848419E, and the installation of an associated corrugated steel caisson. The activities covered by this Agreement include vegetation trimming and trampling to facilitate access; soil disturbance to create temporary staging and work areas; the removal of Pole 1848419E; the installation of a corrugated steel caisson; the replacement of Pole 1848419E with a new wooden utility pole; the placement of clean fill gravel; and associated activities described in further detail below. The Project also includes the restoration of areas subject to Fish and Game Code section 1600 et seq. impacted by the activities covered under this Agreement. Pole 1848419E is located approximately

50 feet west of State route 23 – Westlake Boulevard (see Figure 2). Trucks and personnel vehicles will park on the road shoulder, while a hand crew trims vegetation to allow for vehicle access to Pole 1848419E's location. Two California sycamore trees will have their canopies trimmed by five-percent for safety and access reasons to facilitate the replacement of Pole 1848419, in addition to trimming vegetation in a ten-foot-radius around the pole to create a temporary work area. **The Project will place four four-feet-wide by eight-feet-long steel plates over Lake Eleanor Creek to facilitate vehicle access from the road shoulder to the Pole 1848419E location.** A vacuum truck will then be operated to excavate an approximate three-foot-wide by 17-foot-deep hole using an attached water jet auger and suction hose. A utility truck using a crane attachment will place a 20-foot-long, by three-foot-wide corrugated steel caisson into the excavated hole in a manner that leaves the remaining three feet of the caisson above grade. A new wooden pole will then be placed within the caisson. The void remaining between the pole and caisson will be backfilled with clean gravel. Upon completion of the pole and anchor removal activities, all Project areas will be restored to pre-Project conditions.

The Project is anticipated to be completed during periods of dry weather coinciding with the absence of flows within Lake Eleanor Creek. The Project is expected to be completed within approximately five workdays.

The Project locations, including where the anchor replacement operations, access, and staging will occur will hereafter be referred to as "Project areas." The activities described in this Agreement will hereafter be referred to as "Project activities."

Equipment

Project equipment for the replacement of Pole 1848419E includes hand-operated tools, gas and pneumatic powered hand tools, vacuum trucks, cranes, utility trucks, **steel plates**, and personnel vehicles. Staging of equipment and materials will occur on the road shoulder of State Route 23 – Westlake Boulevard, in addition to within the temporary work area surrounding Pole 1848419E (see Figure 2).

2. 2.33 Vehicle/Equipment Access: Vehicles and equipment shall not be operated in wetted areas (including but not limited to ponded, flowing, or wetland areas). **This includes placement and use of steel plates to facilitate access over Lake Eleanor Creek.**
