Project Title: 713492_CREH_OG

Project Applicant: California Resources Elk Hills, LLC

Project Location: Kern County, Buena Vista Oil Field: Section 1/Township 32S/Range 23E/B&M MD; Latitude: 35.17547607/Longitude: -119.46199036

Project Description:

CREH proposes to rework 2-3A-1C (API 0402902619), part of UIC Project No. 08006009, in the Buena Vista field to repair holes in well 2-3A-1C's casing. The Operator proposes to restore well 2-3A-1C's mechanical integrity and prevent further deterioration by running 5 ½-inch inner casing to the top of the current liner, cementing the casing to surface, and performing post-remediation casing integrity testing to verify isolation of fluid flow between the wellbore and annulus. Temporary equipment such as pumps and return bins may be needed. Various mobile temporary equipment will be used including, but not limited to, workover rig, etc., and vehicles to transport personnel and materials to/from the site. No production facilities and no new ground surface disturbance will be associated with the reworks. Any waste materials will be properly disposed of in accordance with all applicable laws and regulations.

The proposed project consists of the California Department of Conservation, Geologic Energy Management Division (CalGEM) approving a permit for California Resources Elk Hills, LLC to rework the well listed below, in the Buena Vista Oil Field.

API #	Well Name
0402902619	**2-3A-1C**

Exempt Status: As the Lead Agency, CalGEM has determined that the proposed project is exempt from full environmental review requirements of the California Environmental Quality Act (CEQA), pursuant to the specified exemptions marked in the section below. CalGEM further finds that the proposed project would not result in a significant adverse

impact to the environment, or that any of the exceptions to the application of the exemptions apply (14 CCR § 15300.2).

Exemption Type		Statute (PRC)	Regulation (14 CCR)	
☐	**Statutory Exemption:**			
	☐ Ongoing Project (*pre-CEQA approval on April 5, 1973*)	21169	15261 (b)	
	☐ Ministerial	21080 (b)(1)	15268	
	☐ Declared Emergency	21080 (b)(3)	15269 (a)	
	☐ Emergency Projects	21080 (b)(4)	15269 (b) or (c)	
☑	**Categorical Exemption:**	21084		
	☑ **Class 1**: Existing Facilities		15301	1684.1
	☑ **Class 2**: Replacement or Reconstruction		15302	
	☐ **Class 3**: New Construction/Conversion of Small Structures		15303	
	☑ **Class 4:** Minor Alterations to Land		15304	1684.2
	☐ **Class 7**: Protection of Natural Resources		15307	
	☐ **Class 8**: Protection of the Environment		15308	
	☐ **Class 11:** Accessory Structures		15311	
	☐ **Class 21**: Enforcement Actions to revoke a permit		15321	
	☐ **Class 30**: Minor Actions to Prevent, Minimize, Stabilize, Mitigate, or Eliminate a Release (Actual or Threat) of Hazardous Substances (Waste or Material)		15330	
	☐ **Class 33**: Small Habitat Restoration Projects		15333	
☐	**General Exemption** ("common sense")		15061 (b)(3)	
☐	**Not a "Project" subject to CEQA**		15378 (b)(2)	
	CEQA Exceptions to the Exemptions (14 CCR § 15300.2)**:** where project is located (e.g., sensitive environment); Cumulative Impact; Significant Effect due to Unusual Circumstances; Scenic Highways; Hazardous Waste Sites; Historical Resources.			

Reasons Why Project is Exempt: The basis for CalGEM's determination that the project is exempt from the requirements of CEQA is provided in the brief explanation below.

PRC section 3281, subdivision (a), lists three independent exceptions allowing approval of an NOI: to prevent or respond to a threat to public health, safety, or the environment (subdivision (a)(1)); to comply with a court order as specified (subdivision (a)(2)); and to plug and abandon or reabandon a well (subdivision (a)(3)). An NOI to plug and abandon a well or reabandon a well or to drill an intercept well necessary to plug and abandon or reabandon a well does not require submission of a statement of basis. (CCR, § 1765.3(f).)

CalGEM has not issued an order to plug and abandon under PRC section 3237 because the Operator is proposing to repair the well and plugging and abandonment has not been identified as a necessary remedial measure under PRC section 3224 at this time. The Operator is actively working to bring the well into compliance, and the completion of the remedial work proposed by the operator is designed to effectively address the threat to health, safety, and the environment.

Class 1, Existing Facilities (14 CCR §§ 15301, 1684.1):
Class 1 consists of the "operation, repair, maintenance, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features involving negligible or no expansion of use beyond that existing previously." This includes "remedial, maintenance, conversion, and abandonment work on oil, gas, injection, and geothermal wells involving the alteration of well casing, such as perforating and casing repair, removal, or replacement; installation or removal of downhole production or injection equipment, cement plugs, bridge plugs, and packers set to isolate production or injection intervals." (14 CCR § 1684.1.) The proposed project would make minor alterations to the well(s), resulting in negligible expansion of use beyond that existing previously. The proposed project and related permit approval is consistent with the laws that govern the operations, including statutory and regulatory provisions that protect public health, safety, and the environment.

Class 2, Replacement or Reconstruction (14 CCR § 15302):
Class 2 consists of the "replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced[.]" (14 CCR § 15302.) The proposed project would reconstruct the casing and wellbore(s) of existing wells. The work would take place on the existing wellbore(s) and well pads. The proposed work involves negligible change in use of the wells. The proposed project and related permit approval is consistent with the laws that govern the operations, including statutory and regulatory provisions that protect public health, safety, and the environment.

Class 4, Minor Alterations to Land (14 CCR §§ 15304, 1684.2):
Class 4 consists of "drilling operations that result only in minor alterations with negligible or no permanent effects to the existing condition of the land, water, air, and/or vegetation." (14 CCR § 1684.2; see also 14 CCR § 15304.) The proposed project involves negligible or no vegetation removal, expansion of the existing well pads, and ground disturbance. Therefore, there would be no surface disturbance related activities that would significantly disturb the surrounding environment. The proposed project and related permit approval is consistent with the laws that govern the operations, including statutory and regulatory provisions that protect public health, safety, and the environment.

Exceptions to Exemptions: CalGEM further finds that there are no exceptions to the application of the categorical exemptions (PRC § 21084; 14 CCR § 15300.2 (c)) referenced above. There is no substantial evidence that there are any "unusual circumstances" associated with the proposed project that create a reasonable possibility that the activity will have a significant effect on the environment. The approved project is within a Health Protection Zone (HPZ) as def circumstance because SB 1137 (PRC § 3280 et seq.) requires all oil or gas production facilities or wells with a wellhead within an HPZ

to comply with specified health, safety, and environmental requirements. In addition, CalGEM further finds that there are no significant "cumulative impacts" resulting from successive projects of the same type in the same place. Therefore, reliance on the exemption(s) is appropriate.

A copy of this NOE (as required by 14 CCR § 15062(a)) and all other related materials can be made available to the public by contacting the CalGEM District office, located at River Run Boulevard, Bakersfield CA 93311; or an electronic copy of these documents may be requested by contacting CalGEMCentral@conservation.ca.gov.
