Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Reche Canyon Road Extension Project

Lead Agency: City of Colton

Contact Name: Victor Ortiz, PE

Email: vortiz@colton.ca.gov Phone Number: 909-370-5065

Project Location: Colton (*City*) San Bernardino (*County*)

Project Description (Proposed actions, location, and/or consequences).

The Proposed Project is located along Reche Canyon Road from southern access gates of Montecito Memorial Park and Mortuary to the intersection of Washington Street and Hunts Lane. The Proposed Project includes the construction of a new 4-lane, 1,750-foot-long segment between Reche Canyon Road and the intersection of Hunts Lane and Washington Street. The proposed roadway would provide a roadway width of 72 feet within the 88-foot ROW. Two travel lanes, sidewalks, and bicycle lanes will be provided in each direction along the proposed roadway, separated by a center two-way left-turn lane.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potentially significant impacts may occur to air quality, biological resources, cultural resources, paleontological resources, and tribal cultural resources.

AQ-1 would require implementation of various construction air quality emission reduction measures. BIO-1 would require pre-construction special-status plants surveys; installation of highly visible barriers to delineate work areas; a weed abatement program; presence of a qualified biologist during initial ground disturbing activities; and a worker environmental awareness training program. BIO-2 would require a pre-construction Coastal California Gnatcatcher survey and monitoring. BIO-3 would require a pre-construction Least Bell's Vireo survey. BIO-4 would require pre-construction burrowing owl surveys. BIO-5 would require a pre-construction nesting bird survey. BIO-6 would require specific procedures for tree removal and trimming. CUL-1 would require a cultural awareness training program. CUL-2 would require archaeological monitoring. CUL-3 defines procedures for unanticipated discoveries. GEO-1 would require preparation of a Paleontological Resources Mitigation and Monitoring Plan. TCR-1 would require Native American Monitoring. TCR -2 defines procedures for unanticipated discoveries of tribal cultural resources.TCR-3 defines procedures for unanticipated discoveries of human remains.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
