

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: DRC2019-00132 Rocky Canyon Quarry Expansion CUP

Lead Agency: County of San Luis Obispo

Contact Name: Eric Tolle

Email: etolle@co.slo.ca.us

Phone Number: 805-788-2148

Project Location: Atascadero

City

San Luis Obispo

County

Project Description (Proposed actions, location, and/or consequences).

Request by CalPortland for a Conditional Use Permit ("CUP") to expand quarry operations at their Rocky Canyon Quarry to include Phases 3, 4 and 5 as set forth in the 2002 Rocky Canyon Quarry Specific Plan ("Specific Plan"). The proposed expansion will result in an area of disturbance of about 82 acres and would enable the extraction and processing of an additional 30,843,000 cubic yards (67,854,600 tons) of aggregate which would extend the 'life' of the quarried products by about 57 years. The project also includes a request to amend condition No.37 of the Development Plan/Reclamation Plan to alter the design standard for interim graded slopes to reduce the bench width from 15 feet to 12.5 feet. The site consists of three lots of record with a combined area of 286.5 acres located about one mile southeast of the City of Atascadero on Rocky Canyon Road within the El Pomar/Estrella Sub-Area of the North County Planning Area. The project site is within the Agriculture and Rural Lands land use categories and is subject to the Extractive Resource Area combining designation.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Biological Resources: Potential impacts to sensitive plant and wildlife species, oak woodland, aquatic resources, maintenance of wildlife corridors, and mitigation for lighting and landscaping have been identified in BIO measures 1-16.

Geology and Soils: Measures include geologic condition monitoring and adaptive management are identified in GEO measures 1 and 2.

Hazards and Hazardous Materials: Mitigation measures regarding equipment maintenance and refueling and spill protocol response are included as HAZ 1 and 2.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Primary controversy includes traffic and truck trips from the City of Atascadero on city-maintained roadways.

Provide a list of the responsible or trustee agencies for the project.
