Re: 45307 Afton Road, Baker- Solar panels Proj-2020-00139

To Whom It May Concern:

It is our opinion that the construction and installation of the solar panels on the above referenced project will not affect or impact the drainage runoff pattern on this project as said panels will be mounted on above ground brackets and will not alter the existing topography.

Please do not hesitate to contact us with any questions.

Sincerely,

Hossein Zomorrodi, RCE 43235
Project Engineer
