Facilities Management
3450 14th Street, Riverside, CA 92501

NOTICE OF EXEMPTION

August 24, 2026

Project Name: County Farm Central Plant Chiller Drive Replacement Project, Riverside,

Project Number: FM03720016078

Project Locations: 4090 County Circle Drive, north of Purdy Street, Riverside, California 92503; Assessor's Parcel Number (APN): 145-120-003

Description of Project: The County Farm Central Plant is located at 409 County Circle in Riverside, California, 92507. Two of the four chillers serving the central plant are currently out of service, significantly reducing the cooling facilities and creating an immediate risk to the continued operation of the campus. The central plant provides service to the entire campus, including critical County departments such as RUHS – Public and Behavioral Health, where reliable climate control is essential to maintaining safe operations, protecting equipment, and ensuring continuity of public health services. The repair to the chiller drive at the County Farm Central Plant is identified as the proposed project under the California Environmental Quality Act (CEQA). The operation of the facility will continue to provide public services and will not result in an expansion of existing use. No additional direct or indirect physical environmental impacts are anticipated.

Name of Public Agency Approving Project: Riverside County

Name of Person or Agency Carrying Out Project: Riverside County Facilities Management

Exempt Status: State California Environmental Quality Act (CEQA) Guidelines, Section 15301 Existing Facilities Exemption; Section and 15061(b) (3), General Rule or "Common Sense" Exemption, Codified under Title 14, Articles 5 and 19, Sections 15061, and 15301.

Reasons Why Project is Exempt: The proposed project is categorically exempt from the provisions of CEQA specifically by the State CEQA Guidelines as identified below. The project will not result in any specific or general exceptions to the use of the categorical exemption as detailed under State CEQA Guidelines Section 15300.2. The project will not cause an impact to an environmental resource of hazardous or critical concern nor would the project include unusual circumstances which could have the possibility of having a significant effect on the environment. The project would not result in impacts to scenic highways, hazardous waste sites, historic resources, or other sensitive natural environments, or have a cumulative effect to the environment. No significant environmental impacts are anticipated to occur with repairs to the chiller drive at the County Farm Central Plant.

- **Section 15301 –Existing Facilities:** This Class 1 categorical exemption includes the operation, repair, maintenance, leasing, or minor alteration of existing public or private structures or facilities, provided the exemption only involves negligible or no expansion of the previous site's use. The project, as proposed, is limited to the repairs to the existing chiller to keep the buildings functioning and operating efficiently. The use of the facility would continue to provide public services and would not result in a significant increase in capacity or intensity of use. Therefore, the project is exempt as it meets the scope and intent of the Categorical Exemption identified in Section 15301, Article 19, Categorical Exemptions of the CEQA Guidelines.

- **Section 15061 (b) (3) – "Common Sense" Exemption:** In accordance with CEQA, the use of the Common Sense Exemption is based on the "general rule that CEQA applies only to projects which have the potential for causing a significant effect on the environment." State CEQA Guidelines, Section 15061(b) (3). The use of this exemption is appropriate if "it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment." *Ibid*. This determination is an issue of fact and if sufficient evidence exists in the record that the activity cannot have a significant effect on the environment, then the exemption applies and no further evaluation under CEQA is required. See *No Oil, Inc. v. City of Los Angeles* (1974) 13 Cal. 3d 68. The ruling in this case stated that if a project falls within a category exempt by administrative regulation or 'it can be seen with certainty that the activity in question will not have a significant effect on the environment', no further agency evaluation is required. With certainty, there is no possibility that the project may have a significant effect on the environment. The proposed improvements will not result in any direct or indirect physical environmental impacts. The use of the facility would remain unchanged, continuing to provide public services. Therefore, in no way, would the project as proposed have the potential to cause a significant environmental impact and the project is exempt from further CEQA analysis.

Based upon the identified exemptions above, the County of Riverside, Facilities Management hereby concludes that no physical environmental impacts are anticipated to occur and the project as proposed is exempt under CEQA. No further environmental analysis is warranted.
