Project Title: 853464_0100006_SoCalGas_UGS

Project Applicant: Southern California Gas Company (S4700)

Project Location: Los Angeles, Aliso Canyon Gas Field; S27/ T03N/ R16W/ SB; 34.31318665/-118.54018402; From Station #84, 1518' Southerly and 1830' Easterly at right angles

Project Description: Southern California Gas Company proposes to Rework existing Gas Storage well Fernando Fee 32-A at Aliso Canyon UGS 0100006. The intent of this project is to inspect the well integrity and remediate identified conditions as part of the Storage Integrity Management Program (SIMP). After reviewing well history, available directional surveys and inspection logs, and current wellbore configuration (casing size, restrictions, perforations, liner, etc.), a plan has been developed to return the well to service. This project includes pulling completion equipment, cleaning to total depth, performing punch and inject, and probable casing expansions as proposed and with approval from CalGEM, performing integrity tests, and running new completion tubing.

Temporary equipment such as a mud pump and return bins will be utilized. No permanent facilities will be constructed during the process, and no expansion of associated facilities will be required. All waste material, including brine kill fluid, will be properly disposed of as non-hazardous or hazardous waste, as appropriate, at a facility licensed to accept the waste.

The established oil field surrounding the project location consists of graded pads, wells, oilfield equipment and roadways with areas of undisturbed non-native grasses and California sage brush vegetation.

The proposed project consists of the California Department of Conservation, Geologic Energy Management Division (CalGEM) approving 1 permit for Southern California Gas Company (S4700) to rework the well listed below, in the Aliso Canyon Gas Field.

API #	Well Name
0403721872	Fernando Fee 32-A

Exempt Status: As the Lead Agency, CalGEM has determined that the proposed project is exempt from full environmental review requirements of the California Environmental Quality Act (CEQA), pursuant to the specified exemptions marked in the section below. CalGEM further finds that the proposed project would not result in a significant adverse impact to the environment, or that any of the exceptions to the application of the exemptions apply (14 CCR § 15300.2).

	Exemption Type	Statute (PRC)	Regulation (14 CCR)	
☐	**Statutory Exemption:**			
	☐ Ongoing Project (*pre-CEQA approval on April 5, 1973*)	21169	15261 (b)	
	☐ Ministerial	21080 (b)(1)	15268	
	☐ Declared Emergency	21080 (b)(3)	15269 (a)	
	☐ Emergency Projects	21080 (b)(4)	15269 (b) or (c)	
☑	**Categorical Exemption:**	21084		
	☒ **Class 1**: Existing Facilities		15301	1684.1
	☒ **Class 2**: Replacement or Reconstruction		15302	
	☐ **Class 3**: New Construction/Conversion of Small Structures		15303	
	☒ **Class 4:** Minor Alterations to Land		15304	1684.2
	☐ **Class 7**: Protection of Natural Resources		15307	
	☐ **Class 8**: Protection of the Environment		15308	
	☐ **Class 11:** Accessory Structures		15311	
	☐ **Class 21**: Enforcement Actions to revoke a permit		15321	
	☐ **Class 30**: Minor Actions to Prevent, Minimize, Stabilize, Mitigate, or Eliminate a Release (Actual or Threat) of Hazardous Substances (Waste or Material)		15330	
	☐ **Class 33**: Small Habitat Restoration Projects		15333	
☐	**General Exemption** ("common sense")		15061 (b)(3)	
☐	**Not a "Project" subject to CEQA**		15378 (b)(2)	

CEQA Exceptions to the Exemptions (14 CCR § 15300.2)**:** where project is located (e.g., sensitive environment); Cumulative Impact; Significant Effect due to Unusual Circumstances; Scenic Highways; Hazardous Waste Sites; Historical Resources.

Reasons Why Project is Exempt: The basis for CalGEM's determination that the project is exempt from the requirements of CEQA is provided in the brief explanation below.

Class 1, Existing Facilities (14 CCR §§ 15301, 1684.1): The project is categorically exempt from CEQA under the "Class 1" (14 CCR § 15301) exemption per the CEQA Guidelines because the proposed project is a repair or minor alteration of existing facilities and will not involve an expansion of use of the oil field, and therefore is exempt from the need for full CEQA review. Additionally, in accordance with 14 CCR § 1684.1 the Class 1 exemption consists of operation repair, maintenance, minor alternation of existing public or private structures, facilities, mechanical equipment, or topographical features involving negligible or no expansion of use beyond that existing previously. This includes publicly-owned utilities used to provide electric power, natural gas, sewerage, or other public utility services (14 CCR 15301(b)). The existing well is on an existing well pad within the Aliso Canyon Gas Field and the proposed work will not change the current use of the well or operation of the facilities.

Class 2, Replacement or Reconstruction (14 CCR § 15302): Class 2 applies because it consists of "replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced." This includes replacement or reconstruction of existing utility systems and/or facilities involving negligible or no expansion of capacity. Proposed work activities involve the replacement or reconstruction of existing infrastructure and/or equipment and will not change the former well use.

Class 4, Minor Alterations to Land (14 CCR §§ 15304, 1684.2): Class 4 exemption applies. The proposed project would be conducted entirely on an existing pad with enough space to contain all equipment. The project would not disturb any undisturbed areas. The proposed project is located within an industrial area. Therefore, the proposed project "consists of drilling operations that result in only minor alterations with negligible or no permanent effects to the existing condition of the land, water, air, and/or vegetation." The rework/sidetrack would not expand the facility. The well site is located in Oat Mountain Quad on developed hillside terrain on two separate well pads. The well pads are flat and devoid of any vegetation. No ground disturbance will occur in areas that are undisturbed and this work will not expand the facilities.

Exceptions to Exemptions: CalGEM further finds that there are no exceptions to the application of the categorical exemptions (PRC § 21084; 14 CCR § 15300.2) referenced above. For example, there is no substantial evidence that there are any "unusual circumstances" associated with the proposed project that create a reasonable possibility that the activity will have a significant effect on the environment, and that there are no significant "cumulative impacts" resulting from successive projects of the same type in the same place. Therefore, reliance on the exemptions is appropriate.

A copy of this NOE (as required by 14 CCR § 15062(a)) and all other related materials can be made available to the public by contacting the CalGEM CEQA Program, located at 715 P Street, MS 1803, Sacramento, CA 95814; by calling (916) 445-9686; or an electronic copy of these documents may be requested by contacting CEQA@conservation.ca.gov.
