City of Cotati

Sonoma County, California

State Route 116 and West Cotati Avenue Intersection Safety Improvements Project

ENVIRONMENTAL DETERMINATION (CEQA):

Based upon review of the certified Cotati General Plan Environmental Impact Report), the proposed modifications to the project design (e.g. roundabout), the October 2026 State Route 116 / West Cotati Avenue Intersection Safety Improvements Project CEQA Guidelines Section 15183 Consistency Evaluation, technical studies prepared for the Project, and the entire administrative record, the Director of Community Development finds that:

1. The Project is consistent with the land use designations, development intensity, circulation improvements, and infrastructure assumptions analyzed in the certified General Plan EIR (SCH No. 2013982037).

2. The Project would not result in environmental effects peculiar to the Project site or to the Project that were not previously analyzed in the General Plan EIR. Any identified environmental effects are the same types of impacts evaluated in the General Plan EIR and are addressed through applicable General Plan policies, mitigation measures, regulatory requirements, and project conditions of approval.

3. No new or substantially more severe environmental effects have been identified beyond those addressed in the certified General Plan EIR and the Project.

4. The City has further determined that none of the circumstances described in CEQA Guidelines Section 15162 are present. There are no substantial changes to the Project, no substantial changes in the circumstances under which the Project is undertaken, and no new information of substantial importance that would require preparation of a subsequent or supplemental environmental document.

5. All applicable General Plan policies, mitigation measures, conditions of approval, permit requirements, and regulatory standards identified in the certified General Plan EIR and the October 2026 Section 15183 Consistency Evaluation shall remain binding conditions of Project approval.

Accordingly, no further environmental documentation is required.

October 28, 2026
