Project Description

Caltrans proposes placement of rock slope protection as a deterrent for the homeless individuals at all four (4) ramps at Palm Avenue at Interstate 5 at post mile 6.00. Work also includes repairing chain-link fencing at one of the off-ramps to reduce homeless trespassing. Additional work includes placement of signs, and replacement of existing damaged chain link fence near SR 163 at post mile 3.98 to reduce homeless trespassing. The installation of the replaced chain link fence and asphalt driveway along with 4 signs have estimated hole dimensions of 8" in diameter by 4' deep. Caltrans will replace an existing fence panel with a new fence gate and placing aggregate base, as well as installing 2 No Pedestrian Crossing signs. This is next to SR-163 PM 4.00 on outside sides of the northbound/southbound (NB/SB) bridge near the surface street Camino de la Reina. Also, two (2) No Pedestrians signs will be installed at SB SR-163 exit ramp to 6th Avenue/University Avenue at PM 3.054 on both sides of the ramp. Environmental commitments for biological resources, cultural resources, visual resources, hazardous waste, visual resources, and NPDES/Stormwater are included in the Environmental Commitments record (ECR).
