Present Land Use/Zoning/General Plan Designation:

General Plan and zoning designation of Downtown Center (DC)

Project Description:

The proposed project involves the development of a 460-unit for-rent multi-family residential community including 80 residential townhome units and 380 residential stacked flats. Project amenities would include a recreational area with a clubhouse and co-work area, swimming pool and spa, fitness center and family room, a dog park, as well as additional common open spaces. All residential buildings would be three stories. Building heights would vary, with 43'6" to the top of the roof for the residential stacked flats buildings and 40'1" to the top of the roof for the townhome buildings.

Note: The State Clearinghouse will assign identification numbers for all new projects. If an SCH number already exists for a project (e.g. Notice of Preparation or previous draft document), please fill in.

The 80 townhomes would include one-, two-, and three-bedroom units of 880 square feet (sf), 1,282 sf, and 1,502 sf, respectively. The 80 townhome units would be clustered within nine buildings, each containing nine units, with the exception of one building with eight units. The townhomes would be in the northeast portion of the project site.

The 380 stacked flats would have one or two bedrooms and be 741 sf or 880 sf, and 1,087 sf or 1,502 sf, respectively, depending on the building type. The stacked flats would be clustered in ten buildings. Seven buildings would be generally located along the western property boundary adjacent to Darwin Drive, two buildings would be located adjacent to the future extension of Brodiaea Avenue, and one building adjacent to the eastern property boundary.

As proposed, the project would provide 187,557 sf of common space in landscaped pedestrian walkways, a central recreation area, a dog park, game lawn area, and community lounge areas. Each of the 80 townhomes and 380 stacked flats would contain a private deck or patio. In total, townhome units would provide 18,992 sf of private open space and the stacked flats would provide 47,790 sf of private open space for a total of 66,782 sf of private open space.

Vehicular access to the project site would be provided via a gated entry from Darwin Drive and a gated entry from the proposed extension of Brodiaea Avenue. Gated emergency vehicle access would be provided on Alessandro Boulevard. As a part of the proposed project, an additional six feet of pavement on the south side of Brodiaea Avenue would be constructed east from Darwin Drive to the eastern project site boundary. A secondary driveway is proposed on Brodiaea Avenue, which would also be gated. Access from this location would be restricted to right-out only resident egress. The project includes 873 parking spaces, which would be provided in garages, as well as covered carports and open surface parking.

The applicant anticipates that building construction would take approximately two years with construction commencing in 2027. The first phase of units would be completed in approximately 14 months with project completion in 2029.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X". If you have already sent your document to the agency, please denote that with an "S".
