Project Title: Megawatt Depot Charging Expansion at Colton to Support the Future of Zero-Emission Freight Operations

Project Applicant: Greenlane Infrastructure, LLC

Project Location - Specific:
1650 Fairway Drive

Project Location - City: Colton

Project Location - County: San Bernardino

Description of Nature, Purpose and Beneficiaries of Project:

This project involves the installation of 2 Megawatt Charging Systems (MCS) chargers on an existing charging center located in Colton. Included in this project is two MCS charging dispensers, one MCS power cabinet, and associated switchgear and electrical equipment (totaling 64.8 sqft.). The installation of this equipment does not increase the overall developed footprint of the charging facility. The MCS cabinet will be located on previously developed land that was designed and reserved and futureproofed for charging equipment installation.

Name of Public Agency Approving Project: California Energy Commission

Name of Person or Agency Carrying Out Project: Greenlane Infrastructure, LLC

Exempt Status: (check one)

- ☐ Ministerial (Sec. 21080(b)(1); 15268);
- ☐ Declared Emergency (Sec. 21080(b)(3); 15269(a));
- ☐ Emergency Project (Sec. 21080(b)(4); 15269(b)(c));
- ☒ Categorical Exemption. State type and section number: Cal. Code Regs., tit. 14, sect. 15301
- ☐ Statutory Exemptions. State code number:

Reasons why project is exempt:

Cal. Code Regs., tit. 14, Section 15301 Existing Facilities provides that the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment or topographical features which involve negligible or no expansion of use beyond that existing at the time of the responsible agency's determination, are categorically exempt from the provisions of the California Environmental Quality Act (CEQA). The project involves the installation of two MCS charging dispensers, one MCS power cabinet, and associated switchgear and electrical equipment, at an existing charging center in Colton, CA. At the existing charging center, there are 12 400kw CCS pull-through chargers and 29 240kw CCS bobtail chargers. The proposed MCS chargers and associated equipment will be installed on an existing pull-through lane that was installed in the original construction of the site. No trenching will be needed as the chargers will be connected to prefabricated footings serviced by existing trenches for cabling. The project will not affect any visual resources, such as protected trees or historic resources. The installation of MCS chargers does not expand the project boundaries, alter site land use, disturb previously undeveloped areas, or change the approved operation of the facility. The additional charging equipment will be installed entirely

within the existing charging facility using areas and infrastructure that were designed and constructed as part of the original facility development. This project is therefore categorically exempt from the provisions of CEQA under section 15301 of the CEQA Guidelines, and will not have a significant effect on the environment.

Additionally, the project will not impact an environmental resource of hazardous or critical concern where designated, precisely mapped, and officially adopted pursuant to law by federal, state, or local agencies; does not involve any cumulative impacts of successive projects of the same type in the same place that might be considered significant; does not involve unusual circumstances that might have a significant effect on the environment; will not result in damage to scenic resources within a highway officially designated as a state scenic highway; the project site is not included on any list compiled pursuant to Government Code section 65962.5; and the project will not cause a substantial adverse change in the significance of a historical resource. Therefore, none of the exceptions to categorical exemptions listed in CEQA Guidelines section 15300.2 apply to this project, and this project will not have a significant effect on the environment.

Responsible Agency Contact Person: Serena Gu **Area Code/Telephone/Extension:** (916) 259- 5605

If filed by applicant:

1. Attach certified document of exemption finding.
2. Has a Notice of Exemption been filed by the public agency approving the project? ☐ Yes ☐ No
