SWIS	Solid Waste Information System
VEC	vapor encroachment condition

1 Executive Summary

Dudek conducted a Phase I Environmental Site Assessment (ESA) for 7400 Cathedral Oaks Road in Goleta, California, (subject property; see Figure 1, Subject Property Location). The subject property consists of approximately 14 acres of land on one parcel (Assessor's Parcel Number [APN] 077-530-019).

The findings of this investigation are based on historical sources, information contained in regulatory agency databases, interviews, and a site reconnaissance.

Information gathered for this report indicated the following:

- The subject property was cultivated for agricultural use (orchards) from as early as 1943 until sometime after 1994.
- Three structures (two residences and a barn) were moved onto the subject property in 1999. These structures are still present on the subject property.
- At the time of the site reconnaissance, the subject property was observed to be a fallow agricultural field with three structures, a shed, vehicles, equipment, and various materials.
- Adjoining properties include residential properties to the west and south and the Glen Annie Golf Course to the east, north, and northwest.
- The Glen Annie Golf Course has been identified in multiple regulatory programs for handling of hazardous waste and for petroleum storage. Dudek reviewed the available information regarding these activities and determined that it is unlikely that this site has impacted the environmental conditions of the subject property.
- The subject property was cultivated for agricultural purposes for at least 60 years. Due to the potential presence of residual pesticides and metals (specifically, arsenic), Dudek conducted shallow soil sampling across the subject property (Section 12, Soil Sampling). Seven composite soil samples (6 primary and 1 duplicate) were analyzed for organochlorine pesticides (OCPs) and seven discrete soil samples (6 primary and 1 duplicate) were analyzed for arsenic. No OCPs were detected at or above the laboratory reporting limits. Arsenic was detected in the soil samples but at concentrations below the acceptable background concentration for California soils. As such, the historical agricultural use does not appear to have impacted the environmental conditions of the subject property.

This assessment did not reveal evidence of any recognized environmental conditions (RECs), historical RECs, controlled RECs, or vapor encroachment conditions (VECs). Data gaps, which were determined not to be significant, are discussed in Section 13, Limitations.

Dudek performed this Phase I ESA of the subject property in conformance with the scope and limitations of ASTM Standard E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM 2021). This report summarizes the research and findings of the Phase I ESA. Dudek does not have recommendations for additional assessment for the subject property.

Subject Property Location

Cathedral Oaks Phase I ESA

2 Introduction

This Phase I ESA was performed according to the guidelines stipulated in ASTM E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM 2021). This Phase I ESA was conducted for the Shelby Family Partnership LP (user) as part of environmental due diligence prior to development of the subject property. As defined in Section 3.2.98 of ASTM E1527-21, the "user" is defined as the party seeking to complete the Phase I ESA on the subject property. User obligations, as defined in ASTM E1527-21, are discussed further in Section 6.2, User-Provided Information.

2.1 Assessment Procedure and Scope of Investigation

Phase I ESAs assist in identifying past and present land use, including identification of possible releases or disposal of manufacturing or other wastes if such information is contained within regulatory reports or files and/or is currently visible on site. The assessment reviews federal (U.S. Environmental Protection Agency [EPA]), state, county, and local lists of known or potentially hazardous waste sites, landfills, and sites currently under investigation for environmental violations that may be of concern to a site.

The scope of this environmental investigation consisted of (1) a reconnaissance of the subject property; (2) a search of regulatory agency records; (3) a review of available historical aerial photographs, topographic maps, Sanborn fire insurance maps, city directory listings, and building department records; (4) an environmental lien/activity and use limitation search; (5) interviews with the owner of the subject property and user of this report; (6) evaluation of the potential for vapor intrusion risk; and (7) preparation of this Phase I ESA report detailing the findings of the investigation.

These activities were conducted to identify RECs. The term *recognized environmental condition* (REC) means the presence or likely presence of any hazardous substances or petroleum products in, on, or at the subject property due to a release, likely release, past release, or material threat of a future release to the environment.

The term *controlled recognized environmental condition* (CREC) is an environmental condition that would have been considered a REC in the past but that has been remediated and received risk-based closure by a regulatory agency (i.e., received a "no further action" letter) where residual contamination remains in place. Furthermore, the term *CREC* is used if the property is subject to a control or use restriction (i.e., property use restrictions, activity and use limitations [AULs], institutional controls, or engineering controls) due to residual on-site contamination.

The term *historical recognized environmental condition* (HREC) is an environmental condition that would have been considered a REC in the past but that has been remediated and received unrestricted residential use closure by the regulatory agency. Therefore, no controls or use restrictions have been applied to the property.

The term *REC* is not intended to include de minimis conditions. De minimis conditions are conditions that generally do not present a material risk of harm to public health or the environment and thus would not be subject to an enforcement action if brought to the attention of governmental agencies.

2.2 Qualifications of Environmental Professionals

This Phase I ESA was prepared by Caliana Gomez, engineer; Desiree Otillio, geologist; Susan Smith, geologist; Clarissa Smith, geologist; and Kaylene Kuykendall, environmental engineer. Qualifications for Ms. Gomez, Ms. Otillio, Ms. Smith, and Ms. Kuykendall are included in Appendix A. The statement by the environmental professional, Susan Smith, is below.

I, Susan Smith, declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in Section 312.10 of Title 40 of the Code of Federal Regulations, Part 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in Title 40 of the Code of Federal Regulations, Part 312.

3 Site Location

The subject property consists of approximately 14 acres of land on APN 077-530-019. The subject property is located in the northern portion of the City of Goleta, approximately 0.75 miles north of the U.S. Highway 101, in northern Santa Barbara County, California (Figure 1).

The subject property is situated at the northeast corner of the intersection of Northgate Drive and Cathedral Oaks Road. The subject property currently consists of fallow land with three structures. Access to the subject property is via Cathedral Oaks Road.

Northgate Drive borders the subject property along the western boundary followed by residential properties. The subject property is bordered by Cathedral Oaks Road, followed by residential properties to the south and the Glen Annie Golf Course to the east, north, and northwest.

4 Environmental Setting

4.1 Topography and Geology

The subject property is located in the northern portion of the City of Goleta, approximately 0.75 miles north of the U.S. Highway 101, in northern Santa Barbara County, California.

General topographic information for the subject property and the surrounding area was obtained from a review of topographic maps (Appendix B), the Environmental Data Resources (EDR) Radius Map Report (Appendix C), and a site visit. The natural topography of the subject property is generally flat with a slight downward slope to the northwest. The subject property sits at an average elevation of 170 feet above mean sea level.

No subsurface geologic investigations were performed as part of this Phase I ESA. According to the EDR Radius Map Report (Appendix C), the subject property is underlain by Diablo clay soil components. These soils are characterized by a clayey texture and very slow infiltration rates.

4.2 Groundwater

According to the EDR Radius Map Report, there are 58 water wells located within 1 mile of the subject property. Dudek reviewed information on the California Water Board's Groundwater Information System database and did not identify any wells on the subject property (GAMA 2025).

Dudek reviewed nearby monitoring sites on GeoTracker to obtain information about groundwater near the subject property. Monitoring wells associated with a leaking underground storage tank site located 0.6 miles south of the subject property (7-Eleven Store #15191) had depths to water between 57 and 58 feet below ground surface in June 2011; groundwater flow was reportedly to the southeast (Stantec Consulting Corporation 2011).

4.3 Agricultural Use

The subject property was previously cultivated for agricultural use (orchards) from as early as 1943 until sometime after 1994 (see Section 8). As with all agricultural properties, pesticides and herbicides were likely used. The chemicals of concern associated with these compounds, such as organochlorinated compounds and metals, are accumulative and persistent in shallow soils. Therefore, the longer a property is used for agricultural purposes, the more likely there is an accumulation of these chemicals of concern. However, these organochlorinated compounds and metals are typically only observed in agricultural products manufactured and used prior to the 1980s. Following EPA regulations that were enacted in the late 1970s and early 1980s, pesticide and herbicide use became regulated, and the use of organochlorine compounds and heavy metals decreased.

Historical agricultural use is typically considered to represent a REC however, as discussed in Section 12, soil sampling was performed and the laboratory analytical results indicated that the prior agricultural use is not a REC.

5 Public Agency Records Search

Table 1 summarizes the environmental databases that were searched as required by ASTM Standard E1527-21, as well as additional environmental databases providing information on hazardous materials and petroleum products on the subject property that were searched ("target property" is the term used by EDR.). The comprehensive list of databases is included in the EDR Radius Map Report, which was prepared on July 3, 2025 (Appendix C).

Table 1 summarizes the databases that were searched that provide information on hazardous materials and petroleum products on the subject property. The table also indicates the search distances from the subject property and the number of sites identified in each database. The comprehensive list of databases is included in the EDR Radius Map Report (Appendix C).

Table 1. Regulatory Database Search Summary

Acronym	Database	Search Distance	Subject Property Listed?	Number of Surrounding Sites Listed
NPL	National Priorities List (including proposed NPL sites and NPL Liens [target property only])	1 mile	No	0
Proposed NPL	Sites proposed for NPL	1 mile	No	0
Delisted NPL	NPL Deletions	1 mile	No	0
CERCLIS – Federal Facility	Comprehensive Environmental Response, Compensation, and Liability Information System for the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) with U.S. Environmental Protection Agency Federal Restoration and Reuse Office involvement	0.5 miles	No	0
CERCLIS – SEMS	CERCLA Superfund Enterprise Management System	0.5 miles	No	0
CERCLIS NFRAP (SEMS ARCHIVE)	No Further Remedial Action Planned – CERCLA SEMS Archive	0.5 miles	No	0
CORRACTS	Resource Conservation and Recovery Act (RCRA) Corrective Action	1 mile	No	0
RCRA TSDF	RCRA – Transportation, Storage, and Disposal Facilities	0.5 miles	No	0
RCRA-LQG	RCRA Large Quantity Generators	0.25 miles	No	0
RCRA-SQG	RCRA Small Quantity Generators	0.25 miles	No	0
RCRA-VSQG	RCRA Very Small Quantity Generators	0.25 miles	No	0
ERNS	Emergency Response Notification System	Target property	No	0
LUCIS	Land Use Control Information System – Institutional Control/Engineering Control	0.5 miles	No	0
US ENG CONTROLS	Federal sites with Engineering Controls	0.5 miles	No	0

Table 1. Regulatory Database Search Summary

Acronym	Database	Search Distance	Subject Property Listed?	Number of Surrounding Sites Listed
US INST CONTROLS	Federal sites with Institutional Controls	0.5 miles	No	0
RESPONSE	State- and Tribal-Equivalent CERCLIS – Confirmed Release List	1 mile	No	0
ENVIROSTOR	The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program	1 mile	No	1
SWF/LF	State and Tribal Landfill and/or Solid Waste Disposal Site	0.5 miles	No	0
LUST	State Leaking Underground Storage Tank	0.5 miles	No	0
Indian LUST	Tribal LUST	0.5 miles	No	0
CPS-SLIC	State spills, leaks, investigations, and cleanups	0.5 miles	No	0
AST	State and Tribal Registered Aboveground Storage Tank	0.25 miles	No	1
UST	State and Tribal Registered Underground Storage Tank	0.25 miles	No	0
Indian UST	Registered Underground Storage Tank on Tribal Land	0.25 miles	No	0
FEMA UST	Federal Emergency Management Agency (FEMA) owned Registered UST	0.25 miles	No	0
Indian VCP	Voluntary Cleanup on Tribal Land	0.5 miles	No	0
VCP	State and Tribal Voluntary Cleanup	0.5 miles	No	0
Brownfields	State and Tribal Brownfields	0.5 miles	No	0
Additional environmental records, including local lists		*Varies*	*No*	*30*

Note: The search distances in the Environmental Data Resources (EDR) report and listed in this table are equal to or greater than the search distances required by ASTM Standard E1527-21.

5.1 Subject Property

The subject property was not identified in any of the databases searched by EDR.

5.2 Adjoining Properties

Listings for five sites were identified adjoining the subject property and are discussed below.

Glen Annie Golf Course, 1501 West Ocean Avenue, adjoins the subject property to the north and east. The site is listed in the CUPA, RCRA NonGen/NLR, and E Manifest databases. Dudek reviewed the site profile on the California Environmental Protection Agency (CalEPA) Regulated Site Portal; this site is listed in the following regulatory programs: Aboveground Petroleum Storage, Chemical Storage Facilities, and Hazardous Waste Generator. Twenty violations had been posted to the site from 2014 to 2023 (CalEPA 2025). Dudek reviewed each of the violations and determined that they were administrative in nature, and the site returned to compliance within 30 days of each

posted violation. Based on the administrative nature of the violations and lack of documented release, it is unlikely that this site impacted the environmental conditions of the subject property.

307 Northgate Drive adjoins the subject property to the west. The site is listed in the RCRA NonGen/NLR database. Based on the administrative nature of this database and lack of a documented release, it is unlikely that this site has impacted the environmental conditions of the subject property.

313 Northgate Drive adjoins the subject property to the west. The site is listed in the RCRA NonGen/NLR and E Manifest databases. Based on the administrative nature of these databases and lack of a documented release, it is unlikely that this site has impacted the environmental conditions of the subject property.

349 Northgate Drive adjoins the subject property to the west. The site is listed in the RCRA NonGen/NLR and E Manifest databases. Based on the administrative nature of these databases and lack of a documented release, it is unlikely that this site has impacted the environmental conditions of the subject property.

367 Northgate Drive adjoins the subject property to the west. The site is listed in the RCRA NonGen/NLR and E Manifest databases. Based on the administrative nature of these databases and lack of a documented release, it is unlikely that this site has impacted the environmental conditions of the subject property.

5.3 Nearby Properties

According to the EDR Radius Map Report (Appendix C), 12 additional sites were identified within 1 mile of the subject property. Ten of the sites were associated with administrative databases or did not include information that indicated a release to the environment that would impact the subject property and are therefore not included in the following discussion. The remaining two sites are discussed below.

Santa Barbara Montessori School, 7421 Mirano Drive, is approximately 0.25 miles south of the subject property. The site is listed in the CUPA listings database. Dudek searched the CalEPA Regulated Site Portal (CalEPA 2025) and did not identify any listings for the site. No additional information or details were included in the EDR database listing. Based on the administrative nature of the listing and lack of documented release, it is unlikely that this site has impacted the environmental conditions of the subject property.

Citrus Village, 7388 Calle Real, is approximately 0.60 miles south of the subject property. The site is listed in the EnviroStor and CPS-SLIC databases. According to documents reviewed on EnviroStor (DTSC 2025), the site was previously used as dump. The Department of Toxic Substance Control conducted sampling at the site due to former illegal dumping. Sampling at the site included testing for polycyclic aromatic hydrocarbons, volatile organic compounds, and metals. Following sampling efforts, 15 cubic yards of impacted soil was excavated and disposed of off site. Following soil removal activities, the site received regulatory closure in May 2015. Based on the impacted media (soil only), distance from the subject property, and current regulatory status (closed), it is unlikely that this site has impacted the environmental conditions of the subject property.

5.4 Unmapped Sites

Unmapped sites are flagged by EDR but not mapped due to insufficient address information. They are usually included in the database search report because they are in the same zip code as the subject property. The EDR report identified two unmapped sites: Hyatt Hotel Development and Cathedral Oaks Dump. The Cathedral Oaks

Dump site was determined to be located more than 6 miles east of the subject property and therefore unlikely to impact the environmental conditions of the subject property. The remaining site, Hyatt Hotel Development, was identified in the EnviroStor database. Dudek was unable to determine the physical location of the site; however, based on the information reviewed, it appears that this site was screened for illegal dumping of oil drilling mud due to an anonymous caller. According to information reviewed on EnviroStor (DTSC 2025), the site was transferred to a local agency for oversight in 1995; no additional information was available. Based on the lack of documented release, it is unlikely that this site has impacted the environmental conditions of the subject property.

6 Interviews

6.1 Site Representative Interview

Mark Lloyd, representative for the subject property, completed a site background questionnaire on July 7, 2025. A copy of the questionnaire and associated comments are presented in Appendix D. Below is the summary of responses to the questionnaire.

- The current property owner has owned the subject property since 1980.
- A portion of the subject property is currently used for residential purposes since 1999. The remainder of the property is fallow.
- Three structures are currently present on the subject property: a residence, a wood-framed garage, and a barn. All three structures were reportedly moved to the subject property in 1999.
- The subject property was formerly used for agricultural cultivation of avocado orchards from the 1960s to 1995.
- The subject property and adjoining properties have not been used for industrial purposes.
- The property owner was unaware of any previous orchard heaters, smudge pots, pesticides, herbicides, or fungicide storage and application.
- The property owner was unaware of any previous hazardous materials use, or other activities on the subject property, which could indicate a release of hazardous substances.
- The property owner stated that they have 5-gallon containers of gasoline and diesel fuel stored on the property along with 1 gallon of motor oil. The owner is unaware of any spills of these substances.
- An asbestos and lead-based paint survey was conducted when the structures were relocated to the property in 1999. *Note: Dudek was not provided with a report documenting the results of the survey.*

6.2 User-Provided Information

In accordance with ASTM Standard E1527-21, to qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the tasks outlined in Section 6.2 through 6.8 of ASTM Standard E1527-21 must be completed, including a search for environmental liens and AULs. To facilitate this requirement, Dudek sent the following questions to the user of this report. Answers to these questions fulfill the requirement of Sections 6.2 through 6.8 of the ASTM standard. Mark Lloyd, subject property representative, responded on July 7, 2025. In addition, the user requested Dudek complete a search for environmental liens and AULs as part of this Phase I ESA. The results of this search are provided in Section 8.5, Title Information/Environmental Liens.

1. **Question:** Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law?

   Response: No.

2. **Question:** Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

   Response: No.

3. **Question:** As the user of this ESA, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

   Response: No.

4. **Question:** If the purchase price of the subject property was below fair market value, did this occur because contamination was/is known or believed to be present at the property?

   Response: N/A.

5. **Question:** Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? (a) Do you know the past uses of the property, (b) do you know of specific chemicals that are present or once were present at the property, (c) do you know of spills or other chemical releases that have taken place at the property, or (d) do you know of any environmental cleanups that have taken place at the property?

   Response: Yes. (a) Yes, Residential occupation and agricultural orchard cultivation. (b) No. (c) No. (d) No.

6. **Question:** As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

   Response: N/A.

6.3 Local Agency Records

6.3.1 Santa Barbara County

6.3.1.1 Santa Barbara County Environmental Health Services

Dudek submitted a records request through the County of Santa Barbara's Online Public Records Center (Appendix E, Local Agency Records) on July 3, 2025. The address 7400 Cathedral Oaks Road was used for the records search. Dudek has not received a response as of the date of this report. This is considered a data gap and is discussed further in Section 13.

6.3.1.2 Santa Barbara County Zoning Map

Dudek accessed the Santa Barbara County Zoning Map to identify zoning information for the eastern and northern adjoining properties; these adjoining properties are zoned RES 5 and RES 20/30, which correspond with Residential Use (County of Santa Barbara 2025). The subject property and adjoining properties to the west and south are located within the City of Goleta city limit; zoning information for these properties is presented in Section 6.3.2.1.

6.3.1.3 Santa Barbara County Planning and Development

The Santa Barbara County Planning and Development Department maintains an online database of permits searchable by APN (SBCPD 2025). Dudek requested records from the agency on July 8, 2025; records were provided on the same day. Table 2 summarizes the permits reviewed via the agency responses. Copies of the permits provided by the agency are provided in Appendix E.

Table 2. Summary of Planning/Building Cases

APN	Case Type	Date	Status	Description
077-530-019	Accela Building	December 1999/ May 2002	Closed	Electrical-Underground
077-530-019	Accela Building Case	December 1999/ December 2001	Closed	Revision/Temp Stockpile
077-530-019	LIX Building Case	December 1999	A	Revision #00273
077-530-019	Accela Planning Case	April 1999/May 1999	Closed	Temporary Electric
077-530-019	Lix Building Case	April 1999	F	Tenant Protection Plan
077-530-019	Accela Building Case	April 1999/May 2002	Closed	Reroof Stable
077-530-019	LIX Building Case	April 1999	A	Reroof Stable
077-530-019	Accela Building Case	April 1999/May 2002	Closed	Reroof Barn
077-530-019	LIX Building Case	April 1999	A	Reroof Barn
077-530-019	Accela Building Case	April 1999/May 2002	Closed	Reroof Residence
077-530-019	LIX Building Case	April 1999	A	Reroof Single Family Dwelling
077-530-019	LIX Building Case	February 1999/ November 2000	F	Move Existing Building to New Location
077-530-019	Accela Building Case	May 2001/ December 2001	Closed	Temporary Power Poles
077-530-019	LIX Building Case	February 1999	F	Temporary Power Poles

Note: APN = Assessor's Parcel Number.

6.3.1.4 Santa Barbara County Air Pollution Control District

Dudek consulted the Santa Barbara County Air Pollution Control District Permitted Facilities Online Map on July 3, 2025 (APCD 2025). This database tracks facilities with permitted air emissions, which are administrative in nature and not related to an uncontrolled release of hazardous materials. The subject property was not identified as a facility with air emissions permits.

6.3.1.5 Agricultural Commissioner

Dudek submitted a records request through the County of Santa Barbara Online Public Records Center on July 14, 2025, to request records pertaining to potential pesticide, insecticide, and herbicide use associated with the subject property. Dudek has not received a response as of the date of this report. This is considered to represent a data gap and is discussed in Section 13.1, Data Gaps and Data Failures.

6.3.2 City of Goleta

6.3.2.1 Zoning and Land Use

Dudek accessed the City of Goleta Interactive Zoning Map for information about zoning of the subject property and surrounding properties (City of Goleta 2025). The subject property is zoned AG-40, which corresponds with agriculture land use. The western-adjoining properties are zoned RS, which corresponds to single-family Residential housing, and the southern-adjoining properties are zoned RS-7, which corresponds with single Family Residential housing. The northern- and eastern-adjoining properties are located outside of the city limits and are discussed in Section 6.3.1.2.

6.3.2.2 City of Goleta Building and Safety Division

Dudek contacted the City of Goleta Building and Safety Division on July 8, 2025, to request records pertaining to building permits. Dudek has not received a response as of the date of this report. This is considered to represent a data gap and is discussed in Section 13.1.

6.3.3 California Department of Resources Recycling and Recovery Solid Waste Information System

Dudek reviewed the California Department of Resources Recycling and Recovery Solid Waste Information System (SWIS) online database (CalRecycle 2025). The database has information for all solid waste facilities, operations, and disposal sites in California.

The subject property was not identified in the SWIS database. One site, Elwood Reclamation Inert Landfill Op, was mapped approximately 0.7 miles northwest of the subject property. According to information reviewed, inert waste materials were used for an infill project. No violations or enforcement actions were reported. Based on the distance from the subject property and the materials used for infill (inert waste), it is unlikely that this site has impacted the environmental conditions of the subject property.

6.3.4 State Water Resources Control Board

Dudek searched GeoTracker, the State Water Resources Control Board's data management system, for sites that impact, or have the potential to impact, water quality in California. Records include sites that require cleanup, various unregulated projects, and permitted facilities (SWRCB 2025a). No sites were identified on the subject property. No sites were identified within 0.5 miles of the subject property.

6.3.4.1 GeoTracker PFAS Database

Per- and polyfluoroalkyl substances (PFAS) constitute a large family of fluorinated chemicals (exceeding several thousand compounds) that vary widely in their chemical and physical properties. They have been used for commercial and industrial purposes and as a result have been found in the environment (i.e., water, soil, and air). The persistence and mobility of some PFAS, combined with decades of widespread use in industrial processes, certain types of firefighting foams, and consumer products, have resulted in their presence in the environment at trace levels across the globe (ITRC 2023).

The San Francisco Bay Regional Water Quality Control Board published a PFAS Sampling Fact Sheet in May 2024, outlining the following types of sites likely to have used, stored, and/or released PFAS (RWQCB 2024):

- Fire-fighting practice training areas and fire stations (aqueous film-forming foam sites)
- Refineries and bulk fuel terminals
- Semiconductor manufacturers
- Electronics manufacturers—including phones, TVs, and screens
- Chrome plating facilities
- Large commercial/industrial laundries
- Textile facilities—leather tanneries, upholsterers and furniture makers/processors, carpet manufacturing/ treating, large-scale clothes/textile makers
- Plastics manufacturers
- Cardboard/paper packaging manufacturers
- Recycling facilities—paper and/or plastics
- Surface coatings/paints/varnish manufacturers and high-volume users
- High-volume print shops, photos shops, and ink manufacturers
- Pesticide manufacturers
- Manufacturers of consumer products with PFAS
- Mining industry (copper, gold, aluminum, vanadium, and uranium)
- Landfills

As of April 2024, EPA has finalized National Primary Drinking Water Regulations for six PFAS chemicals, including perfluorooctanoic acid (PFOA), perfluorooctanesulfonic acid (PFOS), perfluorononanoic acid (PFNA), perfluorohexanesulfonic acid (PFHxS), hexafluoropropylene oxide dimer acid (HFPO-DA), and mixtures of two or more of PFHxS, PFNA, HFPO-DA, and perfluorobutanesulfonic acid (PFBS). EPA set maximum contaminant levels for these six chemicals (or chemical mixtures), which are enforceable health-based limits, and a hazard index (ratio of water sample concentration to health-based water concentration) for mixtures of two or more of PFHxS, PFNA, HFPO-DA, and PFBS (EPA 2025). Additionally, under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), PFOA, PFOS, and their salts and structural isomers were designated hazardous substances by EPA (EPA 2024a). EPA also established Regional Screening Levels for PFOA and PFOS in soil (EPA 2024b). As such, the presence of PFOA, PFOS, PFNA, PFHxS, and/or HFPO-DA, in any combination above their maximum contaminant levels and/or reportable quantities, could be identified as a REC under ASTM E1527-21.

The State Water Resources Control Board Division of Drinking Water issued multiple General Orders for investigation and monitoring of PFAS in public water systems (SWRCB 2024), along with a series of Investigative Orders issued for airports, chrome plating facilities, landfills, bulk fuel terminals, and public water treatment facilities. The various orders, issuance of which first began in 2019, targeted public water systems and facilities likely to have PFAS, such as airports, landfills, and chrome plating facilities. The State Water Resources Control Board has created a GeoTracker PFAS Map, which is a data management system for sites with PFAS investigative orders, other sites with PFAS data, and water well systems with PFAS data (SWRCB 2025b). No PFAS data were identified within 1 mile of the subject property.

Based on review of the GeoTracker PFAS database on July 3, 2025, there are no records to indicate that PFAS is a REC to the subject property. However, research and studies indicate that PFAS is present in most environments; thus, it is possible that it is present on or near the subject property.

6.3.5 Department of Toxic Substances Control

Dudek searched the EnviroStor database management system used for tracking cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known contamination (DTSC 2025). The subject property was not identified in the database. One evaluation site was identified within 1 mile of the subject property. This site, 7388 Calle Real, is discussed in Section 5.3, Nearby Properties.

6.3.6 California Environmental Protection Agency Regulated Site Portal

Dudek reviewed the CalEPA Regulated Site Portal, which contains data about environmentally regulated sites and facilities in California (CalEPA 2025). Data sources for the portal include California Environmental Reporting System, the Department of Toxic Substances Control EnviroStor, the State Water Resources Control Board GeoTracker, the California Integrated Water Quality System, and the Federal Toxics Release Inventory.

CalEPA sites are generally administrative in nature, identifying sites that have environmental permits or that handle hazardous materials or generate hazardous waste but that do not necessarily have an uncontrolled release of hazardous substances to the environment.

One listing was identified on the eastern-adjoining property and is discussed in Section 5.2, Adjoining Properties.

6.3.7 California Geologic Energy Management Division

Dudek reviewed the California Geologic Energy Management Division database on July 16, 2025 (CalGEM 2025). The southern portion of the subject property is located within the Glen Annie gas field; however, no oil and gas wells were mapped on the subject property. A total of 9 plugged oil and gas wells were mapped within one mile of the subject property. All of the wells were located approximately 0.5 miles to 1 mile from the subject property. Based on the distance, it is unlikely that these wells have impacted the environmental conditions of the subject property. This information was also verified in the EDR Radius Map Report (Appendix C).

6.3.8 National Pipeline Mapping System

Dudek searched the National Pipeline Mapping System online database, which provides a public map viewer application that displays data related to gas transmission and hazardous liquid pipelines, liquefied natural gas plants, and breakout tanks under the Department of Transportation Pipeline and Hazardous Material Safety Administration jurisdiction (NPMS 2025).

No pipelines, accidents, or incidents were reported on the subject property. One active natural gas transmission pipeline was identified approximately 0.7 miles south of the subject property (Appendix E). No accidents or incidents were reported within 1 mile of the subject property.

7 Site Reconnaissance

A site reconnaissance was conducted on July 14, 2025, by Kaylene Kuykendall of Dudek. The site reconnaissance consisted of walking the subject property, taking notes on observations, and taking photographs. Ms. Kuykendall was unaccompanied during the site reconnaissance. Photographs are presented in Appendix F.

7.1 Description of Subject Property and Surroundings

The subject property consists of approximately 14 acres of land on one parcel (APN 077-530-019), immediately north of the City of Goleta. The subject property was accessed from the south entrance at 7400 Cathedral Oaks Road (Photograph 1); there is also access from the southern portion of the property via Cathedral Oaks Road (Photograph 2). As observed during the site reconnaissance, the subject property is bordered by residential housing developments (Photograph 3) to the south across Cathedral Oaks Road and a private golf course (Photograph 4) surrounding the north, east, and west portions of the subject property.

At the time of the site reconnaissance, the subject property consisted of a fallow agricultural field, three structures, one small shed, vehicles, equipment, and stored materials (Photographs 5 through 12). For the purposes of this discussion, the structures are described as follows: Structure 1 is the southernmost building, Structure 2 is the central building, and Structure 3 is the northernmost building. Masonry and paint supplies were observed in the southwest and southeast portions of the property (Photographs 13 through 16). An area of stored wood and what appears to be diesel-powered equipment for splitting wood was observed in the southeast portion of the property (Photographs 17 and 18). Some staining was observed near the wood splitter. A high voltage transformer was observed north of Structure 1 (Photograph 23). A tank, potentially a sewage holding tank, was observed east of Structure 1; no staining or denuded vegetation was observed (Photograph 28).

Items and areas of interest noted during the site reconnaissance are described in Section 7.2, Summary of Observations.

7.2 Summary of Observations

Potable Water Supply or Source

No wells were observed on the subject property. Shallow irrigation lines surround the southern and eastern border of the property (Photograph 24). Water service was observed at the three structures.

Sewage Disposal System

Several sewage cleanouts were observed. Two were located south of Structure 3 and north of Structure 1. One was located directly east of the entrance of the property. Municipal sewer system access manholes were observed along Cathedral Oaks Road to the south of the subject property (Photograph 25). If subject property buildings pre-date the public sewer system, an on-site wastewater treatment system could be present, however, none were observed.

Surface Water Discharge

The subject property is agricultural land that slopes down toward the south. A drainage ditch was observed on the eastern and western boundaries of the property. Water that does not infiltrate would flow south following the topographic gradient.

Distressed Vegetation

No distressed vegetation was observed on the subject property.

Indications of Solid Debris Storage

Debris, including masonry supplies and pallets, were observed in large quantities in the southwest and southeast portions of the property (Photographs 14 and 15). Miscellaneous paint containers (Photograph 16), and 5-gallon drums with unknown contents (Photograph 19), were observed around the perimeter of the agricultural fields and outside Structure 1. Debris relating to the agricultural use of the subject property, including both active and inactive irrigation supply lines, was observed (Photographs 21 and 24).

Surface Staining, Corrosion, and Soil Disturbances

At the time of site reconnaissance, a wood splitter was observed in the southeastern portion of the property. Staining was observed beneath the wood splitter (Photographs 17 and 18). Additional staining was observed outside of Structure 1, likely from agriculture farming equipment. Soil disturbances appeared to be associated with erosion (Photographs 9, 10, 20, and 21). Corroded equipment (tractor bucket lift) s were observed east of Structure 1 (Photograph 27). Stained areas were small and were determined to be de minimis.

Hazardous Material and Petroleum Product Use and Storage

The following hazardous or potentially hazardous materials or petroleum products were observed outside of Structure 1:

- Three 5-gallon paint containers (Photograph 16)
- One high voltage transformer with unknown contents (Photograph 23)
- One 3-gallon gas container with unknown contents (Photograph 26)
- Three 20-lb propane tanks (Photograph 31)
- Two 2-gallon motor oil containers (Photograph 31)

Unnaturally Discolored Ponds or Flowing Waters

No unnaturally discolored pools or flowing waters were observed on the subject property.

Groundwater Wells, Cisterns, Cesspools, or Septic Tanks

No groundwater wells, cisterns, cesspools, or septic tanks were observed.

Polychlorinated Biphenyl-Containing Items

Prior to 1978, polychlorinated biphenyls (PCBs) were often used in transformers and capacitors, specifically in cooling oils. PCBs were also used in hydraulic oils. Releases from these types of equipment may have resulted in PCB impacts to surrounding soils. The age of existing equipment may not necessarily indicate the presence of PCBs because the equipment may have been replaced over time. As such, site history was also reviewed (see Section 8).

One transformer was observed north of Structure 1 (Photograph 23). Three pieces of hydraulic equipment with de minimis staining were observed on the subject property at the time of site reconnaissance (Photographs 9, 17, 18, 29, and 30).

Sumps or Ponds

No sumps or ponds were observed on the subject property.

Abnormal Odor

The site had a slight sewage odor near Structure 1 and Structure 3.

Tanks, Drums, Totes, and Intermediate Bulk Containers

The following tanks, drums, totes, and intermediate bulk containers were observed on the subject property:

- One 5-gallon steel drum with unknown contents (Photograph 19)
- One 5-gallon poly container with unknown contents (Photograph 19)
- One tank with unknown contents and unknown use, potentially a sewage-holding tank (Photograph 28)
- Two 2-gallon containers of assumed oil with soil staining beneath (Photograph 31)
- Two 5-gallon buckets with unknown containers and unknown contents (Photograph 32)

Off-Site Sources

No potential off-site sources were observed during the site reconnaissance.

Fill Material

No evidence of fill material was observed during the site reconnaissance.

Unidentified Substance Containers

The following unidentified substance containers were identified:

- One 5-gallon steel drum, with unknown contents, in poor condition with corrosion (Photograph 19)
- One 5-gallon poly container, with unknown contents, in good condition with no staining (Photograph 19)
- One high voltage transformer with unknown contents (Photograph 23)
- One 3-gallon gas container with unknown contents (Photograph 26)
- One tank, with unknown contents and unknown use, potentially a sewage-holding tank (Photograph 28)

- Two 2-gallon containers of assumed oil with soil staining beneath (Photograph 31)
- Two 5-gallon buckets with unknown containers and unknown contents (Photograph 32)

Pipelines

A buried natural gas pipeline, operated by Southern California Gas Company, was marked along the southern boundary of the subject property (Photograph 33).

8 Site History

Based on a review of the historical aerial photographs, historical topographic maps, agency records, the city directory report, and the Sanborn map report, the subject property was vacant as early as 1938. Agricultural development as an orchard was first observed on the property as early as 1942 until 2002. By 2002, three structures were present on the western portion of the subject property until the present day.

Gaps greater than the 5-year interval required by the ASTM standard were identified in historical resources. This constitutes a data failure and is discussed in Section 13.1.

The northern-adjoining properties have been used for agricultural purposes since as early as 1938 until at least 1960. Residential and commercial properties are observed beginning in 1975 to present day. The western-adjoining property has been used for agricultural purposes since as early as 1938 until at least 1975. Residential apartments are observed beginning in 1978 to present day. The eastern-adjoining property has been used for agricultural purposes since as early as 1938 until 1984. A golf course is observed beginning 1994 until present. The southern-adjoining properties have been used for agricultural purposes since as early as 1938. Housing development began in 1938 with larger-scale residential development by 1994 to present day, and an elementary school is observed as early as 1975.

8.1 Historical Aerial Photographs

Dudek reviewed historical aerial photographs obtained from EDR for 1938, 1943, 1947, 1954, 1967, 1975, 1977 1984, 1994, 2002, 2005, 2010, 2014, 2018, and 2022 (Appendix G). Dudek also reviewed aerial photographs from Google Earth (Google Earth 2025). The photographs provided background information to assess the possibility of past activities that could present environmental concerns. The aerial photographs are described in Table 3.

Table 3. Summary of Aerial Photographs

Date	Subject Property	Adjoining and Surrounding Properties
1938	The subject property is depicted as undeveloped with lots of vegetation along the borders of the subject property.	The adjoining properties to the southwest and east appear to be used for agricultural purposes. Dirt roads are depicted on southwest surrounding properties. The remaining adjoining and surrounding properties appear to be undeveloped with vegetation.
1943	The subject property appears to be developed with an orchard. A dirt road runs along the southern border of the subject property.	The adjoining properties to the south, southwest, and east appear to have expanded and further developed their land for agricultural purposes. The remaining surrounding areas appear similar to 1938 aerial photograph.
1947	The subject property appears similar to the 1943 aerial photograph.	More dirt roads are observed in west and south surrounding properties. The rest of the adjoining and surrounding areas appear similar to the 1943 aerial photograph.
1954	Another dirt road is observed running north/south along the subject properties western boundary. The remaining portions of the subject property appears similar to the 1947 aerial photograph	A pond is observed in southwest surrounding properties. There appear to be three small structures in the southeast surrounding properties. The rest of the adjoining and surrounding areas appear similar to the 1947 aerial photograph.

Table 3. Summary of Aerial Photographs

Date	Subject Property	Adjoining and Surrounding Properties
1967	The subject property appears similar to the 1954 aerial photograph.	The adjoining property to the west appears to have been cleared of all agricultural use. The adjoining property to the northwest appears to be used for agricultural purposes. Residential communities are observed on the south, southwest, and southeast surrounding properties. Two residential structures are observed on the northwest surrounding properties. Half of the east-adjoining property had been cleared for residential purposes. A school is observed on the southeast surrounding property. The adjoining and surrounding properties to the north and northeast appear to still be underdeveloped.
1975	Subject property appears to be cleared of vegetation.	Additional residential structures and communities are observed on the west- and southwest-adjoining properties. There appears to be more development of residential communities in the surrounding properties to the southwest and southeast. A school is observed on the southern surrounding property. The adjoining and surrounding properties to the north and northeast remain undeveloped. The roads to the east, south, and west appear to be paved. The pond is no longer observed.
1977	The subject property appears similar to the 1975 aerial photograph.	The adjoining and surrounding properties appear similar to the 1975 aerial photograph.
1984	The subject property appears similar to the 1977 aerial photograph.	More residential buildings are observed on northwest surrounding property. The surrounding properties to the north and northwest appear to be further developed for agricultural purposes. The remaining adjoining and surrounding properties appear similar to the 1977 aerial photograph.
1994	The subject property is observed similar to the 1984 aerial photograph.	Another road and three residential buildings have been added to the surrounding property to the northwest. The adjoining properties to the north and east appear to have been cleared of vegetation for the development of the Glen Annie Golf Course. The remaining adjoining and surrounding areas appear similar to the 1984 aerial photograph.
2002	The subject property is observed to have three new structures buildings along the western boundary. A north/south-trending paved road is observed abutting Cathedral Oaks. The remaining portions of the subject property appear fallow.	There appears to be a building on the adjoining property to east separate from the golf course with a paved parking lot. There is further development of the Glen Annie Golf Course on the northern- and eastern-adjoining properties. There appear to be a country club and paved parking lot, as well as three ponds on the adjoining golf course. The surrounding property to the north and northeast appears to have further developed their land for agricultural purposes and there is a lot more crops and vegetation observed.
2005	There appears to be a dirt road on the subject property along the southern border.	A additional residential house is observed on the agricultural land to the northeast. The remaining adjoining and surrounding areas appear similar to the 2002 aerial photograph.
2010	The subject property appears similar to the 2005 aerial photograph.	There appears to be a paved road leading up to a residential building on the west surrounding properties. The remaining adjoining and surrounding areas appear similar to the 2005 aerial photograph.

Table 3. Summary of Aerial Photographs

Date	Subject Property	Adjoining and Surrounding Properties
2014	The subject property appears similar to the 2010 aerial photograph.	The adjoining and surrounding areas appear similar to the 2010 aerial photograph.
2018	The subject property appears similar to the 2014 aerial photograph.	A small pond adjoins the eastern boundary of the subject property. The rest of the adjoining and surrounding areas are observed similar to the 2014 aerial photograph.
2022	There appear to be small piles of debris and small buildings along the southern and eastern border. The rest of subject property appears similar to the 2018 aerial photograph.	The adjoining and surrounding areas appear similar to the 2018 aerial photograph.
2025	The rest of subject property appears similar to the 2022 aerial photograph.	The adjoining and surrounding areas appear similar to the 2022 aerial photograph.

Note: See Appendix G for corresponding photographs for 1938 through 2022. The 2025 Google Earth photo is available online and therefore is not included in Appendix G.

8.2 Historical Topographic Maps

Dudek reviewed historical topographic maps from 1938, 1942, 1947, 1950, 1951, 1967, 1982, 1988, 1995, 2012, 2015, 2018, and 2022 (Appendix B). The topographic maps are a historical source that can be used to document the prior use of the subject property and surrounding area. The topographic maps are described in Table 4.

Table 4. Summary of Topographic Maps

Date	Subject Property	Adjoining and Surrounding Properties
1938	The subject property is located approximately 1 mile north of the city of Elwood. The subject property is depicted as undeveloped.	The adjoining properties are depicted as undeveloped. The Pacific Railroad is depicted running east to west a mile north of the subject property. The Elwood and Winchester north–south-trending stream is depicted on western surrounding properties. The Glen Annie north–south-trending stream is depicted on eastern surrounding properties. Bell Canyon is depicted on the southwestern surrounding property. There are unimproved roads depicted to the west and east with some sparsely scattered structures on south surrounding properties. There are light duty roads depicted on southern surrounding properties.
1942	A orchard is depicted on the subject property. An unnamed north–south-trending stream runs along the subject properties western boundary.	There is an unimproved road depicted on the southern- and southwest-adjoining property. Ellwood Ranch is depicted on the northwest surrounding property. Two secondary highways running south–north are now depicted approximately 0.5 miles east of the subject property. Corona Del Mar Rancho is depicted approximately 0.5 miles east of the subject property. A primary highway running west–east is now depicted approximately 1 mile south of the subject property. In general, the surrounding properties are becoming more developed for residential used

Table 4. Summary of Topographic Maps

Date	Subject Property	Adjoining and Surrounding Properties
		and have mixed networks of unimproved and paved roads, with residential communities scattered sparsely.
1947	The subject property is depicted similar to the 1942 topographic map.	The adjoining and surrounding areas are depicted similar to the 1942 topographic map.
1950	The subject property is unmapped.	Along with the subject property, the adjoining properties are also unmapped. Surrounding properties to the east, northeast, and southeast are mapped. Surrounding properties to the northeast are undeveloped with unimproved roads scattered through the land. There are two reservoirs depicted on the east and northeast surrounding properties. Both ranches are no longer depicted. The surrounding properties to the southeast are developed with the 101 highway and 4 secondary highways. There are residential buildings scattered on eastern and southeastern surrounding properties.
1951	The subject property is depicted as undeveloped. The unnamed stream along the western border of the subject property is still depicted.	All adjoining properties are now depicted as undeveloped and the unimproved road on the southern-adjoining property is no longer depicted. Two water tanks are depicted approximately 0.5 miles northwest of the subject property. The 101 west–east-trending highway is depicted approximately 0.6 miles south of the subject property. Ellwood Union school is depicted approximately 1 mile southwest of the subject property. A reservoir is depicted approximately 0.45 miles southeast of the subject property. The surrounding areas to the east, northeast, and southeast are depicted similar to the 1950 topographic map.
1967	The subject property is unmapped.	Along with the subject property, the adjoining properties are also unmapped. Surrounding properties to the east, northeast, and southeast are mapped. More vegetation is now depicted on the northeast surrounding property. A golf course is now depicted to the southeast. A residential community is now depicted next to the golf course on the southeast surrounding property. More buildings are depicted to the east and southeast along the Hollister secondary highway. More paved roads are now depicted to the east and southeast.
1982	The subject property is depicted as having vegetation all throughout the property. The unnamed stream along the western border of the subject property is still depicted.	The adjoining property to the west is depicted as a built-up residential area. The adjoining property to the east is depicted as shrubland. The adjoining property to the north is still depicted as underdeveloped. There is an unnamed, north–south-trending stream that is running through the east- and northern-adjoining properties. The surrounding properties to the south, southwest, and southeast are depicted as built-up residential areas with buildings and apartment complexes scattered scarcely throughout. There is a trailer park depicted on a south surrounding property along the Hollister Avenue secondary highway. A golf course is now depicted southwest next to the oil wells offshore. Additional buildings are depicted on the surrounding properties to the southeast. There is a water reservoir approximately 0.6 miles southwest of the subject property. The surrounding properties to the north, northwest, and

Table 4. Summary of Topographic Maps

Date	Subject Property	Adjoining and Surrounding Properties
		northeast are still depicted as undeveloped with vegetation. The surrounding areas to the east, northeast, and southeast are depicted similar to the 1967 topographic map.
1988	The subject property is depicted similar to the 1982 topographic map.	More buildings have been added to the surrounding areas, but overall the adjoining and surrounding areas are depicted similar to the 1982 topographic map.
1995	The subject property is depicted similar to the 1988 topographic map.	Residential areas have been added to the southeast. Isla Vista is now depicted. The surrounding properties are being further developed to become residential areas. In general, more buildings and roads are being added, but overall the adjoining and surrounding areas are depicted similar to the 1988 topographic map.
2012	The subject property is depicted similar to the 1995 topographic map.	A north/south-trending road is depicted on the western-adjoining property. The railroad is no longer depicted. The residential area on the southern-adjoining property is now depicted as El Encano Heights. The tanks, reservoirs, and wells are no longer depicted. The adjacent properties to the east and north are undeveloped with more vegetation.
2015	The subject property is depicted similar to the 2012 topographic map.	The city of Goleta is now depicted. Three schools are depicted on the southern surrounding properties approximately 0.25 miles away from the subject property. The remaining adjoining and surrounding areas are depicted similar to the 2012 topographic map.
2018	The subject property is depicted similar to the 2015 topographic map.	A small pond is depicted on the eastern-adjoining property. The rest of the adjoining and surrounding areas are depicted similar to the 2015 topographic map.
2022	The subject property is depicted similar to the 2018 topographic map.	The Haskell's Beach Route Trail and Ellwood Mesa Trail are now depicted on the southwest surrounding properties. The rest of the adjoining and surrounding areas are depicted similar to the 2018 topographic map.

Note: See Appendix B for corresponding maps.

8.3 Fire Insurance Maps

Historical Sanborn fire insurance maps were requested from EDR. Sanborn maps provide information regarding the historical uses of the subject property and surrounding properties. Sanborn maps typically exist for cities with populations of 2,000 or more; the coverage is dependent on the location of the subject site within the city limits. The Sanborn Map Report indicates that the Sanborn Library has been searched based on the subject property information, and fire insurance maps covering the subject property were not found. The Sanborn Map Report is provided as Appendix H.

8.4 City Directory

City directory listings were requested from EDR (Appendix I). Cathedral Oaks Road and Northgate Drive were used to identify the subject and adjoining properties. Findings for the subject property and for adjoining property addresses are summarized in Table 5.

Table 5. Summary of City Directory Listings

Address	Date	Listings
Subject Property		
7400 Cathedral Oaks Rd	2010	Crazy Larrys Plumbing SVC
	2005, 2014	Residential
Adjoining to the North		
The northern-adjoining property does not have a physical address. Based on a review of online resources, this property is part of the Glen Annie Golf Course.		
Adjoining to the East		
7380 Cathedral Oaks	1981–2020	Glen Annie Golf Course
Adjoining to the South		
292 Royal Linda Drive 292 King James Court 295 King James Court 295 King Daniel Lane 292 King Daniel Lane 7412 Belluno Drive	These addresses were not included in the City Directory Search performed by EDR. Based on a review of online resources, these properties appear to be used for residential purposes.	
Adjoining to the West		
The western-adjoining property consists of two parcels of land (079-620-CA and 079-610-CA), both of which have a more than a dozen associated addresses (337–409 Northgate Drive). Based on a review of online resources, the parcels are developed with two apartment complexes and are used for residential purposes.		

8.5 Title Information/Environmental Liens

As discussed in Section 6.2, the user is required to complete a search for environmental liens and AULs to satisfy the requirements of the All Appropriate Inquiries Rule for CERCLA liability protection. An environmental lien search including available records from 1980 to the present was conducted for the subject property parcel (APN 077-530-019) (Appendix J).

The current legal owner of APN 077-530-019 is listed as Shelby Family Partnership. No environmental liens, AULs, or deed restrictions were identified through the search, which was conducted back to 1980 (Appendix J).

9 Previous Environmental Site Assessments

No previous environmental assessments were provided to Dudek during this Phase I ESA.

10 Vapor Encroachment

Dudek evaluated vapor encroachment to determine whether there is a potential for vapors originating from contaminated soil and/or groundwater to occur in the subsurface below the existing and potential future on-site structures. Information obtained from other sources (geologic and hydrogeological information, site reconnaissance, local regulatory agency responses), as discussed in this report, was also considered. The VEC assessment was conducted in accordance with ASTM Standard E2600-22 guidance (ASTM 2022). The EDR Radius Map Report (Appendix C) was used to evaluate listed contaminated sites as identified in federal, state, and local databases. A VEC assessment report is provided in Appendix K.

No sites were identified as having groundwater contamination or soil vapor contamination that could impact the subject property; as such, no VEC was identified.

11 Non-ASTM Considerations

This section discusses non-ASTM scope considerations that were included in this Phase I ESA based on the conditions at the subject property. These items are not required to be evaluated per the ASTM standard but may still pose environmental health and safety risks.

Asbestos

Asbestos has been specifically designated a hazardous substance pursuant to CERCLA Section 102, but abatement costs are generally not recoverable under CERCLA. Many building materials commonly contained asbestos until the late 1970s, and a smaller list of building materials contained asbestos in the 1980s, such as drywall, joint compounds, vinyl flooring, roofing, asbestos-cement products, and stucco. Under the Toxic Substances Control Act, EPA banned the use of asbestos in many products, with partial bans occurring in 1989 and 1993. However, a full ban of asbestos products did not occur until 2019. Therefore, if a building was constructed prior to 1989, it is likely it contains asbestos. If it was constructed between 1989 and 2019, it is less likely asbestos is present, but there is still a chance that asbestos was used.

Structures were identified on the subject property; they were reportedly brought onto the subject property in 1999. According to the site representative interview, a lead-based paint and asbestos survey was performed prior to the structure relocation; however, survey results were not provided. Based on the age of the structures, it is possible that asbestos may be of concern for the subject property.

Lead-Based Paint

Paint manufacturers frequently used lead as a primary paint ingredient through the 1940s and gradually decreased its use in the 1950s and 1960s. The federal department of Housing and Urban Development estimates 30% of homes built in the United States before 1978 contain some lead-based paint. The Consumer Product Safety Commission prohibited the use of lead-based paints in residential buildings in 1978; however, the use of lead-based paints in commercial and industrial buildings is not prohibited.

Structures were identified on the subject property; they were reportedly brought onto the subject property in 1999. According to the site representative interview, a lead-based paint and asbestos survey was performed prior to the structure relocation; however, survey results were not provided. Based on the age of the structures, it is possible that lead-based paint may be of concern for the subject property.

Radon

Radon is a radioactive gas that is produced from the natural decay of uranium, radium, and thorium in soil, rock, and groundwater (WHO 2023). When radon becomes trapped in buildings and concentrations accumulate, exposure to radon can be a concern.

The EPA Radon Zone for Santa Barbara County is 1 (EPA n.d.a), which corresponds with average expected indoor radon levels greater than 4 picocuries per liter (pCi/L). The Federal Radon Action Level is 4 pCi/L (EPA n.d.b).

12 Soil Sampling

Soil sampling was conducted at the subject property given its historical agricultural use. Areas of potential impacts were determined based on historical aerial photographs and topographical maps. The constituents of potential concern included organochlorine pesticides (OCPs) and arsenic (used in pesticides). The laboratory analytical report is presented in Appendix L.

12.1 Methods and Procedures

Soil sampling was conducted on September 16, 2025 by Clarissa Smith and Bevon Wilson of Dudek in accordance with methods and procedures outlined in the Department of Toxic Substances Control (DTSC) guidance for sampling agriculture properties (DTSC 2008). The soil samples were collected from approximately 6 inches below ground surface (bgs) at the locations as shown on Figure 2. Samples collected for OCP and arsenic analysis were spaced approximately evenly throughout the subject property to maximize coverage.

Soil was collected from 24 locations (A-1 to A-4; B-1 to B-4; C-1 to C-4; D-1 to D-4; and E-1 to E-4) across the subject property (Figure 2) where the historical agricultural use was noted. Six composite soil samples and one duplicate composite soil sample, each made up of soil from four locations (4:1 ratio), were analyzed for OCPs by EPA Method 8081A as described below.

- Composite Sample A (Composite A-1,2,3,4) was comprised of soil from four locations in the north portion of the subject property (A-1 to A-4).
- Composite Sample B (Composite B-1,2,3,4) was comprised of soil from four locations in the north-central part of the subject property (B-1 to B-4).
- Composite Sample C (Composite C-1,2,3,4) was comprised of soil from four locations in the central portion of the subject property (C-1 to C-4).
- Composite Sample D (Composite D-1,2,3,5) was comprised of soil from four locations (D-1 to D-4) from the southwestern area of subject property.
- Composite Sample E (Composite E-1,2,3,4) was comprised of soil from four locations from the south-central part of the subject property (E-1 to E-4).
- Composite Sample F (Composite F-1,2,3,4) was comprised of soil from four locations in the southeast part of the subject property (F-1 to F-4).
- Composite Sample G (duplicate of Composite Sample E) was comprised of soil from four locations (G-1, G-2, G-3, and G-4) collected alongside locations E-4, E-3, E-2, and E-1, respectively, all located within the Composite E sample locations.

Soil collected from 6 of the 24 locations (A-2, B-3, C-1, D-3, E-2, and F-1) across the subject property (Figure 2) were analyzed for arsenic (EPA Method 6010B). Discrete sample G-3 (duplicate of sample E-2) was also analyzed for arsenic.

Soil from approximately 6 inches bgs was collected using a dedicated, disposable hand trowel at each location. Soil was placed directly into a pre-cleaned laboratory-supplied 4-ounce glass jar. New nitrile gloves and new individually packaged hand trowels were used at each sampling location. Each sample was then labeled with a unique identifier,

logged on a chain-or-custody form, and placed in an ice-chilled cooler. The samples were submitted to Enthalpy Analytical Laboratories, Orange, California via courier for analysis.

12.2 Results

Sample results are summarized in Tables 6 and Table 7 and the laboratory analytical report is provided as Appendix L.

Laboratory analytical results were compared to regulatory screening levels including DTSC-recommended screening levels (RSLs) for soil and environmental screening levels (ESLs) for residential soil (DTSC 2025; SFRWQCB 2025).

12.2.1 Organochlorine Pesticides

No OCPs were detected above their respective laboratory detection limits in any of the six composite soil samples (Table 6).

Table 6. Organochlorine Pesticides Soil Sample Results

Sample Location	Sample ID	Sample Date	Aldrin	alpha-BHC (Lindane)	beta-BHC	gamma-BHC	Chlordane	4,4'-DDD	4,4'-DDE	4,4'-DDT	Dieldrin	Endosulfan I	Endrin	Endrin aldehyde	Heptachlor	Heptachlor epoxide	Methoxychlor	Toxaphene

-- No regulatory screening level established
1 Human Health Risk Assessment Note 3, Table 1. DTSC-Recommended Screening Levels for Soil (Residential, Cancer Endpoint), Revised April 2025; non-cancer endpoint used where no cancer endpoint.
2 Environmental Screening Level, San Francisco Bay RWQCB, Residential Shallow Soil Exposure, Cancer Risk, July 2025 (Rev. 3); non-cancer hazard used where no value for cancer risk.

12.2.2 Arsenic

Arsenic was detected in all six discrete soil samples, as well as in the duplicate discrete sample G-3 (collected from location E-2) (Table 7). Concentrations of arsenic exceeded the regulatory screening level for residential soil and ranged from 6.4 to 10 mg/kg; the RSL and ESL for residential soil is 0.032 mg/kg. The ESL and RSL for arsenic are based on human health screening levels that are much more stringent than the concentrations of arsenic typically found in clean soils. The typical background concentration for arsenic in Southern California soils is 12 mg/kg (DTSC 2009). While the concentrations of arsenic in composite soil samples slightly exceed the human health-based screening levels, all are well below the typical background arsenic concentration of 12 mg/kg.

Table 7. Arsenic Soil Sample Results

Sample ID	Sample Date	Arsenic by EPA Method 6010B (mg/kg)

12.2.3 Quality Control (QC)

One field QC sample (duplicate sample) was collected and analyzed for OCPs and arsenic.

Laboratory QC samples included a method blank, laboratory control spike, MS/MSD analysis, and evaluation of surrogate recovery.

The laboratory analytical results were determined to be acceptable and no issues were reported. The QC evaluation of the analytical data, including results of laboratory and field QC samples, is summarized below.

Matrix Spike/Matrix Duplicate Spike

MS/MSD analyses were conducted by the laboratory as part of the QC procedures. Percent recoveries were examined for all analytes in EPA Method 8081A (OCPs) and one analyte in EPA Method 6010B (arsenic). MS/MSD percent recoveries and RPD for all analytes were within control limits.

Method Blank

A laboratory method blank sample (MB) was analyzed as part of the sampling event. None of the constituents of concern were detected in the MB sample.

Laboratory Control Samples

A Laboratory control sample was analyzed as part of the sampling event. Percent recoveries were examined for EPA Method 8081A (OCPs) and EPA Method 6010B (arsenic only). All percent recoveries for the LCSs were within QC limits.

Duplicate Soil Sample

One duplicate soil sample was collected during the sampling event. The duplicate sample, Composite G-1,2,3,4, is a duplicate of sample Composite E-1,2,3,4. RPDs were not calculated if one analyte of the duplicate pair was not detected above the reporting limit or if the reported concentration was less than five times the reporting limit. As no OCPs were detected, only arsenic was evaluated for QC purposes. The RPD for arsenic was 13.7% which was within the range of 0-20% for the duplicate soil sample.

12.3 Summary

OCPs were not detected above the laboratory reporting limits in any of the six composite soil samples, or in the duplicate composite sample. Arsenic was detected in all soil samples however, the concentrations were all below 12 mg/kg, the typical background arsenic in Southern California soils. Based on this information, the historical agricultural use of the subject property is not considered to represent a REC.

Soil Sample Locations

Cathedral Oaks Phase I ESA

13 Findings and Conclusions

Information gathered for this report indicated the following:

- The subject property was cultivated for agricultural use (orchards) from as early as 1943 until sometime after 1994.
- Three structures (two residences and a barn) were moved onto the subject property in 1999. These structures are still present on the subject property.
- At the time of the site reconnaissance, the subject property was observed to be a fallow agricultural field with three structures, a shed, vehicles, equipment, and various materials.
- Adjoining properties include residential properties to the west and south and the Glen Annie Golf Course to the east, north, and northwest.
- The Glen Annie Golf Course has been identified in multiple regulatory programs for handling of hazardous waste and for petroleum storage. Dudek reviewed the available information regarding these activities and determined that it is unlikely that this site has impacted the environmental conditions of the subject property.
- The subject property was cultivated for agricultural purposes for at least 60 years. Due to the potential presence of residual pesticides and metals (specifically, arsenic), Dudek conducted shallow soil sampling across the subject property (Section 12, Soil Sampling). Seven composite soil samples (6 primary and 1 duplicate) were analyzed for organochlorine pesticides (OCPs) and seven discrete soil samples (6 primary and 1 duplicate) were analyzed for arsenic. No OCPs were detected at or above the laboratory reporting limits. Arsenic was detected in the soil samples but at concentrations below the acceptable background concentration for California soils. As such, the historical agricultural use does not appear to have impacted the environmental conditions of the subject property.

This assessment did not reveal evidence of any RECs, HRECs, CRECs, or VECs. Data gaps, which were determined not to be significant, are discussed in Section 13, Limitations.

Dudek performed this Phase I ESA of the subject property in conformance with the scope and limitations of ASTM Standard E1527-21, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (ASTM 2021). This report summarizes the research and findings of the Phase I ESA. Dudek does not have recommendations for additional assessment for the subject property.

14 Limitations

14.1 Data Gaps and Data Failures

As defined in ASTM Standard E1527-21, a data failure is a failure to achieve the historical research objective required by the ASTM standard even after reviewing the standard historical resources that are reasonably ascertainable and likely to be useful. A data failure is a type of data gap.

The following data failure was identified for this Phase I ESA:

- Gaps greater than the 5-year interval required by the ASTM standard were identified in historical resources. This constitutes a data failure.

As defined in ASTM Standard E1527-21, a data gap is the lack of or inability to obtain information required by this practice despite good faith efforts. A data gap is considered significant when it affects the ability of the environmental professional to identify RECs. The following data gaps were identified for this Phase I ESA:

- The data failure listed above is considered a type of data gap. Based on the site history, available historical and regulatory information, and present-day use, this data gap does not limit the ability to determine RECs and is therefore considered less than significant.
- The structures were not accessible during the site reconnaissance. Based on the site history, available historical and regulatory information, and present-day use, this data gap does not limit the ability to determine RECs and is therefore considered less than significant.
- Dudek did not receive responses from Santa Barabara County Environmental Health Services, the Santa Barabara County Agricultural Commissioner, or the City of Goleta Building and Safety Division. Based on the site history, available historical and regulatory information, and present-day use, Dudek has determined these data gaps are less than significant as this did not limit the ability to identify a REC.

Should Dudek receive information following submission of this Phase I ESA report that completes these data gaps and changes the findings of the Phase I ESA report, Dudek will submit the findings to the user in an addendum.

14.2 Report Limitations

The findings and conclusions presented in this report are professional opinions based solely on the indicated data described in this report, as reflected in the discussion in this report of the visual observations of the subject property and vicinity and documentation reviewed and based on the foregoing, our interpretation of this information and these documents. Dudek makes no warranty, guarantee, or representation, express or implied, as to statements made by others or information included in documentation reviewed or otherwise provided to Dudek, as described in this report. This report does not purport to identify or describe all potential contamination, or other issues related to the environment respecting the subject property and/or the vicinity. Likewise, it is understood that it is possible that conditions or contamination exist at the subject property or in the vicinity that are not identified in this Phase I ESA.

No warranties or guarantees or representations, expressed or implied, are made by Dudek, except for the representation that this report has been prepared in accordance with the current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professionals performing the same or similar services in the same or similar geographical locality. This report, including its conclusions and/or recommendations, is intended exclusively and solely for the purpose outlined herein and for the client identified hereunder. This report may not be relied upon by any other person or entity without the express advance written consent of Dudek specifically identifying such person or entity. Dudek reserves the right to further condition any such third-party use based on matters it deems appropriate under the circumstances, in its sole discretion.

This report is subject to the conditions and restrictions and limitations described in ASTM Standard E1527-21.

In accordance with Section 4.6.1 of ASTM Standard E1527-21, this Phase I ESA is valid as a general matter for not longer than 180 days from the date of the first interview, first review of government records, or first visual inspection. If this Phase I ESA has been prepared for the purposes of a transaction, the report must have been completed no more than 180 days prior to the transaction date to be considered viable. Otherwise, the report must be updated or revised in accordance with ASTM Standard E1527-21.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk

characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/21/2025 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CITRUS VILLAGE	***7388 CALLE REAL***	***S 1/2 - 1 (0.595 mi.)***	***21***	***75***
Facility Id: 60000925 Status: No Further Action				

Lists of state and tribal registered storage tanks

AST: A listing of aboveground storage tank petroleum storage tank locations.

A review of the AST list, as provided by EDR, has revealed that there is 1 AST site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
GLEN ANNIE GOLF COUR	7380 CATHEDRAL OAKS	SE 0 - 1/8 (0.069 mi.)	B4	23
Database: AST, Date of Government Version: 07/06/2016				

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 01/12/2025 has revealed that there is 1 CERS HAZ WASTE site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
GLEN ANNIE GOLF COUR	***7380 CATHEDRAL OAKS***	***SE 0 - 1/8 (0.069 mi.)***	***B2***	***12***

Local Lists of Registered Storage Tanks

CERS TANKS: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs.

A review of the CERS TANKS list, as provided by EDR, and dated 01/12/2025 has revealed that there is 1 CERS TANKS site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/02/2025 has revealed that there are 16 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there are 10 E MANIFEST sites within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 2 CUPA Listings sites within approximately 0.25 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/27/2025

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/20/2024

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

CHROME PLATING: Chrome Plating Facilities Listing

This listing represents chrome plating facilities the California State Water Resources Control Board staff identified as possibly being a source of Per- and polyfluoroalkyl substance (PFAS) contamination. Sites and locations were identified by staff with the Division of Water Quality in the California State Water Board. Data was collected from the CA Air Resources Board 2013 and 2018 - Cr VI emission survey, CA Emission Inventory, CA HAZ Waste discharge database and by reviewing storm water permits. Former chrome plating sites are also included that are open site investigation or remediation cases with the Regional Water Quality Control Boards and the Department of Toxic Substances Control.

Data Release Frequency: Varies

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

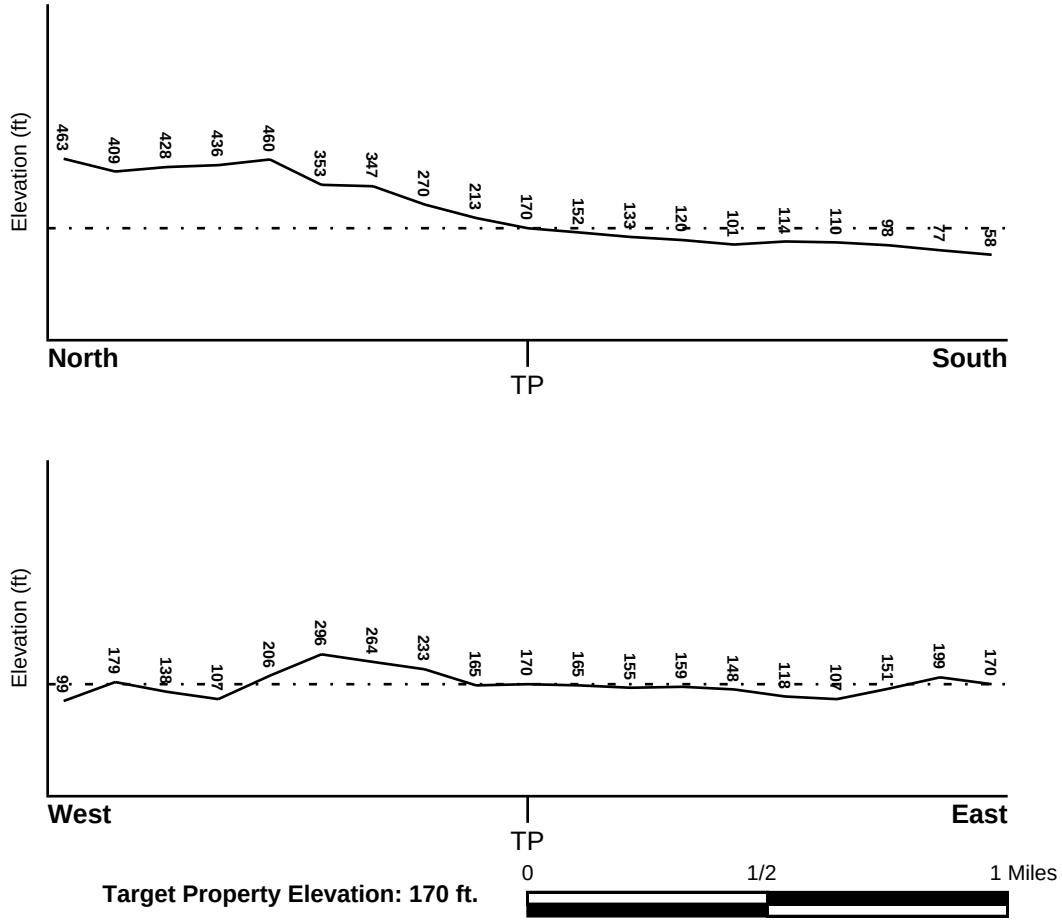

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
DOS PUEBLOS CANYON	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Diablo

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	50 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 1.4 Min: 0	Max: Min:
2	50 inches	53 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 1.4 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: Diablo

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	50 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 1.4 Min: 0	Max: Min:
2	50 inches	53 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 1.4 Min: 0	Max: Min:

Soil Map ID: 3

Soil Component Name: Gullied land

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 4

Soil Component Name: Ayar

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	40 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 1.4 Min: 0	Max: Min:
2	40 inches	44 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 1.4 Min: 0	Max: Min:

Soil Map ID: 5

Soil Component Name: Ayar

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

2	40 inches	44 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 1.4 Min: 0	Max: Min:

Soil Map ID: 6

Soil Component Name: Milpitas

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 141 Min: 42	Max: 7.8 Min: 5.6
2	14 inches	53 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 141 Min: 42	Max: 7.8 Min: 5.6
3	53 inches	68 inches	very gravelly sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 141 Min: 42	Max: 7.8 Min: 5.6

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program
State Water Resources Control Board
Telephone: 916-341-5577
The GAMA Program is Californias comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Heath Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

Geothermal Wells Listing
Department of Conservation
Telephone: 916-445-9686
Geothermal well means a well constructed to extract or return water to the ground after it has been used for heating or cooling purposes. Geothermal wells in California (except for wells on federal leases which are administered by the Bureau of Land Management) are permitted, drilled, operated, and permanently sealed and closed (plugged and abandoned) under requirements and procedures administered by the Geothermal Section of the Department of Conservations Geologic Energy Management Division (CalGEM, formerly DOGGR).

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division
Telephone: 916-323-1779
Oil and Gas well locations in the state.

Appendix D
Owner-Provided Information

The ASTM Standard (E 1527-21, Section 10) for Phase I Environmental Site Assessments requires interviews with past and present owners and occupants of the property in order to obtain information on the history and uses of the property. Please answer the questions below to the best of your knowledge. Please provide additional information for all YES answers.

1. **Current Property Uses and Buildings:**

How long have you owned or occupied the property?

Since 1980.

Describe the current uses of the property.

Single-family residential occupation. The remainder of the property is fallow.

How long has the property been used for these purposes?

Since 1999.

Describe any buildings on the property and indicate the years they were constructed.

2,015 square foot, one-story, 3-bedroom, wood framed, single-family dwelling; 726 square foot, one-story, wood framed garage; 1,152 square foot, one-story, wood framed, barn. All moved to the property in 1999.

2. **Past Uses:** Describe the past use(s) of the property and indicate the time period for each use, if known.

Agricultural cultivation of avocado orchards from approximately 1960s until 1995.

3. **Previous Owners/Operators:** Please identify previous owners and operators and provide their contact information (if available).

n/a

4. **Industrial Uses:** Please indicate whether the property or adjoining properties have been used for the following industrial uses. **Adjoining properties** include properties that are across the street from yours.

Industrial Use	Yes (Property)	Yes (Adjoining Property)	No
Gasoline Station	☐	☐	☑
Printing Facility	☐	☐	☑
Metal Plating Manufacturing	☐	☐	☑
Landfill	☐	☐	☑
Auto Repair/Service Facility	☐	☐	☑
Dry Cleaners	☐	☐	☑
Junkyard/Auto Dismantling	☐	☐	☑
Waste Treatment	☐	☐	☑
Other Industrial Use (please describe below):	☐	☐	☑

5. **Agricultural Uses:** Has the subject property ever been used for agricultural purposes?
☑ Yes ☐ No ☐ Unknown

If yes, please indicate whether any of the following have been present on the subject property.

Agricultural Use	Yes	No	Location
Cattle Hoof Wash	☐	☑	
Wheel Wash, Copper Solution or Other	☐	☑	
Orchards	☑	☐	Location, type, duration: Avocado orchards from 1960s until 1995
Orchard Heaters/Smudge Pots	☐	☐	Unknown
Pesticide/Herbicide/Fungicide Storage	☐	☐	Location, type, duration: Unknown
Pesticide/Herbicide/Fungicide Application	☐	☐	Location, type, duration: Unknown

6. **Dump/Burn Areas:** Have any hazardous substances, petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or other waste materials been dumped above ground, buried, or burned on the property?
☐ Yes ☐ No ☑ Unknown

If yes, please describe:

7. **Hazardous Substances Storage:** Have any of the following items been stored on the property in containers *greater than 5 gallons*? If yes, please describe.

Substance	Yes	No	Substance and Container Size (e.g., waste oil in 55-gallon drum)
Paint	☐	☐	unknown
Chemicals	☐	☐	unknown
Solvents	☐	☐	unknown
Pesticides	☐	☐	unknown
Fuel	☑	☐	Gasoline and diesel fuel, 5 gallon
Oil	☑	☐	motor oil, one gallon
Other (please identify):	☐	☐	

8. **Hazardous Substances Spills:** Have there been spills of the substances in Question 6?

☐ Yes ☐ No ☑ Unknown

If yes, please describe:

9. **Pipelines:** Have hazardous substances or petroleum products been transferred across the property in pipelines, either above or below ground?

☐ Yes ☑ No ☐ Unknown

If yes, please provide the type of hazardous substance:

Have any spills occurred?

☐ Yes ☑ No ☐ Unknown

If yes, please describe:

10. **Fill Dirt:** Has fill dirt been brought onto the property from an off-site source?

☑ Yes ☐ No ☐ Unknown

If yes, what was the source of fill dirt?

Lower 5-acres of property was filled in 1999 with approximately 40,000 cubic yards of excavation taken from the Cathedral Oaks Rd construction fronting the property.

If yes, was/is there evidence that the fill dirt in may be contaminated?

☐ Yes ☑ No ☐ Unknown

If yes, please provide soil sampling data, if available, or describe other evidence:

Cathedral Oaks Rd corridor area subject to excavation was previously utilized for avocado orchard cultivation since 1960s

11. **Pits, Ponds, and Lagoons:** Are there currently any pits, ponds, or lagoons on the property?

☐ Yes ☑ No ☐ Unknown

If yes, please describe:

Have any pits, ponds, or lagoons previously existed on the property?

☐ Yes ☑ No ☐ Unknown

If yes, please describe:

12. **Stained Soil:** Are there currently any areas on the property with stained soil?

☐ Yes ☑ No ☐ Unknown

If yes, please describe where, the size of stain, if there were odors, etc.:

Has stained soil previously existed on the property?

☐ Yes ☑ No ☐ Unknown

If yes, please describe where, size of stain, if there were odors, etc.:

13. **Storage Tanks:** Do underground or aboveground storage tanks exist or have they existed previously on the property?

☐ Yes ☑ No ☐ Unknown

If yes, please provide details below. If tanks previously existed on the property, please describe how they were closed (e.g., removed, abandoned in place).

Tank Size	Year Installed	Contents	Closure Method (if applicable)	Year Closed (if applicable)

14. **Fill Pipes/Vent Pipes/Access Ways:** Do fill pipes, vent pipes, or access ways indicating the presence of underground storage tanks currently exist on the property?

☐ Yes ☑ No ☐ Unknown

Have fill pipes or vent pipes, which may indicate the presence of an underground storage tank, been removed from the property?

☐ Yes ☑ No ☐ Unknown

15. **Floor Drains:** Are floor drains stained with anything other than water or do they emit foul odors on the property?

☐ Yes ☑ No ☐ Unknown

16. **Private Well/Non-Public Water Source:** Is the property served by a private well or other non-public water source?

☐ Yes ☑ No ☐ Unknown

If yes, please describe source

Goleta Water District meter

Are contaminants known to exist in any private well or non-public water system serving the property?

☐ Yes ☑ No ☐ Unknown

If yes, please describe

17. **Wastewater:** Does the property discharge wastewater, other than domestic wastewater or stormwater, into the sewer?

☐ Yes ☑ No ☐ Unknown

If yes, please describe

Does a neighboring property discharge wastewater, other than stormwater, onto the property?

☐ Yes ☑ No ☐ Unknown

If yes, please describe

Other than permission for domestic hookup, has any type of permit(s) for wastewater discharge been issued to the property?

☐ Yes ☑ No ☐ Unknown

If yes, please describe

18. **Septic Tank:** Does a septic tank exist, or has one existed previously at the property?

☐ Yes (currently exists) ☐ Yes (previously existed, was removed) ☑ No ☐ Unknown

19. Cesspools/Cisterns: Do cesspools or cisterns currently exist on the property?

☐ Yes (cesspool) ☐ Yes (cistern) ☑ No ☐ Unknown

Have cesspools or cisterns previously existed on the property?

☐ Yes (cesspool) ☑ Yes (cistern) ☐ No ☐ Unknown

20. Transformer/Capacitor: Is there a transformer or capacitor on the property?

☐ Yes ☑ No ☐ Unknown

If yes, is it known to contain PCBs?

☐ Yes ☐ No ☐ Unknown _____

21. Hydraulic Equipment: Is there any hydraulic equipment such as automobile lifts or elevators on the property?

☐ Yes ☑ No ☐ Unknown

If yes, please describe type and number of equipment:

If yes, is the hydraulic oil known to contain PCBs?

☐ Yes ☐ No ☑ Unknown

22. Surveys: Has an asbestos and/or lead based paint survey been conducted at the property?

☑ Yes ☐ No ☐ Unknown

If yes, when was the survey(s) conducted? Please provide copies of the reports if available.

When structures were relocated to property in 1999.

23. **Pesticides:** Have pesticides, herbicides, or insecticides been applied on the property?

☐ Yes ☐ No ☑ Unknown

If yes, describe type and when they were used:

24. **Environmental Cleanups:** Are you aware of any environmental cleanups/remediation that have occurred on the property?

☐ Yes ☑ No ☐ Unknown

25. **Notice of Violation:** Have notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products associated with activities conducted on the property been issued?

☐ Yes ☑ No ☐ Unknown

26. **Documents:** Has the property been included in any of the following documents? (Please provide any of the available documents.)

Document	Yes	No	Unknown
Phase I or II Environmental Assessment Reports	☐	☐	☑
Environmental Compliance Audits	☐	☐	☑
Environmental Permits	☐	☐	☑
Underground or Aboveground Tank Registrations	☐	☐	☑
Underground Injection System Registrations	☐	☐	☑
Health & Safety Plan / Safety Data Sheets	☐	☐	☑
Community Right-to-Know Plan	☐	☐	☑
Spill Prevention, Control, and Countermeasure Plan	☐	☐	☑
Hazardous Materials Business Plan	☐	☐	☑
Sampling, Remediation, or Risk Assessment Reports	☐	☐	☑
Hazardous Waste Generator Manifests	☐	☐	☑
Geotechnical Reports	☐	☐	☑

27. **Environmental** Assessments: Are there any other environmental assessments that identified hazardous substances or petroleum products on the property?

☐ Yes ☐ No ☑ Unknown

If yes, please describe:

28. **Litigation/Administrative Proceedings:** Is there any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products associated with the property?

☐ Yes ☑ No ☐ Unknown

If yes, please describe:

29. **Additional Knowledge:** Are you aware of any other information (not provided above) about the property related to a releases or potential release of hazardous substances or petroleum products?

☐ Yes ☐ No ☑ Unknown

If yes, please describe:

NOTICE OF FINAL APPROVAL/ INTENT TO ISSUE A REVISED LAND USE PERMIT

Case No: 98-LUS-704 GO **Planner:** Jennifer Trunk **Initials** JT
Project Name: Westfield LLC Grading Permit
Project Address: South of Cathedral Oaks Segment 3 between the intersections of Cathedral Oaks Road/Placer Drive on the east and Cathedral Oaks Road/Evergreen/Northgate Drives on the west.
A.P.N.: 079-120-047,079-120-096, & 077-530-019
Zone District: 7-R-1 (1 unit/7,000 sq. ft.), Cathedral Oaks Segment 3, AG-I-10/AG-II-40

Planning & Development (P&D) *grants final approval and intends to issue* this Land Use Permit for the development described below, based upon the required findings and subject to the attached terms and conditions.

FINAL APPROVAL DATE: May 19, 1999

99GR5-02498-02068

LARWIN
7400 CATHEDRAL OAKS RD
SANTA BARBARA,CA APN# 077-530-19

POSTING DATE/APPEAL PERIOD BEGINS: Revision; N/A

APPEAL PERIOD ENDS: N/A

DATE OF PERMIT ISSUANCE: May 19, 1999

NOTE: This is a revised Land Use Permit to an approved Land Use Permit and as such is not appealable. If you have questions regarding this project please contact the planner at (805) 568-2015

PROJECT DESCRIPTION SUMMARY: Grading

Tract Map 14,461: Cut: 24,072 cubic yards (c. y.); Fill: 7,852 c.y.; Losses due to shrinkage/subsidence: 10,914 c.y.; Export: 5,306 c.y.

ZONING PERMIT
ISSUED
SANTA BARBARA CO. PLANNING & DEVELOPMENT

This permit is a revision from the previously approved Land Use Permit, 98-LUS-704 GO. This permit includes an Export Grading Plan (dated May 17, 1999). The Export Grading Plan consists of approximately 7,000 c.y. of soil originating from Cathedral Oaks Segment 3 and 6,000 c.y. soil originating from the site improvements from Tract 14,461. A disposal non-landscape grade and a landscape berm using the exported earthwork would be constructed and located on A.P.N. 077-530-019. Estimated total amount of fill required per Grading Plan dated May 17, 1999 = 13,000 c.y.

PROJECT SPECIFIC CONDITIONS:

See Attachment A for Conditions of Approval relative to grading, pursuant to TM 14,461 and the Export Grading Plan dated May 17, 1999.

TERMS OF PERMIT ISSUANCE:

1. Posting Notice Because this is a revision to an already approved permit, it becomes effective immediately and no noticing is required.

2. **Work Prohibited Prior to Permit Issuance.** No work, development, or use intended to be authorized pursuant to this approval shall commence prior to issuance of this Land Use Permit and/or any other required permit (e.g., building permit). **Warning! This is not a Building/Grading Permit.**

Case #: 98-LUS-704 RV01 GO (Discretionary Case Number: 98-LA-001, 98-GP-016, 98-GP-004, 98-RZ-005, TM 14,461)
Project Name: Westfield LLC Project GRADING
Project Address: South of Cathedral Oaks Segment 3 between the intersections of Cathedral Oaks Road/Placer Drive on the east and Cathedral Oaks Road/Evergreen/Northgate Drives on the west.
APN: 079-120-047, 079-120-096, & 077-530-019

CONDITIONS OF APPROVAL (PERTAINING TO GRADING)

WESTFIELD LLC
TRACT MAP (TM 14,461)
& EXPORT GRADING PLAN (dated May 17, 1999)

PROJECT DESCRIPTION CONDITION

1. This Vesting Tentative Map is based upon and limited to compliance with the project description, Hearing Exhibits B, C, and D, dated September 30, 1998, and conditions of approval set forth below. Any deviations from the project description, exhibits, or conditions must be reviewed and approved by the County for conformity with this approval. Deviations may require approved changes to the permit and/or further environmental review. Deviations without the above described approval will constitute a violation of permit approval.

The project description is as follows:

Vesting Tentative Map 14,461 would divide the 10.83 acres into 45 lots (43 residential lots, 1 common open space lot of 0.82 acres for purposes of accommodating the onsite portion of the riparian corridor buffer area, and 1 common lot of 1.91 acres for the internal private roadway). Residential lot sizes would range from 7,017 to 12,632 square feet. A Lotting Plan describes the distribution of three different floorplans for future residential development within the tract. A mix of 1- and 2-story development is proposed; homes would range from approximately 2,800 - 3,400 square feet. Height limitations along the eastern boundary and the Cathedral Oaks Road frontage include 23 feet for 1-story units and 27.5 feet for 2-story units. All floorplans can accommodate 3-car garages. Architectural themes include French, Tuscan, and Santa Barbara. Future development shall be consistent with the final Lotting Plan.

A trail is proposed along the edge of the creek buffer. The project includes a riparian corridor buffer area revegetation plan and tract landscaping consisting of a native, riparian theme compatible with the adjacent creek habitat. Grading quantities include 38,000 cubic yards of cut and 38,000 cubic yards of fill.

Access would be via the extension of Cathedral Oaks Road. The improvements are part of the Public Works Cathedral Oaks Circulation Link Segment 3 project and include construction of two travel lanes, a westbound left-turn lane, shoulders, a sidewalk on the south side, and a Class II bikepath in both directions.

The project would be served by the Goleta Water District and the Goleta West Sanitary District.

Project Description for 98-LUS-704 RV01 GO:

This permit is a revision to previously approved Land Use Permit, 98-LUS-704 GO to include an Export Grading Plan. The Export Grading Plan consists of one disposal non-landscaped grade and one landscaped berm as depicted on the Export Grading Plan dated May 17, 1999.

The disposal non-landscaped grade would be approximately 500 feet in length and 360 feet in width to follow the existing topography. The disposal non-landscaped grade would be placed in the central portion of A.P.N. 077-530-019, approximately forty feet from Cathedral Oaks Segment 3 road right of way, approximately 130 feet east of the western property line and approximately 200 feet west of the eastern property line.

The landscaped berm would be approximately 390 feet in length and 67 feet in width. The landscaped berm would be located 10 feet west of the eastern property line and thirty feet north of the road right-of-way for Cathedral Oaks Segment 3 (i.e. along the southeastern corner of A.P.N. 077-530-019). The landscaped berm would have a slope of 4:1. The sides of the landscaped berm would graduate to a height not to exceed eight feet above existing grade, three feet in width at the highest point. The berm shall be revegetated within 4-6 weeks of grading activities with deep rooted, native, drought tolerant species to minimize erosion potential. Landscape contractor to be responsible for hydroseeding the berm. The following

Monitoring: Permit Compliance shall monitor in the field to ensure compliance with the approved plan. Grading inspectors shall monitor technical aspects of the drainage plan.

3. The applicant shall obtain proof of exemption or proof that a National Pollutant Discharge Elimination System Storm Water Permit from the California Regional Water Quality Control Board has been applied for by registered mail. **Plan Requirements and Timing:** The applicant shall submit proof and P&D shall review and approve documentation prior to approval of a land use permit for grading.

   Monitoring: P&D shall review documentation prior to land use permit approval.

4. The recommendations in the Earth Systems Consultants Geotechnical Engineering Report (2/10/98) shall be incorporated into all site grading and building plans. **Plan Requirements and Timing:** Recommendations shall be included on all grading and building plans and shall be reviewed and approved by P&D prior to recordation/land use permit approval.

   Monitoring: Permit Compliance shall monitor in the field to ensure compliance with the approved plan. Grading inspectors shall monitor technical aspects of the drainage plan.

Water Resources/Flooding

5. The final grading/drainage and erosion control plan shall include a detail of the onsite bioswale. **Plan Requirements and Timing:** The final grading/drainage and erosion control plan shall be submitted for review and approval by P&D and the FCD prior to final map clearance.

   Monitoring: Permit Compliance shall ensure compliance with plan. Grading inspectors shall monitor technical aspects of the grading activities.

6. Outdoor water use for tract landscaping shall be limited through the measures listed below:

   a. Landscaping shall be primarily with native and/or drought tolerant species.

   b. Drip irrigation or other water-conserving irrigation shall be installed.

   c. Plant material shall be grouped by water needs.

   d. No turf shall be allowed on slopes of over 4%.

   e. Extensive mulching (2" minimum) shall be used in all landscaped areas to improve the water holding capacity of the soil by reducing evaporation and soil compaction.

   f. Soil moisture sensing devices shall be installed to prevent unnecessary irrigation.

   Plan Requirements and Timing: A final landscape plan shall submitted to P&D and BAR for review and approval prior to final map clearance. If applicable, the applicant shall provide evidence of a contract with the GWD to provide reclaimed water for landscaping or demonstrate infeasibility to the satisfaction of P&D. The applicant shall implement all aspects of the landscape and irrigation plan prior to occupancy clearance.

   Monitoring: Permit Compliance shall conduct site visits to ensure installation and maintenance of landscape and irrigation.

8. Reclaimed water shall be used for all grading and construction activities which require dust suppression. **Plan Requirements and Timing:** This measure shall be included as a note on the grading plan. Prior to the commencement of earth movement, the applicant shall submit an agreement/contract with a reclaimed water provider to P&D for review and approval.

   Monitoring: Permit Compliance staff shall site inspect to ensure non-potable water is being used in trucks.

9. Reclaimed wastewater shall be utilized for exterior landscaping (but not within the ESH buffer area of Lot 44 or on tract landscaping which is not reclaimed water tolerant) if available. **Plan Requirements and Timing:** Final landscape plans and tract improvement plans shall include dual plumbing systems for the use of reclaimed water. These plans shall be reviewed and approved by P&D and the GWD prior to final map clearance.

Monitoring: P&D shall ensure measures are on plans. Permit Compliance, Grading and Building inspectors shall spot check; Grading and Building shall ensure compliance on-site. Permit Compliance and APCD inspectors shall respond to nuisance complaints.

14. In order to minimize NO_x emissions, the following measures shall be implemented for each piece of heavy duty diesel construction equipment:

    a. heavy-duty diesel-powered construction equipment manufactured after 1996 (with federally mandated "clean" diesel engines) should be utilized wherever feasible;

    b. the engine size of construction equipment shall be the minimum practical size;

    c. the amount of construction equipment operating simultaneously shall be minimized through efficient management practices to ensure that the smallest practical number are operating at any one time;

    d. construction equipment shall be maintained in tune per the manufacturer's specifications;

    e. construction equipment operating onsite shall be equipped with two to four degree engine timing retard or precombustion chamber engines;

    f. catalytic converters shall be installed on gasoline-powered equipment, if feasible;

    g. diesel catalytic converters shall be installed, if available;

    h. diesel powered equipment should be replaced be electric equipment whenever feasible; and

    i. construction worker trips should be minimized by requiring carpooling and by providing for lunch onsite.

    Plan Requirements and Timing: The applicant shall record an agreement to comply with conditions prior to commencement of construction and shall demonstrate to the satisfaction of the APCD that the above measures have been complied with for each piece of heavy duty diesel equipment utilized onsite. The measures shall be reviewed prior to approval of a land use permit for grading or structural development and shall be implemented during project construction.

    Monitoring: P&D shall monitor in the field during grading and construction operations.

15. The following energy-conserving techniques should be incorporated in future development unless the applicant demonstrates their feasibility to the satisfaction of P&D staff:

    a. installation of low NOx residential and commercial water heaters and space heaters per specifications in the 1991 Air Quality Attainment Plan;

    b. installation of heat transfer modules in furnaces;
    c. use of light colored water-based paint and roofing materials;

    d. installation of solar panels for residential water heating systems and other facilities and/or the use of water heaters that heat water only on demand;

    e. use of passive solar cooling/heating;

    f. use of natural lighting;

    g. use of concrete or other non-pollutant materials for parking lots instead of asphalt;

    h. installation of energy efficient appliances;

    i. installation of energy efficient lighting;

    j. use of landscaping to shade buildings and parking lots;

19. Temporary fence protection (marking the extent of allowed disturbance) shall be provided within the creek/buffer area during grading and construction. Fencing material shall be approved by P&D and shall be a minimum of six feet high and shall include staking, every six feet. **Plan Requirements and Timing:** Fence protection shall be identified on the final grading plan (and on future building plans as applicable) and shall be reviewed and approved by P&D prior to final map clearance. Fencing shall be in place prior to commencement of grading/construction activities.

Monitoring: Permit Compliance shall site inspect to ensure fencing is installed and maintained throughout grading/construction activities.

20. A plan for fencing on common open space Lot 44, between the trail and the ESHA, shall be provided. Fencing shall allow access to the trail but shall discourage intensive use of the remaining buffer area and creek channel. It shall be a minimum of 3 feet high and shall permit animal movement. **Plan Requirements and Timing:** Fencing shall be identified on the revegetation plan and the final tract landscaping plan. These plans shall be reviewed and approved by P&D prior to final map clearance.

Monitoring: Permit Compliance shall site inspect for installation according to plan.

21. The final tract landscape plan shall be consistent with the preliminary plan with regard to inclusion of primarily native species compatible with the adjacent riparian habitat. The use of invasive species in project landscaping shall be prohibited. **Plan Requirements and Timing:** The final landscape plan shall specify the prohibition against invasives and shall be reviewed and approved by P&D and the BAR prior to final map clearance. This condition shall also be included in project CC&Rs which shall be reviewed and approved by P&D prior to final map clearance. The applicant shall file a performance security with the County for installation and maintenance of plantings for a three year period. Landscaping shall be initiated prior to the first occupancy clearance and completed prior to the last occupancy clearance.

Monitoring: Permit Compliance shall site inspect for installation according to plan.

22. Native specimen plants and seed stock from locally (western Goleta to the greatest extent feasible) obtained sources shall be utilized in project landscaping. **Plan Requirements and Timing:** This requirement shall be included on the project landscaping plan which shall be reviewed and approved by P&D prior to final map clearance.

Monitoring: Permit Compliance shall site inspect to ensure compliance.

24. All exterior lighting within 100 feet of the drainage corridor/buffer area shall be low intensity, shielded, and directed away from the ESH area. **Plan Requirements and Timing:** This requirement shall be noted on the revegetation plan, tract landscaping plan, and future building plans and shall be reviewed and approved by P&D prior to final map clearance/land use permit approval. This condition shall also be included in project CC&Rs which shall be reviewed and approved by P&D prior to final map clearance.

Monitoring: Permit Compliance and building inspectors shall site inspect for installation according to plan.

25. A Tree Protection and Replacement Program prepared by a P&D-approved arborist or biologist shall be implemented. The program shall attempt to increase the number of existing mature trees that are to be retained and shall include, but not be limited to, the following components:

A. Program elements to be graphically depicted on final grading and building plans:

a. The location and extent of driplines for all trees and the type and location of any fencing.

b. Equipment storage and staging areas shall be designated on approved grading and building plans outside of dripline areas.

c. Paving shall be pervious material where access roads or driveways encroach within 6 feet of a native specimen tree's dripline.

d. Drainage plans shall be designed so that oak tree trunk areas are properly drained to avoid ponding. These plans shall be subject to review and approval by P&D or a P&D-qualified biologist/arborist.

stream channel. **Plan Requirements:** An erosion control plan shall be submitted for review and approval by P&D (and Grading Division) and Flood Control prior to final map clearance. **Timing:** The plan shall be implemented prior to the commencement of grading/construction.

Monitoring: Permit Compliance and grading inspectors shall perform site inspections throughout the construction phase.

29. Outlet structures shall minimize disturbance to the natural drainage and avoid use of hard bank structures. Where such structures must be utilized as deemed appropriate by P&D and the Flood Control District, natural rock or steel gabions shall be used for bank retaining walls. If concrete must be used, then prefabricated crib wall construction shall be used rather than pouring concrete. Rock grouting shall only be used if no other feasible alternative is available as determined by P&D. **Plan Requirements and Timing:** A detail of the drainage outfall and overland swale shall be submitted for review and approval by P&D prior to final map clearance.
Monitoring: Permit Compliance shall ensure installation according to plan and shall spot-check throughout grading and construction.

30. An energy dissipater over the end of the drain pipe (or similar device such as trash racks or baffles), shall be installed to ensure minimal erosion during storm events and to prevent children from entering the storm drain system. **Plan Requirements and Timing:** The dissipater or other device shall be shown on the final grading plan and shall be reviewed and approved by P&D prior to final map clearance.

Monitoring: Permit Compliance shall site inspect to ensure installation according to plan.

31. The applicant shall restore the area disturbed as part of installation of drainage improvements. Revegetation shall be compatible with the buffer area revegetation plan and shall utilize appropriate native, fast growing, vining plants that will quickly cover the outlet structure and thrive in a rocky environment. **Plan Requirements and Timing:** A revegetation plan shall be prepared by a P&D-qualified biologist and shall be reviewed and approved by P&D prior to final map clearance. The plan shall be implemented prior to issuance of occupancy permits.
Monitoring: Permit Compliance shall site inspect to ensure installation according to plan.

32. A grease/silt trap shall be installed in all drop inlets closest to the creek to prevent oil, silt, and other debris from entering the creek. Such traps/basins shall be maintained and cleaned out every spring and fall to prevent overflow situations and potential mosquito habitats from forming. **Plan Requirements:** A maintenance program shall be submitted to P&D for review and approval prior to final map clearance. **Timing:** the traps/basins shall be installed with tract improvements.

Monitoring: Permit Compliance shall site inspect to verify installation and once each year to monitor maintenance.

33. During construction, washing of concrete, paint, or equipment shall occur only in areas where polluted water and materials can be contained for subsequent removal from the site. Washing shall not be allowed within 100 feet of the riparian corridor. An area designated for washing functions shall be identified. **Plan Requirements and Timing:** A designated wash off area shall be shown on the final grading plan which shall be reviewed and approved by P&D prior to final map clearance. The wash off area shall be in place throughout construction.

Monitoring: Permit Compliance shall site inspect throughout grading and construction.

34. The applicant shall obtain a U.S. Army Corps of Engineers 404 permit or waiver for any grading or fill activity within the adjacent drainage corridor for the portion within ACE jurisdiction. **Plan Requirements and Timing:** A copy of the 404 permit or waiver shall be submitted to P&D prior to final map clearance.

Monitoring: P&D shall ensure compliance prior to final map clearance.

35. No alteration to stream channels or banks shall be permitted until the Department of Fish and Game has been contacted to determine if the drainage falls under its jurisdiction. **Plan Requirements and Timing:** Prior to final map clearance, applicant must receive all necessary permits from CDFG or provide evidence to P&D that no such permits are necessary.

Monitoring: P&D shall ensure compliance prior to final map clearance.

Agricultural Resources

43. Extension of a sewer service to Parcel 1(as may be shown via an extension off tract sewer service infrastructure) shall be limited to the minimum lateral size necessary to serve allowable uses under the existing agricultural zoning. **Plan Requirements and Timing:** Improvement plans for extension of any service to Parcel 1 shall be reviewed and approved by P&D prior to recordation if extension occurs with tract improvements or prior to approval of a land use permit if extension occurs with future development on Parcel 1 (consistent with uses allowed under the agricultural designations).

Monitoring: P&D shall site inspect for installation according to plan.

Solid Waste

48. Demolition and/or excess construction materials shall be separated for reuse/recycling or proper disposal (e.g. concrete and asphalt). During grading and construction, separate bins for recycling of construction materials shall be provided onsite (outside of the ESHA and buffer area). **Plan Requirements:** This requirement shall be printed on the grading and construction plans. Permittee shall provide P&D with receipts for recycled materials or for separate bins. **Timing:** Materials shall be recycled as necessary throughout construction. All materials shall be recycled prior to occupancy clearance.

Monitoring: P&D shall review receipts prior to occupancy clearance.

Recreation

50. The applicant shall construct a trail within the common open space lot to Park Department specifications and shall dedicate it to the County. Maintenance shall be provided by the homeowner's association in perpetuity and shall be described in project CC&Rs. **Plan Requirements:** The easement document and specific alignment shall be reviewed and approved by P&D, County Counsel, and the Park Department prior to final map clearance. Project CC&Rs shall be reviewed by P&D prior to final map clearance. **Timing:** The trail shall be constructed prior to issuance of the first occupancy permit.
Monitoring: P&D shall site inspect to verify construction according to plan.

51. The applicant shall dedicate the Class I bikeway alignment north of the extension of Cathedral Oaks Road to the County in perpetuity consistent with the GTIP and GCP Bikeways Element. **Plan Requirements and Timing:** The alignment shall be coordinated with the Class I segment adjacent to the east. The easement document and specific alignment shall be reviewed and approved by P&D, Public Works, and County Counsel prior to final map clearance.
Monitoring: P&D shallensure dedication according to plan.

Aesthetics/Visual Resources

54. Future development shall be consistent with the final Lotting Plan and floor plan square footages (approximately 2800 - 3400 square feet). At a minimum the following lots along the eastern property boundary and the Cathedral Oaks frontage shall be 1-story: Lots 7- 17, 19, 36, and 43. These lots are restricted to the Plan 1 floorplan and square footage (and 23 foot height limitation). If built as 2-story structures, the following lots along these same frontages shall be restricted to the 2-stories with the floorplans (Plan 3 with structural surfaces along Cathedral Oaks Road minimized) as shown on the Lotting Plan (with 27.5 foot height limitation): Lots 18 and 35. Remaining future development shall be substantially consistent with the floorplan distribution and square footages (Plan 1, Plan 2, and Plan 3) shown on the final Lotting Plan. **Plan Requirements and Timing:** The final Lotting Plan and floor plans shall be reviewed and approved by P&D and BAR prior to final map clearance and the single story limitations shall be recorded as an informational sheet along with the final map Applicant shall restudy architectural styles for neighborhood compatibility.

Monitoring: P&D shall ensure conformance prior to approval of future land use permits for structural development.

56 The proposed wall along Cathedral Oaks Road and other walls that are six feet in height or greater shall be in tones compatible with surrounding terrain (vegetation, soils, and other natural features) using textured materials or construction methods which create a textured effect. Native vegetation shall be planted to screen walls. **Plan Requirements and Timing:** Walls subject to this condition shall be included on final plans and shall be reviewed and approved by P&D and BAR prior to final map clearance.

Monitoring: P&D shall site inspect prior to occupancy clearance.

released upon satisfactory installation of all items in section (a). If plants and irrigation (and/or any items listed in section (a) below) have been established and maintained, P&D may release the maintenance security 5 years after installation. If such maintenance has not occurred, the plants or improvements shall be replaced and the security held for another year. If the applicant fails to either install or maintain according to the approved plan, P&D may collect security and compete work on property. The installation security shall guarantee compliance with the provision below:

a) Installation of: project landscaping in accordance with the landscape plan.

79. Landscaping shall be maintained for the life of the project.

80. Prior to final map clearance, the applicant shall obtain final Board of Architectural approval for the project.

81. The applicant shall ensure that the project complies with all approved plans and all project conditions including those which must be monitored after the project is built and occupied. To accomplish this the applicant agrees to:

a) Contact P&D compliance staff as soon as possible after project approval to provide the name and phone number of the future contact person for the project and give estimated dates for future project activities.

b) Contact P&D compliance staff at least two weeks prior to commencement of construction activities to schedule an onsite pre-construction meeting with the owner, compliance staff, other agency personnel, and with key construction personnel.

c) Pay fees prior to approval of land use permits as authorized under ordinance and fee schedules to cover full costs of monitoring as described above, including costs for P&D to hire and manage outside consultants when deemed necessary by P&D staff (e.g., non-compliance situations, special monitoring needed for sensitive areas including but not limited to biologists, archaeologists, etc) to assess damage and/or ensure compliance. In such cases, the applicant shall comply with P&D recommendations to bring the project into compliance. The decision of the P&D Director shall be final in the event of a dispute.

84. Developer shall defend, indemnify and hold harmless the County or its agents, officers and employees from any claim, action or proceeding against the County or its agents, officers or employees, to attack, set aside, void, or annul, in whole or in part, the County's approval of the Vesting Tentative Tract Map. In the event that the County fails promptly to notify the applicant of any such claim, action or proceeding, or that the County fails to cooperate fully in the defense of said claim, this condition shall thereafter be of no further force or effect.

85. In the event that any condition imposing a fee, exaction, dedication or other mitigation measure is challenged by the project sponsors in an action filed in a court of law or threatened to be filed therein which action is brought within the time period provided for by law, this approval shall be suspended pending dismissal of such action, the expiration of the limitation period applicable to such action, or final resolution of such action. If any condition is invalidated by a court of law, the entire project shall be reviewed by the County and substitute conditions may be imposed.

NOTICE OF FINAL APPROVAL/ INTENT TO ISSUE A REVISED LAND USE PERMIT

Case No: 98-LUS-704 GO **Planner:** Jennifer Trunk **Initials** JT
Project Name: Westfield LLC Grading Permit
Project Address: South of Cathedral Oaks Segment 3 between the intersections of Cathedral Oaks Road/Placer Drive on the east and Cathedral Oaks Road/Evergreen/Northgate Drives on the west.
A.P.N.: 079-120-047,079-120-096, & 077-530-019
Zone District: 7-R-1 (1 unit/7,000 sq. ft.), Cathedral Oaks Segment 3, AG-I-10/AG-II-40

Planning & Development (P&D) *grants final approval and intends to issue* this Land Use Permit for the development described below, based upon the required findings and subject to the attached terms and conditions.

FINAL APPROVAL DATE: May 19, 1999

99GR5-02498-02068

LARWIN
7400 CATHEDRAL OAKS RD
SANTA BARBARA,CA APN# 077-530-19

POSTING DATE/APPEAL PERIOD BEGINS: Revision; N/A

APPEAL PERIOD ENDS: N/A

DATE OF PERMIT ISSUANCE: May 19, 1999

NOTE: This is a revised Land Use Permit to an approved Land Use Permit and as such is not appealable. If you have questions regarding this project please contact the planner at (805) 568-2015

PROJECT DESCRIPTION SUMMARY: Grading

Tract Map 14,461: Cut: 24,072 cubic yards (c. y.); Fill: 7,852 c.y.; Losses due to shrinkage/subsidence: 10,914 c.y.; Export: 5,306 c.y.

ZONING PERMIT
ISSUED
SANTA BARBARA CO. PLANNING & DEVELOPMENT

This permit is a revision from the previously approved Land Use Permit, 98-LUS-704 GO. This permit includes an Export Grading Plan (dated May 17, 1999). The Export Grading Plan consists of approximately 7,000 c.y. of soil originating from Cathedral Oaks Segment 3 and 6,000 c.y. soil originating from the site improvements from Tract 14,461. A disposal non-landscape grade and a landscape berm using the exported earthmove will be constructed and located on A.P.N. 077-530-019. Estimated total amount of fill required per Grading Plan dated May 17, 1999 = 13,000 c.y.

PROJECT SPECIFIC CONDITIONS:

See Attachment A for Conditions of Approval relative to grading, pursuant to TM 14,461 and the Export Grading Plan dated May 17, 1999.

TERMS OF PERMIT ISSUANCE:

1. Posting Notice. Because this is a revision to an already approved permit, it becomes effective immediately and no noticing is required.

2. **Work Prohibited Prior to Permit Issuance.** No work, development, or use intended to be authorized pursuant to this approval shall commence prior to issuance of this Land Use Permit and/or any other required permit (e.g., building permit). **Warning! This is not a Building/Grading Permit.**

3. **Date of Permit Issuance.** This Permit shall be deemed effective and issued on the **Date of Permit Issuance** as identified above, provided:

a. All terms and conditions must be met and this Notice/Permit has been signed.

b. N/A

c. N/A

4. **Time Limit.** Failure to obtain a required construction/demolition or grading permit and to lawfully commence development within two (2) years of permit issuance, shall render this Land Use Permit null and void. A Land Use Permit that follows an approved Final Development Plan (FDP) shall be rendered null and void on the date the FDP expires even if the FDP expiration date is within two years of the Land Use Permits issuance.

NOTE: This Notice of Final Approval/Intent to Issue a Land Use Permit serves as the Approval and the Land Use Permit once the permit is deemed effective and issued. Issuance of a permit for this project does not allow construction or use outside of the project description, or terms or conditions; nor shall it be construed to be an approval of a violation of any provision of any County Policy, Ordinance or other governmental regulation.

OWNER/APPLICANT ACKNOWLEDGMENT: Undersigned permittee acknowledges receipt of this approval and agrees to abide by all terms and conditions thereof.

5/19/99 — Date

F:\GROUP\DEV_REV\WP\LUS\98_CASES\8LUS704.GO\LUPRV DOC

Case #: 98-LUS-704 RV01 GO (Discretionary Case Number: 98-LA-001, 98-GP-016, 98-GP-004, 98-RZ-005, TM 14,461)
Project Name: Westfield LLC Project GRADING
Project Address: South of Cathedral Oaks Segment 3 between the intersections of Cathedral Oaks Road/Placer Drive on the east and Cathedral Oaks Road/Evergreen/Northgate Drives on the west.
APN: 079-120-047, 079-120-096, & 077-530-019

CONDITIONS OF APPROVAL (PERTAINING TO GRADING)

WESTFIELD LLC
TRACT MAP (TM 14,461)
& EXPORT GRADING PLAN (dated May 17, 1999)

PROJECT DESCRIPTION CONDITION

1. This Vesting Tentative Map is based upon and limited to compliance with the project description, Hearing Exhibits B, C, and D, dated September 30, 1998, and conditions of approval set forth below. Any deviations from the project description, exhibits, or conditions must be reviewed and approved by the County for conformity with this approval. Deviations may require approved changes to the permit and/or further environmental review. Deviations without the above described approval will constitute a violation of permit approval.

The project description is as follows:

Vesting Tentative Map 14,461 would divide the 10.83 acres into 45 lots (43 residential lots, 1 common open space lot of 0.82 acres for purposes of accommodating the onsite portion of the riparian corridor buffer area, and 1 common lot of 1.91 acres for the internal private roadway). Residential lot sizes would range from 7,017 to 12,632 square feet. A Lotting Plan describes the distribution of three different floorplans for future residential development within the tract. A mix of 1- and 2-story development is proposed; homes would range from approximately 2,800 - 3,400 square feet. Height limitations along the eastern boundary and the Cathedral Oaks Road frontage include 23 feet for 1-story units and 27.5 feet for 2-story units. All floorplans can accommodate 3-car garages. Architectural themes include French, Tuscan, and Santa Barbara. Future development shall be consistent with the final Lotting Plan.

A trail is proposed along the edge of the creek buffer. The project includes a riparian corridor buffer area revegetation plan and tract landscaping consisting of a native, riparian theme compatible with the adjacent creek habitat. Grading quantities include 38,000 cubic yards of cut and 38,000 cubic yards of fill.

Access would be via the extension of Cathedral Oaks Road. The improvements are part of the Public Works Cathedral Oaks Circulation Link Segment 3 project and include construction of two travel lanes, a westbound left-turn lane, shoulders, a sidewalk on the south side, and a Class II bikepath in both directions.

The project would be served by the Goleta Water District and the Goleta West Sanitary District.

Project Description for 98-LUS-704 RV01 GO:

This permit is a revision to previously approved Land Use Permit, 98-LUS-704 GO to include an Export Grading Plan. The Export Grading Plan consists of one disposal non-landscaped grade and one landscaped berm as depicted on the Export Grading Plan dated May 17, 1999.

The disposal non-landscaped grade would be approximately 500 feet in length and 360 feet in width to follow the existing topography. The disposal non-landscaped grade would be placed in the central portion of A.P.N. 077-530-019, approximately forty feet from Cathedral Oaks Segment 3 road right of way, approximately 130 feet east of the western property line and approximately 200 feet west of the eastern property line.

The landscaped berm would be approximately 390 feet in length and 67 feet in width. The landscaped berm would be located 10 feet west of the eastern property line and thirty feet north of the road right-of-way for Cathedral Oaks Segment 3 (i.e. along the southeastern corner of A.P.N. 077-530-019). The landscaped berm would have a slope of 4:1. The sides of the landscaped berm would graduate to a height not to exceed eight feet above existing grade, three feet in width at the highest point. The berm shall be revegetated within 4-6 weeks of grading activities with deep rooted, native, drought tolerant species to minimize erosion potential. Landscape contractor to be responsible for hydroseeding the berm. The following

rates of seed and fertilizer may be used: Silva Fiber: 1,500 lbs/acre, Commercial Fertilizer: 400 lbs/acre, Annual Rye Grass: 40 lbs/acre, California Oats: 90 lbs/acre, Palestine Orchard: 20 lbs/acre.

Estimated amount of export from Cathedral Oaks Segment 3 Road Construction = 7,000 cubic yards.
Estimated amount of export from Tract 14,461 Construction = 6,000 cubic yards.
Estimated total amount of fill required per Grading Plan dated May 17, 1999 = 13,000 cubic yards.

The grading, development, use, and maintenance of the property, the size, shape, arrangement, and location of structures, parking areas and landscape areas, and the protection and preservation of resources shall conform to the project description above and the hearing exhibits and conditions of approval below. The property and any portions thereof shall be sold, leased or financed in compliance with this project description and the approved hearing exhibits and conditions of approval hereto. All plans (such as Landscape and Tree Protection Plans) must be submitted for review and approval and shall be implemented as approved by the County.

CONDITIONS FROM THE EIR

Geologic Processes

1. The final grading/drainage plan shall minimize grading requirements and shall be designed to minimize erosion. The plan shall include, but not be limited to, the following:

   a. The applicant shall limit excavation and grading to the dry season of the year (i.e. April 15 to November 1) unless a P&D-approved erosion control plan is in place and all measures therein are in effect. Geotextile binding fabrics shall be used if necessary to hold soils until vegetation is established.

   b. Drainage shall be consistent with approved drainage plans. Prior to recordation, a drainage plan shall be submitted to P&D and Flood control for review and approval. The plan shall include the locations of all proposed pipelines, the entire length of all proposed pipelines, trees located within fifteen feet of the pipelines, pipe diameters, locations where the pipes would surface in the drainage corridor, and amount of water that would flow from each pipeline.

   c. Grading along the westerly property boundary within the riparian corridor buffer area shall be limited to the areas shown on the Vesting Tentative Map (9/14/98) which include installation of the drainage outlet structure in the creek corridor, grading necessary for placement of the trail, for the westerly project entry road, and minor ground preparation within this 50-foot buffer area for purposes of revegetation.

   d. Graded areas shall be revegetated within 4 - 6 weeks of grading activities with deep rooted, native, drought-tolerant species to minimize erosion potential.

   e. Methods such as retention basins, drainage diversion structures, temporary berms, spot grading, and use of erosion control devices such as silt fencing, straw bales, or sand bags shall be used to reduce siltation into the adjacent drainage corridor during grading and construction activities.

   f. Temporary storage of construction equipment shall be limited to a specified area which shall be designated on grading plans (outside of the drainage corridor and associated buffer area).

   Plan Requirements: The final grading/drainage and erosion control plan shall be submitted for review and approval by P&D and the FCD prior to recordation/approval of a land use permit. The applicant shall notify Permit Compliance prior to commencement of grading. **Timing:** Components of the grading plan shall be implemented throughout all grading activities as specified on the plan.

   Monitoring: Permit Compliance will photo document revegetation and ensure compliance with plan. Grading inspectors shall monitor technical aspects of the grading activities.

2. All runoff from impervious areas shall be conveyed by conduits to existing drainage systems. **Plan Requirements and Timing:** A drainage plan which incorporates the above and includes a maintenance and inspection program to ensure proper functioning shall be submitted to P&D and the Flood Control District for review and approval prior to recordation/approval of a land use permit

Monitoring: Permit Compliance shall monitor in the field to ensure compliance with the approved plan. Grading inspectors shall monitor technical aspects of the drainage plan.

3. The applicant shall obtain proof of exemption or proof that a National Pollutant Discharge Elimination System Storm Water Permit from the California Regional Water Quality Control Board has been applied for by registered mail. **Plan Requirements and Timing:** The applicant shall submit proof and P&D shall review and approve documentation prior to approval of a land use permit for grading.

   Monitoring: P&D shall review documentation prior to land use permit approval.

4. The recommendations in the Earth Systems Consultants Geotechnical Engineering Report (2/10/98) shall be incorporated into all site grading and building plans. **Plan Requirements and Timing:** Recommendations shall be included on all grading and building plans and shall be reviewed and approved by P&D prior to recordation/land use permit approval.

   Monitoring: Permit Compliance shall monitor in the field to ensure compliance with the approved plan. Grading inspectors shall monitor technical aspects of the drainage plan.

Water Resources/Flooding

5. The final grading/drainage and erosion control plan shall include a detail of the onsite bioswale. **Plan Requirements and Timing:** The final grading/drainage and erosion control plan shall be submitted for review and approval by P&D and the FCD prior to final map clearance.

   Monitoring: Permit Compliance shall ensure compliance with plan. Grading inspectors shall monitor technical aspects of the grading activities.

6. Outdoor water use for tract landscaping shall be limited through the measures listed below:

   a. Landscaping shall be primarily with native and/or drought tolerant species.

   b. Drip irrigation or other water-conserving irrigation shall be installed.

   c. Plant material shall be grouped by water needs.

   d. No turf shall be allowed on slopes of over 4%.

   e. Extensive mulching (2" minimum) shall be used in all landscaped areas to improve the water holding capacity of the soil by reducing evaporation and soil compaction.

   f. Soil moisture sensing devices shall be installed to prevent unnecessary irrigation.

   Plan Requirements and Timing: A final landscape plan shall submitted to P&D and BAR for review and approval prior to final map clearance. If applicable, the applicant shall provide evidence of a contract with the GWD to provide reclaimed water for landscaping or demonstrate infeasibility to the satisfaction of P&D. The applicant shall implement all aspects of the landscape and irrigation plan prior to occupancy clearance.

   Monitoring: Permit Compliance shall conduct site visits to ensure installation and maintenance of landscape and irrigation.

8. Reclaimed water shall be used for all grading and construction activities which require dust suppression. **Plan Requirements and Timing:** This measure shall be included as a note on the grading plan. Prior to the commencement of earth movement, the applicant shall submit an agreement/contract with a reclaimed water provider to P&D for review and approval

   Monitoring: Permit Compliance staff shall site inspect to ensure non-potable water is being used in trucks.

9. Reclaimed wastewater shall be utilized for exterior landscaping (but not within the ESH buffer area of Lot 44 or on tract landscaping which is not reclaimed water tolerant) if available. **Plan Requirements and Timing:** Final landscape plans and tract improvement plans shall include dual plumbing systems for the use of reclaimed water. These plans shall be reviewed and approved by P&D and the GWD prior to final map clearance.

Monitoring: Permit Compliance shall site inspect for installation according to plan.

Transportation/Circulation

10. Adequate access to the project site shall be provided from Cathedral Oaks Road. **Plan Requirements:** Improvement plans shall be reviewed and approved by P&D and Public Works prior to final map clearance. **Timing:** Possession of right-of-way shall occur as per the Roadway Agreement and shall occur prior to final map clearance. A land use permit for project grading shall not be approved until the contract for construction of the Cathedral Oaks Road Segment 3 project has been let, or applicant and County have provided for construction as contemplated in the Roadway Agreement.
Monitoring: P&D shall coordinate with Public Works and County Counsel to ensure appropriate timing for dedication/recordation and land use permit approval.

11. A construction haul route plan which prohibits the use of area residential collector streets and limits access to the site to ingress/egress from Cathedral Oaks Road shall be provided. **Plan Requirements and Timing:** The haul route plan shall be reviewed and approved by P&D and Public Works prior to approval of a land use permit for tract grading. Construction - related trips shall be scheduled to avoid peak traffic hours (7:30 - 8:30 AM and 4:30 - 5:30 PM).

Monitoring: Permit Compliance shall site inspect to ensure compliance with haul route plan.

Air Quality

12. If any portion of the project site is graded and left undeveloped for over 30 days, the applicant shall employ the following methods immediately to inhibit dust generation:

a) seeding and watering to revegetate graded areas; and/or
b) spreading of soil binders; and/or

c) any other methods deemed appropriate by the Air Pollution Control District or Planning and Development.

If grading activities are discontinued for over six weeks, applicant shall contact both Permit Compliance staff and the Grading Inspector to site inspect revegetation/soil binding. **Plan Requirements:** These requirements shall be noted on the grading plan. **Timing:** The final grading plan shall be submitted for review prior to Land Use Permit approval.

Monitoring: Permit Compliance staff and Grading Inspector shall perform periodic site inspections.

13. Dust generated by the development activities shall be kept to a minimum, with a goal of retaining dust onsite, by following the dust control measures listed below. Reclaimed water should be used whenever possible.

a) During clearing, grading, earth moving, excavation, or transportation of cut or fill materials, water trucks or sprinkler systems are to be used to prevent dust from leaving the site and to create a crust, after each day's activities cease.

b) During construction, water trucks or sprinkler systems shall be used to keep all areas of vehicle movement damp enough to prevent dust from leaving the site. At a minimum, this would include wetting down such areas in the later morning and after work is completed for the day and whenever the wind speed exceeds 15 mph.
c) Soil stockpiled for more than two days shall be covered, kept moist, or treated with soil binders to prevent dust generation.

d) The contractor or builder shall designate a person or persons to monitor the dust control program and to order increased watering, as necessary, to prevent transport of dust offsite. Their duties shall include holiday and weekend periods when work may not be in progress. The name and telephone number of such persons shall be provided to the Air Pollution Control District prior to land use clearance.

Plan Requirements: All requirements shall be shown on grading and building plans. **Timing:** This condition shall be adhered to throughout all grading and construction periods.

Monitoring: P&D shall ensure measures are on plans. Permit Compliance, Grading and Building inspectors shall spot check; Grading and Building shall ensure compliance on-site. Permit Compliance and APCD inspectors shall respond to nuisance complaints.

14. In order to minimize NO_x emissions, the following measures shall be implemented for each piece of heavy duty diesel construction equipment:

    a. heavy-duty diesel-powered construction equipment manufactured after 1996 (with federally mandated "clean" diesel engines) should be utilized wherever feasible;

    b. the engine size of construction equipment shall be the minimum practical size;

    c. the amount of construction equipment operating simultaneously shall be minimized through efficient management practices to ensure that the smallest practical number are operating at any one time;

    d. construction equipment shall be maintained in tune per the manufacturer's specifications;

    e. construction equipment operating onsite shall be equipped with two to four degree engine timing retard or precombustion chamber engines;

    f. catalytic converters shall be installed on gasoline-powered equipment, if feasible;

    g. diesel catalytic converters shall be installed, if available;

    h. diesel powered equipment should be replaced be electric equipment whenever feasible; and

    i. construction worker trips should be minimized by requiring carpooling and by providing for lunch onsite.

    Plan Requirements and Timing: The applicant shall record an agreement to comply with conditions prior to commencement of construction and shall demonstrate to the satisfaction of the APCD that the above measures have been complied with for each piece of heavy duty diesel equipment utilized onsite. The measures shall be reviewed prior to approval of a land use permit for grading or structural development and shall be implemented during project construction.

    Monitoring: P&D shall monitor in the field during grading and construction operations.

15. The following energy-conserving techniques should be incorporated in future development unless the applicant demonstrates their feasibility to the satisfaction of P&D staff:

    a. installation of low NOx residential and commercial water heaters and space heaters per specifications in the 1991 Air Quality Attainment Plan;

    b. installation of heat transfer modules in furnaces;
    c. use of light colored water-based paint and roofing materials;

    d. installation of solar panels for residential water heating systems and other facilities and/or the use of water heaters that heat water only on demand;

    e. use of passive solar cooling/heating;

    f. use of natural lighting;

    g. use of concrete or other non-pollutant materials for parking lots instead of asphalt;

    h. installation of energy efficient appliances;

    i. installation of energy efficient lighting;

    j. use of landscaping to shade buildings and parking lots;

k. installation of sidewalks and bikepaths;

l. installation of covered bus stops to encourage use of mass transportation.

Plan Requirements and Timing: The applicant shall incorporate the listed provisions into building and improvement plans or shall submit proof of unfeasibility prior to approval of Land Use Permits.

Monitoring: Building and Safety shall site inspect to ensure development is in accordance with approved plans prior to occupancy clearance. Planning staff shall verify landscape installation in accordance with approved landscape plans.

Biological Resources

16. The applicant shall implement a restoration and revegetation plan along the adjacent riparian corridor and buffer area. The plan shall include, but not be limited, to the following measures:

a. The goal of the revegetation effort shall be to restore and enhance the existing riparian habitat and shall include removal of non-native and/or invasive species as appropriate. Revegetation shall be with native riparian species. Species shall be from locally obtained plants and seed stock (from western Goleta to the greatest extent feasible) and species selection shall be dependent on the nature of the habitat.

b. Any necessary removal (e.g. during fence removal and/or as specified on the approved tract map) of native and/or rare plant species in the creek corridor or buffer area shall be documented by a P&D-qualified biologist. Any such removal shall be minimized. Biologically favorable options for ground disturbances and/or improvements shall be identified. Replacement shall occur at ratios consistent with County policy and shall be specified in the plan (e.g., 10:1 for oaks, 2:1 for Santa Barbara honeysuckle).

c. Provisions shall be made for the propagation of the Santa Barbara honeysuckle using seed and cuttings taken from plants subject to removal.

d. All new plantings shall be irrigated with drip irrigation on a timer and shall be weaned off of irrigation over a period of two to three years.

Plan Requirements: The plan shall be prepared by a P&D-approved biologist (and coordinated with the Tree Protection Plan required below) and reviewed and approved by P&D and Flood Control prior to final map clearance. The plan shall specify plants to be cultivated, sources of plant material, size of container plants, planting methods, weeding methods, irrigation requirements, performance criteria, and a maintenance and monitoring program. Planting shall occur in fall, immediately prior to the season's first rain. The plan shall include a performance security filed with the County for completion of the restoration effort and for maintenance of plantings for five years (or longer as deemed appropriate by a P&D-qualified biologist). **Timing:** Restoration shall commence prior to approval of a land use permit for structural development and shall be completed prior to occupancy clearance.

Monitoring: Permit Compliance shall site inspect for installation according to plan. Maintenance shall be confirmed through site inspections. Permit Compliance signature is required for performance security release.

17. Disturbance to the creek bank/buffer area shall be limited to the following areas shown on the tract map: roadway encroachment into the buffer area near the project entry, drainage improvements in the southwestern corner of the property, installation of the bioswale, and installation of the trail. Other ground disturbances shall be limited to preparation of the surface for installation of the revegetation plan. All other ground disturbances shall be prohibited. **Plan Requirements and Timing:** This requirement shall be noted on the final grading plan, the revegetation plan, and tree protection plan and shall be reviewed and approved by P&D prior to final map clearance.

Monitoring: Permit Compliance shall site inspect for compliance during grading and construction activities.

18. The final plan for the bioswale shall specify construction and planting details that provide for pollutant filtration. **Plan Requirements and Timing:** The final grading plan and buffer area revegetation plan shall include specifications for review and approval by P&D and the Flood Control District prior to final map clearance.

Monitoring: Permit Compliance shall site inspect for compliance during grading and construction activities.

19. Temporary fence protection (marking the extent of allowed disturbance) shall be provided within the creek/buffer area during grading and construction. Fencing material shall be approved by P&D and shall be a minimum of six feet high and shall include staking every six feet. **Plan Requirements and Timing:** Fence protection shall be identified on the final grading plan (and on future building plans as applicable) and shall be reviewed and approved by P&D prior to final map clearance. Fencing shall be in place prior to commencement of grading/construction activities.

Monitoring: Permit Compliance shall site inspect to ensure fencing is installed and maintained throughout grading/construction activities.

20. A plan for fencing on common open space Lot 44, between the trail and the ESHA, shall be provided. Fencing shall allow access to the trail but shall discourage intensive use of the remaining buffer area and creek channel. It shall be a minimum of 3 feet high and shall permit animal movement. **Plan Requirements and Timing:** Fencing shall be identified on the revegetation plan and the final tract landscaping plan. These plans shall be reviewed and approved by P&D prior to final map clearance.

Monitoring: Permit Compliance shall site inspect for installation according to plan.

21. The final tract landscape plan shall be consistent with the preliminary plan with regard to inclusion of primarily native species compatible with the adjacent riparian habitat. The use of invasive species in project landscaping shall be prohibited. **Plan Requirements and Timing:** The final landscape plan shall specify the prohibition against invasives and shall be reviewed and approved by P&D and the BAR prior to final map clearance. This condition shall also be included in project CC&Rs which shall be reviewed and approved by P&D prior to final map clearance. The applicant shall file a performance security with the County for installation and maintenance of plantings for a three year period. Landscaping shall be initiated prior to the first occupancy clearance and completed prior to the last occupancy clearance.

Monitoring: Permit Compliance shall site inspect for installation according to plan.

22. Native specimen plants and seed stock from locally (western Goleta to the greatest extent feasible) obtained sources shall be utilized in project landscaping. **Plan Requirements and Timing:** This requirement shall be included on the project landscaping plan which shall be reviewed and approved by P&D prior to final map clearance.

Monitoring: Permit Compliance shall site inspect to ensure compliance.

24. All exterior lighting within 100 feet of the drainage corridor/buffer area shall be low intensity, shielded, and directed away from the ESH area. **Plan Requirements and Timing:** This requirement shall be noted on the revegetation plan, tract landscaping plan, and future building plans and shall be reviewed and approved by P&D prior to final map clearance/land use permit approval. This condition shall also be included in project CC&Rs which shall be reviewed and approved by P&D prior to final map clearance.

Monitoring: Permit Compliance and building inspectors shall site inspect for installation according to plan.

25. A Tree Protection and Replacement Program prepared by a P&D-approved arborist or biologist shall be implemented. The program shall attempt to increase the number of existing mature trees that are to be retained and shall include, but not be limited to, the following components:

A. Program elements to be graphically depicted on final grading and building plans:

a. The location and extent of driplines for all trees and the type and location of any fencing.

b. Equipment storage and staging areas shall be designated on approved grading and building plans outside of dripline areas.

c. Paving shall be pervious material where access roads or driveways encroach within 6 feet of a native specimen tree's dripline.

d. Drainage plans shall be designed so that oak tree trunk areas are properly drained to avoid ponding. These plans shall be subject to review and approval by P&D or a P&D-qualified biologist/arborist.

e. All utilities shall be placed within or directly adjacent to roadways and driveways or in a designated utility corridor in order to minimize impacts to trees.

B. Program elements to be printed as conditions on final grading and building plans:

a. No grading or development shall occur within the driplines of oak trees which remain in the construction area.

b. All specimen trees within 25 feet of proposed ground disturbances shall be temporarily fenced with chainlink or other material satisfactory to P&D throughout all grading and construction activities. The fencing shall be installed six feet outside the dripline of each specimen tree, and shall be staked every six feet.

c. No construction equipment shall be parked, stored, or operated within six feet of any specimen tree dripline.

d. Any roots encountered that are one inch in diameter or greater shall be cleanly cut. This shall be done under the direction of a P&D-approved arborist/biologist.

e. No permanent irrigation shall occur within the dripline of an existing oak tree.

f. Any trenching or construction activity required within three feet of a native specimen tree's dripline shall be done with hand tools.

g. Only designated trees shall be removed.

h. Any native trees which are removed and/or damaged (more than 25% of root zone disturbed) shall be replaced on a 10:1 basis with a mix of one to five gallon size saplings grown from locally obtained seed.

A drip irrigation system with a timer shall be installed. Trees shall be irrigated and maintained until established (a minimum of three years or longer as deemed appropriate by a P&D-qualified biologist). The plantings shall be protected from predation by wild and domestic animals and from human interference by the use of staked, chain link fencing and gopher fencing during the maintenance period.

i. Any performance securities required for installation and maintenance of replacement trees will be released by P&D after its inspection and approval of such installation.

j. All trees located within 25 feet of proposed buildings shall be protected from stucco or paint during construction.

Plan Requirements: The applicant shall submit the Tree Protection and Replacement Program for review and approval by P&D prior to final map clearance. Timing: Where not otherwise stated, all measures shall be in place throughout grading and construction activities.

Monitoring: Permit Compliance shall conduct site inspections throughout all phases of development to ensure compliance and to evaluate all tree protection and replacement measures.

26. Excavation work within or adjacent to sensitive habitats shall be avoided to the maximum extent feasible. Where excavation must be performed within sensitive areas (as determined by P&D), it shall be performed with hand tools only. If the use of hand tools is deemed infeasible by P&D, excavation work may be authorized by P&D to be completed with rubber-tired construction equipment weighing five tons or less. If significant large rocks are present, or if spoil placement will impact surrounding trees, then a small tracked excavator (i.e., 215 or small track hoe) may be used as determined by P&D staff. **Plan Requirements and Timing:** The above measure shall be noted on all grading and construction plans and reviewed and approved by P&D prior to final map clearance.

Monitoring: Permit Compliance shall site inspect to ensure compliance during grading and construction.

27. Ground disturbances within the drainage corridor/buffer area for installation of the drainage outlet and overland swale shall be prohibited during the rainy season (November 1 to April 15) and outside of the rainy season when raining. **Plan Requirements and Timing:** This requirement shall be noted on all grading and building plans which shall be reviewed and approved by P&D prior to final map clearance.

Monitoring: Permit Compliance shall site inspect to ensure compliance during grading and construction.

28. Erosion control measures shall be implemented to prevent runoff into the buffer area, creek corridor, and creek bottom. Silt fencing, straw bales, or sand bags shall be used in conjunction with other methods to prevent erosion and siltation of the

stream channel. **Plan Requirements:** An erosion control plan shall be submitted for review and approval by P&D (and Grading Division) and Flood Control prior to final map clearance. **Timing:** The plan shall be implemented prior to the commencement of grading/construction.

Monitoring: Permit Compliance and grading inspectors shall perform site inspections throughout the construction phase.

29. Outlet structures shall minimize disturbance to the natural drainage and avoid use of hard bank structures. Where such structures must be utilized as deemed appropriate by P&D and the Flood Control District, natural rock or steel gabions shall be used for bank retaining walls. If concrete must be used, then prefabricated crib wall construction shall be used rather than pouring concrete. Rock grouting shall only be used if no other feasible alternative is available as determined by P&D. **Plan Requirements and Timing:** A detail of the drainage outfall and overland swale shall be submitted for review and approval by P&D prior to final map clearance.
Monitoring: Permit Compliance shall ensure installation according to plan and shall spot-check throughout grading and construction.

30. An energy dissipater over the end of the drain pipe (or similar device such as trash racks or baffles), shall be installed to ensure minimal erosion during storm events and to prevent children from entering the storm drain system. **Plan Requirements and Timing:** The dissipater or other device shall be shown on the final grading plan and shall be reviewed and approved by P&D prior to final map clearance.

Monitoring: Permit Compliance shall site inspect to ensure installation according to plan.

31. The applicant shall restore the area disturbed as part of installation of drainage improvements. Revegetation shall be compatible with the buffer area revegetation plan and shall utilize appropriate native, fast growing, vining plants that will quickly cover the outlet structure and thrive in a rocky environment. **Plan Requirements and Timing:** A revegetation plan shall be prepared by a P&D-qualified biologist and shall be reviewed and approved by P&D prior to final map clearance. The plan shall be implemented prior to issuance of occupancy permits.
Monitoring: Permit Compliance shall site inspect to ensure installation according to plan.

32. A grease/silt trap shall be installed in all drop inlets closest to the creek to prevent oil, silt, and other debris from entering the creek. Such traps/basins shall be maintained and cleaned out every spring and fall to prevent overflow situations and potential mosquito habitats from forming. **Plan Requirements:** A maintenance program shall be submitted to P&D for review and approval prior to final map clearance. **Timing:** the traps/basins shall be installed with tract improvements.

Monitoring: Permit Compliance shall site inspect to verify installation and once each year to monitor maintenance.

33. During construction, washing of concrete, paint, or equipment shall occur only in areas where polluted water and materials can be contained for subsequent removal from the site. Washing shall not be allowed within 100 feet of the riparian corridor. An area designated for washing functions shall be identified. **Plan Requirements and Timing:** A designated wash off area shall be shown on the final grading plan which shall be reviewed and approved by P&D prior to final map clearance. The wash off area shall be in place throughout construction.

Monitoring: Permit Compliance shall site inspect throughout grading and construction.

34. The applicant shall obtain a U.S. Army Corps of Engineers 404 permit or waiver for any grading or fill activity within the adjacent drainage corridor for the portion within ACE jurisdiction. **Plan Requirements and Timing:** A copy of the 404 permit or waiver shall be submitted to P&D prior to final map clearance.

Monitoring: P&D shall ensure compliance prior to final map clearance.

35. No alteration to stream channels or banks shall be permitted until the Department of Fish and Game has been contacted to determine if the drainage falls under its jurisdiction. **Plan Requirements and Timing:** Prior to final map clearance, applicant must receive all necessary permits from CDFG or provide evidence to P&D that no such permits are necessary.

Monitoring: P&D shall ensure compliance prior to final map clearance.

Archaeological and Ethnic Resources

36. In the event archaeological remains are encountered during grading/construction, work shall be stopped immediately or redirected until a P&D qualified archaeologist and Native American representative are retained by the applicant to evaluate the significance of the find through a Phase 2 investigation consistent with the County Archaeological Guidelines. If remains are found to be significant, they shall be subject to a Phase 3 mitigation program consistent with County Archaeological Guidelines and funded by the applicant. **Plan Requirements and Timing:** This requirement shall be placed on all approved grading and building plans. Plans shall be approved prior to land use clearance for grading on each parcel.

Monitoring: P&D shall check plans prior to issuance on the Land Use Permit and spot-check throughout grading and construction.

Noise

37. Future project-related site preparation and construction activities shall be limited to the hours between 7 am and 4 pm, Monday through Friday. No construction shall occur on holidays (e.g., Thanksgiving, Labor Day). Construction equipment maintenance shall be limited to the same hours. Non-noise generating construction activities such as interior painting are not subject to these restrictions. **Plan Requirements and Timing:** Two signs stating these restrictions shall be provided by the applicant and posted onsite prior to approval of a land use permit for any future grading/construction activities. Signs shall be in place throughout grading/construction activities. Violations may result in suspension of permits.

Monitoring: Building Inspectors and Permit Compliance shall spot check and respond to any complaints.

38. Stationary construction equipment that generates noise in excess of 65 dBA at property boundaries shall be shielded to P&D's satisfaction and shall be located as far as possible from nearby sensitive receptors. **Plan Requirements and Timing:** The equipment area and appropriate acoustic shielding shall be designated on building and grading plans prior to approval of a land use permit for future grading/construction. Equipment and shielding shall remain in the designated location throughout construction activities.

Monitoring: Permit Compliance shall site inspect to ensure compliance.

39. Equipment warm-up areas, water tanks, and equipment storage areas shall be placed in a central location on the property. **Plan Requirements and Timing:** These areas shall be designated on grading plans and construction plans and shall be reviewed and approved by P&D prior to approval of a land use permit.

Monitoring: Permit Compliance and grading/building inspectors shall site inspect to ensure compliance.

40. Construction vehicles shall access the site from Cathedral Oaks Road and shall be prohibited from taking access from the adjacent residential streets. **Plan Requirements and Timing:** This requirement shall be included as a note on all grading and building plans and shall be reviewed and approved by P&D prior to approval of a land use permit.

Monitoring: Permit Compliance and grading/building inspectors shall site inspect to ensure compliance.

41. The applicant shall provide all adjacent property owners with a construction activity schedule and construction routes 7 days in advance of construction activities associated with installation of tract improvements. Any alterations or additions shall require two day notification. **Plan Requirements and Timing:** The applicant shall submit a copy of schedule and mailing to Permit Compliance 14 days prior to initiation of any earth movement.

Monitoring: Permit Compliance shall perform periodic site inspections to verify compliance with activity schedules.

42. The applicant shall construct a 6-foot solid block wall along the Cathedral Oaks Road frontage (except on Lot 44 where frontage treatment shall be coordinated with the Public Works roadway project). **Plan Requirements and Timing:** This wall shall be shown on the tract map and on grading/tract improvement plans. It shall be in place prior to issuance of occupancy clearance and shall remain in place for the life of the project.

Monitoring: Permit Compliance staff shall verify installation of the wall prior to issuance of occupancy clearance.

Agricultural Resources

43. Extension of a sewer service to Parcel 1(as may be shown via an extension off tract sewer service infrastructure) shall be limited to the minimum lateral size necessary to serve allowable uses under the existing agricultural zoning. **Plan Requirements and Timing:** Improvement plans for extension of any service to Parcel 1 shall be reviewed and approved by P&D prior to recordation if extension occurs with tract improvements or prior to approval of a land use permit if extension occurs with future development on Parcel 1 (consistent with uses allowed under the agricultural designations).

Monitoring: P&D shall site inspect for installation according to plan.

Solid Waste

48. Demolition and/or excess construction materials shall be separated for reuse/recycling or proper disposal (e.g. concrete and asphalt). During grading and construction, separate bins for recycling of construction materials shall be provided onsite (outside of the ESHA and buffer area). **Plan Requirements:** This requirement shall be printed on the grading and construction plans. Permittee shall provide P&D with receipts for recycled materials or for separate bins. **Timing:** Materials shall be recycled as necessary throughout construction. All materials shall be recycled prior to occupancy clearance.

Monitoring: P&D shall review receipts prior to occupancy clearance.

Recreation

50. The applicant shall construct a trail within the common open space lot to Park Department specifications and shall dedicate it to the County. Maintenance shall be provided by the homeowner's association in perpetuity and shall be described in project CC&Rs. **Plan Requirements:** The easement document and specific alignment shall be reviewed and approved by P&D, County Counsel, and the Park Department prior to final map clearance. Project CC&Rs shall be reviewed by P&D prior to final map clearance. **Timing:** The trail shall be constructed prior to issuance of the first occupancy permit.
Monitoring: P&D shall site inspect to verify construction according to plan.

51. The applicant shall dedicate the Class I bikeway alignment north of the extension of Cathedral Oaks Road to the County in perpetuity consistent with the GTIP and GCP Bikeways Element. **Plan Requirements and Timing:** The alignment shall be coordinated with the Class I segment adjacent to the east. The easement document and specific alignment shall be reviewed and approved by P&D, Public Works, and County Counsel prior to final map clearance.
Monitoring: P&D shallensure dedication according to plan.

Aesthetics/Visual Resources

54. Future development shall be consistent with the final Lotting Plan and floor plan square footages (approximately 2800 - 3400 square feet). At a minimum the following lots along the eastern property boundary and the Cathedral Oaks frontage shall be 1-story: Lots 7- 17, 19, 36, and 43. These lots are restricted to the Plan 1 floorplan and square footage (and 23 foot height limitation). If built as 2-story structures, ~~T~~the following lots along these same frontages shall be restricted to the 2-stories with the floorplans (Plan 3 with structural surfaces along Cathedral Oaks Road minimized) as shown on the Lotting Plan (with 27.5 foot height limitation): Lots 18 and 35. Remaining future development shall be substantially consistent with the floorplan distribution and square footages (Plan 1, Plan 2, and Plan 3) shown on the final Lotting Plan. **Plan Requirements and Timing:** The final Lotting Plan and floor plans shall be reviewed and approved by P&D and BAR prior to final map clearance and the single story limitations shall be recorded as an informational sheet along with the final map Applicant shall restudy architectural styles for neighborhood compatibility.

Monitoring: P&D shall ensure conformance prior to approval of future land use permits for structural development.

56 The proposed wall along Cathedral Oaks Road and other walls that are six feet in height or greater shall be in tones compatible with surrounding terrain (vegetation, soils, and other natural features) using textured materials or construction methods which create a textured effect. Native vegetation shall be planted to screen walls. **Plan Requirements and Timing:** Walls subject to this condition shall be included on final plans and shall be reviewed and approved by P&D and BAR prior to final map clearance.

Monitoring: P&D shall site inspect prior to occupancy clearance.

57. The final tract landscape plan shall be consistent with the preliminary plan with regard to density and type of landscaping. The final plan shall include at least one 24" box tree per lot for all lots along Cathedral Oaks Road. **Plan Requirements and Timing:** The final landscape plan shall be reviewed and approved by P&D and BAR prior to final map clearance. The applicant shall file a performance security with the County for installation and maintenance of plantings for a three year period (or longer if deemed necessary by P&D). Landscaping shall be installed prior to occupancy clearance.

Monitoring: P&D shall site inspect for installation according to plan.

58. Any exterior lighting installed on the project site shall be of low intensity, low glare design, and shall be hooded to direct light downward onto the subject parcel and prevent spill-over onto adjacent parcels. **Plan Requirements and Timing:** The applicant shall include a Lighting Plan as a component of the final landscape plan incorporating these requirements. The locations of all exterior lighting fixtures and an arrow showing the direction of light being cast by each fixture and the height of fixtures shall be depicted on the Lighting Plan/final landscape plan which shall be reviewed and approved by P&D and BAR prior to final map clearance. Lighting requirements shall also be included in project CC&Rs which shall be reviewed and approved by P&D prior to final map clearance.
Monitoring: P&D shall site inspect for installation according to plan.

PROJECT SPECIFIC CONDITIONS

61. Compliance with Department letters:

a. Air Pollution Control District dated February 11, 1998
b. Fire Department dated June 19, 1998
c. P&D Grading dated September 2, 1998
d. Park Department dated October 26, 1998
e. Environmental Health Services dated September 11, 1998
f. Public Works Department dated September 21, 1998
g. Flood Control District dated September 21, 1998

STANDARD CONDITIONS FOR A MAP

65. If the proposed map is revised from the approved map, or if changes to conditions are sought, approval shall be in the same manner as for the originally approved project.

71. Prior to recordation, any obstruction within a utility easement which would interfere with the intended use of the easement, shall be removed by the subdivider at subdivider's expense.

COUNTY RULES AND REGULATIONS/LEGAL REQUIREMENTS

75. Within 30 days of approval of this tract map by the Board, the applicant must place into escrow an executed grant of easement as described in the Roadway Agreement executed by the Board of Supervisors, with escrow instructions as set out in the Roadway Agreement. If the applicant fails to place an executed grant of easement into an escrow account by the agreed upon date, or otherwise breaches the Roadway Agreement in a way which requires the County to bring a lawsuit to enforce the terms of the Agreement, the map shall not record pending resolution of the lawsuit.

76. Within 30 days of approval of this map by the Board, the applicant shall record the Fee Agreement as contemplated therein.

77. Before using any land or structure, or commencing any work pertaining to the erection, moving, alteration, enlarging or rebuilding of any building, structure, or improvement the applicant shall obtain a land use permit and building permit from Planning and Development consistent with the approved tract map. These permits are required by ordinance and are necessary to ensure implementation of the conditions required by the Board of Supervisors. Before any permit will be issued by Planning and Development, the applicant must obtain written clearance from all departments having conditions; such clearance shall indicate that the applicant has satisfied all pre-construction conditions. A form for such clearance is available in Planning and Development.

78. Two performance securities shall be provided by the applicant prior to recordation (for tract landscaping) and prior to approval of a land use permit (for residential construction), one equal to the value of installation of all items listed in section (a) below (labor and materials) and one equal to the value of maintenance and/or replacement of the items listed in section (a) for 5 years of maintenance of the items. The amounts shall be agreed to by P&D. Changes to approved landscape plans may require a substantial conformity determination or an approved change to the plan. The installation security shall be

released upon satisfactory installation of all items in section (a). If plants and irrigation (and/or any items listed in section (a) below) have been established and maintained, P&D may release the maintenance security 5 years after installation. If such maintenance has not occurred, the plants or improvements shall be replaced and the security held for another year. If the applicant fails to either install or maintain according to the approved plan, P&D may collect security and compete work on property. The installation security shall guarantee compliance with the provision below:

a) Installation of: project landscaping in accordance with the landscape plan.

79. Landscaping shall be maintained for the life of the project.

80. Prior to final map clearance, the applicant shall obtain final Board of Architectural approval for the project.

81. The applicant shall ensure that the project complies with all approved plans and all project conditions including those which must be monitored after the project is built and occupied. To accomplish this the applicant agrees to:

a) Contact P&D compliance staff as soon as possible after project approval to provide the name and phone number of the future contact person for the project and give estimated dates for future project activities.

b) Contact P&D compliance staff at least two weeks prior to commencement of construction activities to schedule an onsite pre-construction meeting with the owner, compliance staff, other agency personnel, and with key construction personnel.

c) Pay fees prior to approval of land use permits as authorized under ordinance and fee schedules to cover full costs of monitoring as described above, including costs for P&D to hire and manage outside consultants when deemed necessary by P&D staff (e.g., non-compliance situations, special monitoring needed for sensitive areas including but not limited to biologists, archaeologists, etc) to assess damage and/or ensure compliance. In such cases, the applicant shall comply with P&D recommendations to bring the project into compliance. The decision of the P&D Director shall be final in the event of a dispute.

84. Developer shall defend, indemnify and hold harmless the County or its agents, officers and employees from any claim, action or proceeding against the County or its agents, officers or employees, to attack, set aside, void, or annul, in whole or in part, the County's approval of the Vesting Tentative Tract Map. In the event that the County fails promptly to notify the applicant of any such claim, action or proceeding, or that the County fails to cooperate fully in the defense of said claim, this condition shall thereafter be of no further force or effect.

85. In the event that any condition imposing a fee, exaction, dedication or other mitigation measure is challenged by the project sponsors in an action filed in a court of law or threatened to be filed therein which action is brought within the time period provided for by law, this approval shall be suspended pending dismissal of such action, the expiration of the limitation period applicable to such action, or final resolution of such action. If any condition is invalidated by a court of law, the entire project shall be reviewed by the County and substitute conditions may be imposed.

Address: P.O.BOX 98 SANTA BARBARA CA. 93101

WORKER'S COMPENSATION

I hereby affirm and declare under penalty of perjury that I will maintain a Certificate of Consent to self insure for Worker's Compensation or a Certificate of Worker's Compensation Insurance on file with the Santa Barbara County Building and Safety Division (Sec 3700 of the California Labor Code) I have, and will maintain worker's compensation insurance as required by the Labor Code, for the performance of the work for which this permit is issued

Insurer _____

Policy # _____ Exp Date _____

I further affirm and declare that I shall not employ any person in any manner so as to violate the Worker's Compensation Laws of the State of California.

OWNER BUILDER/CONTRACTOR DECLARATION

☐ I Affirm and declare that I am a licensed contractor under the provisions of Chapter 9 of the California State Contractor's Law and my license is in full force and effect

☐ I affirm and declare that I am exempt from the Cal State Contractor's Law for the following reasons

☐ I, as owner of the property, or my employees with the wages as their sole compensation, will perform the work and the structure is not intended or offered for sale within one year from date of issuance of this permit (Business and Professions Code, Sec 7044)

☐ I, as owner of the property, am exclusively contracting with licensed contractors for the performance of the work (Business and Professions Code, Sec 7044)

☐ The value of labor and material to perform this work is less than $200 00 (Business and Professions Code, Sec 7048)

HAZARDOUS MATERIALS DECLARATION

☐ I affirm and declare that I am familiar with the Hazardous Materials Information Guide and understand my obligations under Sections 25505,25533, and 25534 of the California Health and Safety Code

LENDER'S INFORMATION DECLARATION

☐ I affirm and declare that there is a construction lending agency providing funding for the construction of this project and for the performance of the work for which this permit is issued (California Civil Code, Sec 3097)

Signature of Permittee _____ Date _____

This permit becomes null and void if work or construction is not commenced within one year from the date of issuance of this permit or if work does not receive and pass a principal inspection every six month period after work is commenced.

RE: 25-125 PRR 2025-07-08 7400 Cathedral Oaks Building Permits

Dear Caliana Gomez,

I am writing in response to your request for documents under the California Public Records Act (Govt. Code § 7920.000 et seq.) submitted to the City Clerk's office on July 8, 2025, wherein you requested copies of any building permits issued for the subject property located at 7400 Cathedral Oaks Rd in Goleta, CA.

Records responsive to your request can be accessed at the following link: https://cityofgoleta.egnyte.com/fl/rvg6H8X8r6xG.

Please feel free to contact Deborah Lopez, City Clerk at dlopez@cityofgoleta.org or via phone at (805) 961-7505 if you have any questions.

Sincerely,

Deborah S. Lopez
City Clerk

Appendix F
Site Reconnaissance Photographs

Photograph 1. Main entrance to the subject property located at 7400 Cathedral Oaks Road, Goleta, California 93117.

Photograph 2. Additional access to the subject property, located east of main access via Cathedral Oaks Road.

Photograph 3. Adjoining property to the south, across Cathedral Oaks Road.

Photograph 4. Adjoining property (east, north, and west), private golf course; entrance to the east.

Photograph 5. Structure 1 – Southernmost structure on the subject property. Owner indicated this is used as a masonry shop.

Photograph 6. Truck next to Structure 1 – Southernmost structure on the subject property. "Stonescapes" is written on truck decal.

Photograph 7. Recreational vehicle (RV) and small shed east of Structure 1.

Photograph 8. Recreational vehicle and sewer cleanout east of Structure 1.

Photograph 9. De minimis staining observed north of Structure 1.

Photograph 10. Structure 2 – Northernmost structure on the subject property, single family home.

Photograph 11. Chicken coop observed outside of Structure 2.

Photograph 12. Structure 3 – north of Structure 1.

Photograph 13. Concrete mixing trailers stored in the southwest portion of the subject property.

Photograph 14. Stone and masonry supplies stored in the southwest portion of the subject property.

Photograph 15. Stone and masonry supplies stored in the southeast portion of the subject property.

Photograph 16. 5-gallon paint containers observed in the southeastern portion of the subject property.

Photograph 17. Wood splitter on southeast portion of subject property. Appears to be diesel fueled.

Photograph 18. De minimis staining observed under wood splitter.

Photograph 19. 5-gallon buckets with unknown contents.

Photograph 20. Example of erosion observed throughout property.

Photograph 21. Example of plastic tubing observed throughout the subject property.

Photograph 22. Sewer cleanouts north of Structure 1.

Photograph 23. High voltage transformer observed on the southeastern portion of the subject property,

Photograph 24. Shallow irrigation lines surrounding the southern and eastern subject property border.

Photograph 25. Municipal sewer access on Cathedral Oaks Road.

Photograph 26. Gas can and masonry supplies observed on southeastern portion of the subject property.

Photograph 27. Corroded materials and equipment observed in the laydown area.

Photograph 28. Unknown tank, potentially sewage holding tank, observed on the southern portion of the subject property.

Photograph 29. Hydraulic equipment outside Structure 1.

Photograph 30. Hydraulic equipment outside Structure 1.

Photograph 31. Motor oil containers and propane tanks observed next to small shed, outside Structure 1.

Photograph 32. Miscellaneous containers observed next in the laydown area.

Photograph 33. Buried natural gas pipeline, operated by Southern California Gas Company, on southern boundary of the subject property.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by DUDEK were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Order Number:
79-414386-47

Project Number:
18797.01

Our Environmental Lien and AUL report to 1980 provides a summary of recorded information on a specific property from January 1st, 1980 to present time. The report is intended to assist in the search for environmental liens filed in land title records. The report will verify property ownership, links the recorded transactions which pass title from one person (and/or entity) to another, and provide information on recorded environmental liens and/or Activity and Use Limitations that have been recorded from January 1st, 1980 forward. The scope of this search is compliant with ASTM 1527-21 standards.

Our professional network of trained researchers follow established industry protocols and use client-supplied property information to complete this Environmental Lien and AUL report. The research is conducted at all appropriate government offices based on the location of the subject property. This would include City, County, State, Federal and Tribal offices as needed. The report includes:

- Current deed information (i.e. grantor, grantee, recording dates)
- Historical property transfer information from 1980 forward (i.e. grantor, grantee, recording dates)
- Legal Description
- Environmental Lien information
- Activity and Use Limitation information
- Any Environmental Liens and/or documents referencing AULs that are listed within our summary report

DISCLAIMER

This report was prepared for the intended use of AFX Research, LLC (AFX) and client, exclusively. This report is not a guarantee of title, nor a commitment to insure, nor a policy of title insurance. MAIL TAX STATEMENT AS SHOWN ABOVE

EXHIBIT A

That portion of the Rancho Los Dos Pueblos, in the County of Santa Barbara, State of California, described in a deed to the Nerepis Company recorded May 7, 1980 as Instrument No. 80-18567 of Official Records, in the Office of the County Recorder of said County, said land is shown on a Record of Survey recorded December 10, 1998 in Book 149, Page 77 of Record of Surveys.

Excepting therefrom that portion of said land which lies southerly of a line parallel and concentric with and distant fifty-two (52.00) feet southerly of the following described line:

Beginning at the intersection of the centerline of Cathedral Oaks Road one hundred and four (104) feet wide with the centerline of Northgate Drive as shown on Parcel Map No. 14,257 recorded July 24, 1996 in Book 51, Pages 79 through 88, inclusive, of Parcel Maps;

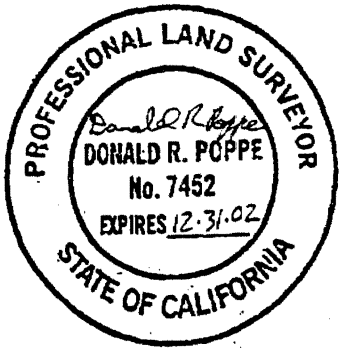

Thence North 89°24'16" East, a distance of 71.97 feet, to the beginning of a tangent curve, concave northerly and having a radius of 3000.00 feet;

Thence easterly along said curve through a central angle of 2°15'34", an arc distance of 118.31 feet;

Thence North 87°08'42" East, a distance of 376.95 feet to the beginning of a tangent curve, concave southerly and having a radius of 3000.00 feet;

Thence easterly along said curve through a central angle of 2°03'26", an arc distance of 233.10 feet;

Thence North 89°12'08" East, a distance of 233.10 feet to the easterly line of the land described in said deed to the Nerepis Company.

Exclusive Recovered Govt. Archives	0.001	0	0	-

*The Default Area of Concern may be adjusted by the environmental professional using experience and professional judgement. Each category may include several databases, and each database may have a different distance. A list of individual databases is provided at the back of this report.

EXECUTIVE SUMMARY

TARGET PROPERTY INFORMATION

ADDRESS

CATHEDRAL OAKS
7400 CATHEDRAL OAKS ROAD
GOLETA, CA 93117

COORDINATES

Latitude (North):	34.443075 - 34° 26′ 35.06378″
Longitude (West):	119.886265 - 119° 53′ 10.567017″
Elevation:	170 ft. above sea level

EXECUTIVE SUMMARY

SEARCH RESULTS

Unmappable (orphan) sites are not considered in the foregoing analysis.

Case Narrative

Dudek 687 South Coast Highway 101 Encinitas, CA 92024 Susie Smith	Lab Job Number: 542357 Location: 7400 Cathedral Oaks Rd Soil Sampling, 18797-03 Date Received: 09/17/25

This data package contains sample and QC results for seven soil samples and seven four-point soil composites, requested for the above referenced project on 09/17/25. The samples were received in good condition.

Pesticides (EPA 8081A):
No analytical problems were encountered.

Metals (EPA 6010B):
No analytical problems were encountered.

SAMPLE RECEIPT CHECKLIST

Section 1: General Info

Date Received: 9/17/25 WO# 542357 Client: DUDEK

Section 2: Shipping / Custody **Are custody seals present?** ☐ Yes ☒ No

Custody seals intact on arrival? ■ N/A ☐ Yes ☐ No ☐ On cooler / box ☐ On samples

■ Courier ☐ Walk-In ☐ Field Sampling ☐ Shipping Info: _____

Section 3a: Condition / Packaging ☐ **Outside 0.0 - 6.0°C (0.0 - 10.0°C for microbiology) (PM notified)**

Date Opened 9/17/25 By (initials) LX13 Type of ice used: ■ Wet ☐ Blue/Gel ☐ None

☐ Samples received on ice directly from the field; cooling process had begun. (if checked, skip temperatures)

☐ Sample matrix doesn't require cooling (e.g. air, bulk PCB). (if checked, skip temperatures)

If no cooler: Observed/Adjusted Temp (°C): _____ / _____ Thermometer/IR Gun: IR 13 CF: 0.0

Cooler Temp (°C) #1: 3.1 / 3.1 #2: ____/____ #3: ____/____ #4: ____/____ #5: ____/____ #6: ____/____

Section 3b: Microbiology Samples ■ **No microbiology samples submitted (skip 3b)**

☐ Within temp range 0.0 - 10.0°C or received on ice directly from field.

☐ Adequate headspace for microbiology analysis.

Section 3c: Air Samples ■ **No air samples submitted (skip 3c)**

☐ 1.4L Canisters ☐ 6L Canisters ☐ Tedlar Bags ☐ MCE Cassettes ☐ Sorbent Tubes ☐ Other_____

Section 4: Containers / Labels / Samples	YES	NO	N/A
1) Were custody papers present, filled properly, and legible?	X		
2) Is the sampler's name present on the CoC?	X		
3) Were containers received in good condition (unbroken / unopened / uncompromised)?	X		
4) Were the samples bagged? (required for microbiology samples; recommended for soil samples)	X		
5) Were all of, and only, the correct samples received?	X		
6) Are sample labels present, legible, and in agreement with the CoC?	X		
7) Does the container count match the CoC?	X		
8) Was sufficient sample volume / mass received for the analyses requested?	X		
9) Were samples received in proper containers for the analyses requested?	X		
10) Were samples received with > 1/2 holding time remaining?	X		
11) Are samples properly preserved as indicated by CoC / labels?	X		
12) Unpreserved VOAs received - If necessary, was the hold time changed in LIMS?			X
13) Are VOA vials free from headspace/bubbles > 6mm?			X

Section 5: Explanations / Comments

(If no comments are made, then no discrepancies noted.)

☐ **No additional discrepancies**

Date Logged 9/17/25 **By (print)** NCM **(sign)** _____
