## NOTICE OF DETERMINATION

---

**Subject:** Filing of Notice of Determination pursuant to Section 21108 of the Public Resources Code

**State Clearinghouse Number:** 2018102007

**Project Title:** Blue Rock Springs Creek Bridge, (Lake or Streambed Alteration Agreement No. EPIMS-SOL-51282-R3)

**Project Location (Solano):** The Project is located at Blue Rock Springs Creek, in the County of Solano, State of California; Latitude 38.127021°, Longitude -122.227314°.

**Project Description:** The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement EPIMS Notification No. EPIMS-SOL-51282-R3, pursuant to Section 1602 of the Fish and Game Code to Vallejo-Fairview Developers, LLC.

The Project is limited to the construction of an approximately 59-foot clear span, pre-fabricated concrete vehicular bridge and associated concrete abutments outside the top of bank on both sides of the creek. This activity will widen Admiral Callaghan Lane with safe pedestrian crossing and accommodate a right turn into a new commercial development. The bridge superstructure, steel beams, and concrete deck will be

founded on cast-in-place square abutments supported by deeper 30-inch diameter cast-in-drilled hole (CIDH) concrete piles. Construction requires drilling these 30-inch diameter CIDHs and placing structural concrete and reinforcement in the drilled hole, all with equipment located outside of the creek bank. Five (5) piles will be drilled on the south side of the bridge (Abutment 1) and six (6) piles will be drilled on the north side (Abutment 2). Retaining walls will be installed where the abutments meet the existing roadway (Admiral Callaghan Lane) and wingwalls with geocomposite drain material will be installed adjacent to the abutments. The Project also includes installation of a trash rack that will be suspended from the new bridge. The trash rack is designed to prevent the passage of debris into the existing culverts.

The Project will result in temporary impacts to 0.034 acres (1,480 square feet), and permanent impacts to 0.050 acres (2,180 square feet) and 40 linear feet, including from shading of the creek, of Blue Rock Springs Creek. One arroyo willow (*Salix lasiolepis*) with stems from 0.5 to 0.75 inch will be permanently shaded from the bridge.

Previously, LSA notification No. 1600-2018-0106-R3 was submitted for the project, however it was withdrawn due to property ownership issues.

This is to advise that CDFW, acting as a Responsible Agency, approved the project described above on February 10, 2026, and has made the following determinations regarding the project pursuant to Section 15096, subdivision (i) of the California Code of Regulations:

1. The project **will not** have a significant effect on the environment. This determination is limited to effects within CDFW's permitting jurisdiction as a Responsible Agency.
2. CDFW considered the environmental impact report prepared by the Lead Agency for this project pursuant to California Code of Regulations section 15096, subdivision (f).
3. Mitigation measures **were** made a condition of CDFW's approval of the project.
4. A Mitigation Reporting or Monitoring Plan **was** adopted by CDFW for this project.
5. A Statement of Overriding Considerations **was not** adopted by CDFW for this project.
6. Findings **were** made by CDFW pursuant to California Code of Regulations section 15091.

The Final EIR prepared for the project is available to the general public at the office
