

**NOTICE OF AVAILABILITY OF THE
DRAFT SUPPLEMENTAL ENVIRONMENTAL IMPACT REPORT
FOR THE LONG TERM WATER TRANSFER PROJECT
WOODLAND-DAVIS CLEAN WATER AGENCY**

Notice is hereby given that a Draft Supplemental Environmental Impact Report (Draft SEIR) prepared by the Woodland-Davis Clean Water Agency (WDCWA) is available for public review.

Title: Woodland-Davis Clean Water Agency Long-Term Water Transfer Project

Project Location: WDCWA serves the city of Woodland, the city of Davis, and University of California, Davis (UC Davis). WDCWA's service area is located within the boundaries of Yolo County in Northern California, approximately 64 miles northeast of San Francisco and 15 miles west of the city of Sacramento.

Project Description: WDCWA proposes the Long-Term Water Transfer Project to secure additional water supplies from the Sacramento River through long-term transfers from the South Sutter Water District, Te Velde Farms, The Nature Conservancy, and/or a Sacramento River Settlement Contractor (collectively referred to as Sellers). The transferred water would help meet WDCWA's water demands during dry-year conditions, Term 91 curtailments, Shasta Critical Year conditions, and potential Drought Preparedness Plan scenarios involving a 50 percent reduction in available supplies.

Transferred water would be made available through a Seller's existing water rights or through an SRSC's existing entitlement with the U.S. Bureau of Reclamation. Under the LTWT, transferred surface water would be diverted at WDCWA's existing Sacramento River intake/diversion facility, known as the Joint Intake Facility, and conveyed through the existing raw water pipeline to the Regional Water Treatment Facility. Following treatment, the water would be distributed to the cities of Woodland and Davis and UC Davis to support municipal and irrigation demands, including residential, multifamily residential, commercial, industrial, and institutional uses.

Review: The Draft SEIR will be circulated for a 45-day public notice period beginning Monday, August 10, 2026, and ending Monday, September 28, 2026.

Written comments on the Draft SEIR are due no later than 5 p.m. on Monday, September 28, 2026. Please submit your written comments via mail or email to:
