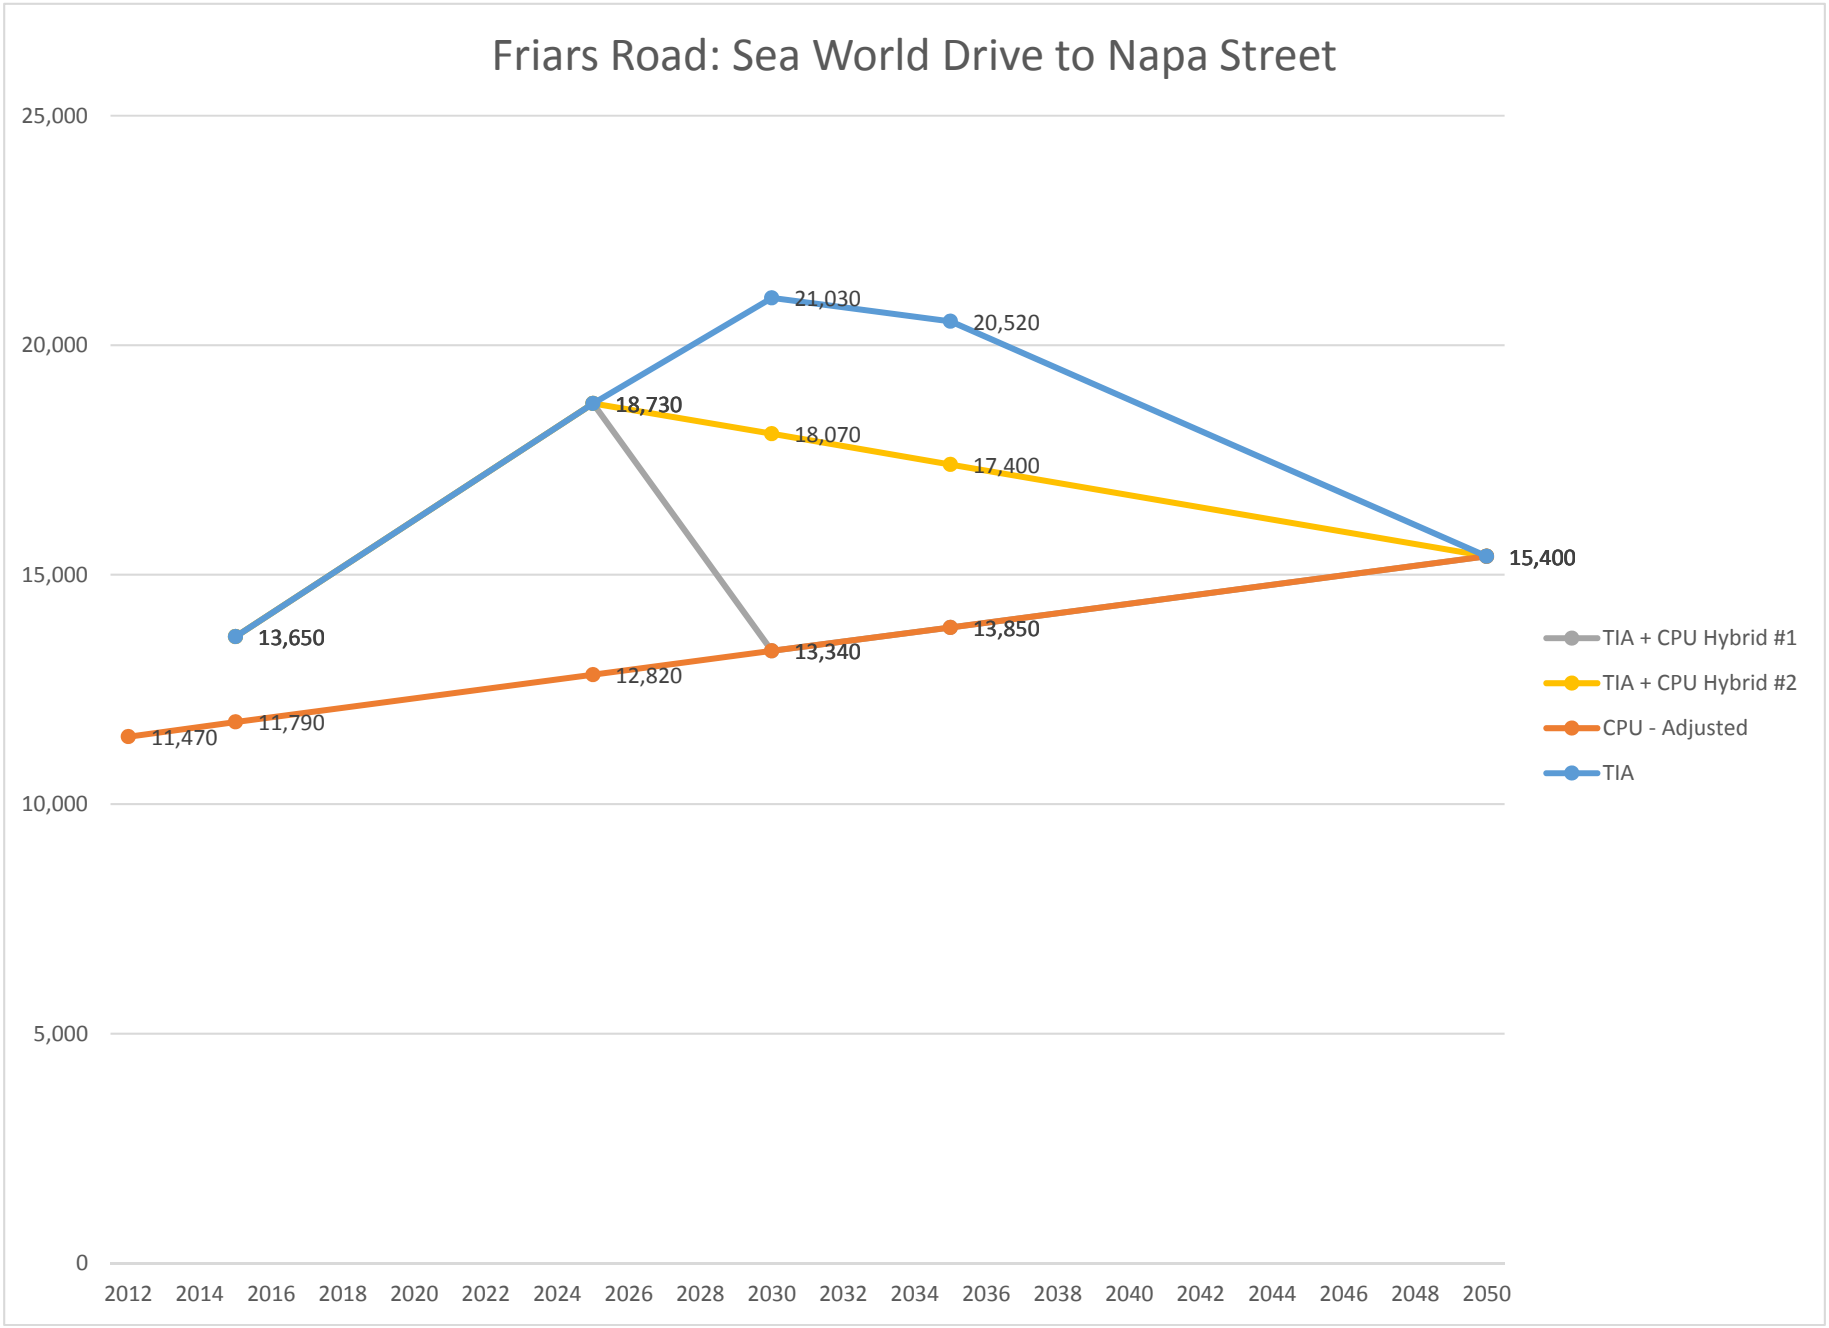
APPENDIX V

FORECAST VOLUME DEVELOPMENT

The forecast volumes for the project were developed using the following metholdogy:

Model Adjustment Steps:



1. The MVCPU model was under review by SANDAG and was not available for public use and could not be reviewed in detail or used for this TIA. Therefore, based on consultation with City staff, the volumes were developed using the below steps.
2. Sources for volume development includes Series 13 Traffic Forecast Information Center (TFIC), Series 12 Model and other published technical studies such as Mission Community Plan Update TIA, Morena Station Planning Study among others. These sources represents the best and most recent information available to-date.
3. Series 13 model growth calculated using TFIC between Year 2020 and Year 2035 on segments where roadway network aligns with project site plan. Growth rate applied to Near-Term + Project volumes to develop Series 13 Year 2035 + P volumes.
4. Other sources such as Series 12 model and published technical studies were used to develop Year 2035 traffic volumes were used and adjustments were made to reflect project site plan and roadway network.
5. Three (3) trendline projections were developed:
   a. *CPU Trendline* : Develop a MVCPU adjusted trendline between Existing (Year 2012) and Year 2050 Preferred Roadway Network volumes
   b. *TIA + CPU Trendline* : Develop a trendline between Existing (Year 2015), Near-Term (Opening Day) + Project from the TIA with Year 2050 Preferred Roadway Network volumes.
   c. *Near-Term + CPU Trendlin* e: Develop a trendline between Near-Term (Opening Day) + Project from the TIA with Year 2050 Preferred Roadway Network volumes.
6. The Year 2035 + Project volumes were plotted against the three (3) trendlines projections to ensure the TIA volumes are higher than these projections to be conservative.
7. The appropriate Year 2035 volume per the trendline and per consultation with City staff were selected based on comparison with the Year 2050 MVCPU volume.
8. Year 2030 volumes were interpolated between Year 2025 and Year 2035 volumes
